WASHINGTON (FEB. 6) BUSINESS WIRE - US Sprint Tuesday introduced its new, comprehensive billing system, IPS (Invoice Processing System).

IPS is a powerful management tool that delivers traffic details never before available to telecommunications managers.

''US Sprint has taken the lead as the only interexchange carrier to create a totally new, innovative, user-friendly billing system,'' said Richard

Smith, president of national markets.

''Our customers drove this development, just as they do our other services and products. They told us that today's increasingly complex business requirements and telecommunications functions are not adequately supported by any major carrier's billing system.

''They told us what they wanted and why they had to have it. We listened and we went to work to give them the most innovative telecommunications invoice system in the industry.''

IPS is a flexible system that provides consolidated invoices, logically organized into groupings, representing a customer's organization. It allows service usage to be analyzed by location and by product. The invoice detail is backed by a comprehensive family of management reports that provide powerful information to assist US Sprint customers in managing their telecommunications services.

Customers will receive one invoice with enchanced call detail information. The data can be used in a variety of ways by individuals and companies to analyze call activity and charges by geographic regions, operating departments and other criteria. Business customers can choose among sophisticated reporting options designed to meet their specific information needs.

After extensive testing of IPS, US Sprint employees were converted to the new systems last November. Presently, more than 400,000 residential customers are on the system. The conversion of all residential and most business customers will be completed by the end of this year.

US Sprint, which offers the only nationwide all-digital fiber-optic network, is a unit of United Telecommunications Inc., a diversified international telecommunications company based in Kansas City, Mo.

SANTA CLARA, CA (FEB. 6) BUSINESS WIRE - Richard Wirt, director of Software Technology, Microcomputer Component Group, and Peter D. MacWilliams, director of Advanced Platform Architecture, Systems Group, have been named Intel Fellows, the company's highest ranking technical position.

Dr. Wirt was named in recognition of his far-reaching contributions to

Intel's and the industry's UNIX operating system developments and other software technologies. MacWilliams was named for his pioneering contributions to a wide variety of board and component bus architectures.

They are the fifth and sixth Fellows to be named in the company's 22-year history. Intel Fellows are given complete freedom to explore new directions in technology and to choose the research projects they will conduct.

Intel's newest Fellows join three other Fellows: Leo Yau, whose work on short-channel MOS transistors is required reading in solid-state theory textbooks; Gene Meieran, who was worked widely in statistical process control, quality and reliability of semiconductor materials, as well as artificial intelligence; and Justin Rattner, a pioneer in parallel and multiprocessor computer systems products.

Marcian ''Ted'' Hoff, the inventor of the microprocessor, was Intel's first Fellow.

Intel Corp. manufactures microcomputer components, modules and systems.

DENVER (FEB. 6) BUSINESS WIRE - Kimco Energy Corp. (NASDAQ:KIMC) announced that its merger partner Broken Arrow Petroleum Co., Scottsdale, Ariz. (OTC) has completed arrangements for an initial $900,000 drilling committment as part of its proposed Arkoma Basin 1990 natural gas development program.

Drilling activity is expected to commence later this month on the first of two prospects.

Gary M. Cook, president of Kimco stated,''We are very excited that Broken Arrow has scheduled the initial segment of its 1990 devlopment program in the Arkoma Basin.'' Cook noted that ''Broken Arrow's drilling program complements the merged companies' strategy of combining Broken Arrow's ability to provide a growing stream of lower-risk gas development projects with Kimco's ability to find, acquire, and manage reserves.''

Kimco and Broken Arrow announced in January a definitive agreement to combine the two companies with the goal of becoming a leading low-cost developer of natural gas reserves.

REDONDO BEACH, CA. (FEB. 6) BUSINESS WIRE - TRW received its third recognition in four months for achievements in supporting small and minority owned businesses when the company was named the ''Outstanding Corporation of the Year'' by the Latin Business Association (LBA) on Friday.

LBA selected TRW for providing a wide range of subsontracting and other opportunities for businesses owned by Hispanics and other minorities.

Edsel D. Dunford, executive vice president and general manager of TRW's Space & Defense Sector, with headquarters in Redondo Beach, said the firm awarded $180 million in contracts to small and disadvantaged businesses in 1989.

''We were selected for the LBA award because of our long and measureable efforts to open our contracting to companies out of the regular business mainstream,'' said Leo Trujillo, a TRW purchasing official in the company's Systems Development Division. Trujillo accepted the award for TRW at an LBA awards dinner at the Century Plaza Hotel on Feb. 2.

The company was also recently honored for awarding the largest aerospace contract ever to a small disadvantaged business, a $1.5 million award to minority owned Input Output Computer Services Inc. TRW Space & Technology Group's vice president and general manager, Daniel S. Goldin, signed the contract at a ceremony in the office of Sen. Ted Kennedy in Washington on Jan. 31.

In October, TRW's Space & Technology Group was honored by the National

Association of Small and Disadvantaged Businesses for its commitment to helping minority firms develop high technology skills applicable to the aerospace industry. At this presentation of awards, both Space & Technology Group vice president and general manager Goldin and Ray M. Price, small disadvantaged business advocate for the group, were cited by Sen. Rudy Boschwitz of Minnesota for individual and organizational accomplishments in minority business.

''We're honored by these notices of our commitment to involving small and disadvantaged businesses in our business,'' said Dunford, ''and we look forward to expanding our programs in the coming years.''

VANCOUVER, WA (FEB. 6) BUSINESS WIRE - Pacific Telecom Inc. (NASDAQ: PTCM) reported record revenues and net income for the 12 months ended Dec. 31, 1989, and increased revenues and net income for the fourth quarter.

Net income for the year ended Dec. 31, 1989, was $73.5 million, the highest in the company's history. Net income per common share was $1.91, an increase of 26 percent over 1988. The company achieved a $20 million improvement in operating income in 1989 primarily as a result of increased long distance message volumes, consolidation benefits in the company's international operations, favorable out-of-period revenue adjustments and the effect of a 1988 charge related to a litigation settlement. Net income also improved as a result of reduced losses related to the diversified investments sold in early 1989.

Net income for the fourth quarter of 1989 was $20.3 million or 52 cents per common share, an increase of 36 percent over net income in the comparable quarter last year. The net income improvement resulted primarily from decreases in losses related to diversified investments which were sold in early 1989.

Results of operations for 1989 reflect the acquisition of TRT Communications Inc. in December 1988.

By action of the board of directors on Jan. 31, 1990, a dividend of 26 cents per common share was declared. The dividend will be payable March 5, 1990, to shareholders of record as of Feb. 16, 1990.

TORONTO (FEB. 6) BUSINESS WIRE - Jascan Resources Inc. (ASE:JSC) Tuesday announced that Jascan Resources U.S.A. Inc., a wholly owned subsidiary of Jascan, has entered into a letter of intent (the ''Letter Agreement'') with Uranerz U.S.A. Inc. (''UUS'') in relation to the Dawson property in Colorado.

Uranerz U.S.A. Inc. is based in Denver, and is a wholly owned subsidiary of Uranerzbergbau-GmbH (URANERZ) located in Bonn, Federal Republic of Germany (FRG). URANERZ is owned equally by C. Deilman AG and Rheinische Braunkohlewerke AG, also of the FRG.

C. Deilmann AG is controlled by Preussag AG which business activities include mining, and Rheinische Braun-kohlewerke AG is controlled by Rheinisch-Westfalisches Elektrizitatswerk AG, the largest power generating utility in the FRG.

Under the Letter Agreement, UUS has been granted a series of options which if exercised, entitle UUS to acquire up to a 75 percent interest in Jascan U.S.A.'s interest in the portion of the Dawson Property designated as the Dawson and Windy Gulch Resource Blocks and up to a 50 percent interest in Jascan U.S.A.'s interest in the remainder of the Dawson Property.

In order to acquire those interest, UUS is obligated to make a total of U.S. $325,000 (approximately Cdn. $385,000), in option payments to Jascan U.S.A. and to make a total of U.S.$4,250,000 (approximately Cdn. $5,050,000), in exploration and development expenditures on the Dawson Property. UUS is entitled to earn those interests on or before Dec. 31, 1992. Such period may be extended if the price of gold falls below a specified level.

The Dawson Property which encompasses direct and leasehold interests in various patented claims and titles to unpatented mining claims, covers an area of approximately 6,000 acres and is located 3-4 miles west of Canon City in south-central Colorado.

Diamond drilling to date totalling 69,500 feet in 106 holes supports a reserve calculation of 465,000 tons grading 0.24 oz Au/ton (8.23 g Au/t). These reserves which occur in the Windy Gulch and Dawson Resource Blocks as to 60,000 tons grading 0.20 oz Au/ton in the former and 405,000 tons grading 0.25 oz Au/ton in the latter, are approximately 2,000 feet (610 metres) apart.

The Dawson Resource Block gold mineralization occurs between 300 and 1,000 feet below surface, while the Windy Gulch gold mineralization has been

traced from surface to a depth of 200 feet.

The 2,000 foot interval between Windy Gulch and Dawson, as well as at depth within these areas, remains to be drill tested. UUS will assume operatorship of the property and intends to commence a drilling program this month.

The Letter Agreement is subject to Jascan U.S.A. obtaining any necessary regulatory approvals.

SAN JOSE, CA (FEB. 6) BUSINESS WIRE - Corvus Systems Inc. announces a memory expansion card which allows users to break the 640K barrier and expand usable DOS memory by 64K to a total of 704Kb.

The card can be used with any DOS application or network software in either a network or standalone environment. The new ReadyRAM card, which ships fully populated, will retail for $99 (all prices suggested U.S. resale at participating dealers; dealer inquiries are invited). First customer shipments are slated for early March 1990.

The new ReadyRAM card is the first addition to the Corvus ReadyNet product family. ReadyRAM allows DOS to access memory at address A0000 to AFFFF. This memory is usually reserved for video display, but is unused on systems with monochrome or CGA monitors.

The ReadyRAM card is half-sized and slips easily into any available expansion slot. ReadyRAM software is not memory resident and will not conflict with any DOS program. ReadyRAM works with any Tandy computer, or IBM, or compatible PC, XT, AT, or 386 with either monochrome or CGA monitors.

Corvus Systems manufactures a complete line of local area network hardware and software products for IBM PC, PS/2, Macintosh, Apple II and compatible systems. More than half a million Corvus LAN nodes have been installed worldwide.

SANTA CLARA, CA (FEB. 6) BUSINESS WIRE - Castelle Tuesday announced it has fully tested and endorsed Da Vinci's eMAIL software package for use as part of Castelle's new electronic mail to fax gateway.

Endorsed by Novell, MHS (Message Handling Service) is the emerging de facto store and forward electronic mail standard for LANs. The most popular version of Da Vinci eMAIL, which is based on MHS, is the fastest growing mail product for PCs having won virtually all the trade industry press awards available, and takes particular advantage of the power of Novell NetWare.

Castelle's FaxPress transmits faxes from PC networks two ways, via its revolutionary ''printer approach'' and as attachments to eMAIL messages. Da Vinci eMAIL is the vital link in eMAIL to fax communication.

FaxPress is a standalone server designed specifically for Novell networks. The product provides fax capabilities allowing network users to send and receive faxes from any network PC. With FaxPress, faxes can be sent from within applications with all of the document's fonts, graphics and formatting retained. FaxPress is available from selected Castelle resellers now, with a list price of $3,995 for the 2.5Mb version and $4,395 for 4.5Mb.

Da Vinci eMAIL is available in DOS, Windows, and OS/2 and is compatible with any drive-sharing network. Suggested retail price is $150/single user, $295/eight user, and $995/unlimited-user server version for the DOS product.

Founded in 1987, Castelle is a privately held company that designs, manufactures, markets and supports dedicated network server solutions to optimize workgroup computing.

Da Vinci Systems Corp., founded in 1985, is a privately held software development company specializing in network software for business and professional use.

SAN FRANCISCO (FEB. 6) BUSINESS WIRE - Deltanet Inc., the data processing leader in dental insurance software systems, announced the availability of its dental claims administration system to the business community.

Previously, the software product has been licensed or operated exclusively for insurance companies which were members of the Delta Dental Plans Association.

Deltanet is offering a feature rich, on-line, computer system capable of meeting the most complex and sophisticated dental claims administration requirements. The system was created to meet the specific requirements of dental claims processing. It is currently in use by over sixty percent of the Delta Dental Plans insurance organizations.

Deltanet has become the premier IBM Business Partner for dental claims systems. The software product is offered either on a software license basis, or as part of a full service shared processing environment using Deltanet's computer processing center. The system is available on IBM large and mid-range platforms under both the MVS and DOS/VSE operating systems.

DENVER (DEC. 6) BUSINESS WIRE - Cellular Inc. (NASDAQ:CELS) Tuesday announced that it has entered into an agreement to acquire the non-wireline construction permit for rural service area (RSA) Wyoming 3, which has a population of over 155,000.

The acquisition is subject to approval by the Federal Communications Commission.

''The Wyoming 3 RSA system will enhance our network in both western Montana and eastern Idaho. It is but the first in our ongoing program to augment and supplement the company's 69 RSAs and 11 metropolitan statistical area (MSA) markets located in 17 states,'' said Arnold Pohs, president and chief executive officer of Cellular Inc.

Operations of Wyoming 3 will will be integrated with the company's Pocatello, Idaho system, which went operational on Feb. 1, 1990.

Cellular Inc., founded in 1983, provides management, financing and operational services for the cellular interests of independent telephone companies (''telcos''). Currently, the company has affiliations with 156 telcos, and has interests in 11 operational MSA markets and 69 RSA markets the majority of which will become operational during 1990.

#90037b0085 02/06/1990 ~Business Wire

SEATTLE (FEB. 6) BUSINESS WIRE - PENWEST (NASDAQ:PENW) Tuesday announced that it has developed and received initial orders for a new starch-based specialty chemical product for the paper industry that is expected to have a significant effect on the company's sales and earnings beginning in its fiscal year which starts Sept 1, 1990.

The new product, known as PENGLOSS, is a paper coating whose unique properties assure the highest quality printed image -- quality superior to that produced using latex coatings, which until now were the industry norm. The company's Penford Products division is the paper industry's major supplier of chemical starch coatings.

Papermakers in North America spend about $300 million annually for latex, while the combined North American and European market is estimated at $650 million. PENWEST officials told shareholders at the company's annual meeting in Seattle today that they would be ''disappointed with less than 10 percent'' of the combined market within five years. In its most recent fiscal year, ended Aug. 31, 1989, PENWEST had revenues of $80 million.

Hamachek said the specific attributes of PENGLOSS, which was developed by the company's Penford Products division, include important advantages over latex materials: improved printability, less mottling, easier glossing and better runability. It can be used in varying blends with starch -- including up to 100 percent PENGLOSS -- to achieve specific paper characteristics and production efficiencies.

In mill tests researchers found PENGLOSS-coated paper easier to gloss, while the finished product has improved opacity and stiffness. Hamachek said the new product, which goes into production in September at the company's Cedar Rapids, Iowa, plant, will be competitively priced. Initial capacity could generate up to $20 million in annual revenue. Additional capacity can be brought on line as needed.

The company expects to maintain current levels of profitability for the new product.

Both PENGLOSS and its application process are protected by pending patents.

PENWEST develops, manufactures and markets specialty carbohydrate and snythetic polymer chemicals for papermaking. Its largest customers are papermakers. The company also produces and markets specialty food ingredients and agricultural nutrition supplements.

HONOLULU (FEB. 6) BUSINESS WIRE - First Hawaiian Inc., a bank holding company whose principal subsidiary is First Hawaiian Bank, has reached an agreement to acquire First Interstate of Hawaii Inc., the bank holding company of First Interstate Bank of Hawaii.

The announcement was made jointly Tuesday by Walter A. Dods Jr., chairman, president and chief executive officer of First Hawaiian Inc., and Donald L. MacGregor Jr., president and chief executive officer of First Interstate of Hawaii Inc.

First Hawaiian will pay 2.3 times the book value of First Interstate Bank of Hawaii at the time of closing plus the value of cash and cash equivalents in the holding company. First Interstate Bank of Hawaii's book value at Dec. 31, 1989, was approximately $51.7 million.

Once the transaction is completed, a process expected to take from six to nine months, First Interstate of Hawaii Inc. will become a wholly owned subsidiary of First Hawaiian Inc., which will then have consolidated assets of approximately $6 billion.

The transaction is subject to approval by the shareholders of First Interstate of Hawaii Inc., the Board of Governors of the Federal Reserve System and the Hawaii Commissioner of Financial Institutions.

While the regulatory applications are being processed, First Hawaiian Inc. will be planning for the eventual consolidation of the operations of the two banking systems. Dods said that discussions will be held with First Interstate Bancorp regarding the First Interstate franchise agreement.

Dods commented that he was pleased not only with the operations of First Interstate Bank of Hawaii, but with the caliber of the First Interstate Bank of Hawaii employees as well.

First Interstate Bank of Hawaii has 20 branches throughout Hawaii and total assets $812 million as of Dec. 31, 1989. It was founded in 1935 as American Security Bank. In 1983, the bank changed its name to First Interstate Bank of Hawaii when it became an independent licensee of First Interstate Bancorp.

First Hawaiian Inc.'s principal subsidiary is First Hawaiian Bank, the

state 's second-largest financial institution with more than $5 billion in total assets. Other major subsidiaries include First Hawaiian Creditcorp Inc., the state's largest locally owned industrial loan company, and First Hawaiian Leasing Inc., which is primarily engaged in commercial equipment and vehicle leasing.

IRVINE, CA (FEB. 6) BUSINESS WIRE - Belcor Inc. announced financial results Tuesday for fiscal 1989.

Revenues increased 20 percent from the prior year to $26,465,901, and net income increased 24 percent from the prior year to $1,066,185.

Following is a five-year summary of financial results reflecting the company's successful transition into a diversified holding company.

	Year ended Oct. 31,				
	1985	1986	1987	1988	1989
Net sales	$ 811,340	$9,386,070	$13,783,842	$21,672,129	$26,035,007
Net income (loss)	(1,688,116)	833,388	413,412	859,735	1,066,185
Net income (loss) per common share	(11 cents)	5 cents	2 cents	4 cents	5 cents
Total assets	2,220,341	9,457,898	13,821,711	17,939,898	20,803,959
Long-term debt	2,443	2,653,989	4,215,743	5,376,577	5,597,080
Share- holders equity	1,345,554	2,832,278	4,778,590	5,653,110	7,366,348

Belcor also announced Monday that effective Feb. 15, its 24,692,948 common shares will be reverse split on the basis of one share for each existing five shares. This will result in Belcor having 4,938,590 common shares outstanding. Based on this number of shares outstanding for the entire fiscal year, net income per share for the year ended Oct. 31, 1989, would have been 21 cents per share.

#90037b0097 02/06/1990 ~Business Wire

DUBLIN, CA. (FEB. 6) BUSINESS WIRE - Hexcel Corp. (NYSE/PSE:HXL) Tuesday announced earnings of $3,735,000 for the year ended Dec. 31, 1989.

Earnings were 77 percent below the $16,135,000 reported in 1988. Included in the 1989 results was a previously announced $5 million pretax increase to reserves, recorded in the fourth quarter, related primarily to the planned 1990 reduction of resources dedicated to the military aerospace business.

Primary earnings per share for 1989 were 54 cents, 77 percent below the comparable $2.33 reported last year. Fully diluted earnings per share were also 54 cents, 75 percent lower than the $2.19 earned in 1988. Sales for 1989 were $410,946,000, 3 percent above 1988 sales of $399,180,000.

The company reported a loss of $2,921,000 for the fourth quarter of 1989 compared with earnings of $4,685,000 for the fourth quarter of 1988. The loss largely reflected the reserve increases recorded in the quarter primarily to cover costs related to the consolidation of the company's classified military aerospace business activities from the San Ramon, Calif., facility to the Dublin headquarters.

Reserves related to environmental issues and government contracting were also increased. Excluding the reserve increases, the company experienced a loss from operations for the fourth quarter of 1989.

Primary earnings per share in the current fourth quarter were a loss of 42 cents compared with fourth quarter profits in 1988 of 67 cents. Fully diluted earnings per share for the fourth quarter of 1989 were also a loss of 42 cents vs. 63 cents earned in the fourth quarter of 1988. Sales in the recent quarter of $101,834,000 declined 4 percent from the $105,941,000 in sales for the fourth quarter of last year.

''1989 was a very difficult year for Hexcel,'' said Robert L. Witt, president and chairman. ''The cutbacks and stretchouts of several military aerospace programs had a significant negative impact on our earnings throughout 1989. It became evident in the fourth quarter that the outlook for military aerospace was for continued reductions and possibly cancellation of some programs.

''Although the consolidation of our military aerospace business contributed to our poor financial performance for 1989, it was a necessary step and allows the company to focus on commercial aerospace and other expanding markets, where we already have a significant presence.''

Hexcel is an international developer and manufacturer of honeycomb, advanced composites, reinforcement fabrics, and specialty chemicals and

resins used in the aerospace and other general and industrial markets.

CLEBURNE, TX (FEB. 6) BUSINESS WIRE - United Heritage Corp., a Cleburne-based holding company (NASDAQ: UHCP, BSE: UHC), announced Tuesday that its wholly owned subsidiary, Heritage Marine Corp., which is engaged in the retail sales and service of marine products in the states of Colorado and Nebraska, has completed its most successful major boat show in the history of the corporation or of its predecessor corporation.

Despite gloomy economic reports and media representation of sagging consumer demand and consumer confidence, sales at the 1990 Denver Boat Show totaled $1,351,000.00, up 82 percent from the 1989 Denver Boat Show figures.

Heritage Marine Corp. featured all U.S. Marine products in its 1990 show. Products included Bayliner, Arriva, Cobra, and Spectrum boats. Representatives Mike Kirkpatrick and Jim Schott of Brunswick's U.S. Marine Division stated that the Heritage Marine display of U.S. Marine products at the Denver Boat Show was the most extensive disply of the U.S. Marine product line that they had seen throughout the country in the 1990 boat show season.

Boat show performance; i.e., sales, is considered by the industry to be indicative of the performance for the calendar year. Heritage Marine Corp. officials estimate that 1990 calandar sales will exceed $9 million.

RICHARDSON, TX (FEB. 6) BUSINESS WIRE - Rockwell International Corp.'s Collins Defense Communications (CDC) has been awarded a $7 million contract to provide high-performance communications systems for U.S. Navy P-3C Anti-Submarine Warfare (ASW) aircraft.

Under terms of the contract, issued by the U.S. Naval Air Systems Command, CDC will provide an Integrated Logistics Program for the AN/ARQ-50 HF Communications System. CDC will also modify the AN/ARQ-50 HF system and provide technical support for integration into the Navy's P-3C Update IV aircraft, and supply emulation data for the P-3C Weapon System Trainer.

The AN/ARQ-50 HF system features a simultaneous operation transceiver utilizing a control bus architecture which allows the AN/ARC-207 high-frequency and AN/ARC-182 multiband radios on the P-3C aircraft to be operated from a single control. It also provides automated performance monitoring that eliminates the need for constant attendance by an operator. The system has undergone extensive Navy flight testing and has been approved for service use.

Work on the program will be performed at CDC facilities in Richardson, Texas, and Cedar Rapids, Iowa.

Rockwell International is a $12 billion, multi-industry company applying advanced technology to a wide range of products in its aerospace, electronics, automotive and graphics businesses.

SEATTLE (FEB. 6) BUSINESS WIRE - PENWEST's (NASDAQ:PENW) board of directors declared a 3-for-2 stock split in the form of a dividend and elected a new chairman at the company's annual shareholders' meeting here today.

The non-taxable dividend, effective for shareholders of record Feb. 21, 1990, provides one additional share for every two shares owned on the record date. Certificates will be mailed March 21.

N. Stewart Rogers, who was elected chairman succeeding Curtis P. Lindley, described the move as ''Another in a series of positive actions to build shareholder value.''

In other business at the meeting, incumbent directors Lindley, Richard E. Engebrecht and William K. Street were re-elected to the board.

PENWEST earlier today announced a major new product, PENGLOSS, a chemical starch product for paper coating, which is expected to have a significant effect on sales and earnings in the company's 1991 fiscal year beginning Sept. 1, 1990.

PENWEST develops, manufactures and markets specialty carbohydrate and synthetic polymer chemicals for papermaking. The company also produces and markets specialty food ingredients and agricultural nutrition supplements.

SEATTLE (FEB. 6) BUSINESS WIRE - Alamo Rent a Car is the newest partner in the Alaska Airlines Mileage Incentive Plan.

Alaska frequent fliers now are eligible to earn 500 miles each time they rent a car from Alamo in U.S. cities served by Alaska and in Hawaii.

Alamo, the largest independently owned and operated car rental company in the nation, has outlets in Seattle, Anchorage, Boise, Portland, Phoenix, Tucson and each of the 10 cities Alaska serves in Southern California and the San Francisco Bay area.

Alamo joins Budget Rent-a-Car in Alaska's mileage plan and brings to 13 the number of partners in the program.

Alaska and sister carrier Horizon Air serve more than 60 cities in Alaska, Canada, Mexico and seven Western states.

     #90037b0146 02/06/1990 ~Business Wire
SAN FRANCISCO (FEB. 6) BUSINESS WIRE - Home Federal Savings and Loan Association of San Francisco (NASDAQ:HFSF) reported net income of $2,377,000, or $1.72 per share for the year ended Dec. 31, 1989, compared to net income of $3,933,000 or $2.85 per share for the year ended Dec. 31, 1988.

Net income for the fourth quarter 1989 was $1,459,000, or $1.06 per share, 130 percent higher than net income of $634,000, or 46 cents per share in the fourth quarter of 1988.

According to Stanley E. Bailey, president and chief executive officer, the decrease in 1989 earnings was in part due to a mid-year write-down of $1,443,000 of the premium on loan sales. This decrease in earnings was partially offset by an increase in gains from loan sales.

Also, the 1988 operating results included a one-time benefit of $1,375,000 due to a change in accounting for income taxes. The write-down of the

premium on loan sales reflected a change in estimated future prepayments of loans serviced by Home Federal.

Bailey also reported that during the first half of 1989, rising interest rates resulted in Home Federal's cost of funds increasing more rapidly than the yield on its assets. Improved fourth quarter earnings resulted from the reversal in the trend of interest rates, providing opportunities to increase interest margins and net interest income. Loan sales during the fourth quarter 1989 also provided added revenues.

Stockholders' equity was $34,698,000, or $25.14 per share at Dec. 31, 1989 compared to $32,321,000, or $23.42 per share at Dec. 31, 1988. Home Federal meets the new capital requirements under the Financial Institutions Reform, Recovery and Enforcement Act of 1989 (FIRREA).

Bailey reported that Home Federal did not grow in 1989 so that its capital ratios would not be eroded and that it would be in compliance with the stringent capital requirements of FIRREA adopted in August and effective in December, 1989. Home Federal's assets totaled $570,944,000 at Dec. 31, 1989, compared to $572,034,000 one year earlier.

During 1989, Home Federal's loan originations and purchases totaled $159,592,000, compared to $191,035,000 in 1988. To keep its asset base rate stable, loan sales totaled $104,144,000. As a result of its loan sales, loans serviced for others reached an all time high of $299,767,000 at the end of 1989.

DALLAS (FEB. 6) BUSINESS WIRE - Herbert D. Kelleher, chairman and president of Southwest Airlines Tuesday announced that Lieutenant Gov. William P. Hobby had become a member of the board of directors of Southwest Airlines.

Gov. Hobby's addition to the Southwest Board increases its size from six to seven members.

Kelleher stated that: ''We welcome Gov. Hobby to the Southwest Airlines board of directors and are honored by his acceptance of our invitation. Gov. Hobby is that rarest of individuals in modern times: a citizen-statesman. His success in business and leadership in public affairs and public office provide a breadth of experience and insight that will enrich our deliberations.''

Hobby has served as Lieutenant Governor of Texas for a record 18 years. During his tenure as Lieutenant Gov., he has assiduously worked to upgrade the quality of education; expand human services; and balance the state budget. He is chairman of the Legislative Budget Board; the Legislative Coucil; and the Legislative Education Board. He also serves as vice chairman of the Criminal Justice Policy Council.

Gov. Hobby has received the Santa Rita Award, the highest honor of the University of Texas; has been honored for his contributions to mental health by the Texas Mental Health Association; was selected as Texan of the year at the 23rd Annual Texas Legislative Conference; was a recipient of the Mirabeau B. Lamar Award for distinguished service to higher education; and was honored for his contributions to transportation by the Texas Good Roads and Transportation Association.

Gov. Hobby has had a distinguished career in journalism, serving as executive editor of the Houston Post for 18 years, during which time he was elected as president of the Texas Daily Newspaper Association and served several times a a member of the advisory committee for Pulitzer Prizes in journalism.

Presently, Gov. Hobby is chairman of H & C Communications, a privately owned broadcasting company, and serves on the boards of Rice University, where he also teaches, and the Houston Area Research Corp.

SAN FRANCISCO (FEB. 6) BUSINESS WIRE - Aldus Corp. Tuesday announced the newest version of its desktop publishing program, Aldus PageMaker 4.0 for the Macintosh.

More than 75 features and enhancements have been added to the program that sets the international standard for desktop publishing.

''PageMaker 4.0 is the most complete writing, design, and production tool a Macintosh owner can use to create high-quality publications,'' said Aldus President Paul Brainerd. ''Its powerful new features will give creative and business professionals a measure of control and independence not possible in desktop publishing before. Version 4.0 marks the beginning of a new era in desktop publishing.''

Aldus Corp. (NASDAQ:ALDC) creates computer software that helps people throughout the world effectively communicate information and ideas. Aldus distributes its products through an international network of more than 12,000 authorized dealers and distributors.

#90037b0198 02/06/1990 ~Business Wire

SEATTLE (FEB. 6) BUSINESS WIRE - Aldus Corp. (NASDAQ:ALDC) Tuesday announced that it has signed a definitive agreement to acquire Silicon Beach Software, a privately owned San Diego, Calif., software publisher.

The acquisition will be made through a merger in which shares of Aldus common stock will be exchanged for all of the outstanding shares of Silicon Beach. Aldus signed a letter of intent to acquire Silicon Beach on Jan. 16.

The definitive agreement allows for the acquisition of Silicon Beach to be accounted for as a pooling of interests, and is expected to have minimal dilutive effect on Aldus' common stock. The total number of Aldus shares to be exchanged in the merger will be determined in approximately four weeks, when the acquisition closes.

Under the terms of the agreement, Silicon Beach will become a wholly owned subsidiary of Aldus. The company will continue to operate from its headquarters in San Diego.

Charlie Jackson, currently president of Silicon Beach, will remain with the company for the next several months to assist in the transition and the recruitment of a vice president and general manager as his successor. The new vice president will manage all day-to-day operations of Silicon Beach and report directly to Aldus chief operating officer, Phillip Herres.

''Silicon Beach is a strong, profitable organization,'' said Aldus President Paul Brainerd. ''We are eager to start forging new directions for Aldus with the addition of their talented people, award-winning products, and exciting new technologies.''

''We anticipate greatly increased market share and visibility for our products as a result of this new relationship with Aldus,'' said Jackson. ''By working with and supporting Aldus' three sales and service organizations (Aldus North American, Aldus Europe, and Aldus Pacific Rim), we will be able to take advantage of Aldus' extensive worldwide distribution network.''

Silicon Beach's line of graphics, multimedia, and publishing software -- all priced below $500 -- gives Aldus a suite of entry-level products to complement its own line of advanced software products.

''It is clear that our market is segmenting,'' said Larry Spelhaug, Aldus vice president of marketing. ''Aldus' business strategy is to introduce quality products at both the low end and the high end of the market to capitalize on that segmentation.''

Aldus Corp. creates computer software that helps people throughout the world effectively communicate information and ideas.

Silicon Beach Software, founded in January 1985, develops and publishes state-of-the-art software applications for the Apple Macintosh. Aldus will distribute all Silicon Beach products through its worldwide distribution network of more than 12,000 dealers and distributors.

#90037b0208 02/06/1990 ~Business Wire

TORONTO, Ontario (FEB. 6) BUSINESS WIRE - Lawson Mardon Group Ltd. Tuesday announced net income of $26.4 million, or $0.92 per common share, for the year ended Dec. 31, 1989, compared with net income of $41.9

million, or $1.45 per share, a year earlier.

Sales in 1989 were $997.7 million, compared with $1,110.5 million in 1988.

Net income for the fourth quarter of 1989 was $8.2 million, or $0.29 per share, compared with $9.5 million, or $0.33 per share, for the corresponding 1988 period. Sales in the fourth quarter of 1989 were $241.7 million, compared with $269.4 million a year earlier.

Lawrence G. Tapp, Lawson Mardon's president and chief executive officer, said ''the decline in net income resulted primarily from the growing strength of the Canadian dollar against other currencies, increased interest expense resulting from higher borrowings to fund capital additions and the one-time cost of realigning the company's businesses in Canada.''

He said that ''the restructuring of our Canadian printing and packaging operations will make them more responsive to customer needs, more efficient and thus more competitive in a free-trade environment.

''The downward pressure on earnings more than offset several positive developments, among them lower exchange rates on foreign interest, record-high beverage-related sales in the United Kingdom, and a net gain of $5.9 million from the divestiture of certain North American real estate interests.

He said that ''earnings were also bolstered by particularly strong performances by two of our divisions, Packaging, North America and Flexible Packaging, Europe, which benefited from increased revenues, successful cost-reduction programs and lower commodity prices.

''As well, our Folding Cartons and Plastic Custom Mouldings operations in the United Kingdom made a significant contribution to earnings in 1989, as they had in 1988, and continued to out-perform our competitors.''

Lawson Mardon also announced that a quarterly dividend of $0.10 per share will be paid on March 6, 1990, to shareholders of record on Feb. 16, 1990.

Lawson Mardon produces flexible, rigid plastic, metal and folding carton packaging, and is engaged in commerical printing, label making and print trade finishing, with operations in Canada, the United States, the United Kingdom, Ireland, West Germany and France.

#90037b0215 02/06/1990 ~Business Wire

SAN MATEO, CA (FEB. 6) BUSINESS WIRE - Power Up Software Corp. Tuesday introduced and began retail shipments of Top Priority, a time- and task-management software tool that provides IBM PC and compatibles users with an effective way to complete their most important activities each day.

Top Priority has a suggested retail price of $99.95, and is available now at software retailers nationwide, or direct from Power Up Software Corp.

Top Priority enables users to concentrate on what's important and when. The program allows users to enter goals, tasks and appointments in either one list or several. For example, users may want to keep one list for a long-term project, another for administrative tasks and yet another for personal activities.

These lists can then be selectively merged together to view the ''big picture'' or only a subset of tasks. The program organizes daily tasks in one place, replacing unorganized and messy handwritten to-do lists.

In addition to selectively merging to-do lists for viewing, tasks can be viewed by categories such as phone calls or things to discuss with the manager. Major goals can be divided into achievable subtasks and some of these can be delegated to others, thus enabling managers to more effectively supervise their employees by viewing only tasks assigned to them.

#90037b0229 02/06/1990 ~Business Wire

DALLAS (FEB. 6) BUSINESS WIRE - Halliburton Co. Tuesday reported that its net income for the year ended Dec. 31, 1989, was $135.0 million, or $1.27 per share, an increase of 43 percent as compared to earnings of 89 cents a share in 1988.

Fourth quarter 1989 net income was 45 cents a share, up from 11 cents a share earned in the fourth quarter of 1988.

The company's improved 1989 fourth quarter earnings are attributable to higher operating results of its oil field services and engineering and construction groups.

The oil field services group reported operating income of $66.5 million in the fourth quarter of 1989. During the fourth quarter of 1988 the company's oil field group earned only $800,000, after recognizing $27.2 million of charges related to reorganizing oil field units acquired during

1988. During the fourth quarter of 1989 the company substantially completed reorganization of its Halliburton Geophysical Services, Halliburton Logging Services and Halliburton Reservoir Services business units. Although provisions were made at the end of 1988 in anticipation of the costs of the reorganizations, additional reorganization costs of about $9 million were recognized in the fourth quarter of 1989.

Improved oil and gas activity levels in the United States, as compared to a year ago, contributed to both improved revenues and profitability of the group in the fourth quarter of 1989.

The engineering and construction services group's fourth quarter 1989 operating income was $18.5 million, more than double operating income of one year ago. The 1989 improvement was aided by a strong build-up of activity relating to major projects for the petroleum, chemical and forest products industries in the United States, as well as increased profits from international marine operations.

The insurance services group's fourth quarter 1989 operating income of $5.7 million was 27 percent below the fourth quarter of 1988. Last year's fourth quarter results included about $2.5 million of operating income from Life Insurance Company of the Southwest, which was sold earlier in 1989 and not included in fourth quarter 1989 results.

Halliburton Co. is one of the world's largest diversified oil field services, engineering and construction companies. Founded in 1919, Halliburton provides oil field services and products, industrial and marine engineering and construction services, and property and casualty insurance services.

HONOLULU (FEB. 6) BUSINESS WIRE - International Holding Capital Corp. (OTC:ISLH) Tuesday reported its second quarter earnings for its 1990 fiscal year.

International Holding Capital is the holding company for International Savings and Loan Association Limited, Diversified Resources and Investments Inc. and Hawaiian Foliage and Landscape Inc.

The consolidated net income of International Holding for the quarter ended Dec. 31, 1989, was $1,387,000, or $1.16 per share, and increase of $652,000, or 89 percent from the $735,000, or 68 cents per share, reported for the comparable period last year.

International Holding's consolidated earnings for the six month period ended Dec. 31, 1989 were $1,933,000, or $1.69 per share, compared to earnings of $1,393,000, or $1.28 per share reported for the comparable period last year.

Lionel Y. Tokioka, chairman of the board and chief executive officer of International Holding, and president of International Savings and Loan, stated that the increase in earnings is attributable to the dramatically improved operating results of HFL, which posted net operating income of $471,000 and $1,041,000 for the three and six months ended Dec. 31, 1989.

During the like period last year, HFL had net operating losses of $390,000 and $439,000, respectively.

The previously announced merger with Sumix Co. Ltd. (formerly known as Maruwa Koyo Co. Ltd.) is progressing according to schedule. Among other things, the merger is subject to regulatory and shareholder approval. Sumix Co. Ltd. has recently filed an application with the Office of Thrift Supervision to obtain regulatory approval on the merger.

International Holding has submitted preliminary proxy materials to the Securities and Exchange Commission for their review prior to holding a shareholders meeting to approve the merger. The shareholders meeting is expected to be held sometime in April 1990.

PASADENA, CA (FEB. 6) BUSINESS WIRE - Nationwide Health Properties Inc. (NYSE:NHP) announced its results for the year and the fourth quarter of 1989.

Earnings increased 8 percent to $11.64 million from $10,822,000 in 1988. Included in 1989 earnings were gains on sales of facilities of $990,000 vs. $261,000 of gains in 1988. Earnings per share also increased 8 percent to $1.42 from $1.32. The company recorded revenues of $35,317,000 a 2 percent increase over the $34,663,000 in 1988. For the 1989 year, the company generated cash available from operations of $18.86 million, or $2.30 cents per share, compared with $19,145,000, or $2.34 per share in 1988.

Earnings for the quarter increased 38 percent to $3,204,000, or 39 cents per share, compared with $2,325,000, or 28 cents per share, for the fourth quarter of 1988. Gains on sales of facilities in the fourth quarter of 1989 accounted for $282,000 of earnings vs. $261,000 in the fourth quarter

of 1988.

Revenues in the fourth quarter of 1989 decreased to $8,578,000 from $9,034,000 in 1988 due to facility sales. For the quarter ended Dec. 31, 1989, the company generated cash available from operations of $4,809,000, or 59 cents per share.

Nationwide Health Properties is a real estate investment trust specializing in the ownership of health care facilities.

CHATSWORTH, CA (FEB. 6) BUSINESS WIRE - For the eighth consecutive quarter, The Software Toolworks Inc., the Chatsworth-based developer and publisher of entertainment, educational, personal productivity and utility software, reported record quarterly revenue and earnings.

Revenue for the three month period ended Dec. 31, 1989 increased 56 percent to $6,060,000 from $3,885,000 for the comparable three month period last year. Net income for the current quarter increased 163 percent to $1,670,000 from $635,000 for the comparable period last year.

Earnings per share increased to 20 cents per share from 10 cents per share even though average shares outstanding increased to 8,510,000 from 6,369,000.

Revenue for the nine months ended Dec. 31, 1989 rose 109 percent to

$15,997,000 from $7,655,000 for the first nine months of the prior year. Earnings for that period increased 170 percent to $3,866,000 from $1,433,000 for the corresponding period last year.

Earnings per share increased to 53 cents per share from 23 cents per share even though average shares outstanding increased from 6,208,000 to 7,258,000.

Les Crane, chairman and chief executive officer of The Software Toolworks, attributed the growth in revenue and profitability to the continued strong performance in the company's OEM licensing business coupled with a significant increase in revenues from Priority Software Packaging, its wholly owned duplication, printing and packaging subsidiary.

During the quarter ended Dec. 31, 1989, the company licensed two recently released software entertainment products for the Nintendo Entertainment System, entitled Bruce Lee Lives, an action-strategy, multi-level game employing artificial intelligence techniques and Beyond the Black Hole, a multi-level game which employs techniques that produce true stereoscopic three dimensional graphics.

Additionally, the company licensed Chessmaster on the Nintendo's new hand held video game system called Game Boy, the company's first product on that format.

LEMOYNE, PA (FEB. 6) BUSINESS WIRE - CareerCom Corp. (CCM/NYSE) Tuesday reported results for the first quarter of fiscal year 1990 ended Dec. 31, 1989.

Revenues for the three months ended Dec. 31, 1989 increased to $40,944,648 from $35,863,241 in the comparable period of fiscal year 1989.

Net income for the first fiscal quarter was $2,666,091, or 26 cents per share, compared with $3,092,910, or 26 cents per share, in the comparable period of fiscal year 1989.

The weighted average number of shares outstanding for the fiscal quarter ended December 31, 1989 decreased to 10,253,521 from 11,995,640 for the comparable quarter of fiscal 1989.

CareerCom President and Chief Executive Officer Robert A. Smith, stated, ''The financial results for the first quarter represent a strong start to

the 1990 fiscal year. The current results, which on a per share basis are comparable to those of fiscal year 1989, are a testament to management's capabilities and commitment to the Company's core business.''

Smith also noted that the reported earnings are consistent with the range of earnings previously projected by the company for the period.

Smith emphasized that debt reduction is an important consideration for management. He noted that the company had succeeded in reducing its debt to equity ratio from 4.4 to 1 at September 30, 1989 to approximately 3.2 to 1 at Dec. 31, 1989.

According to Smith, ''Absent material acquisitions which require additional debt, the Company anticipates further sizable reductions in this ratio over the balance of fiscal year 1990.''

CareerCom Corp. is a leading owner and operator of career training institutes located throughout the United States. The company currently maintains 72 proprietary, accredited, post-secondary schools offering programs of study in a variety of career oriented disciplines.

#90037b0615 02/06/1990 ~Business Wire

WASHINGTON (FEB. 6) BUSINESS WIRE - Tekelec, based in Calabasas, Calif., Tuesday announced its OSI Analyzer as an add-on testing capability for its Chameleon 32/20 data protocol test systems.

This product now provides protocol developers and network managers the ability to test complete OSI interoperability standards on multivendor networks for the first time, according to Robert Hess, Tekelec's director of corporate marketing.

''Tekelec develops its products with existing as well as future network testing requirements in mind,'' said Hess. ''And with the Government OSI Profile becoming a reality in the 1990s, Tekelec is taking the initiative by providing test capabilities for vendors and users alike to analyze compatibility with the emerging standards,'' he added.

Tekelec plans to provide testing capabilities for all standard applications as defined by GOSIP. The applications supported with the first release of the OSI Analyzer include X.224 and X.225 monitoring and

full protocol stack support for X.400 and G4 Fax. Other applications such as FTAM and CNLP will be released at later dates.

Although the OSI Analyzer was developed to test standards, it also offers a high degree of flexibility. An OSI Configuration/Development System is available that both users and developers can access. Protocol stacks can be configured on existing building blocks provided by Tekelec. Developers are able to customize or develop any standard or bybrid protocol stacks.

Developers can also link protocols developed in ''C'' language to the OSI Analyzer's building blocks to make complete customized stacks.

The Chameleon 32 system tests a multitude of data protocols with its many available options. Now with the OSI Analyzer option, users and developers can test OSI protocol stacks over many different link layers, which are available with the standard Chameleon test system (i.e. V series, ISDN and X.21).

The OSI Analyzer is currently available. The OSI Configuration/Development System will be available within three months. Prices start from $17,000 for a Chameleon test system with the OSI Analyzer.

Recognized as a leading test equipment manufacturer, Tekelec's product line encompasses testing of data protocols (ISDN, X.25), transmission services and equipment, signaling (SS7) and emerging intelligent network applications. Its products are actively marketed worldwide with subsidiaries in Japan and the United Kingdom.

California Business Magazine rated Tekelec No. 12 in its survey of the 100 most successful companies in California due to its overwhelming growth in the last five years.

MILPITAS, CA (FEB. 6) BUSINESS WIRE - Logic Modeling Systems Inc., developer of the LM-1000 simulator-independent, networked hardware modeling system, Tuesday announced availability and full support for DECstation and MIPS computers.

''We see both the DECstation and MIPS emerging as very popular platforms for EDA tools due to their performance and standard operating systems,'' said Holly Stump, director of marketing for Logic Modeling.

Other platforms supported by Logic Modeling include Hewlett-Packard, HP's Apollo Systems division, Sun and the PC/386. Logic Modeling also offers an alternate platform integration kit which enables companies with commercial or proprietary simulators to integrate the advanced LM-1000 hardware modeler on any platform.

Hardware modeling is an EDA technology which solves the model availability problem for system and ASIC designers by allowing actual VLSI devices to be used as simulation models for design verification.

The LM-1000 provides designers with easy access to models of all important VLSI devices on the market today, as well as ASICs. Over 600 full-function models of standard VLSI devices are currently available from Logic Modeling.

These models can be shared by popular simulators from EDA vendors including Cadence Advanced CAE Division, GenRad, Valid Logic Systems, Vantage Analysis Systems and Viewlogic Systems, on multiple platforms.

Logic Modeling sells hardware modelers through OEM relationships with the above EDA vendors and to large companies with proprietary simulators. The company is currently making volume shipments of the LM-1000.

Logic Modeling Systems Inc. is a privately held company, with corporate headquarters located at 1520 McCandless Dr., Milpitas, Calif. 95035 (telephone 408/957-5200).

MILPITAS, CA (FEB. 6) BUSINESS WIRE - Octel Communications Corp. (NASDAQ:OCTL) and NEC America Inc. Tuesday announced the signing of a distribution agreement, under which NEC America will market Octel's entire line of Aspen voice processing systems in the United States under the Octel label.

Under the terms of the agreement, NEC America will promote Octel systems as its preferred choice of voice processing equipment for use with NEC's entire line of private branch exchange (PBX) systems, with emphasis on NEC's flagship NEAX 2400 IMS PBX.

The agreement calls for NEC America to distribute Octel's full line of voice processing systems, including the Aspen Maxum Super-System, serving organizations with up to 30,000 users; the Aspen Maxum, serving up to 10,000 users; the Aspen, serving up to 2,000 users, the Aspen Branch and

Aspen Branch XP, each supporting a maximum of 275 users; and the VPC 100, serving from 10 to 100 users.

NEC America will market Octel systems through its direct sales subsidiaries to an installed base of more than 2,000 NEAX2400 IMS PBX systems and to future NEAX2400 IMS system customers as well as to current and potential customers of other NEC PBX's.

Octel Communications Corp. designs, manufactures and markets a full line of high-performance voice processing systems. These specialized computers which integrate with a large number of telephone systems, help companies and individuals solve a range of communications problems.

Among the applications for Octel's products are voice mail, integrated telephone answering, automated attendant, call routing and audiotex (voice bulletin boards).

Octel was founded in 1982 and is headquartered in Milpitas.

NEC America Inc. develops, manufactures and markets a complete line of advanced communications products and software for public and private networks, including digital key telephones and PBX systems, facsimile machines, central office switches, cellular mobile telephones and fiber optic transmission, microwave and satellite communications systems.

As an affiliate of NEC Corp., NEC America is part of a global high technology presence comprising more than 104,000 employees with revenues in excess of $23 billion.

#90037b0618 02/06/1990 ~Business Wire

SCOTTS VALLEY, CA (FEB. 6) BUSINESS WIRE - Borland International (NASDAQ:BORL) Tuesday unveiled a new set of programming tools that may revolutionize the way developers currently build and test complex software products, removing many of the obstacles that have created bottlenecks in the software development cycle.

Borland's high-performance toolset, Turbo Debugger & Tools, includes Turbo Debugger 2.0, which supports object-oriented debugging, the new Turbo Profiler, the world's first interactive profiler and Turbo Assembler 2.0.

With Turbo Debugger & Tools, Borland gives professional developers at all

levels a major advancement in the art of hunting and fixing software bugs, and analyzing and optimizing software code to ensure peak performance.

''The 'software bottleneck' issue made headlines in 1989 with the well-publicized delays of new versions of Lotus 1-2-3 and Ashton-Tate's dBASE,'' said Philippe Kahn, Borland's chairman, president and chief executive officer. ''The software world is fully aware of the problems caused by the growing complexity of software.

''In response to customer feedback, we are offering a vast array of new features in this toolset as well as an entirely new programming tool.''

Turbo Debugger & Tools is a three-way productivity package for programmers who need to get the bugs out of their programs, analyze run-time performance and supports all popular compilers for DOS.

Turbo Debugger & Tools will ship during the second quarter of this year with a suggested retail price of $149.95. Registered users of Turbo Assembler & Turbo Debugger 1.0 as well as the Turbo Professional Series will receive a $59.95 upgrade offer.

Turbo Debugger & Tools require DOS 2.0 or higher and a hard drive or high density floppy disk drive. The toolset supports all popular video display adapters and monitors. Minimum RAM requirements are 384K for Turbo Debugger, 384K for Turbo Profiler and 256K for Turbo Assembler.

Borland International Inc. is a leading developer of high-performance software products.

#90037b0619 02/06/1990 ~Business Wire

NEW YORK (FEB. 6) BUSINESS WIRE - Virgin Atlantic Airways announced Tuesday that it will become the first airline to offer an all-non-smoking service between New York and London.

Led by increasing passenger demand, and following the U.S. legislative ban on smoking on all domestic flights, the British carrier is once again leading the field.

This is the first clear alternative to non-smoking sections which are never completely satisfactory for today's health-conscious traveler.

From May 18, Virgin Atlantic Airways will introduce a second 747 to its popular Newark-Gatwick route (on Thursdays, Fridays, Saturdays and Sundays) to accommodate the new, non-smoking service. The extra flights offered by Virgin Atlantic, from Newark, will give non-smokers the chance to breathe nicotine-free air all the way to the United Kingdom.

Virgin Atlantic Airways is still offering its other daily scheduled departures from Newark and JFK that will offer smoking sections.

Virgin Atlantic Chairman Richard Branson said, ''Statistics show that at least 110,000 people die each year as a result of smoking induced diseases...

''That's a horrific number in every sense, and one which we felt couldn't be ignored. We have been noticing a steady increase in passenger comments on the subject of cigarette smoking on board our aircraft, and we wanted to make a firm stand by offering a choice of smoking or non-smoking departures.

''Newark is the first of our routes on which we are able to carry out this trial but, with increased capacity on our other services, and more aircraft, we would hope to extend the nicotine-free alternative to Tokyo, Los Angeles, Miami and New York (JFK).

We will be watching very closely to see how our passengers take to the idea, and if we find it to be as well received as we anticipate, then, who knows...''

SAN JOSE, CA (FEB. 6) BUSINESS WIRE - BT Tymnet Inc. and Digital Equipment Corp. Tuesday announced that the international value-added network TYMNET has been chosen as the access provider for the Digital Independent Software Vendor (ISV) Program, ISVNet.

Digital, a long-time customer of BT Tymnet, established the ISVNet to identify and work with third-party software developers, worldwide, interested in writing applications for all of Digital's strategic platforms.

ISVNet is used to link Digital's ISVs and CSOs (Complimentary Solutions Organizations) with Digital personnel, and is becoming a primary way these third parties communicate with Digital. Benefits of the ISV program

By utilizing the TYMNET Network, ISVs and CSOs gain easy, low-cost access and dependability via a local call in over 850 cities nationwide, as well as over 80 countries worldwide. ''We estimate the cost for an hour of connect time will decrease to an average of $5 vs. $30 an hour previous to this agreement,'' said Mike Mancuso, group marketing manager for Digital's Corporate Independent Software Vendors Group.

The ISVNet is currently used by software developers as an electronic-mail system to Digital engineers and for access to on-line Notes Conferences, which focus on common development issues. Digital also uses the ISVNet to announce training classes, which it provides free to its ISVs and CSOs, and as an electronic bulletin board.

Digital's CSO and ISV programs are open to all companies, regardless of size or number of employees.

BT Tymnet Inc., an international value-added network supplier, is one of the world's largest providers of shared, dedicated, and hybrid network solutions. The company owns and operates the TYMNET Network, which offers protocol conversion, error-protection, enhanced security features, electronic data interchange (EDI), card services, and electronic messaging. The TYMNET Network is accessible from most countries throughout the world.

Digital Equipment Corp., with headquarters in Maynard, Mass., is a leading worldwide supplier of network computer systems and services. Digital offers a full range of computing solutions and systems integration for the entire enterprise -- from the desktop to the data center.

WASHINGTON (FEB. 6) BUSINESS WIRE - BT Tymnet, suppliers of the international value-added network, TYMNET, Tuesday announced a company-wide restructuring program at Communications Networks '90.

This program is a direct result of the integration of the British Telecom subsidiary, BT Dialcom, Rockville, Md., and the operating divisions acquired from McDonnell Douglas, Network Systems Co., Network Application Systems Co., Applied Communication Systems (ACS), and Payment Systems Co.

The new entity, BT Tymnet Inc., will be closely focused on providing high-quality, high-value, business solutions to the world-wide market for telecommunications applications systems, products and services.

Integration of Sales and Marketing

All of the systems, products and services marketed under the various companies will now be available from the new company, BT Tymnet Inc. This includes the products and service associated with the TYMNET Network, as well as the electronic-messaging programs DIALCOM and OnTyme, the electronic-data interchange program, EDI Net, and the point-of-sale services, Electronic Draft Capture, and Credit Authorization.

Sales operations have also been aligned to reflect the business solution focus of the new product portfolio. BT Tymnet corporate headquarters are located in San Jose, Calif., U.S.A. with regional offices located in the United States, Canada, Europe and the Pacific Rim. Key Element to Success

CYPRESS, CA (FEB. 6) BUSINESS WIRE - PacifiCare Health Systems Inc. (NASDAQ:PHSY) Tuesday said that revenues for the first quarter ended Dec. 31, 1989, increased 63 percent to $204,427,000 compared with revenues last year of $125,039,000.

Earnings for the quarter were $2,945,000, or 25 cents per share, an increase of 174 percent over last year when the company reported earnings of $1,075,000, or 10 cents per share. Included in the current quarterly results is a gain on the sale of PacifiCare's Austin, Texas, operation that added 9 cents per share to earnings.

PacifiCare Health Systems Inc. owns and operates HMOs in California, Oregon, Oklahoma and Texas and an insurance subsidiary licensed in 33 states. The company also provides independent utilization review and preferred provider organization services.

WASHINGTON (FEB. 6) BUSINESS WIRE - SynOptics Communications Inc. (NASDAQ/NMS:SNPX) Tuesday announced the immediate availability of LattisNet NETMAP, a NetView/PC application which allows IBM's NetView network management system to iteractively manage Ethernet networks through SynOptics' LattisNet Network Management system.

NETMAP is a software application program that communicates with NetView/PC running on an IBM PC AT or PS/2 Model 25 or 30, and enables LattisNet Network Management Release 2.1 to send information to, and receive commands from, IBM's NetView network management system.

NETMAP is fully compatible with NetView/PC and NetView environments, and uses terminology and procedures familiar to the NetView operator so that no additional programming or host customization is required.

The NETMAP application is being demonstrated this week at the Communication Networks '90 trade show by both SynOptics (Booth 2802) and IBM (Booth 838).

NETMAP enables NetView operators to monitor and control LattisNet networks from the same screen as their Systems Network Architecture (SNA) and other non-SNA networks. LattisNet Network Management information is presented to the NetView operator in a familiar format and is integrated with information from other networks managed by NetView.

NETMAP reports alerts, threshold data, and specific configuration information to a NetView console from a LattisNet Network Management station. When used in conjunction with the System 3000 platform, LattisNet Network Management enables network operators to manage and control individual Ethernet network connections based on Media Access Control (MAC)-level parameters and statistics.

NETMAP is available immediately at a list price of $4,495.

SynOptics Communications Inc. designs, manufactures and markets local area networking products based on its Network Utility Architecture, a value-added product strategy which incorporates network connectivity, internetworking and network management solutions into an integrated networking system.

LattisNet is a registered trademark and SynOptics is a trademark of SynOptics Communications Inc. Other brand and product names are registered trademarks or trademarks of their respective holders. NetView

is a trademark of IBM.

#90037b0641 02/06/1990 ~Business Wire

MEMPHIS, TN (FEB. 6) BUSINESS WIRE - TBC Corp. (NASDAQ/NMS:TBCC) Tuesday reported record 1989 earnings of $16.2 million, or $1.07 per share.

Net sales for the year totaled $481.9 million.

In 1988, the company reported net earnings of $15.7 million, or 98 cents per share, on revenues of $485.4 million.

TBC also reported a new high in income for the fourth quarter. Net earnings for the period totaled $4.2 million, or 29 cents per share, compared with $4.1 million, or 26 cents per share, in the fourth quarter of 1988. Net sales for the period were $120.6 million versus $122.9 million in the year-earlier quarter.

The 1988 per share results have been adjusted to reflect the 3-for-2 stock split distributed in October 1989.

In announcing the results, Marvin E. Bruce, president, noted that 1989 marked the fourth consecutive year of record earnings for TBC. He remarked: ''Extending this record is gratifying, particularly since revenues for 1989 were down slightly due to some short-term shifts in our base of distributors. We absorbed those changes during the year and still achieved improved profitability.

''TBC continues to have a strong balance sheet with total stockholders' equity of nearly $71 million at the close of 1989 and no long-term debt. Our sound finances enabled us to repurchase approximately 1.5 million shares during the year which, in turn, favorably affected the growth in earnings per share.''

Bruce said: ''The fundamental trend is up in TBC's share of the automotive aftermarket. We have secure product sourcing relationships, an efficient distribution system and steady growth in the underlying demand for the products we market.''

TBC Corp. distributors of products for the automotive replacement market. The company's common shares are traded over-the-counter under the

National Market System symbol TBCC.

EMERYVILLE, CA (FEB. 6) BUSINESS WIRE - Ortho Diagnostic Systems Inc., a Johnson & Johnson company, and Chiron Corp. (NASDAQ:CHIR) Tuesday announced that they have completed their purchase of most of the AIDS and hepatitis blood screening business of E.I. du Pont du Nemours & Co.

DuPont's business, which markets AIDS and hepatitis tests to the blood-banking industry and in 1989 had sales of more than $40 million, will be combined with the Ortho and Chiron AIDS and hepatitis testing business. The newly combined business will be one of the major suppliers of these tests worldwide.

Ortho and Chiron are currently introducing the first test for antibodies to hepatitis C (formerly non-A, non-B hepatitis) in Europe and Japan. The two companies filed applications in August 1989 to manufacture and market the test in the United States.

#90037b0646 02/06/1990 ~Business Wire

STAMFORD, CT (FEB. 6) BUSINESS WIRE - Pitney Bowes Inc. Tuesday reported full-year 1989 revenue of $2.876 billion, up 12 percent from $2.576 billion in 1988.

Net income, including the effects of previously announced transition costs and the change in accounting for income taxes, increased to $252.8 million or $3.19 per share, up 4 percent from $243.4 million, or $3.08 per share, in 1988.

The company's fourth-quarter revenue in 1989 increased 13 percent to $812 million from $717.1 million in the fourth quarter of 1988.

Fourth-quarter 1989 revenue included $421.8 million from sales, up 13 percent from $372.3 million in the fourth quarter of 1988; $280.1 million from rentals and financing, up 14 percent from $245.4 million; and $110.1 million from support services, up 11 percent from $99.4 million.

Full-year 1989 revenue included $1.4 billion from sales, up 7 percent from $1.304 billion in 1988; $1.047 billion from rentals and financing, up 17 percent from $897.6 million; and $428.9 million from support services, up 15 percent from $374.2 million.

Fourth-quarter net income in 1989, which included the effect of transition costs related to a program announced on Dec. 12, 1989, was $9.5 million, or 12 cents per share, compared to $78.9 million, or 99 cents per share in the fourth quarter of 1988.

The transition costs of $110 million were reflected as a one-time, pretax charge to earnings in the fourth quarter of 1989. The company's transition action plans include a worldwide workforce reduction of approximately 1,500 positions over a three-year period, a change of employee skill mix, establishment of a dedicated copier division, and consolidation of distribution centers, as well as streamlining of administrative systems and equipment service organizations. The company expects operating expense reductions over the next three years to exceed total transition costs.

Fourth-quarter 1989 income from continuing operations was $5 million, or 6 cents per share, reflecting the transition costs and excluding income from the Wheeler Group, the direct mail marketer of business supplies, which the company has announced it will sell. Fourth-quarter 1988 income from continuing operations, which also excludes income from the Wheeler Group, was $74.8 million, or 94 cents per share.

Pitney Bowes is a $2.9 billion multinational manufacturing and marketing company which provides mailing, shipping, copying, dictating and facsimile systems; item identification and tracking systems and supplies; mailroom, reprographics and related management services; and product financing.

#90037b0653 02/06/1990 ~Business Wire

RICHARDSON, TX (FEB. 6) BUSINESS WIRE - ProNet Inc. (NASDAQ/NMS:PNET) Tuesday announced revenues and net income for the fourth quarter and year ended December 31, 1989.

For the fourth quarter of 1989, revenues increased to $3.6 million from $2.9 million reported for the quarter ended December 31,1988. The net loss for the quarter decreased from $234,000 or 6 cents per share in 1988 to $57,000 or 2 cents per share in 1989. Operating cash flow increased to

$704,000 vs. $419,000 for the same period in 1988, a 68 percent increase.

Revenues for the year ended December 31, 1989 increased to $12.8 million from $10.8 million recorded for the previous year. The net loss for 1989 was $513,000 or 14 cents per share compared to $122,000 or 3 cents per share loss for 1988. Operating cash flow increased to $2.4 million in 1989 from $1.7 million in 1988, a 41 percent improvement.

The decreases in net income resulted, as expected, from the increased cost of sales and services, sales and marketing expenses and general and administrative expenses associated with the New York City and Boston paging operations and the first full year of operations of the company's ETS subsidiary.

Commenting on the results, Jackie Kimzey, CEO and president of ProNet Inc. stated, ''We are pleased by the company's continued revenue growth during fiscal 1989. We remain confident that the investment in our 1989 expansion has solidified the appropriate foundation and structure for ProNet's future success.''

ProNet Inc., founded in 1982, was the first to supply and operate integrated paging systems and solutions designed exclusively for medical institutions and health care professionals. Today ProNet provides communication products and services worldwide for special, unique or critical applications in large and/or complex organizations.

BARBERTON, OH (FEB. 6) BUSINESS WIRE - Babcock & Wilcox has received a $7 million contract to provide six MPS pulverizers to replace existing equipment at Iowa Public Service Co. for the Neal Station Unit 3 near Sioux City, Iowa.

The new pulverizers feature improvements in capacity, reliability, maintenance and safety.

Pulverizers are used to grind coal into a fine powder to optimize combustion efficiency when fired in a utility coal-fired boiler. Each pulverizer at Neal 3 will be capable of grinding 130,000 lbs. of coal per hour.

The order, which was acquired after a competitive bidding process, includes supply of six (6) MPS-89 type coal pulverizers for the plant's 515-megawatt boiler, including seal air systems and accessories.

Engineering and project management will be performed at B&W's Barberton location. Manufacturing will be done in Paris, Texas, with field erection completed by B&W Construction Co.

The six pulverizers are scheduled for delivery and erection by late September 1990.

Babcock & Wilcox is a major operating unit of McDermott International Inc. a leading worldwide energy services company. McDermott and its subsidiaires provide engineering and construction services for industrial and utility facilities onshore, and to the oil and gas industry offshore. They also manufacture steam-generating equipment, defense products and tubular products.

LONDON (FEB. 6) BUSINESS WIRE - Bankers Trust Co. and Digital Equipment Corp. Tuesday announced the successful launch of Bankers Trust's newly installed digital trading room at their European Headquarters in Broadgate London.

The new system, considered to break new ground in the large-scale application of digital trading technology, replaces the video (or analog) system which has been in use for many years. It consists of 250 trading stations in one large trading room interconnected by a DECnet based local area network. Based on Digital's DECtrade platform, the system utlilised microVAX 2000 and 3500 systems to deliver the data to the 250 VAXstation 3100-based trader workstations to display, monitor and analyse realtime market data from multiple sources.

The project, which was begun in 1988 was jointly developed by Bankers Trust and Digital. Its new communication technology provides every trader on the floor with the capability of receiving the same market information simultaneously. In addition each trader has the individual facility to receive and manipulate the data most relevant to his or her own business.

Geoff Penney, manager of technological strategic planning for Bankers Trust said ''Thanks to this architectural platform concept, we were able to integrate the trader workstation software developed by Bankers Trust onto the distribution software developed by Digital, maximising the technology strengths of both companies.

Digital Equipment Corp., with headquarters in Maynard, Mass., U.S.A. is

the world's leading manufacturer of networked computer systems and associated peripheral equipment and the leader in systems integration with its networks, communications, and software product.

Banker Trust Co. is a global merchant bank with assets of $55.7 billion. It is one of the most profitable companies trading in capital markets with trading revenues of $581 million in 1989, and last year, was nominated by Computerworld Magazine as the premier U.S. bank in the use of information systems.

SAN JOSE, CA (FEB. 6) BUSINESS WIRE - Frame Technology Corp. announced that it has selected Paul R. Robichaux as president, chief executive officer, and chairman of the board, effective Tuesday.

Robichaux joins Frame from Boole & Babbage Inc., where he was executive vice president and chief operating officer.

''I was attracted to Frame because it has developed an industry-wide reputation for delivering high-quality products and support,'' said Robichaux.

Robichaux succeeds Steven Kirsch, co-founder of Frame. Kirsch earlier announced that he was stepping down as president, CEO, and chairman to assume the role of vice president of new products.

Kirsch, who previously founded Mouse Systems, said, ''Paul is a great choice to direct Frame's growth in the future. With his extensive management experience and knowledge of the software industry, he can help the company move into its next stage of growth. In return, I can resume those activities that I do best -- identifying opportunities and putting together the elements needed to turn them into a successful business.''

Frame is the supplier of FrameMaker, the leading workstation publishing software available for multiple graphical interfaces on more than 20 different computers including Sun, Hewlett-Packard, Apollo, NeXT, MIPS, Pyramid, Matsushita, Silicon Graphics and Altos.

Robichaux, 46, joined Boole & Babbage, a leading supplier of IBM mainframe systems software, in 1980. He held a number of operations and finance

posts there during his nine-year tenure, and also supervised marketing and international operations. He directed the company through its initial public offering in 1984. He has a bachelor's and a master's degree from Louisiana State University.

Frame is a leading worldwide supplier of workstation publishing software. Founded in 1986, Frame has sold over 14,000 licenses of its FrameMaker software since the product's introduction in March 1987. Frame markets its products worldwide through distributors, VARs, OEMs and directly to end users. The privately held company is located at 1010 Rincon Circle, San Jose, Calif., 95131.

#90037b0664 02/06/1990 ~Business Wire

SUNNYVALE, CA (FEB. 6) BUSINESS WIRE - Telebit Corp., a leading provider of high-speed dial-up connectivity solutions, Tuesday introduced TMS 10, a network management system specifically designed for high-performance dial-up networks.

The TMS 10 system integrates telecommunications tools with data communications technology to provide dial networks with cost-effective security, management and control features.

Two types of security are supported by TMS 10, administration security and connection security. To protect unauthorized access at the network manager's station, an eight character password is required.

Connection security is provided by password identification and callback functions. After the remote modem user's ID and password are verified, TMS 10 then disconnects the call, seizes an appropriate modem, and calls a pre-defined telephone number associated with the user.

Thus unauthorized access is eliminated. Equally important, entry to critical host applications and databases can be restricted. Callback identifications can be programmed to limit the systems available to each user.

Capable of configuring, copying and verifying individual or clusters of local rack or remote modems, TMS 10 provides easy configuration of an entire network of modems from a central site, taking the burden off the enduser and placing it in the hands of the network administrator.

Clusters of modems can be grouped by assigning unique characteristics, and then configured as a group. Configurations can be automatically verified by polling the network modems -- as a whole or in groups -- at timed intervals scheduled by the network administrator.

The configurations are checked, confirmed and the network administrator notified if an adjustment is required. Manual configuration is also possible with Telebit's TTY (Terminal Emulation) mode, which allows TMS 10 to communicate directly to a rack or remote modem instead of through a serial line.

The TMS 10 monitors the status and usage of all network modems in real time, using color to highlight activities and events.

Telebit markets its products worldwide through original equipment manufacturers, value-added resellers, distributors and direct sales to major national accounts.

SEATTLE (FEB. 6) BUSINESS WIRE - Arctic Alaska Fisheries Corp. (NYSE:ICE) Tuesday reported record revenues for the year ended Dec. 31, 1989, but lower earnings due to a fourth quarter loss.

Revenues for the year grew 19 percent to $143.4 million from $120.7 million in 1988. Net income was $12.5 million, or 83 cents per share, compared with 1988 earnings of $13.9 million and $1 per share. Average shares outstanding for 1989 were 8 percent higher than in 1988, accounting for about half of the per-share earnings decline.

Fourth quarter revenues were $27.5 million vs. $21.4 million in the comparable 1988 period. The company posted a loss of $1.4 million, or 8 cents per share, compared with earnings of $418,000, or 3 cents per share, in the year-ago quarter. Average shares outstanding for the 1989 fourth quarter were 16,468,565 vs. 14,459,989 in the 1988 quarter.

''Arctic Alaska's continued 1989 revenue growth came from greater fleet capacity as well as the addition of sales of value-added products from our Seattle seafood processing plant,'' said Terry J. Baker, president and chief executive officer.

The fourth quarter loss was attributed to softening fish prices toward the end of the year and a greater-than-expected number of vessels being out of

service for repairs in December.

Arctic Alaska Fisheries Corp. is a vertically-integrated seafood products company and the largest fishing and at-sea processing company in the United States. Its vessels operate year-round in the U.S. 200-mile zone off Alaska catching crab and bottomfish such as pollock, cod, red snapper and sole.

Arctic Alaska processes its catch both at sea on large factory trawlers and at a Seattle plant focused on value-added products. The company sells a variety of seafood products under the Arctic Ice trademark in the United States, Japan and other export markets.

#90037b0667 02/06/1990 ~Business Wire

LOS ANGELES (FEB. 6) BUSINESS WIRE - In one of the industry's major casting coups, award-winning director, Franco Zeffirelli, has attracted Mel Gibson and Glenn Close to star in ''Hamlet,'' based upon William Shakespeare's epic drama.

All North American rights to the picture have been acquired by Nelson Entertainment, it was announced today by Barry Spikings, President and Chief Operating Officer, Nelson Entertainment, and Rick Finkelstein, President of Production, Nelson Films. ''Hamlet'' will receive a major theatrical release in North America. Nelson Entertainment has multiple-picture theatrical distribution agreements with Orion Pictures and Columbia Pictures.

''Franco introduced an enormous movie-going audience to Shakespeare with his exciting and revolutionary version of ''Romeo & Juliet,'' which won accolades worldwide including two Academy Awards, and achieved approximately $40 million at the box office in 1968,'' commented Messrs. Spikings and Finkelstein. ''That success was achieved with a then unknown cast. This time we have the tremendous benefit of some of the most talented and important artists available.

''Regarded by many as Shakespeare's most powerful play, this tale of heroism and evil will be framed by Zeffirelli's remarkable talent for visual imagery. The budget allocated allows him to shoot in authentic medieval locations of stunning savagery and beauty.''

NHI Nelson Holdings International Ltd. (Stock symbol NNH: American/Toronto/Vancouver Stock Exchanges) is the holding company for the Nelson Entertainment Group whose subsidiaries include Nelson Films, a film production company; Nelson Entertainment Home Video, a North American home video distributor; Nelson Entertainment International, which markets theatrical, video and television rights outside North America; Nelson Television, a television production company involved in all forms of television production; and for 68 percent owned Nelson Vending Technology Limited, which currently operates as a videocassette retailer in Toronto utilizing a network of automated dispensing terminals.

#90037b0669 02/06/1990 ~Business Wire

GREAT NECK, NY (FEB. 6) BUSINESS WIRE - BRT Realty Trust (NYSE Symbol:BRT) Tuesday announced results for the first quarter ended December 31, 1989.

Revenues for the first quarter ended December 31, 1989 were $8,182,000 as compared to revenues of $8,468,000 reported for the same period in the prior fiscal year. Net income for the first quarter was $3,721,000, or 50 cents per share, compared to $4,539,000, or 62 cents per share, for the quarter ended December 31, 1988.

Earnings for the first quarter of fiscal 1990 are after a provision for possible losses of $500,000, whereas there was no such provision in the previous comparable period. The weighted average number of shares outstanding during the first quarter of fiscal 1990 was 7,406,649 compared to 7,328,230 during the first quarter of fiscal 1989.

Commenting on the results for the first quarter, Israel Rosenzweig, President of BRT Realty Trust, noted that revenues for the first quarter of fiscal 1990 had declined as compared to the first quarter of fiscal 1989 primarily due to a general softness in the real estate markets historically serviced by the Trust. This softness has resulted in a reduction in loan demand in the Trust's basic market area and, therefore, a reduction in the loan portfolio and an increase in non-earning real estate loans.

The 3 percent decrease in revenues and the 14 percent increase in expenses resulted in an 18 percent decrease in net income from $4,539,000 in 1989 to $3,721,000 in 1990. The increase in expenses was caused primarily by the $500,000 provision for possible losses in the 1990 quarter and an increase in interest expense. These expenses were offset in part by a decrease in general and administrative expense.

Rosenzweig stated that due to the general softness in the northeastern real estate markets, the Trust has expanded its real estate lending activities to certain Metropolitan areas in Texas. He also noted that the Trust's significant capital base should enable it to take advantage of opportunities as they arise.

BRT Realty Trust is a mortgage-oriented real estate investment trust (REIT) specializing in short-term mortgage lending.

SALT LAKE CITY (FEB. 6) BUSINESS WIRE - Equity Oil Co. (NASDAQ:EQTY) Tuesday reported 1989 net income of $1,586,997, up 265 percent from net income of $434,924 in 1988.

Revenues in the year ended Dec. 31, 1989, reached $15,350,029, as compared with $12,678,362 in the prior year. On a per share basis, earnings were 13 cents in 1989, compared with earnings per share of 4 cents in 1988.

Net income for the fourth quarter was $544,569, or 4 cents per share, compared to $378,422, or 3 cents per share, for the fourth quarter of 1988. Revenues for the fourth quarter were $4,113,299, compared to $2,930,900 for the fourth quarter of 1988.

According to Fred H. Evans, president of Equity Oil, ''The higher net income and revenues for the fourth quarter and full year 1989 were a direct result of a 25 percent rise in the average price received for oil per barrel from $15.08 in 1988 to $18.87 in 1989.''

Evans added that oil production for 1989 totaled 665,237 barrels, a 2 percent decrease from 1988 production of 678,613 barrels while gas production increased 19 percent from 913,569 million cubic feet in 1988 to 1,083,178 million cubic feet in 1989.

Converting gas to oil on a 6,000 cubic feet per barrel equivalent basis, gas production represented 21 percent of total production in 1989 vs. 79 percent for oil.

Lease operating costs increased to $6,516,504 in 1989 from $6,039,912 in 1988. Cash provided by operating activities for the full year increased 73 percent to $5,458,256 from $3,146,508 in 1988.

Commenting further, Evans stated: ''We are looking at the current year as

well as the new decade with a growing sense of optimism. On an industry basis it appears that we are seeing a new level of stabilization and a firming trend in oil and gas prices.

Equity Oil Co., headquartered in Salt Lake City, is an independent oil and gas exploration and development company with operations in nine western states and Canada. In 1988, the company ranked 21st among U.S. independents in total oil reserves and ranked 96th in oil production among all U.S. public companies.

LOUISVILLE, KY (FEB. 6) BUSINESS WIRE - Rally's (NASDAQ: RLLY), the Louisville-based double drive-through restaurant chain, Tuesday reported record sales and profits for the quarter and six months ended Dec. 31, 1989.

The company reports results on both an actual and pro forma combined basis. Pro forma figures include company results plus those from franchised restaurants in the New Orleans, Birmingham, Ala., and central Indiana markets, which were acquired Oct. 19, 1989.

For the quarter ending Dec. 31, 1989, pro forma results showed very significant gains over the prior year. Pro forma combined revenues for the quarter ending Dec. 31, 1989, increased 32 percent to $16.4 million, compared with $12.4 million during the prior period.

Pro forma combined net income before an extraordinary credit increased 82 percent to $1,023,000 or 15 cents per share, compared with $562,000 or eight cents per share last year.

For the six months ending Dec. 31, 1989, pro forma combined revenues reached $32.8 million, a 34 percent increase over revenues of $24.5 million in the comparable six months in the prior year.

Pro forma combined net income before extraordinary credit advanced 76 percent to $2,166,000, or 32 cents per share, compared with $1,228,000, or 18 cents per share for the same period in the previous year.

Actual results also showed significant gains over the like period in the prior year. Actual revenues for the quarter were 111 percent higher at

$15.1 million, compared with $7.2 million the prior year.

Actual earnings for the quarter, after a pro forma adjustment for income taxes, reflected net income of $844,000, or 14 cents per share, compared with $332,000, or eight cents per share, before an extraordinary credit of six cents per share, for the same period in the prior year.

Actual revenues through mid-year were 80 percent higher at $25.3 million compared with $14.1 million, and pre-tax income was $2.5 million compared with $1.2 million.

Rally's operates and franchises 200 double drive-through, quick- service hamburger restaurants in 23 states. The restaurants provide extremely fast service and feature a low-priced, high-quality limited menu.

SUNNYVALE, CA (FEB. 6) BUSINESS WIRE - Xerox Corp. Tuesday announced ViewCards, a multi-purpose "hypertext" software tool that enables information to be accessed similar to the way people naturally think.

Using the familiar metaphor of three-by-five note cards, ViewCards software organizes and show relationships among large amounts of computerized textual and graphical information.

Based on advanced hypertext capabilities, ViewCards can create structured methods of learning new information, and enable users to arrange and rearrange thoughts, ideas, topics and information as developed.

Users who would benefit from ViewCards include business and technical professionals such as analysts, researchers, writers, and trainers who could use the software for applications such as personal information management, research and analysis, document creation, and training.

ViewCards is sold directly by the Xerox Integrated Systems Operations sales force in the United States. The software is priced at $595; quantity discounts are available. Order taking begins immediately with initial customer shipments in the first quarter of 1990.

#90037b0675 02/06/1990 ~Business Wire

WHITE PLAINS, NY (DEC. 6) BUSINESS WIRE - IBM Tuesday announced three new models of the Application System/400(a) (AS/400) that give customers increased performance and an extended growth range within the family of popular business computers.

The new AS/400 models C10, C20 and C25 offer customers more information processing and storage capability than the previously announced AS/400 B10 and B20.

The new models are the same physical size, slightly smaller than a two-drawer file cabinet, but use faster processors and faster and smaller disk storage units.

The new Application System/400 Model C25 is designed for customers who want to add more users or who require more information storage and processing capability than was available on the B10 and B20. This makes the AS/400 Model C25 an ideal growth path for B10, B20, C10 and C20 users or an attractive system for new customers.

The Application System/400 C10, C20 and C25 models can offer customers relative system performance increases(a) of up to 30 percent, 80 percent and 120 percent respectively over the B10.

This increased performance results from the combination of enhanced system processors, more main memory and use of the industry's fastest, highest-capacity, and most reliable 3.5-inch direct access storage device (DASD) available today.

Each new model has a minimum of 8 megabytes main memory to run applications -- double the standard memory available on the B10 and B20. The memory can be increased to 40 megabytes on the C25 model, a five-fold increase within the new models. Customers can expand disk storage to 2.5 gigabytes (billion bytes), about equal to 1.25 million double-spaced typed pages of information, with an expansion unit available for the C20 and C25 models.

The new DASD unit provides 320 megabytes of storage -- the most of any available 3.5-inch DASD unit. It sets the industry standard in speed of locating data in the unit with an average seek time of 12.5 milliseconds (12.5 thousandths of a second).

SAN JOSE, CA (FEB. 6) BUSINESS WIRE - Digital Microwave Corp. (NASDAQ/NMS:DMIC) announced Tuesday that DMC Telecom Canada, its wholly owned Canadian subsidiary, was awarded a $5.9 million contract from Bell Cellular Inc., a subsidiary of BCE-Mobile Inc. of Canada.

This contract is for the supply of 10, 18 and 23 GHz digital microwave radios that will be used by Bell Cellular in their cellular network. Shipments will begin immediately and are scheduled for completion in calendar year 1990.

''The demand for increased and improved cellular service requires an aggressive construction program and the products and services offered by DMC Telecom Canada will help us make this program successful,'' stated Joseph P. Sarnecki, vice president of Network Services, Bell Cellular Inc.

''We are pleased to be chosen by Bell Cellular for the second year as their prime supplier of short-haul digital microwave radio. We are a major supplier to the cellular market both in North America and overseas and have developed products focused on the needs of the cellular providers '' commented William E. Gibson, president and chief executive officer of Digital Microwave Corp.

Headquartered in San Jose, Digital Microwave Corp. is a leading supplier of high performance short-haul transmission products to domestic and international markets.

Digital Microwave Corp. is located at 170 Rose Orchard Way, San Jose, 95134.

#90037b0683 02/06/1990 ~Business Wire

SAN JOSE, CA (FEB. 6) BUSINESS WIRE - Digital Microwave Corp. (NASDAQ:DMIC) announced Tuesday the addition of a new generation 2 GHz digital microwave radio to its M Series product line. The DMC 2M provides up to four DSI lines and is the first fully synthesized 2 GHz digital radio on the market.

The DMC 2M will initially be available to the common carrier market

including cellular telephone providers. This radio is ideally suited for cellular network applications because it is easy to install and can be moved and reconfigured quickly as the market dictates. In addition, common carriers will appreciate the cost-effectiveness of the DMC 2M for new customer demands and emergency restoration.

Key features of the DMC 2M are: built-in multiplexer; forward error correction coding which enhances performance and system availability; very high system gain of up to 112 dB to ensure operation under adverse conditions; sophisticated built-in diagnostics including local and remote loopback testing; DMC Net Network Monitoring Capability for control of an entire network from one terminal; and DMC's standard five-year warranty.

"This new product line enhances our product offering to the cellular providers and reaffirms our commitment to meet the needs of our customers by providing products with superior flexibility, performance and reliability," commented William E. Gibson, president and chief executive officer of Digital Microwave Corp.

SYLMAR, CA (FEB. 6) BUSINESS WIRE - At a hearing on Feb. 5 in the Court of Chancery in the state of Delaware, the court approved a settlement agreement and dismissed the shareholder litigation against the company and certain members of its board of directors. The court order of dismissal and judgment will become final after 30 days.

The shareholders of Sierracin, at its annual meeting in January, approved the merger agreement between SCS Acquisition Corp. and the company. The merger is subject to final approval of the shareholder litigation.

At the time the court approval becomes final, the merger agreement provides for a merger of a subsidiary of SCS into Sierracin in which the stockholders will receive $15 in cash and whereby Sierracin will become a privately held company.

Sierracin Corp., which is listed on the American Stock Exchange, manufactures high-technology products for the aerospace and industrial markets.

AKRON, OH (FEB. 7) BUSINESS WIRE - Summit Bancorp announced Tuesday the initial public offering of 600,000 shares of common stock to capitalize Summit Bank, the first entirely new bank founded in Akron in more than 50 years.

The bank is scheduled to open at 2680 W. Market St. this summer, David C. Vernon, Summit Bancorp president, said.

The shares are being offered by the company at a price of $25 per share through its directors, officers and employees. Atlanta Securities and Investments Inc., a firm that specializes in helping new banks raise capital, will assist the company in marketing the shares.

After the offering is completed, the stock will be listed on the over-the-counter exchange for trading, enabling the investing public to buy or sell shares of stock in the open market.

Vernon, former senior vice president of Bank One Akron and the Firestone Bank, announced plans to form Summit Bank last summer.

The bank will be dedicated to providing personalized service to small and mid-sized businesses, their owners and employees, executives, professionals and professional corporations, as well as individuals who appreciate emphasis on personal service.

Preliminary approval to organize the bank was granted by the Ohio Department of Commerce, Division of Banks on Oct. 26. The bank has applied to the Federal Deposit Insurance Corp. for federal deposit insurance coverage.

Service as directors of Summit Bancorp and Summit Bank are Milo E. Chelovitz, vice president, Systemation Inc.; Charles E. Conner, president, Alcon Tool Co.; Philip P. Lutz Jr., retired banker; Karl A. A. Reuther, president, Reuther Mold and Manufacturing Co., and Jerry F. Whitmer, Brouse & McDowell, LPA.

Copies of the prospectus may be obtained from Summit Bancorp, 2680 W. Market St., phone: 864-8080.

#90037b0701 02/06/1990 ~Business Wire

WASHINGTON (FEB. 6) BUSINESS WIRE - Northern Telecom (NYSE:NT) Tuesday announced DPN Advisor, an enhanced data network management offering for the DPN-100 digital data packet networking system.

DPN Advisor is a network management application that provides enhanced real-time control and fault management for DPN-100 networks.

''DPN Advisor enables our DPN-100 customers to implement and operate their networks more quickly and efficiently,'' said William Pfeiffer, vice president, Data Networks, Northern Telecom Inc. ''It's easy to use, and it greatly increases the productivity of our customers' network operating personnel.''

DPN Advisor was announced and demonstrated at the Communication Networks '90 Conference and Exposition, held at the Washington Convention Center.

DPN Advisor includes a graphic-based user interface, multiple window capability, on-line help, and detailed, on-line documentation.

The intuitive user interface and extensive, on-line assistance reduce training time and increase productivity. Multiple windows allow network managers to perform more than one operation at a time.

DPN Advisor gathers and consolidates status information from the entire DPN-100 network, and produces network maps and graphic displays of network status and alarms in real time. Network topology can be displayed graphically to four levels of detail.

Multiple DPN Advisor workstations can be located throughout the network, with separate or overlapping spans of control. Network managers can set preferences for their own operating environments. Multiple security levels are available to provide a specific set of functions for each network manager.

An optional expert system -- DPN Expert Advisor -- correlates multiple alarms to determine the most likely problem. This method eliminates the need for a network manager to sort through multiple alarms to isolate critical problems.

DPN Advisor, including software and a Sun Microsystems Series 3 UNIX workstation, is available for delivery in April 1990. DPN Expert Advisor software is available for delivery in September 1990. Pricing is to be determined.

Northern Telecom has installed nearly 60 public and private data packet networks in more than 30 countries, including Australia, Austria, Belgium, Canada, Finland, Hong Kong, Ireland, Norway, Portugal, Sweden, Switzerland Turkey, the United Kingdom, the United States and West Germany.

Northern Telecom is the leading global supplier of fully digital telecommunications switching systems. The company provides products and services to the telecommunications industy, businesses, universities, governments and other institutions worldwide. Northern Telecom Inc., with its headquarters in Nashville, Tenn., employs more than 22,000 people across the United States.

#90037b0702 02/06/1990 ~Business Wire

NORWALK, CT (FEB. 6) BUSINESS WIRE - The ROLM Co. announced Tuesday functional enhancements for its 9750 Business Communication System that offer customers performance increases of up to 150 percent.

ROLM, a joint venture of IBM Corp. and Siemens Corp., also announced an array of new products, services and programs aimed at making its customers' business communications systems more productive, cost-effective and easier to maintain as they enter the 1990's including:

- Enhancements to its call center operations -- more than double the number of Automatic Call Distribution (ACD) agents previously supported, and a new version of ROLM's CallStat product for smaller centers;

- More than double the number of lines now available for customer service agents to support IBM's CallPath;

- A Complementary Application Program under which ROLM will market products from other vendors in order to significantly expand the company's range of business applications available to customers;

- A Cooperative Marketing Program, which will enable ROLM marketing representatives to market designated IBM telecommunications products to customers;

- The ROLMphone 240E - a new, high-function, application-oriented telephone with display technology;

- An enhanced service strategy to improve remote support of ROLM 9751 CBXs;

- Integration of the ROLM PhoneMail system with AT&T's Centrex No. 5ESS switch.

The increase in 9750 function result from a combination of leading-edge hardware and software technology to further utilize the inherent capabilities in the system's advanced architecture.

#90037b0703 02/06/1990 ~Business Wire

WASHINGTON, D.C. (FEB. 6) BUSINESS WIRE - Bytex Corp., based in Southborough, Mass., has joined forces with Tektronix in Mountain View, Calif., to provide customized test functionality for managing remote data centers.

Under the agreement, Tektronix, a leading manufacturer of test equipment, will supply Bytex with text capability in the form of modified protocol analyzers, TIMS testers and T1 analyzers.

This will expand the Bytex Remote Center Management capabilities by combining the benefits of testing and network control provided by Bytex electronic matrix switches. The packaging of hardware and software products allows users to isolate, identify and diagnose network problems at remote locations without leaving the central control facility.

The Bytex UNITY Test Facility and related Bytex products are being displayed and demonstrated at ComNet '90 now through Feb. 8 in Bytex Booth 1320.

The union of matrix switches and test equipment provide benefits which neither component can individually accomplish. Matrix switching not only facilitates access to the multitude of lines and devices at a remote communications center, but also provides the full benefit of service restoration at these sites in the event of failure.

Test equipment provides the ability to identify and isolate where a problem exists.

Network availability is raised when this power is available for remote control of distant centers. Results include speedy detection, diagnosis and repair of network problems while saving critical technical staff time.

The Bytex UNITY Test Facility provides users broad test and diagnostic capability for monitoring and troubleshooting datacom networks. The dual-port protocol analyzer capability is offered for simultaneous monitoring of two independent interfaces.

As a network trouble-shooting device, the UNITY Test Facility offers central control with easy-to-use menus with integrated ''help'' prompts to check the network at physical, data-link or packet levels. An elementary programming feature enables emulation of numerous datacom devices.

Priced at about $10,000 for a fully featured system, the UNITY Test Facility is available after March 31. It comes complete with X.25 and SNA analysis capabilities and offers full remote control communications.

''The on-site testing function enhances our remote test capability and strengthens our leadership in the control of an on-line transaction processing system,'' says George R. Kushin, Bytex marketing vice president.

Remote Center Management makes the entire network resistant to the failure of any single component at either a central or remote site. The matrix switching feature permits a spare component to be inserted to immediately replace a failed component. There are no service delays while a technician takes a spare out to the remote site.

Bytex designs, manufacturers, markets and supports fault-tolerant electronic matrix switching systems and related data communications products. Bytex is the leading worldwide supplier with an installed base of more than 4,000 switches. According to International Data Corp., Bytex has approximately 36 percent of the U.S. market. Bytex is traded on the NASDAQ National Market Systems under the symbol BYTX.

#90037b0705 02/06/1990 ~Business Wire

ATLANTA (FEB. 6) BUSINESS WIRE - Equifax Inc. (NYSE:EFX) reported Tuesday that operating revenue increased 13 percent and operating income 12 percent in 1989.

Revenue for the international business-information firm was $840,283,000 in 1989, compared with $743,078,000 in 1988. Operating income was $66,983,000 compared with $59,996,000.

The company said the 1989 operating income was reduced by $14,656,000 for an early-retirement program initiated in the fourth quarter. A similar

program and other items reduced operating income in 1988 by $2,455,000. Excluding those unusual costs, Equifax's operating income was 31 percent higher in 1989 than in 1988.

Net income for 1989 was $35,663,000 (73 cents a share) compared with $33,956,000 (73 cents a share) before adjusting for an accounting change mandated by the Financial Accounting Standards Board. 1989 per-share net reflects an 18 cent charge resulting from the early-retirement program mentioned above.

In the fourth quarter, operating revenue increased 11 percent from $199,768,000 to $221,133,000. However, the early-retirement charge resulted in a decrease in fourth quarter operating income from $14,886,000 in 1988 to $8,486,000 in 1989. Net income, including the cost of voluntary early-retirement programs and other unusual costs, was $4,414,000 (9 cents a share), compared with $8,420,000 (17 cents a share).

C.B. Rogers Jr., president and chief executive officer of Equifax Inc., said the voluntary early-retirement programs were part of a continuing effort by the company to control costs and increase efficiency. That effort also included divestiture of two subsidiary companies in 1989.

Rogers said the most dramatic improvement in profit margins was in the company's insurance-related services. He also cited the exceptionally good performance of Equifax marketing services and Equifax Canada as contributors to the 1989 results.

Equifax Inc., based in Atlanta, provides information for business decisions to business, industry and government throughout North America. Last week, the company announced formation of a joint venture with a British firm to provide similar services throughout the United Kingdom.

AGOURA HILLS, CA (FEB. 6) BUSINESS WIRE - Bishop Inc. (NASDAQ: BISH) Tuesday announced that John J. Theiss has been named as its president and chief executive officer. Theiss replaces Kenneth J. Kay, who has accepted a position with another company. Kay will, however, retain his seat on the board of directors.

Richard M. Drysdale, chairman of the board, stated that Theiss brings to Bishop many years of experience as a chief executive officer with advanced computer systems technology companies. Additionally, his sixteen years with Xerox Corp., a number of which were associated with Xerox's

engineering marketing efforts, lend to a rapid understanding of the company's markets and needs.

According to Drysdale, his strong management and marketing background and familiarity with the company's product lines are expected to enhance the operating results of the company, which have shown improvement in recent quarters.

Bishop Inc.'s operating companies are primarily engaged in the marketing and distribution of engineering, architectural, and design products.

#90037b0711 02/06/1990 ~Business Wire

NOBLESVILLE, IN (FEB. 6) BUSINESS WIRE - Firestone Industrial Products Co. will concentrate its resources and management expertise on the manufacture and marketing of air springs for use in the transportation and manufacturing industries and will withdraw from production and sales of custom molded products.

The company also will relocate its corporate headquarters staff of about 40 employees from the plant complex here to a yet-to-be-determined office location in the greater Indianapolis area.

Firestone officials met last week with leaders of the United Rubber Workers International and with URW Local 138 here to discuss the effects this decision would have on the Noblesville workforce.

"Firestone is the world's leading supplier of air springs," said V. James Sardo, president of Firestone Industrial Products Co. "We now will direct all our efforts to these products which are marketed under the Airide, Airail, Airmount, Airstroke, and Ride-Rite brand names."

Sardo said that molded goods, which account for only about 16 percent of the company's revenues, include products such as tank track, rubber pads, cushions, and bushings.

"Firestone has only a small share of the molded goods market and for us to be competitive in this business, we would need to invest considerable funds in new production processes," Sardo explained. "We firmly believe those funds should be invested elsewhere in the business with greater growth potential at increased returns."

As part of its business strategy, Firestone will phase out production of custom molded goods at its plant in Noblesville by August and consolidate production of heavy duty air springs into remaining manufacturing space

here by late 1991. It is expected that employment levels here will be reduced by about 200 hourly and 50 salaried employees.

"By focusing on the air springs businesss and relocating the corporate activities, we will create a good working environment for the plant management and hourly and salaried employees to improve employee involvement programs and to emphasize the Total Quality Control (TQC) concept in the plant," Sardo said. There currently are about 520 hourly and 230 salaried employees at Firestone's Noblesville facility.

Firestone Industrial Products Co. also has air springs plants in Williamsburg, Ky., and in Sao Paulo, Brazil, and a metal stamping plant in Dyersburg, Tenn.

#90037b0717 02/06/1990 ~Business Wire

NASHUA, NH (FEB. 6) BUSINESS WIRE - Nashua Corp. (NYSE:NSH) Tuesday announced net income for the fourth quarter ended Dec. 31, 1989, of $6.4 million, or $.68 per share, vs. last year's $8.5 million, or $.88 per share.

Sales for the fourth quarter were $232 million vs. the prior year's fourth-quarter level of $250 million.

For the year ended December 31, 1989, Nashua reported net income of $20.1 million, or $2.11 per share, on sales of $946 million. This compares with net income of $32.5 million, or $3.38 per share, on sales of $989 million in 1988.

''Softening demand in several of Nashua's markets at the beginning of the year required that we realign our businesses to these changing environments,'' said Charles E. Clough, chairman and chief executive officer. ''Adjustment of our cost structure to lower demand levels and better market conditions resulted in steady improvement in our financial performance as we moved through the year.

''During the fourth quarter, our progress was slowed by soft paper markets and the cumulative effect of a higher tax rate. These factors offset the effects of resurgent demand for rigid discs and improved results from the Office Systems and Supplies Group,'' said Clough.

The company reported that sales for the Computer Products Group in the fourth quarter were up year-to-year for the first time since the fourth quarter of 1988. Volume expanded sharply in both small and large rigid discs, with thin-film shipments well ahead of a year ago. Operating

income increased from the 1988-fourth-quarter levels primarily due to the higher demand.

For the year, Computer Products' sales declined due to weak first half demand. Operating income was lower year-to-year despite the strong second half performance. The small rigid disc product line was the largest contributor to the year's operating income. Large rigid discs saw sharply higher demand during 1989, resulting in margin improvement.

Nashua Corp. is a multinational company providing a diverse mix of products and services in four business segments: office systems and supplies, coated paper products, computer products and photofinishing services.

#90037b0720 02/06/1990 ~Business Wire

COLLINGWOOD, Canada (FEB. 6) BUSINESS WIRE - Keller Industries Ltd. NASDAQ: KILSF (Shares); KILWF (Warrants) (''the company'') announced Tuesday that it will be a joint venture partner in the cleaning and cement mortar lining (''CML'') of watermain pipelines in Louisville, Ky.

In addition, Keller will participate in its second Los Angeles CML contract.

The Louisville contract, valued at approximately $1.4 million, has been awarded by the Louisville Water Company to Kay and Kay Contracting, Inc., a general contractor. As Kay and Kay's 45 percent joint venture partner, Keller will be providing its state-of-the-art integrated system of equipment and project management services for the CML of approximately 38,000 feet of watermain pipeline ranging in diameter from six to 36 inches. The project is scheduled to begin in late February, 1990.

In Los Angeles, Keller will provide its equipment and project management services to Sinclair Corp., a civil engineering contractor, for CML work on approximately 10,000 feet of uniformly 60 inch watermain pipeline. The contract, valued at approximately $290,000, has been awarded by the Los Angeles Department of Water to Sinclair Corp. Work is scheduled to begin in mid-February, 1990.

Keller is also providing equipment to Sinclair Corp. for a recently commenced contract for the cleaning and lining of approximately 46,000 feet of watermain pipeline in Los Angeles.

Andrew Rivett-Carnac, president of Keller Pipeline Rehabilitation, the

company's Los Angeles-based wholly-owned subsidiary, noted, ''We look forward to exhibiting the significant advantages Keller's proprietary CML system offers to municipalities in the United States. We believe that participation in the three projects now scheduled, in which our equipment will be used exclusively on a variety of pipe size, will demonstrate the unique capabilities of Keller's state-of-the-art system.''

Kevin Murray, managing director of Keller Industries, added, ''We are gratified to have made major strides in our corporate objective to offer our services throughout the United States. We are making significant headway in establishing Keller as an innovative and expert CML provider in Los Angeles and now look forward to doing the same in Louisville. With total U.S. CML contract backlog utilizing the Keller system of approximately $2.9 million and our continued marketing efforts throughout the country, we look ahead with confidence to the growth of our operations for the remainder of the year and beyond.''

Keller Industries Ltd. repairs and rehabilitates underground watermain pipeline systems using the cement mortar lining process, a cost-effective technique which requires minimal excavation. The company designs and manufactures a proprietary system of equipment for use with the CML process.

#90037b0724 02/06/1990 ~Business Wire

NASHUA, NH (FEB. 6) BUSINESS WIRE - Digital Equipment Corp. Tuesday announced three products based on the AT&T ISDN Gateway, building upon the June 1989 agreement with AT&T to develop integrated voice and data solutions.

"As a digital telecommunications service, ISDN holds the promise of providing customers with a lower cost, more reliable and faster wide area network transmission service than most available today," said Robert G. Murray, Digital's director of networks and communications marketing.

"ISDN is a technology that helps customers get the most out of their substantial investment in telecommunications by creating a single information network designed to meet their organization's total communications requirements," said Don Hirsch, vice president, product mangement and marketing, AT&T business communication systems.

Two Digital products, ALL-IN-1 System for customer services software and DECvoice Response System voice application platform, have been enhanced to include a link, through AT&T's ISDN Gateway, between Digital's VAX computer and the AT&T DEFINITY Communications System and System 85 PBX. The link lets users take full advantage of the capabilites offered through the integration of AT&T's PBX's and Digital's computers.

Through AT&T's ISDN Gateway, ALL-N-1 System for Customer Services users and DECvoice Response System users will be able to more efficiently handle inbound calls and to faciliate the automatic switching of voice and data to an appropriate point of service.

For example, Automatic Number Identification (ANI), which is the caller's billing telephone number, is passed through AT&T's ISDN network to the PBX. The ISDN Gateway then forwards the number to the user's host computer, where it is matched to the caller's file. The customer's account information automatically appears on the service agent's screen as the call is received or transferred.

The DECvoice Response System has also been enhanced to utilize the DEFINITY Communications System and the ISDN Gateway. DECvoice incorporates three types of voice technology - digitized speech, speech synthesis, and voice recognition - enabling over-the-telephone transaction processing and access to information services.

Callers can be asked to enter their account numbers through a touch-tone or rotary-dial telephone. The number is forwarded to the host computer and the account information is automatically sent to the agent's screen.

The third product is a development tool, a software applications interface that can be used by developers to make existing call center applications capable of using the ISDN information and the telephony features of the DEFINITY Communications Sytems. In addition, the applications interface will enable business partners who offer Digital software packages to enhance their applications to take advantage of ISDN.

CAROL STREAM, IL (FEB. 6) BUSINESS WIRE - MicroEnergy Inc. (NASDAQ: MCRE), designer and manufacturer of custom switching power supplies, announced Tuesday its results for second fiscal quarter ending Dec. 31, 1989.

MICROENERGY INC. STATEMENT OF EARNINGS (unaudited)

Three Months Ended	12/31/89	12/31/88
Revenues	$2,798,732	$1,391,974
Profit (loss)/after tax	229,862	(26,938)
Earnings per share	.002	.000

Six Months Ended	12/31/89	12/31/88
Revenues	$4,677,678	$2,413,027
Profit after tax	252,871	1,026
Earnings per share	.002	.000

The revenues for the second quarter represent an increase of 101 percent, over the prior year period and a 94 percent increase over the prior year six month period. The profits were up dramatically as a result of the higher revenues and continued cost control program.

#90037b0736 02/06/1990 ~Business Wire

FRAMINGHAM, MA (FEB. 6) BUSINESS WIRE - Microsystems Software Inc. Tuesday announced PDK 1 (Professional Developer's Kit 1), an add-on product for the CodeRunneR TSR library.

Like CodeRunneR itself, PDK 1 is a library of extremely tight assembly language routines which lets developers create the smallest possible TSR programs. PDK 1 is a $99 CodeRunneR add-on option which requires CodeRunneR, and provides the following features: Serial Communications Functions LIM Support Function Print SPOOLer Functions Program Regitration Functions

SERIAL COMMUNICATIONS FUNCTIONS: Over 80 serial communications functions deliver full background capability, chained buffers, automatic software-hardware handshaking, high speed (115KBits) shared or separate IRQ, multiple serial ports, X/Y modem support and more.

LIM SUPPORT: Full set of LIM access functions. Simple function move to lim () will move the entire TSR (or code only, or data only) into LIM memory, using less than 1 KBytes of main memory. Additional support functions for multi-segment access (mixed models) provide file I/O strings and video.

SPOOLer FUNCTIONS: These functions capture printer data. Coupled with CodeRunneR's management for DOS busy, means that you can easily add print SPOOLing functions to your TSRs.

PROGRAM REGISTRATION: These functions are used for registering field copies of your application programs. With this facility you can protect your CodeRunneR programs. Unregistered copies of your programs can be set

for time limited demos (run for one hour, then unload), or provide hooks to other types of ''limited access'' controls.

HyperCOM: PDK 1 includes some sample TSR programs using PDK 1 and CodeRunneR. HyperCOM is a sample TSR which provides full background communications with X/Y modem multiple file transfer. Source code is provided for all of the sample TSR programs.

CodeRunneR: CodeRunneR is a library for creating the smallest possible TSRs, using Borland's Turbo C or Microsoft C. Some of CodeRunneR's features include: 1) automatic elimination of all initialization code and data, 2) function level granularity, 3) transparent DOS access, 4) support for up to 256 dynamic hot-keys and/or hardware/software interrupts, 5) a scheduler supporting over 10,000 events, 6) a BCD library and more.

     #90037b0740 02/06/1990 ~Business Wire
WAYNE, NJ (FEB. 6) BUSINESS WIRE - American Cyanamid Co. announced Tuesday record operating earnings in 1989.

Fourth-quarter net earnings of the company were lower versus the comparable period in 1988 primarily as a result of a previously announced provision for losses related to a foreign subsidiary.

Net earnings in the fourth quarter of 1989 were $38.5 million, or 41 cents per share, compared to $60.8 million, or 65 cents per share, in the same period in 1988.

In November of 1989, the company acquired Praxis Biologics Inc. in a transaction accounted for on a pooling of interests basis. Accordingly, the company's 1988 results have been restated, and 1989 results include the accounts and operations of Praxis.

The effect of this is to reduce 1988 full-year net earnings by 25 cents per share and 1989 net earnings by 33 cents per share, while 1988 and 1989 fourth quarter net earnings per share were reduced by 6 cents and 10 cents respectively.

As previously announced, fourth quarter net earnings were adversely affected by approximately $24 million, or 25 cents per share, related to unathorized borrowings and previously unreported losses of the company's Shulton subsidiary in Brazil.

Sales in the fourth quarter of 1989 were $1.147 billion, up 4 percent from

$1.103 billion in 1988.

Net earnings in 1989 were $292 million, or $3.12 per share, vs. $295.6 million, or $3.16 per share, in 1988.

Total operating earnings of Cyanamid's business groups in 1989 were a record $579 million, up 8 percent from $538.3 million in the previous year.

Worldwide sales in 1989 were a record $4.825 billion, 5 percent higher than the $4.592 billion in 1988, despite translation of 1989 foreign currency sales at unfavorable exchange rates vs. 1988.

In 1989, the medical group set global sales and operating earnings records for the fourth consecutive year.

Cyanamid is a research-based biotechnology and chemical company which develops medical, agricultural, chemical and consumer products and manufactures and markets them throughout the world.

MINNEAPOLIS (FEB. 6) BUSINESS WIRE - MOCON (Modern Controls Inc.) announced the newest in a growing line of thickness gauging systems, the PROFILER 320.

This on-line thickness gauge allows for edge-to-edge scanning of all types of non-metallic materials, with very repeatable gauge readings at thickness resolution better than one millionth of an inch. A new software package allows for either crossweb or downweb graphic trend analysis.

The small, single-sided sensor provides for high surface resolution with full computer control. With the very rapid thickness sampling rate, the reasonably-priced PROFILER 320 is ideal for most applications where on-line gauge measurement is essential.

MOCON (Modern Controls Inc.) has announced a new Carbon Dioxide Headspace Analyzer, the PG-100, for Quality Control and R&D applications. This new system measures the CO_2 in controlled atmosphere packaging while utilizing only a small sample amount.

Designed for efficient operation, the PG-100 provides reproducible results in a variety of controlled atmosphere applications, including checking the thoroughness of a gas flushing operation, developing the proper food package percent CO_2 to maximize shelf-life and assessing the CO_2 headspace

content in packages, pouches, bottles and tanks.

MOCON is a leading developer, manufacturer and marketer of high technology instrumentation designed to test packages and packaging materials for permeation of gases and water vapor.

MOCON testing instrumentation is used in quality control and research laboratories in the food and pharmaceutical industries, to test plastic packaging materials for cost effective protection against loss of color, flavor, texture, potency and freshness.

The Company also manufactures weighing and sorting instrumentation that helps the pharmaceutical industry maintain the rigid weight toleranaces needed in producing drugs in capsule and tablet form.

MOCON's shares are traded over-the-counter and are listed in the NASDAQ National Market System. The Company's electronic NASDAQ symbol is MOCO. Common Stock quotations can be found in leading newspapers under the symbol MOCON.

KENOSHA, WI (FEB. 6) BUSINESS WIRE - The Federal Trade Commission has closed an inquiry into the relationship of Snap-on Tools Corp. and its dealers.

The FTC's Bureau of Consumer Protection has notified the company that no action against Snap-on was warranted following an inquiry underway since August, 1988.

''This decision confirms our belief that Snap-on conducts its business lawfully and in good faith,'' said Marion F. Gregory, chairman and chief executive officer.

Gregory noted that the FTC requested and the company cooperated fully in supplying all documents relating to the company's recruiting practices, dealer agreements, training materials, and other subject areas dating to 1980.

''We were especially gratified by the support of many present an former dealers in explaining to the Commission the fairness and value of Snap-on's policies and practices in support of our dealers' efforts,'' Gregory added.

Snap-on Tools Corp. (NYSE:SNA) is the world's largest producer and distributor of hand and air-powered tools, electronic equipment, and tool storage units for professional mechanics.

#90037b0747 02/06/1990 ~Business Wire

CONCORD, MA (FEB. 6) BUSINESS WIRE - For the fourth quarter ended Dec. 30 1989, GenRad Inc. Tuesday reported a net loss of $3,475,000, or 20 cents per share.

In the 1988 fourth quarter a year earlier, the company reported net income of $1,777,000, or 11 cents per share.

Net sales and service revenues for the fourth quarter, 1989 were $45,489,000 compared to $54,222,000 for the corresponding period in 1988.

For the full year ended Dec. 30, 1989, GenRad reported a net loss of $6,090,000, or 36 cents per share including a charge of $3,000,000, or 18 cents per share, for reorganization taken in the third quarter, 1989.

For the previous year ended Dec. 31, 1988, the company reported a net loss of $6,238,000, or 38 cents per share, including a charge of $10,000,000, or 60 cents per share, for restructuring taken in the third quarter, 1988.

Net sales and service revenues for the year 1989 were $188,906,000 down from $205,859,000 in 1988.

Commenting on the year-end results, GenRad President and Chief Executive Officer Robert E. Anderson said, ''Orders from the U.S. electronic equipment manufacturing market were particularly weak in the fourth quarter, continuing a trend begun in June, 1989. During the quarter the weakness which was first seen in the computer and defense electronics segments spread to other electronic equipment manufacturers who chose to delay their capital expenditures.

GenRad, Anderson pointed out, fared significantly better in the international marketplace where it derives a growing percentage of its annual business. ''Sales continued strong in Japan and the Pacific Rim. Healthy order activity in western Europe, constant throughout the year, was sparked by major ATE purchases relating to the modernization of telecommunications networks and significant capital equipment purchases in advance of EC'92. Unfortunately, our positive international order trends were not sufficient to offset the impact of sluggish domestic orders.

GenRad Inc. is a leading worldwide supplier of integrated software systems and automatic test equipment to manufacturers and users of electronic and mechanical equipment, for design verification, product testing, and process quality management. The company's stock is traded on the New York Stock Exchange; its trading symbol is GEN.

#90037b0751 02/06/1990 ~Business Wire
Columbia, SC (FEB. 6) BUSINESS WIRE - Colonial Companies Inc. (NASDAQ/NMS:CACCB) Tuesday announced results for the fourth quarter and year ended Dec. 31, 1989.

Net income for 1989 was $29,978,000, or $1.99 per share, an increase of 11 percent over 1988 net income of $26,926,000, or $1.80 per share. These figures include after-tax realized gains on investments for 1989 of $1,383,000, or 9 cents per share, compared with $544,000, or 4 cents per share, in 1988.

Net income for the fourth quarter of 1989 was $7,263,000 compared with $7,231,000 for 1988, or 48 cents per share for both quarters. All per share figures have been restated to reflect the two-for-one stock split effected June 12, 1989.

Commenting on the results, Chairman Gayle O. Averyt said, ''Nineteen eighty-nine was another year of consistent growth for Colonial. Premiums increased 11 percent and total assets rose 12 percent. The growth in premiums has been aided by an increase in policyholder retention of five percentage points over the past four years and sales increases from prior years.

''In 1990, we will continue to concentrate on strengthening and improving our sales capabilities. Our goals for the year include a 10 percent to 12 percent increase in sales and premiums,'' he said.

Operating in 49 states, Colonial Life & Accident Insurance Company underwrites a broad line of personal accident, life and cancer insurance policies. It is the principal subsidiary of Colonial Companies Inc., whose shares are traded on the NASDAQ National Market System under the symbol CLACB.

VALDOSTA, GA (FEB. 6) BUSINESS WIRE - SAFT America Inc., a leading manufacturer of high technology energy systems, announced expansion of its research and development (R&D) capabilities.

A new R&D Center has been established and will be located adjacent to SAFT's Advanced Battery Systems Division manufacturing facility in Cockeysville, Md., a suburb of Baltimore.

Ongoing research will concentrate on diversification of lithium, thermal and nickel-based battery technologies, as well as other advanced couples.

Initially, 12 SAFT engineers and scientists have been assigned to the Center to conduct research which will be supported by facilities, equipment and personnel from SAFT's Advanced Battery Systems Division. New products developed by the Center will be used for both civilian and government applications.

A key initial project will be electrical vehicular propulsion research for the Department of Energy (DOE). SAFT recently received a $3.4 million contract from DOE to develop a lithium iron sulfide battery for this project. SAFT also will underwrite the project with a multi-million dollar investment.

In developing the DOE proposal, SAFT America Inc. worked closely with SAFT operations in France and the United Kingdom. Internationally, SAFT, the French-based parent company of SAFT America Inc., has a vested interest in the development of alternative energy sources for vehicles, which ultimately will benefit mankind by protecting the environment.

With headquarters in Valdosta, Ga., SAFT America Inc. operates 10 facilities throughout the United States, Canada and Mexico. SAFT's products include:

Nicad batteries for consumer and industrial use; lithium batteries for the military, medical and electronics markets; thermal batteries for munition and missile systems; nickel-cadmium and lead-acid batteries for standby power; mass-transit industrial batteries; and aviation batteries for military, business and commercial aircraft.

SAFT is a subsidiary of French-based Compagnie Generale d'Electricite, one of the world's leaders in the field of autonomous energy products for industry and high technology. SAFT operates 16 subsidiaries in Europe, North America, southeast Asia, Japan, Australia and employs more than 6,500 people worldwide.

WATERBURY, VT (FEB. 6) BUSINESS WIRE - Fred ''Chico'' Lager announced Tuesday that he will step down as the president and chief executive officer of Ben & Jerry's Homemade Inc., effective at the end of 1990.

Ben Cohen, chairman of the board of the company, announced that Chuck Lacy will replace Lager as the company's president and become chief operating officer. Lacy is currently the company's general manager. Cohen will remain as chairman of the board and assume the title of chief executive officer.

Lager has been with Ben & Jerry's since 1982, when he was hired as the company's first general manager. ''I've been contemplating this move for some time. I'm looking forward to taking some time off and working for a while at a more relaxed pace,'' Lager said.

''Writing and teaching are both possibilities. I wouldn't rule out running another small business at some point in the future, but I'm in no rush to get involved in another totally engrossing project.'' Prior to joining Ben & Jerry's, Lager owned and operated Hunt's, a nightclub widely recognized as one of the best places for live entertainment in Vermont.

''There's no way to express our gratitude for the contribution Chico has made to Ben & Jerry's,'' Cohen said. ''He's provided the managerial expertise and leadership that allowed us to grow successfully at an incredible rate. We couldn't have done it without him.'' Sales have increased from less than 1 million dollars in 1982, when Lager joined the company, to over 50 million dollars in 1989.

Lacy joined Ben & Jerry's in 1987. He graduated from Amherst College in 1980 and earned his master's degree in business administration from Cornell University. Prior to coming to Ben & Jerry's, he was a finance and business development executive with United Health Services, a chain of hospitals and clinics in upstate New York.

''We're lucky to have found a person as capable and committed as Chuck,'' Cohen said. ''The board and I have been working with him as our general manager since early 1989, and we're confident he's going to be a great president for Ben & Jerry's.''

''We're got the people, the product, and the commitment to excel,'' stated Lacy. ''I think we can achieve sustained growth and profitability and improve the quality of life in our communities,'' he added. ''I'm looking forward to the challenge.''

Lager will remain a member of the company's board of directors, and will act as a consultant to the company. ''Ben & Jerry's has been my life for the past 8 years,'' Lager said, ''and I expect to be involved with it in one way or another for many more years to come.''

COSTA MESA, CA (FEB. 6) BUSINESS WIRE - PDA Engineering has elected Thomas C. Curry vice president and general manager for the PATRAN Software Products Division.

Curry will be responsible for the division's worldwide operations, including product planning, development, manufacturing, marketing, sales, education and customer support.

"Tom Curry brings a unique customer perspective, industry experience and a strong market orientation to the PATRAN Division," said Dr. Louis A. Delmonico, PDA Engineering president and chief executive officer.

"His working knowledge of customer needs combined with his product planning and marketing experience will play a key role in PDA Engineering's commitment to provide outstanding solutions based on leading-edge technology to the computer-aided engineering market."

Curry was previously vice president of marketing for McDonnell Douglas Corp.'s Manufacturing and Engineering Systems Co. He has also held management positions with Auto-Trol Technology Corp. and Air Products and Chemicals Inc.

PDA Engineering, based in Costa Mesa, Calif., designs, develops and markets leading mechanical engineering software under the PATRAN brand name. The software provides pre- and post-processing capabilities, modeling, finite element analysis and other specialty analysis software used in the product development process.

PDA Engineering distributes its products through sales offices in eight U.S. cities and company-owned subsidiaries in the United Kingdom, France, Germany, and Italy and independent distributors elsewhere.

Formed in 1972, the company provides advanced technology products and specialized engineering services to both commercial and government market segments through its Engineering Services Division. PDA is a publicly owned company (NASDAQ symbol PDAS).

CHICAGO (FEB. 6) BUSINESS WIRE - Bell & Howell announced Tuesday that it

has named William J. White as chairman, president and chief executive officer, effective immediately. He replaces Nils Johansson, the company's chief financial officer, who has been acting as interim CEO.

White, 51, joins Bell & Howell with extensive experience in operating a broad range of businesses. Prior to joining Bell & Howell, he was President and CEO of Whitestar Graphics Inc., which was acquired by the William Blair Leveraged Capital Fund and White in 1989.

From 1985-1988, White was with the USG Corp. where he served as executive vice president and CEO of three major subsidiaries. From 1981-1984, he was president of the Masonite Corp. which was acquired by USG in May 1984. White was president of the Mead Products Division of the Mead Corp. before joining Masonite.

White has an industrial engineering degree from Northwestern University and received an MBA from Harvard University in 1963. He is a member of the Board of Governors of the Midwest Stock Exchange and serves on the Board of Directors of Harris Bankcorp and the Material Sciences Corp. White is a long time resident of the Chicago area.

Bell & Howell, which in May 1988 was acquired by the Robert M. Bass Group and members of management, is an information management company whose principal businesses consist of the Phillipsburg Co., University Microfilms Inc., Document Management Products Co. and the Publication Systems Co.

#90037b0772 02/06/1990 ~Business Wire

STAMFORD, CT (FEB. 6) BUSINESS WIRE - General Housewares Corp. (NYSE:GHW) Tuesday reported improved results for the fourth quarter of 1989 and the full year, in terms of continuing operations and total net income as well.

Net sales from continuing operations for the year ended Dec. 31, 1989, were $75,096,000 compared to restated net sales for 1988 of $56,346,000. Income from continuing operations was $2,424,000, or 82 cents per share, compared to restated income for 1988 of $1,032,000, or 39 cents per share.

The results for 1988 give effect to the mid-year acquisition of Chicago Cutlery Inc. and the related issuance of 440,000 shares, which increased the average number of shares outstanding during 1989 by 11 percent.

Net sales from continuing operations for the fourth quarter of 1989 were

$22,504,000 as compared to restated net sales for 1988 of $21,842,000, while income was $1,319,000, or 45 cents per share, as compared to $512,000, or 18 cents per share, for the year-earlier period.

Including the operations of discontinued businesses, the company's net sales for 1989 were $117,772,000 compared to $97,864,000 for the preceding year. Total net income for 1989 was $2,414,000, or 82 cents per share, which included income from discontinued operations of $330,000, or 11 cents per share, that was offset by the estimated loss on their disposal.

This compares to last year's total net income of $1,410,000, or 53 cents per share, before an extraordinary charge for the extinguishment of debt associated with acquisition financing that reduced net income for 1988 to $1,044,000, or 39 cents per share.

The company's net sales for the fourth quarter of 1989, including the operations of discontinued businesses, were $33,694,000 compared to $31,488,000 for 1988, while net income was $909,000, or 31 cents per share and compared to last year's fourth quarter results of $514,000, or 18 cents per share.

The net income for 1989 includes both a loss from discontinued operations of $70,000, or 3 cents per share, and the loss on disposal of $340,000, or 11 cents per share.

General Housewares Corp. is a leading manufacturer and marketer of cookware, cutlery and tabletop giftware product lines.

PHOENIX, AZ (FEB. 6) BUSINESS WIRE - Zila Inc. (NASDAQ: ZILA) Tuesday announced it has granted to Bausch & Lomb Inc., exclusive international (non-U.S.) rights to manufacture and market its line of unique, non-prescription oral health care products. Included in the agreement are:

- Zilactin, for canker sores, fever blisters and cold sores, 50 percent of the public suffers from recurring canker sores - painful ulcers that occur in the mouth, on cheeks, gums and tongue. Eighty-five percent suffer from painful and unsightly cold sores and fever blisters on the lips and around the edges of the mouth.

- ZilaBrace, for those suffering from cuts and abrasions on the inner cheek, caused by newly installed braces and other dental appliances. In the United States, 1.2 million new braces are installed each year.

- ZilaDent, for the gum sores that plague denture wearers - 50 million in the United States alone.

The three Zila products are in wide U.S. distribution; a fourth, Zilactol, will enter U.S. markets in the Spring.

Bausch & Lomb expects foreign sales to begin in Canada during the current quarter. Bausch & Lomb will pay an undisclosed sum for the exclusive marketing rights, and will pay royalties to Zila based on a percentage of sales with an agreed-upon minimum guaranteed annual sales volume. The agreement gives Bausch & Lomb the right to use the Zilactin, ZilaBrace, and ZilaDent names in foreign markets.

Bausch & Lomb is a Fortune 500 company (1989 sale of $1.2 billion) with leadership positions in worldwide health care and optics markets. Bausch & Lomb said this agreement marks an important expansion of the company's oral care business, which is in the early stages of development in international markets.

Bausch & Lomb's Oral Care division currently markets the Interplak Home Plaque Removal Device and the Interprobe Periodontal Charting and Examination system.

"With this agreement," said Zila President Joseph Hines, "Zila attains two critical objectives: Zila's products begin international distribution and will benefit from association with Bausch & Lomb as that company expands into the oral care market.

#90037b0790 02/06/1990 ~Business Wire
WASHINGTON (FEB. 6) BUSINESS WIRE - Vitalink Communications Corp. has introduced enhancements to its TransLAN III Ethernet remote bridge which include the industry's first bridge implementation of a feature that prevents multicast storms on one local area network from degrading the performance of an enterprise-wide, bridged network.

This new capability is unique to Vitalink's remote bridges and is one of several features included in the new software release.

''As organizations interconnect multiple, geographically-dispersed LANs to create large enterprise networks, network reliability and manageability become primary concerns,'' said Jack Marsal, Vitalink's TransLAN product manager.

''The multicast storm isolation feature was developed to address both these issues and is another example of the kind of technical innovations customers have come to expect from Vitalink,'' he said.

This new software release will be available on TransLAN III in June 1990 and by the fourth quarter, the features will be extended to Vitalink's entire bridge and router product lines: the TransLAN 320 and TransLAN 350 Ethernet remote bridges; TransRING 530 and TransRING 550 token ring bridges; and the TransPATH 350, TransPATH 530 and TransPATH 550 routers.

Potentially damaging to a network, a multicast storm occurs when malfunctioning computers create an abnormally high level of multicast messages on the LAN. The storm creates slower network response time. With the new software release, Vitalink bridges can now be configured with a multicast traffic ceiling that quenches the storm, ensuring wide area network reliability.

Once multicast traffic reaches a pre-established ceiling, the Vitalink bridge stops forwarding the multicast traffic to the network. The user can configure the traffic ceiling to match his network requirement.

Additional features included in the software release are: the ability to segment the network into separate bridged domains, concurrent support for both the IEEE 802.1 Spanning Tree Protocol and Digital Equipment Corp.'s version of Spanning Tree Protocol, additional filtering capabilities, an improved user interface and more detailed traffic statistics.

By segmenting a network into separate bridged domains, a user can make his network more reliable and easier to manage. For example, a data link failure in one of the network domains will have absolutely no affect on any of the other domains.

This gives the user the benefit of maximum network stability and the segmented network is much easier to manage, as each domain is less complex than the entire network.

By supporting both IEEE 802.1 Spanning Tree Protocol and the original Spanning Tree Protocol developed in 1986 by Digital Equipment Corp. and Vitalink, the new software will offer the user an easy migration path from what has been the de-facto Spanning Tree Protocol standard to the new IEEE

standard.

Vitalink is the only LAN interconnect vendor to fully interoperate with both versions of Spanning Tree Protocol.

The new software release increases to to 416 per bridge the number of filters network managers can use to monitor and control their network. Filters can be activated or removed instantly, without disruption of network services.

The menu-based user interface has been simplified with the addition of an on-line help facility for commands and screens plus the sue of a consistent set of command terminology.

And finally, as an aid in network management, Vitalink has added more detailed traffic statistics in this software release. Network managers can monitor who is using the bandwidth and obtain the 10 busiest addresses per bridge or per network link.

Pricing on TransLAN III remains the same at $14,250, including software.

Vitalink Communications Corp. manufactures and markets a complete family of LAN interconnection products. The company is the leading supplier of Ethernet and token ring remote bridges, and also offers a family of routers, network management products and worldwide service capabilities.

Comprehensive support is provided by Vitalink and its distributors. Digital Equipment Corp. also distributes and supports TransLAN products.

#90037b0792 02/06/1990 ~Business Wire

WASHINGTON (FEB. 6) BUSINESS WIRE - Vitalink Communications Corp. has introduced a new software release for its WANmanager network management system which includes a historical database that organizations can use to increase their understanding of usage trends on their computer networks.

This knowledge is essential to effective long-term network capacity planning.

Using an SQL relational database engine, WANmanager captures network performance parameters such as traffic volume and the frequency of network errors which occur on either LAN segments or wide area network transmission facilities.

This information can be presented in the form of both graphic and tabular reports to provide a clear picture of current and past network behavior. The network planner is then a better position to optimize his network design for maximum response time and throughput.

''The design of the WANmanager has always reflected the critical needs of our users. Initially, we provided tools for day-to-day management of computer networks,'' said Tim Lee-Thorp, network management product manager. ''Now, we've expanded the scope of the WANmanager to address the long term planning needs of the network manager who is building larger, more global networks,'' said Lee-Thorp.

Additional features in the new software release of WANmanager include: a Simple Network Management Protocol (SNMP) client, an expansion of the node performance monitoring facility, the ability to print all system graphics to a laser printer, and an enhanced user interface.

The new software release of WANmanager includes a SNMP client that allows the user to monitor the Management Information Base (MIB) in Vitalink's TransPATH routers.

''SNMP is the defacto standard protocol within the Internet community and is rapidly being embraced throughout the data communications industry,'' said Lee-Thorp. ''The addition of an SNMP client demonstrates Vitalink's commitment to supporting the emerging network management standards.''

The node performance monitoring facility has been expanded to include a comprehensive list of bridge parameters and the SNMP MIB variables. All Vitalink's LAN interconnect products, as well as products from several other vendors, can be monitored with this tool.

Other vendors' products that Vitalink supports on WANmanager include Digital's LAN Bridge local bridges, Chipcom's Ethermodem III broadband-to-baseband bridges and StrataCom's IPX T1 multiplexers.

The new software for the WANmanager provides a printing facility for hard copy laser printout of all system graphics, allowing the user to maintain a historical record of network configurations and performance.

And finally, the graphic user interface on the WANmanager has been enhanced so that it is fully DECwindows compatible. This allows system windows to be remotely accessed from other DECwindows servers.

Available for shipment in April, the new WANmanager software will be priced at $10,000 for the first copy in a network and $5,000 for additional copies. Vitalink's WANmanager software runs on Digital Equipment Corp.'s VAXstation workstations, using the ULTRIX operating

system.

Vitalink is one of the original members of Digital's Enterprise Management Architecture (EMA) strategic partners program and is currently developing an Access Module for Digital's DECmcc product.

Vitalink Communications Corp. manufactures and markets a complete family of LAN interconnection products. The company is the leading supplier of Ethernet and token ring remote bridges, and also offers a family of routers, network management products and service capabilities worldwide. Comprehensive service and support are provided by Vitalink and its distributors. Digital Equipment Corp. also distributes and supports TransLAN products. - WANmanager is a trademark of Vitalink Communications Corp. - LAN Bridge, DECwindows, VAXstation, ULTRIX, EMA, and DECmcc are trademarks of Digital Equipment Corp. - Ethermodem III is a trademark of Chipcom Corp. - IPX is a trademark of StrataCom Corp.

FAIRFAX COUNTY, VA (FEB. 6) BUSINESS WIRE - Atlantic Research Corp. (ARC) announced that its ARC Professional Services Group has won a contract to provide data automation services to the U.S. Air Force.

Teamed with Information Spectrum Inc. (ISI), ARC will provide services to the deputy for avionics control at Wright-Patterson Air Force Base in Dayton, Ohio. The ceiling value of the three year contract is $3 million, to be shared evenly by ARC and ISI.

Under the contract, the Dayton Operations of ARC's Information Systems Division will support the client with systems design, telecommunications, database administration, applications programming and operations research for the Avionics Decision Support System (ADSS).

ADSS is an analytical management tool that provides a common database and central point of contact for the acquisition, modification and support of all Air Force avionics programs.

The Information Systems Division is part of the ARC Professional Services Group, which supplies professional and technical services to both government and commercial clients. Atlantic Research Corp. is also a leading developer and producer of solid propellant rockets, gas generators liquid propulsion systems and advanced composite materials through the

ARC Aerospace Group.

Atlantic Research is a wholly owned subsidiary of Sequa Corp. (NYSE: SQA) of New York, a diversified, technology based company with principal interests in the fields of aerospace, machinery and metal coatings, marine transportation, specialty chemicals, and professional and technical services. Sequa is a Fortune 500 company listed on the New York Stock Exchange.

WOOD DALE, IL. (FEB. 6) BUSINESS WIRE - NEC Technologies Inc. announced an agreement with Businessland Inc. (NYSE:BLI) for the reseller to sell, service and support NEC's fulL line of laptop computers, monitors and optical media products worldwide.

''We are very pleased to enter this expanded strategic partnership with Businessland which is based on the strong market demand for NEC products '' said Keith Schaefer, senior vice president of NEC Technologies Inc. ''Through Businessland, we will be able to offer complete solutions with one-stop shopping to users throughout the worldwide market.''

The agreement is part of the Businessland strategy to expand its capabilities internationally, providing consistency in products, pricing, consultation, systems integration, training, service and support for its multinational customers.

David Norman, chairman, president and chief executive officer of Businessland, said, ''We have enjoyed a stellar business relationship with NEC for several years. NEC is a stable, financially sound company that is able to supply first-to-market technology for the long haul. Together we will be able to meet our customers' need for a long-term strategic partner in the ninties.''

NEC Technologies Inc., a leading supplier of computers and peripherals for the U.S. market, is an affiliate of NEC Corp., a $24 billion manufacturer of computers, communications, semiconductors and home electronics products.

Founded in 1982, Businessland Inc. is an international leader in the distribution, integration and support of microcomputer and workstation systems for business. The company integrates microcomputer products from selected manufacturers to create systems tailored to specific customer needs and provides the high level service and support to maximize their productivity. Businessland operates centers and branch offices in 50

major U.S. metropolitan markets, five metropolitan markets in Great Britain, five in Canada and two in West Germany. It reported sales of $1.2 billion in fiscal 1989.

#90037b0806 02/06/1990 ~Business Wire

WHITE PLAINS, NY (FEB. 6) BUSINESS WIRE - IBM Tuesday introduced geoManager, a software program that allows users to create, maintain and access geographic information across an enterprise's multitude of data bases.

GeoManager is key to IBM's approach to integrating the overall geographic information system (GIS) computing environment. Geographic information systems merge conventional data bases, comprised of words and numbers, with spatial data, such as maps and diagrams.

GeoManager, used in conjunction with IBM's GIS offerings, is designed for use by a wide range of customers, including governmental agencies, utility companies, transportation departments, petroleum companies and telecommunications firms.

GeoManager's unique implementation takes spatial data (where it is), attribute data (what it is), and graphic data (what it looks like), and integrates it all within one relational data base, such as SQL/DS(a) or DB/2(a). GeoManager also is compliant with IBM's Systems Application Architecture(a) (SAA).

''Regardless of an organization's size, its investment in GIS is considerable,'' said Dennis Sigloh, director of GIS for IBM. ''The only way to realize maximum return on this investment is to make data available to all individuals within an organization. The only way to have such accessibility is to keep all data in one integrated data base. GeoManager does this.''

The four primary benefits of geoManager to GIS users are: o Allows a broad range of users access to geographic information, applications and query options.

o Permits integration of geographic information with other data bases within an enterprise and enables interaction with traditional office systems software,

including electronic mail and business graphics.

o Gives customers the ability to access geographic data via low-cost 3270-type terminals, thus reducing the cost of using a goegraphic information system. o Manages parameters for retrieval and/or update of spatial data, protecting users from inadvertently corrupting the representation of the geography in the database.

''IBM worked with IFM-InfoMaster, an Italian-based software development firm, on the development of the 3270 terminal support capability of geoManager, which allows a user to query the GIS data base,'' said Sigloh. ''IBM and IFM, which has, in the past, offered solutions based on IBM GIS products, look forward to continuing this productive relationship.''

GeoManager will be available in June 1990 for a one-time charge or monthly license charge. Depending upon the processor used, the purchase price ranges from $28,100 to $193,400, and the monthly license charge ranges from $1169 to $4297. This release of the software runs on System 370 processors supporting the MVS or VM operating systems.

JACKSONVILLE, FL (FEB. 6) BUSINESS WIRE - Koger Properties Inc. (NYSE: KOG) reported revenues from real estate operations of $25,475,000 in the third quarter ended Dec. 31, 1989, up 30 percent from the like quarter in 1988. For the nine-month period ended Dec. 31, 1989, revenues were $153,234,000, an increase of eight percent over the like period in 1988.

The company also reported cash flow (a) from real estate operations, which includes cash flow from rents and the sale of properties, of $11,883,000 for the quarter and $67,333,000 for the nine months just ended, up 16 percent over the third quarter and six percent over the nine months ended Dec. 31, 1988.

Earnings before non-cash charges (cash flow)(a) were $9,219,000 for the quarter and $60,440,000 for the nine months, approximately unchanged from results in the like periods in 1988. Based in Jacksonville, Fla., Koger operates 36 office parks in 23 cities.

(a) - Management believes that cash flow, rather than net income (loss), more accurately reflects the performance of income-producing real estate.

ALBANY, NY (FEB. 6) BUSINESS WIRE - Carter B. Chase has been elected senior vice president and assistant general counsel for KeyCorp, announced Victor J. Riley Jr., chairman, president and chief executive officer.

Chase was most recently a senior partner in the Syracuse-based law firm of Hiscock & Barclay, which he joined in 1974. Before that, he created a legal department for Crouse-Hinds Co. in Syracuse and was named vice president, general counsel and secretary in 1969. He is admitted to practice law in the State of New York, as well as before the U.S. District Court for the Northern District of New York.

A member of Phi Beta Kappa, Chase graduated from Syracuse University with a bachelor's degree in 1957. He received his law degree in 1960 from the New York University School of Law.

An active member of the community, Chase has served as officer and director of the Greater Syracuse Chamber of Commerce (chairman 1987-88), the Metropolitan Development Association, the Greater Syracuse Technology Development Organization, the Onondaga County Planning Board and has served on committees for the United Way. In addition, he is a member of the American Bar Association, the Onondaga County Bar Association and the American Society of Corporate Secretaries.

Chase and his wife, Chris, are the parents of a daughter and reside in DeWitt.

KeyCorp (NYSE:KEY) with assets of over $15.4 billion is a financial services company headquartered in Albany. It has focused its banking expansion activities in the Northeast and Northwest. Following a middle market focus, KeyCorp has concentrated its resources in cities and smaller communities of the northern tier of states, thus avoiding overcrowded marketplaces and single industry loan exposure.

DERRY, NH (FEB. 6) BUSINESS WIRE - Cornerstone Financial Corp. (NASDAQ:CSTN), a two bank holding company located in Derry, N.H., announced net income of $103,000, or 5 cents per share for the fourth quarter ended Dec. 31, 1989, compared with net income of $215,000, or 11 cents per share for the fourth quarter ended Dec. 31, 1988.

Fourth quarter net income in 1989 included an extraordinary gain of $1,000 with no effect on 1989 earnings per share and $20,000, or 1 cent per share, in 1988. The extraordinary gain was from Cornerstone's continued buyback program of its 7 percent convertible subordinated debentures on the open market.

Net income for the fourth quarter 1989 was adversely affected by sale of securities at a loss of $48,000, reduced earnings from a real estate development joint venture, and a reserve of $250,000 for potential future losses against the joint venture.

For the year ended Dec. 31, 1989, Cornerstone recorded net income before extraordinary gain of $942,000, or 44 cents per share, and net income after extraordinary gain of $1,027,000, or 48 cents per share. For the year ended Dec. 31, 1988, net income extraordinary gain was $347,000, or 18 cents per share, and $513,000, or 26 cents per share, after recognizing the extraordinary gain. Net income included a pre-tax loss of $1,174,000 resulting from the sale of equity securities.

John M. Terravecchia, chief executive officer of Cornerstone, stated that despite the real estate and economic slow down in the Northeast, the core earnings of the company remain strong, as evidenced by the increase in net interest income of $778,000, or 14.2 percent over 1988.

The net interest margin for Cornerstone remained strong, increasing to 4.8 percent in 1989 from 4.3 percent in 1988. Terravecchia noted that the non-performing loans at Dec. 31, 1989 were $513,000, or 55 percent of outstanding loans. The reserve for possible loan losses stood at $937,000 or 183 percent of non-performing loans and 1.01 percent of outstanding loans at year end.

The bank reduced the balance of certain loans down to market value at year end and, pursuant to generally accepted accounting principles, transferred the loans to other real estate owned which increased to $4,578,000 from $2,725,000 at year end 1988.

MIAMI (FEB. 6) BUSINESS WIRE - People's Telephone Co. Inc. (NASDAQ: PTEL) one of the nation's leading competitive public communications companies, Tuesday announced that it has entered into a commitment letter with Creditanstalt-Bankverein (''Creditanstalt'') for a $27 million credit facility.

The credit facility will consist of a $12 million revolving credit facility and $15 million standby/term loan. PaineWebber Inc. will act as placement agent for the entire credit facility.

Jeffrey Hanft, the Company's chairman of the board and chief executive officer, reported that the credit facility will be used primarily to finance the acquisitions of existing pay telephone routes and to purchase additional pay telephones for installation.

Hanft stated that ''the Company will concentrate its growth in the eastern and midwestern parts of the United States.'' Hanft further stated that ''Creditanstalt was selected because of its commitment to the telecommunications industry and its ability to fund the Company's expansion plans well into the future.''

The Company currently operates more than 6,600 telephones in Florida, Georgia, Alabama, Louisiana, South Carolina, North Carolina, Virginia, Tennessee, Ohio, Indiana, Pennsylvania, Texas, California and West Virginia.

SIDNEY, OH (FEB. 6) BUSINESS WIRE - The Monarch Machine Tool Co. Tuesday released figures for the year ending Dec. 31, reporting revenues of $96,658,834 and net income of $1,985,404 or 52 cents per common share compared with 1988 revenues of $90,842,127 with net income of $1,757,916 or 46 cents per common share.

Fourth quarter revenues for 1989 were $25,079,303 with a net income of $802,532 or 21 cents per common share compared with 1988 revenues of $27,548,172 with net income of $1,161,005 or 30 cents per common share.

The board of directors of The Monarch Machine Tool Co., meeting on Feb. 6, declared a regular quarterly dividend of 20 cents per share, payable March 1, to Monarch common shareholders of record on Feb. 21.

The board of directors also declared a dividend of 45 cents per share, payable March 1, to Monarch Series A preferred shareholders of record on Feb. 21.

1990 is the 78th consecutive year in which Monarch has paid dividends to its shareholders.

#90037b0841 02/06/1990 ~Business Wire
BOSTON (FEB. 6) BUSINESS WIRE - Bradley Real Estate Trust (AMEX:BTR) reported Tuesday that the quarterly dividend has been increased to 20 cents from 17 cents payable on March 23, 1990, to shareholders of record on Feb. 28, 1990.

Funds from operations for the fourth quarter were 22 cents per share and 58 cents per share for the year ended Dec. 31, 1989.

Funds from operations is defined as net income before depreciation and amortization less gains on sale of real estate and deferred rent collections.

Mangement believes that funds from operations is an appropriate measure of the Trust's operating performance and that reductions for property depreciation and amortization charges are not meaningful in evaluating the operating results of the Trust's income-producing real estate.

Net income for the year ended Dec. 31, 1989 was $975,000 or 26 cents per share based on the average number of shares outstanding during the year. Because the Trust's fiscal year ended Dec. 31, 1988 consisted of a short, four month interim period, comparisons with the year ended Dec. 31, 1989 are not meaningful.

Net income for the full fiscal year ended Aug. 31, 1988 was $4,675,000, or $1.39 per share, and included gain on the sale of properties of $3,728,000 or $1.11 per share.

In making the announcement, E. Lawrence Miller, president, said ''We are extremely pleased with our fourth quarter performance. The higher dividend reflects the increase in the Trust's funds from operations following the substantial completion of the capital improvements and re-tenanting programs effected at Richfield Hub Shopping Center and Hood Commons during 1989.

''The Trust's assets are being managed aggressively and the underlying value of the Trust's assets continues to be preserved and enhanced.''

Bradley Real Estate Trust is a real estate investment trust (''REIT'') that is engaged in the business of acquiring, renovating and holding established income-producing commercial real estate. The Trust was founded as a Massachusetts business trust in 1961 and is the country's oldest continuously qualified REIT.

POUGHKEEPSIE, NY (FEB. 6) BUSINESS WIRE - Poughkeepsie Savings Bank, FSB (NASDAQ: PKPS) announced Tuesday the resignation of Maurice E. Kinkade as chairman of the board of directors, chief executive officer and president of the bank, effective immediately.

Kinkade stated, ''My resignation is for personal reasons and to pursue other business opportunities and interests.''

The bank also announced the appointment of Christoph H. Schmidt, effective March 1, 1990, to succeed Kinkade as chairman of the board of directors and chief executive officer, and the appointment of J. Michael Feeks as president of the bank.

Schmidt was president and chief executive officer of Poughkeepsie Savings Bank from 1977 through July 1980 when he left to take a position as senior vice president of State Street Boston Corp., the parent of State Street

Bank and Trust Co. in Boston.

In 1983 he became president and chief executive officer of Fairhaven Savings Bank in Fairhaven, Mass. Fairhaven Savings was sold to Citizens Financial Group Inc. in June 1988.

Schmidt said, ''I'm extremely pleased to return to the Mid-Hudson Valley and to have the opportunity to lead the Poughkeepsie Savings Bank in the 1990's. I believe the bank is poised for success and will be able to take advantage of its strong capital position and franchise in the months and years to come.''

J. Michael Feeks has been with the bank for 2-1/2 years as president of the Bank's Community Bank Group. Formerly, Feeks was senior vice president at Manufacturers Hanover Trust Co. and managed its Branch Banking Division business in Manhattan, Bronx, Westchester, Orange and Rockland Counties. The bank also announced its intention to nominate Feeks to its board of directors at the first opportunity.

The appointments were announced by H. Clifton Wilson, who will serve as Poughkeepsie's board chairman until Schmidt's arrival on March 1, 1990. Kinkade will continue to serve the bank as a consultant.

Poughkeepsie Savings Bank is a community banking institution whose principal market is the Mid-Hudson Valley region of New York, where it operates 11 branch offices. Its market street mortgage subsidiary has loan production offices in Florida, Georgia, Virginia and New York.

#90037b0849 02/06/1990 ~Business Wire

COLUMBUS, OH (FEB. 6) BUSINESS WIRE - American Electric Power Service Corp. and the U.S. Department of Energy have signed a cooperative agreement to share the cost of building a commercial-scale Pressurized Fluidized Bed Combustion (PFBC) unit at the Philip Sporn Plant in New Haven, W.V.

The PFBC Utility Demonstration Project is to be funded as part of the federal Innovative Clean Coal Technology program.

''Our goal is to demonstrate that PFBC is capable of helping the nation meet its environmental goals more effectively than current technology,''

said Dr. James J. Markowsky, senior vice president and chief engineer - AEP Service Corp. AEP Service Corp. is the management and technology arm of the seven-state electric company system.

Among the benefits of PFBC are reduced emissions of nitrogen oxide and sulfur dioxide and higher thermal efficiency.

The key environmental feature of the PFBC process involves SO2 removal -- greater than 90 percent -- during combustion and only a fraction of NOx emissions compared with conventional technology. Basically, SO2 released when coal is burned reacts with a limestone sorbent present in the pressurized combustion chamber. The resulting inert byproduct -- a dry, granular material -- is collected and is potentially usable.

''The specific objective of this project is to demonstrate the feasibility and cost effectiveness of using PFBC technology in a commercial-scale plant of at least 330 megawatts capacity. This plant will be the largest PFBC plant in the world,'' Markowsky said.

The cost associated with the cooperative agreement is $660 million, of which the government would provide $185 million (28 percent). The remainder of the cost would come from one or more AEP subsidiaries. In September 1988, AEP's project was one of 16 proposals selected for negotiation to share $575 million in federal funds. This agreement concludes the negotiation process for AEP.

''This project is a critical bridge between a smaller-scale demonstration of PFBC to begin operation later this year at Ohio Power's Tidd Plant and commercial implementation of the technology at utility scale,'' Markowsky said.

The 70-megawatt Tidd PFBC Demonstration Plant at Brilliant, Ohio, which will commence a three-year operational phase this year, is expected to provide valuable input into the commercial plant design. The Tidd project is a cooperative effort of AEP and the Department of Energy under the first round of Clean Coal Technology projects. The Ohio Coal Development Office is also a participant in the Tidd project.

Preliminary engineering and design for the PFBC Utility Demonstration Project are under way. Preliminary engineering includes a detailed evaluation of both the Sporn Project and the option of constructing a completely new facility. Commercial operation is scheduled for 1996 if the Sporn option is selected and 1998 if a completely new facility is selected. The extended schedule associated with a new facility is required to allow sufficient time for additional environmental studies that would be required for a totally new unit.

AEP's efforts to commercialize PFBC could be hampered if the Clean Air Act

is amended to require extensive retrofit of flue gas scrubbers to existing power plants or premature retirement of those plants, according to W.S. White Jr., AEP chairman and chief executive officer.

''Any amendments to the Clean Air Act should provide an appropriate time frame to permit deployment of clean coal technologies. The industry simply does not have the financial resources to pursue the development of clean coal technologies while simultaneously installing scrubbers or replacing prematurely retired units,'' White said.

American Electric Power is a utility holding company with eight operating electric utility subsidiaries serving 7 million people in parts of Michigan, Indiana, Ohio, Kentucky, West Virginia, Virginia and Tennessee.

#90037b0851 02/06/1990 ~Business Wire

PLYMOUTH MA (FEB. 6) BUSINESS WIRE - Plymouth Five Cents Savings Bank (NASDAQ:THFI) Tuesday reported a net loss of $1,529,000, or 66 cents per share for the year ended Dec. 31, 1989, compared with net income of $794,000, or 35 cents per share for the year ended Dec. 31, 1988.

For the quarter ended Dec. 31, 1989, the bank reported a net loss of $1,878,000, or 82 cents per share compared with net income of $4,000 or $0.00 per share for the comparabIe period in 1988.

Elliot W. Chassey, chairman, president and chief executive officer of Plymouth Five Cents Savings Bank noted that the loss for the quarter and the year was primarily the result of management's previously announced decision to substantially increase its provision for possible loan losses in the fourth quarter.

The bank added $2,250,000 to its provision for possible loan losses in the fourth quarter of 1989, compared to $450,000 for the same period in 1988. The provision for possible losses for the 12-month period ended Dec. 31, 1989 was $3,021,000, compared to $776,000 for the same 12-month period in 1988.

The bank also took a charge to earnings of $561,000 through a write down of real estate acquired through foreclosure. At Dec. 31, 1989 the reserve for loan losses amounted to $3,874,000 or 1.4 percent of total loans.

Chassey said that ''the increase in the Bank's loan loss provision reflects the continued decline in the Massachusetts economy and increased levels of non-performing loans in the bank's portfolio. The resolution of

loan problems requires a great deal of time and effort and will be influenced by economic trends both nationally and regionally.''

Total non-accruing loans and real estate in possession and acquired by foreclosure were $14.4 mil3/8ion, at Dec. 31, 1989, compared with $10.9 million at Sept. 30, 1989, and $3.5 million at Dec. 31, 1988.

Total assets at Dec. 31, 1989 were $333,542,000 and deposits were $239,083,000. Total stockholders' equity at year end equaled $29,348,000 or 8.8 percent of assets. Book value was $12.76 per share.

The Plymouth Five Ccnts Savings Bank is a Massachusetts chartered savings bank organized in 1855 which conducts husiness from offices in Plymouth, Manomet, West Plymouth, Kingston, Duxbury, Marshfield, Middleboro and Bridgewater. Deposits are insured in full by the Federal Deposit Insurance Corp. and the Mutual Savings Central Fund Inc.

NORWOOD, MA (BUSINESS WIRE) - Phoenix Technologies Ltd. (NASDAQ:PTEC) Tuesday announced at its annual shareholders' meeting that it will make changes to and expand its board of directors.

Neil J. Colvin, formerly the company's chairman of the board, will concentrate his efforts on the research of advanced technologies and potential new products as the company's senior vice president and chief technical officer.

Lance E. Hansche, formerly vice chairman of the board and executive vice president, will continue in his role overseeing the computer division and business development groups with the new title of senior vice president.

Ron Fisher, the new president and chief executive officer, was appointed a member of the board.

The company also announced today a search for additional outside directors one of whom will become the new chairman of the board.

''For some time now, the board has been undertaking a program to add additional outside directors,'' said Colvin. ''As the company continues its efforts to refocus and rebuild its core businesses, it becomes even more important that these new directors be highly experienced and dynamic additions to the board.

''It is appropriate,'' Colvin continued, ''that the position of chairman be available to be assumed by the tye of outside director we are now seeking. This will also allow me to focus my skills full time on the technology aspects of the company's growth.''

WASHINGTON (FEB. 6) COMTEX - The 8-K report filed at the SEC shows on Jan. 30, 1990, Otzar Hityashvuth Hayehudim B.M., the parent company of Bank Leumi le-Israel B.M., entered into a memorandum with the Israel Ministry of Finance and M.I. Holdings Ltd.

Under terms of the memorandum, subject to the approval of shareholders of Otzar Hityashvuth, the Ministry of Finance, M.I. Holdings, and the Finance Committee of the Knesset, Otzar Hityashvuth has agreed to equalize voting rights in Bank Leumi. Otzar Hityashvuth will thus abolish the special shares of Bank Leumi which had been entitled to 75% of the votes at general meetings. It will instead grant full voting rights to the general shareholders, who formerly were granted only a 25% vote.

In compensation, Otzar Hityashvuth will gain an additional 3% of the share capital of Bank Leumi, subject to shareholder approval.

No later than 18 months after the effective date of the memorandum, M.I. Holdings will take steps to sell a controlling interest of between 25% and 75% of Bank Leumi and dispose of the remainder of shares held by BLL Batuhot Ltd. under the bank share arrangement. The memorandum also lays out procedure to equalize voting rights via the parties for the Union Bank of Israel Ltd. The memorandum sets out proceedure for the sale of Union Bank of Israel and other Bank Leumi non-banking subsidiaries.

#90037c0049 02/06/1990 ~Comtex

WASHINGTON (FEB. 6) COMTEX - The 8-K report filed at the SEC shows on Jan. 27, 1990, California Micro Devices Corp. engaged the services of Coopers & Lybrand as the company's new independent auditors, replacing Price Waterhouse.

In Dec. of 1989, California Micro Devices relocated the supervision of its audit from its Milpitas, CA offices to its Tempe, AZ offices, and sought an independent public accountant in the vicinity of that new location to audit accounts for its fiscal 1990 year. As its former public accountants, Price Waterhouse, had offices in the area, it was also solicited for a bid. Price Waterhouse, however, declined the solicitation.

"The reports of Price Waterhouse on the Company's financial statements for the fiscal years ended June 30, 1988 and 1989, contained no adverse opinion or disclaimer of opinion, and were not qualified or modified as to uncertainty, audit scope or accounting principle." No disagreements were reported between the two parties for these previous two years.

Price Waterhouse did advise California Micro Devices in its fiscal assessment on June of 1989, that the company had material internal control weaknesses, and advised how the company might remedy these weaknesses.

#90037c0065 02/06/1990 ~Comtex

WASHINGTON (FEB. 6) COMTEX - Four regional Federal Reserve bank presidents today unanimously gave their support to a resolution which directs the Fed to gradually eliminate inflation over a five-year period and then maintain price stability.

The four bank presidents, Robert Black from Richmond, E. Gerald Corrigan of the New York Fed, W. Lee Hoskins from Cleveland and Robert T. Parry from San Francisco testified before the House Subcommittee on Domestic Monetary Policy that price stability should be the overriding objective of monetary policy.

The congressional resolution calls for a goal of "zero inflation" over a five year period. Subcommittee Chairman Stephen L. Neal (D-NC) defines zero inflation as the "absence of any significant expectation of future inflation in economic decision making." "As a practical matter, that could well be compatible with a Consumer Price Index fluctuating somewhere between zero and 1 or 2 percent," Neal added.

Recently, rising interest rates in Japan and West Germany have contributed to inflation fears in the United States which have unexpectedly sent interest rates here moving upward. The rise in rates may be creating conflict between the Fed and the Bush Administration.

The administration appears to feel that inflation is in check, and seeks a decline in interest rates to spur economic growth which was sluggish in the fourth quarter of 1989. But as the Fed bank presidents testified, they view cutting the inflation rate from its 4-percent-plus plateau of the past few years as a top priority.

"A less inflationary environment is compatible with high investment and high savings activity," Corrigan said. "If U.S. inflation remains higher than Japan and West Germany, it will undermine the value of the U.S. dollar."

"If the administration wants lower interest rates, it can, and should do two things: work for a lower deficit and support my effort to eliminate inflation," Neal said. "Nothing else will work."

These opposing views take on added urgency as the Fed's top policy makers begin a two-day meeting today to decide whether to act to further reduce the inflation rate or maintain the current level.

The Federal Open Market Committee, the Fed's top policy-making group, is composed of 12 regional Fed bank presidents, four of whom testified before the subcommittee, and six Fed board governors. Under current law, the Fed must consider a wide range of economic conditions in carrying out monetary policy. Black called this a detriment to Fed policy.

"Faced with a mandate to consider a broad range of economic conditions ... policy choices necessarily are made in a discretionary manner which gives substantial weight to current economic and financial conditions and prospects for the near-term future," Black said. "This approach to policy fosters the notion the Fed can fine-tune the economy even though both actual experience and much of the most important research in macroeconomics argue persuasively to the contrary."

"The resolution would help us overcome these problems by specifying clearly a single, feasible objective for monetary policy and instructing the Federal Reserve to achieve that objective," Black added. Moreover, I believe price stability is really the only feasible objective for monetary policy."

The four Fed bank presidents acknowledged that the cost of achieving this goal may initially result in the possibility of recession, higher unemployment and lower productivity but they feel the long-term gains outweigh the short-term disadvantages.

"Some argue the transitionary costs are too high," Black said. "The more modern way to look at this is if inflation were lower, there would be less incentives for businesses to raise prices because it wouldn't stick and wages would not rise either."

"We must be realistic as a nation to recognize we have significant imbalances in the national economy," Corrigan said. "Eliminating inflation won't be done cost-free, but if we do nothing it will be an even greater cost to the economy."

"We can eliminate inflation over five years without experiencing recession " Parry said. "If we do not pursue zero inflation, we almost certainly will undergo a recession because inflation is so volatile."

WASHINGTON (FEB. 7) COMTEX - Telecast Inc. filed a Form 8-K with the NASD stating that it previously announced that Philips Credit Corp., the principal secured lender to Telecast, declared Telecast to be in default under its loan obligations to Philips. Philips had demanded repayment of approximately $15 million of Telecast debt.

On Dec. 13, 1989, Philips and Telecast entered into an agreement under which Philips loaned additional funds to Telecast which enabled Telecast to continue its operations for a limited period. Pursuant to the agreement, Telecast executed and delivered an instrument of peaceful possession with regard to substantially all of its assets to Philips. Those assets were pledged to Philips previously.

Philips has given Telecast notice of termination of the agreement and its intention to take possession of the pledged assets as of Feb. 2, 1990.

Telecast's executive office is located at 20542 Harper Ave., Harper Woods, MI 48225 and its telephone number is (313) 881-9802.

SEOUL (FEB. 6) - South Korea's Samick Musical Instruments said Tuesday it was launching a 30 million dollar convertible bond in Euro markets to finance its joint venture projects in China, Indonesia and Alaska.

Samick, which claims to be the world's largest exporter of acoustic pianos, will issue the bonds in mid-February, with "road shows" or explananatory sessions for investors starting on February 8 in Zurich.

Lead managers will be South Korea's Sangyong Investment and Securities Co., Barclays de Zoete Wedd Ltd. and Daiwa Europe Ltd.

Samick said it would use the proceeds of the issue to finance its "overseas diversification plan" as it seeks to become more competitive by using lower-cost labor and raw materials.

Samick is funding a 20 million dollar joint venture in China to produce

pianos and guitars and a 30 million dollar plant in Alaska to manufacture medium-density fibreboard, a wood substitute.

The bonds can be convertible to Samick's common stocks within a year. Samick was publicly listed in 1988 and its 3.12 million shares currently trade at around 30,000 won per share. The price-earnings ratio of its shares was estimated at 45 in 1989.

TOKYO (FEB. 6) - Japan's Ishida Corp., an affiliate of Toyota Motor Corp. said Tuesday it had agreed to buy a Florida-based manufacturer of aircraft parts from Fairchild Aircraft Corp. for six million dollars.

The acquisition of Crestview Aerospace Corp. is expected to be completed in April, the Nagoya-based company said.

Ishida, established by late Toyota president Taizo Ishida, is involved in aircraft development and real estate. It set up a subsidiary in San Francisco last month to develop and market a vertical takeoff and landing aircraft.

TOKYO (FEB. 6) - Japan's Matsushita Electric Industrial Co. Ltd. is to import semiconductors from Intel Corp. of the United States for use in its own products and marketing under the Intel name, a company official said Tuesday.

The official said Matsushita, the world's largest consumer electronics maker, planned to buy erasable programmable read only memories (Eprom) chips from Intel although volumes and prices had not yet been decided.

Matsushita's consolidated imports are expected to surge 49 percent to 25 billion yen (173 million dollars) in the year to March, or 13 percent of total consumption. Sales totaled 5,504 billion yen (38 billion dollars) last year.

Foreign chips accounted for a record 12 percent of the Japanese market in the September quarter, according to Japan's International Trade and Industry Ministry. The United States is seeking a 20 percent share.

SEOUL (FEB. 6) - Samsung Electronics Co. Ltd, South Korea's leading

electronics manufacturer, said Tuesday it had signed a 50-million-dollar contract to export time division exchanges (TDX) to Poland, Samsung said Tuesday.

TDXs are electronic devices which do the work of telephone operators.

The contract was signed between a Samsung delegation and Polish government officials in Warsaw last week, the company said in a press release.

Samsung also exchanged a letter of understanding with the Warsaw government to take part in telecommunication projects in provincial cities, it added.

Nuremberg (FEB. 6) - Unemployment in West Germany in January increased by 139,500 persons due to seasonal factors to reach just over 2.19 million, the Federal Labour Office said Tuesday.

The joblessness rise pushed the unemployment rate up to 8.5 percent, from December's 8.0 percent rate.

By comparison, in January 1989 there had been over 2.33 million people unemployed, for a rate of 9.0 percent.

Paris (FEB. 6) - Western industrial nations consumption of oil will rise by a little over one percent in 1990, the same growth seen last year, the International Energy Agency (Iea) said here Tuesday.

The Iea forecast said oil usage would amount to some 38 million barrels per day for the 24 nations of the Organisation for Economic Cooperation and Development (Oecd).

The report said that in the fourth quarter of 1989, the Oecd group increased its oil consumption by 4.5 percent compared to the same period the year before.

At the outset of 1990, the Oecd nations held 452 million tons of oil in strategic reserves, about 4 million tons higher than at the start of 1989.

Ankara (FEB. 6) - Oil-poor Turkey will import over 22 million tons of crude this year, the semi-official Anatolian Agency reported here Tuesday,

quoting industry sources.

The chief supplier is projected to be Iraq, with whom negotiations were underway for imports amounting to 7.5 million tons, the agency said.

Turkey has reportedly already signed deals with Iran for five million tons with Libya for three million tons, with the Soviet Union for 1.3 million tons and with Algeria for one millon tons of oil.

Ankara was also negotiating purchases from Saudi Arabia and China, the agency said.

CAPE TOWN (FEB. 6) - Nelson Mandela could be free within the next 10 days judging by a broad hint given by South African Foreign Minister Pik Botha here Tuesday.

With leading black U.S. politician the Reverend Jesse Jackson due to arrive in South Africa on Wednesday for a 10-day visit Mr. Botha was at pains to pre-empt any claim he might make to having secured the release.

"With all due respect there is nothing the Rev. Jackson can do to make a contribution towards Mr. Mandela's release," Mr. Botha told reporters.

"The government's decisions have been taken before the arrival of Mr. Jackson. He can enjoy the aftermath, but certainly not claim any credit."

Mr. Botha also cast doubt on statements by Mr. Mandela's wife Winnie that he does not want to be released until all emergency regulations are lifted as demanded by the African National Congress.

"Don't just believe what other people who see him think, they might put words into his mouth," Mr. Botha said, a statement lent some substance by reports from Stockholm that ANC foreign secretary Thabo Mbeki had told reporters that the remaining emergency regulations were not an obstacle to Mr. Mandela's release.

DAR ES SALAAM (FEB. 6) - Tanzania-based Shell Petroleum Development (SPDT) has sunk a first exploration oil well 60 kilometers (40 miles) south of the town of Kilwa Masoko, an official said here Tuesday.

Drilling operations will start under a production-sharing agreement between SPDT, the Tanzanian government and the state-owned Tanzania Petroleum

Development Corporation (TPDC), the official at the Energy and Minerals Ministry said.

Partners in the exploration venture are Esso oil company and Italian firm Petrofina who each have 25 per cent shares, while the SPDT, which has been searching for oil in southern Tanzania's Lindi region over the past three years, is the venture's main operator.

An earlier statement by the ministry of energy and minerals said seismic surveys had been conducted over a 1,700 square kilometre (680 square miles) area in the Lindi region, culminating in the choice of the site.

No information has been given about the cost of the exploration project.

The statement also revealed that an off-shore seismic survey, involving exploration of hydrocarbons in the Indian Ocean Mafia channel, was completed in May last year following the signing of a production-sharing agreement between the SPDT and the TPDC in December 1988.

It said detailed analysis of the survey, currently being undertaken at the SPDT laboratories in Dar es Salaam, would be known by the end of next year.

The statement emphasized however that a full enviromental impact assessment would be carried out before any drilling was started due to the conservation value of the Mafia channel, one of the richest fishing grounds along the Tanzanian coast.

PARIS (FEB. 6) - French national gas company Gaz de France (GDF) said Tuesday it made a loss of around 50 million francs (8.7 million dollars) last year, after showing a profit of 77 million francs (13.5 million dollars) in 1988.

GDF president Francis Gutmann blamed the poor result on the fact that the government had insisted on holding prices steady while costs had risen by 12 per cent during the year.

Sales were up 3.6 percent to 39.3 billion francs.

Waitingi, New Zealand (FEB. 6) - Queen Elizabeth Ii, head of state of the independent Commonwealth nation of New Zealand, was greeted Tuesday by demonstrators who staged a protest at an official celebration marking the 150th anniversary of the country's incorporation into the British colonial

empire.

The celebrations at this coastal town commemorated the February 6, 1840 Treaty of Waitingi when Maori chiefs ceded sovereignty to Britain and a colony was established.

The demonstrators, mainly Maoris and a few whites, chanted slogans like ''Queen, go home'' and carried banners saying ''Honour the treaty''. One woman hurled a flag pole toward the monarch.

Baton-wielding police dispersed the demonstrators who protested against what they said was the expropriation of the indigenous population during the past 150 years.

The festivities drew more than 25,000 New Zealanders, among them many Maoris who paddled here in their traditional canoes.

SYDNEY (FEB. 6) - Australian mineral sands, gold and base metals miner Renison Goldfields Consolidated Ltd. said here Tuesday it had won a one billion Australian dollar (760 million U.S.) contract to supply coal to the Electricity Commission of New South Wales (Elcom).

Narama Proprietary Ltd., a 50-50 joint venture between Renison's 93.3 per cent owned Nardell Colliery Proprietary Ltd. and Costain Australia Ltd., will supply two million tons of coal a year to the Bayswater and Liddell power stations under the 20-year deal with Elcom.

The contract marks Renison's entry into coal production, requiring the development of an open cut mine at a cost of 75 million dollars (57 million U.S.), the company said.

Costain, which will manage the joint venture, already operates an adjoining mine under contract to Elcom.

Nardell holds coal lease CL580 in the Hunter Valley, near Ravensworth, which contains about 60 million tonnes of coal.

"It's a good project and represents the first development we've had in coal production," said Campbell Anderson, managing director of Renison.

Mr. Anderson said the group welcomed the opportunity to enter into coal production at a time when significant productivity improvements were being achieved and the global demand for coal was increasing.

#90037d4780 02/06/1990 ~French/German News Agency
BERLIN (FEB. 6) - East Germany's future political landscape became clearer Tuesday with the prospect of an electoral battle ahead between a right-wing alliance backed by Bonn and a left-wing grouping of social democracts and former communists.

East Germany's first free elections are scheduled for March 18. They will be dominated on the right by an 'Alliance for Germany' comprising three conservative parties supported by the powerful West German Christian Democratic Union (CDU).

The alliance's biggest challenge will come from the Social Democratic Party (SPD) and the former communist party which has been renamed the Party of Democratic Socialism (PDS).

The SPD, which has the support of its West German homonym, is expected to win the biggest share of the leftwing vote. The PDS admits it is unlikely to win more than 15 per cent and even that figure is deemed wildly optimistic by its rivals.

The Liberals occupy the political centre and two "Green" parties will campaign on ecological themes.

The Alliance for Germany was founded Monday by the East German CDU - a former satellite of the communist party - the Democratic Renewal movement and the German Social Union party (DSU) - a group also represented in Bavaria.

West German Chancellor Helmut Kohl travelled specially to Berlin Monday to preside over the alliance's birth. Mr. Kohl has promised active support for the Alliance and will take part in six campaign rallies.

#90037d4820 02/06/1990 ~French/German News Agency
TOKYO (FEB. 6) - Moody's Investors Services Inc. said Tuesday it was downgrading its credit ratings for Japan's three biggest trust banks and two of their Hong Kong units due to their exposure to the Japanese real-estate market.

The downgrading of Mitsubishi Trust and Banking Corp., Sumitomo Trust and Banking Co. Ltd. and Mitsui Trust and Banking Co. Ltd. affects almost 2.4 billion dollars in long-term debt, the U.S. rating agency said.

Moody's said it took the action due to "increased concern" about the three banks' direct and indirect exposure to the Japanese real estate market which made them "vulnerable" to a downturn in prices.

The agency said it was downgrading Mitsubishi Trust's rating for senior debt, long-term deposits and standby letters of credit from Aa-1 to Aa-2,

affecting one billion dollars in long-term debt. The downgrading also affects senior debt of its Hong Kong subsidiary, Mitsubishi Trust Finance (Asia) Ltd.

The bank's capital base increased "significantly" in the past three years but its "dependence on real-estate and real-estate related loans, as well as on real-estate brokerage, expanded noticeably during the same period," it said.

But Moody's also noted that Japan's biggest trust bank had a higher capital ratio and less exposure to third world debt than most of its peers.

The agency said it was downgrading the senior debt and long-term deposits of Sumitomo Trust and Mitsui Trust from Aa-2 to Aa-3, affecting Sumitomo's one billion dollars and Mitsui's 360 million dollars in long-term debt.

The downgrading also affects Sumitomo's standby letters of credit and the senior debt of its Hong Kong subsidiary Sumitomo trust Finance (HK) Ltd.

"Sumitomo Trust generally exercise strict credit standards but the scale of the bank's real-estate exposure make the bank vulnerable to a downturn," Moody's said.

"Mitsui Trust has been one of the most aggressive lenders to Japan's real-estate and related sectors," it added, although "its overall asset quality is good and its capital ratio is relatively high."

TOKYO (FEB. 6) - Japanese office equipment maker Ricoh Co. Ltd. said Tuesday it would build a thermal paper plant on its industrial site in Colmar, southwest France, to target the European market.

The factory, which is due to commence production in 1992, will have an initial workforce of 160 people and will cost Ricoh 6.7 billion yen (48 million dollars) to set up, the company said.

Ricoh said the plant would produce some 30,000 tonnes of paper a year, adding that most of the raw materials for production would be locally purchased. The paper is for use in facsimile machines.

"In Europe, Ricoh has until now been dependent on imported thermal paper from Japan," said Ricoh Europe BV president Yoshiharu Moriya.

Ricoh Industrie France SA, which was set up in 1987, makes office equipment including photocopiers and facsimile machines.

ATHENS (FEB. 6) - Strikes involving an estimated 60,000 people affected supplies of electricity and public transport in Greece on Tuesday.

Employees of the state-owned DEI electricity undertaking began a 48-hour strike in a dispute over pay, health and levels of staffing, causing power cuts in the region of Athens, a spokesman for the 30,000-strong union Chrissostomos Christidis said.

Meanwhile some 32,000 employees of the urban bus, trolley and lorry transport system halted work for five hours in a dispute over pay, modernisation, and levels of staffing, OUPAE union federation president Theophilos Chalkiopoulos said.

The main ports in Greece remained closed for the second day in succession because administrative staff were participating in a five-day renewable strike.

The federation representing airline pilots, air hostesses and mechanics, most of whom work for the state-owned Olympic Airways, has threatened to call a 24-hour strike next week in support of a demand for an increase in pay.

Prime Minister Xenophon Zolotas on Monday urged employees, and particularly civil servants, to exercise moderation in making their demands because the country was experiencing "a deep economic crisis".

TEHERAN (FEB. 6) - Iran is to invest 5.7 billion dollars in the petrochemical sector over the next five years, enabling it to eliminate imports and to boost overseas sales of oil-based products, the Iranian news agency IRNA reported Tuesday.

By the end of a five-year plan, endorsed by parliament here late last month, annual production in the sector will reach six million tons, the agency said, quoting managing director of Iran's National Petrochemical Industries Ahmad Rahgozar.

Production over the next calender year, which starts March 21, is expected to come to 2.5 million tons.

With investment worth 400 billion riyals Iran will export 20 percent of its domestically produced oil-based byproducts by 1995, said Mr. Rahgozar.

Iran already exports some petrochemicals, including 300,000 tons of sulphur this year, according to IRNA.

Mr. Rahgozar pointed to a methanol plant in Shiraz that has just begun to operate experimentally with an annual capacity of 60,000 tons.

The plant was designed and erected by Iranian experts, with half the needed equipment produced within Iran, he said.

At full capacity, in the next two or three months, the plant will turn out 84,000 tons a year, of which 25,000 tons would be used to meet domestic consumption, Mr. Rahgozar added.

MANILA (FEB. 6) - The Philippines is to import rice from Indonesia, Taiwan and Thailand this year to beef up stocks of the country's staple cereal, the official Philippine News Agency (PNA) said Tuesday.

Senen Bacani told a congressional committee deliberating on his nomination as agriculture secretary by President Corazon Aquino that Manila was to import 200,000 tons of rice in July and August, PNA said.

Mrs. Aquino said on Sunday that the government expects a three to five per cent growth in rice production this year despite the effect of a current drought on production in the first quarter, but that imports were necessary because the harvest could not keep up with rising demand.

#90037d5370 02/06/1990 ~French/German News Agency

STOCKHOLM (FEB. 6) - Sweden, already facing problems over a strike that has kept banks closed for a week, is now facing a disruption of transport and hospital services due to a threatened strike by public service workers.

A lockout by the banks a week ago following a strike by 1,500 employees in the foreign service sector has left Swedes unable to draw cash or pay bills, while companies cannot pay wages or carry out normal business functions.

A mediation panel has been trying for a week without success to bring about an agreement between management and the bank unions, who are asking for wage rises of up to 20 percent, but the unions rejected the latest offer on Monday.

Now public service workers have announced they plan to go on strike next week in support of a 14.5 percent wage claim, which would close creches, disrupt public transport and threaten the functioning of Stockholm hospitals.

The social-democratic government is awaiting a reply Wednesday from unions and business leaders to its proposals to try to rein in wage rises, which hit nearly 10 per cent last year.

Finance Minister Kjell-Olof Feldt said when he presented the budget in January that he wanted to see wage increases held to a maximum eight per cent in 1990 and four per cent in 1991.

The government is proposing centralised wage negotiations for the two coming years, and stiffer penalties for wildcat strikes which have become increasingly common in recent months.

If management and unions do not want to play ball, the government is threatening to axe a promised sixth week of annual paid holiday and higher taxes on company profits.

The business leaders have already said they are against the centralised wage negotiations proposal and prefer pay agreements to be hammered out within individual companies.

#90037d5710 02/06/1990 ~French/German News Agency

PARIS (FEB. 6) - French airline Transport Aerien Transregional (TAT) said Tuesday its consolidated turnover rose 22.8 percent in 1989 over the 1988 level to 1.85 billion francs (324 million dollars).

Net profit was expected to be close to the 1988 level of 54 million francs, company president Michel Marchais said.

"We are France's second largest airline and the largest private company following Air France's taking control of UTA and Air Inter," he said, stressing TAT's determination to continue its independent development, particularly in relation to Air France which holds a 35 percent stake in the company.

But Mr. Marchais also stressed TAT's "interdependence" with the French national airline, with which it has cooperated for 15 years in passenger and freight transport and with which it has set up a joint leasing company to finance the purchase of 16 Fokker 100 jets for TAT.

Mr. Marchais, who holds the remaining 65 percent of TAT's shares, also stressed that his succession was assured through his son Rodolphe.

TAT, which has 70 aircraft with less than 100 seats, carried a total of 2.7 million passengers in 1989, a 20 percent increase on the 1988 level.

It is hoping to attract a wider range of customers - some 80 per cent of its passengers are businessmen - by introducing a business class and more special fares.

The group currently employs 2,522 people, 15.8 percent more than in 1988, and is planning to recruit a further 650 by 1993.

#90037d5960 02/06/1990 ~French/German News Agency

Amman (FEB. 6) - Jordan has reached an agreement to reschedule part of its 1989 and 1990 debts to Moscow and to pay the rest in Jordanian exports to the Soviet Union.

Finance Minister Basel Jardaneh said that after a week of intensive negotiations, Amman reached an agreement with Moscow to reschedule 168 million dollars in debts due this year and last year and to repay 42 million dollars in exports of Jordanian commodities.

In a statement carried by the official news agency, Petra, the minister said the rescheduled debt would be repaid over 12 years with a six years grace period and five per cent interest.

He said Jordan has also committed itself to pay 4 million dollars in cash by mid-March.

Jordan's debt with Moscow stands at 700 million dollars and was mostly incurred for the purchase of Soviet arms in 1984, particularly anti-aircraft missiles and air defence systems.

Amman has already reached agreements on rescheduling its 8 billion dollars foreign debt with the Paris Club of official creditors and the London Club of commercial banks.

Over the past three months, Jordan has signed several bilateral agreements with creditor government and will soon sign accords with commercial banks.

The kingdom sought the help of the International Monetary Fund last year to reschedule its debt after it failed to pay debt instalments because of foreign currency shortages.

The crisis prompted a 50 percent devaluation of the Jordanian dinar and a hike in prices.

BANGKOK (FEB. 6) - Two Khmer Rouge guerrillas were killed Tuesday in an assault on a Cambodian government base in northwestern Cambodia, a Thai border district official said.

A unit of 60 guerrillas belonging to the Khmer Rouge 450th Division launched an attack on Phnom Penh troops at Ban Kop Yai village some four kilometres (2.4 miles) from the Thai border, the district official said.

The official, stationed at Lam Nong Ian border village opposite the battle zone, said the government troops had repulsed the attack with "heavy barrages" of mortar and recoiless cannon fire.

"Two guerrillas were killed on the spot," the official said.

The Khmer Rouge are the strongest faction of the U.N.-recognized tripartite Cambodian resistance coalition fighting a pro-Hanoi regime installed in Phnom Penh 11 years ago by Vietnam.

#90037d7310 02/06/1990 ~French/German News Agency
LONDON (FEB. 6) - Former British chancellor of the exchequer Nigel Lawson will join the board of Guinness Peat Aviation (GPA), the world's biggest aircraft leasing company, reliable sources said here Tuesday.

Mr. Lawson became a board member and part-time advisor to the Barclays Bank on February 1 with a minimum annual salary of 100,000 pounds (170,000 dollars) a year, according to financial sources.

He was expected to earn another 30,000-40,000 pounds (51,000-68,000 dollars) at GPA, where he will not hold management responsibilities, the sources said.

Irish entrepreneur Tony Ryan founded GPA in the mid-1970's. The company leases aircraft to 64 carriers in 32 countries.

In the biggest aircraft order ever placed, GPA last year ordered 300 planes from Boeing, McDonnell-Douglas and Airbus Industries, for a total cost of 17 billion dollars.

Mr. Lawson resigned as chancellor of the exchequer in October after policy disagreements with Prime Minister Margaret Thatcher's personal economics advisor Sir Alan Walters. Sir Alan stepped down following Mr. Lawson's resignation.

BUENOS AIRES (FEB. 6) EFE - Argentine authorities have begun evacuating 10,000 people in coastal provinces and in the north of the country where heavy rains are threatening to cause serious flooding.

Nearly 2,000 people, mainly children, were evacuated from the belt of industrial suburbs surrounding the Argentine capital where 52 mm of rain fell in a single 18-hour period over the weekend.

A state3,000 people were ordered to leave their homes in Corrientes province, near the Brazilian border.

In the coastal province of Entre Rios, the Parana River was threatening to burst its banks, civil defense officials said.

NAGOYA (FEB. 6) KYODO - THE ISHIDA GROUP, A TOYOTA MOTOR CORP.-AFFILIATED ORGANIZATION, SAID TUESDAY IT HAS NEARLY CONCLUDED AN AGREEMENT TO BUY A U.S. MAKER OF SMALL AND MEDIUM-SIZED AIRCRAFT FROM ITS PARENT COMPANY FAIRCHILD AIRCRAFT CORP.

THE SAN FRANCISCO-BASED T. ISHIDA U.S.A. INC., A WHOLLY-OWNED ISHIDA GROUP SUBSIDIARY, WILL BUY CRESTVIEW AIRCRAFT CORP. FOR 6 MILLION DOLLARS, AN ISHIDA OFFICIAL SAID.

THE FLORIDA-BASED MAKER OF AIRCRAFT MANUFACTURES THE FUSELAGE FOR SHORT-DISTANCE LIGHT AIRPLANES.

THE ISHIDA GROUP HOPES THE ACQUISITION WILL SET INTO MOTION ITS PLANS TO MANUFACTURE AND MARKET BY 1996 A TW68 16-PASSENGER VERTICAL TAKE-OFF AND LANDING AIRCRAFT, HE SAID.

SINCE THE TAKEOVER MAY VIOLATE A COMPREHENSIVE U.S. TRADE LAW, THE GROUP WILL NEED THE APPROVAL OF BOTH THE JAPANESE AND U.S. GOVERNMENTS TO GO THROUGH WITH ITS PLANS.

HOWEVER, THE ISHIDA OFFICIAL SAID THERE WILL BE NO MAJOR OBSTACLES TO THE PLANNED TAKEOVER.

THE OFFICIAL SAID THE PURCHASE MAY BE CONCLUDED AS EARLY AS APRIL. THE ISHIDA GROUP WAS ESTABLISHED WITH FUNDS LEFT BY THE LATE TAIZO ISHIDA, THE FORMER CHAIRMAN OF TOYOTA, TO PROMOTE SCIENCE AND TECHNOLOGY.

THE ISHIDA FOUNDATION FORMS THE CORE OF THE ORGANIZATION AND IS ALSO ENGAGED IN NAGOYA CITY'S REAL ESTATE, FASHION AND PUBLISHING INDUSTRIES.

#90037p0017 02/06/1990 ~PR Newswire

PURCHASE, NY (FEB. 6) PR NEWSWIRE - PepsiCo, Inc. (NYSE: PEP) today reported record sales and earnings in 1989 for both its fourth quarter and full-year.

Wayne Calloway, chairman and chief executive officer of PepsiCo, said: "We closed out the year with strong volume growth and operating profit gains in each of our three businesses. A powerful 28 percent growth in operating profits in our base businesses more than offset dilution from recent strategic acquisitions totalling 44 cents per share. This resulted in a 17 percent gain in reported earnings per share for 1989. During the past five years our ongoing earnings have grown at a compound rate of 21 percent per year and our sales have increased almost 17 percent per year. This clearly reflects the vitality of our businesses."

Full Year Results For the full year, net income jumped over 18 percent to a record $901.4 million on a sales gain of almost 22 percent to $15.2 billion. Operating margin improvements in each of PepsiCo's three business segments contributed to this strong performance, along with particularly impressive volume growth in snack foods and restaurants.

Earnings per share rose by over 17 percent to $3.40. The impact of one time items in 1988 and 1989 on the growth rate was offset by the effect of an extra week in the fourth quarter of 1988.

Fourth Quarter Results Fourth quarter operating profits for PepsiCo's three business segments soared 42 percent and earnings per share grew almost 23 percent, excluding the impact of a $0.05 per share charge for the reorganizations of Pepsi-Cola International and Taco Bell in 1989 and the effect of approximately $0.06 per share in additional earnings in 1988 as a result of the extra week. Reported operating profits rose a very strong 28 percent to $503.2 million, net income rose eight percent to $202.1 million and earnings per share rose six percent to $0.76. Sales rose 19 percent to almost $4.8 billion. Fourth quarter results primarily reflect strong volumes in all three businesses and margin gains in soft drinks and snack foods.

Calloway said: "This is a remarkably strong fourth quarter for PepsiCo. When you consider our reported results include $0.15 of dilution from the strategic acquisitions we made over the last year, you begin to sense the true strength of our businesses."

#90037p0020 02/06/1990 ~PR Newswire
VINELAND, NJ (FEB. 6) PR NEWSWIRE - Security Investments Group, Inc.

(NASDAQ: SSLN) and its subsidiary Security Savings Bank, SLA, today reported consolidated net income of $9.3 million, or $1.99 per share, for the three months ended Dec. 31, 1989, as compared to net income of $2.3 million, or $0.50 per share, reported for the same quarter last year.

Net income for the year ended Dec. 31, 1989, was $14.5 million, or $3.10 per share, as compared to $7.7 million, or $1.64 per share, reported the previous year.

Net interest income grew $3.8 million to $12.7 million for the three-month period, and $8.7 million to $39.6 million for the year ended Dec. 31, 1989 as compared to the same period last year. Contributing to this was an increase of $4.3 million for the quarter and $7.8 million for the year in income derived from the normal accretion of discount as well as accretion associated with the sale of loans acquired under the purchase method of accounting.

According to Ronald A. Seagraves, president and chief executive officer, "Fourth-quarter earnings were enhanced by a one-time gain of $6.6 million resulting from the consummation of a previously announced transaction wherein Security Savings Bank sold three branches in Ocean County." He said, "The proceeds from this transaction directly contributed to Security's compliance with the material provisions of the new capital requirements."

As of Dec. 31, 1989, Security was in compliance with two of the three newly mandated capital requirements under the Financial Institutions Reform, Recovery and Enforcement Act (FIRREA). Seagraves commented, "On Dec. 31, 1989, Security had tangible capital equal to 1.6 percent of assets and core capital of 3.3 percent of assets. These levels are higher than the 1.5 percent tangible and 3.0 percent core capital levels required by the regulators." He added, "As previously disclosed, Security's risk-based capital level is equal to 4.5 percent, slightly lower than the required 6.4 percent ratio. However, the bank expects to be in compliance prior to the allowable time established by the regulators."

Provision for loan losses increased in both the quarter and year ended Dec. 31, 1989, by $1.0 million and $2.1 million, respectively, in comparison to the corresponding periods for 1988. "The decision to provide additional provision for loan losses is considered a conservative measure on the bank's part," Seagraves commented.

Seagraves continued, "Real estate income declined by $1.0 million for the quarter and $4.5 million for the year, a decline that is in line with the bank's strategy to de-emphasize real estate investments."

Security's mortgage banking operations experienced an increase in income of $2.7 million for the year ended Dec. 31, 1989, as compared to 1988.

As a result of a cost-containment program, operating expenses for the three-month period ended Dec. 31, 1989, decreased $1.6 million to $11.6 million as compared to $13.2 million reported for the same quarter last year. For the year ended Dec. 31, 1989, operating expenses were $46.9 million compared to $45.4 million, an increase of 3 percent from the same period last year.

Security Investments Group, Inc., the holding company for Security Savings Bank, SLA, had assets in excess of $1.5 billion on Dec. 31, 1989. Security Savings Bank is a state-chartered financial institution headquartered in Vineland. The bank operates 35 branches throughout southern New Jersey and provides businesses and consumers with a wide variety of financial products and services.

SAN DIEGO (FEB. 6) PR NEWSWIRE - Infrasonics Inc. (NASDAQ: IFRA) announced today that revenues for its second quarter ended Dec. 31, 1989, increased 7 percent to $1,450,400 as compared to $1,352,300 for the same quarter last year. In the most recent quarter there was a profit of $83,400, compared to a loss of $57,300 in the same quarter of the previous year. This represents a profit of one cent per share for the period just ended compared to a loss of zero cents per share in the same period ended Dec. 31, 1988.

For the six month period ended Dec. 31, 1989, revenues increased 14 percent to $2,804,900 from $2,465,700 during the same period in 1988. There was a profit of $164,900 for the most recent six month period vs. a loss of $163,500 for the same period ended Dec. 31, 1988. This represented a profit of one cent per share vs. a loss of one cent per share, respectively.

Jim Hitchin, Infrasonics' president, said: "Our improved revenue is due to our increasing market share for the Infant Star neonatal ventilator. We have just received FDA approval to begin commercial distribution of our high frequency ventilator (HFV). Also, production of our new adult ventilator is now coming on line. We believe these products will add significant revenues and profits as we penetrate the larger adult ventilation market and this newly established infant HFV arena.

"If we look at the calendar year just ended, revenues increased 22 percent to $5,740,900 compared to $4,703,600 year ago. The 1989 calendar year was profitable at $174,000 compared to a loss of $620,800 in the 1988 year. This represents a profit for the year of one cent compared to a loss of four cents in calendar 1988."

Infrasonics is a public company with its common shares traded Over-the-Counter under the NASDAQ symbol IFRA. The company manufactures

ventilators (respirators) for infants, children, and adults as well as other respiratory care products for use in hospitals and the home.

HAYWARD, CA (FEB. 6) PR NEWSWIRE - Nellcor Inc. (NASDAQ: NELL) announced today that it has reached an agreement in principle to acquire Radiant Systems Inc., a software and systems development company. The purchase price consists of $1.8 million in cash paid at closing and 150,000 shares of Nellcor common stock, to be delivered on the achievement of certain business objectives over time.

Radiant is a small privately held company located near Kansas City, Mo. Radiant presently employs six engineers and has developed advanced hardware and software technology for the implementation of hospital- based monitoring systems.

Ray Larkin Jr., Nellcor's president and CEO, said, "We expect radiant to bring to Nellcor in-depth expertise in software and systems development. We believe that our investment in Radiant will accelerate our bringing to market new network-based products to meet the rapidly evolving needs of our hospital customers."

The proposed transaction is subject to a number of contingencies, including the completion of certain due diligence, the negotiation of a definitive acquisition agreement and required board, stockholder and third party approvals.

Nellcor Inc. designs, manufactures and markets high-performance electronic monitoring instruments for patient safety and management in operating rooms, recovery rooms, intensive care units and other areas of the hospital. Nellcor is the leading producer of pulse oximeters used in hospitals for the continuous measurement of patient oxygen status.

#90037p0024 02/06/1990 ~PR Newswire

HAYWARD, CA (FEB. 6) PR NEWSWIRE - Nellcor Inc. (NASDAQ: NELL) today announced the election of a new director and two officer appointments recently approved by the company's board of directors.

Donald L. Hammond has been elected a member of the board of directors, expanding the board to six members. Hammond has also agreed to consult

for the company on a part-time basis, focusing on technical management issues. Now a consultant to and member of the boards of several non-profit institutions and private companies, Hammond previously spent 30 years with Hewlett-Packard, ending as director of Hewlett-Packard Laboratories. Nellcor President and CEO Ray Larkin Jr. commented, "Hammond's broad technical background and expertise is a valuable asset, and we're very pleased that he has agreed to join the board."

Lauren Yazolino has been elected to the new position of vice president of product development. Yazolino joined Nellcor as a consultant in December 1988 to coordinate the improvement program for the N-1000 multi-function monitor and the subsequent release of software and hardware enhancements. More recently, he led the development of Nellcor's new N-2500 anesthesia safety monitor, which has been shipped in limited quantities to Europe.

Tibor L. Foldvari, now vice president of technology development, will focus on technological problem-solving and advanced technology development.

Michael P. Downey, vice president of finance, has been elected chief financial officer. Downey joined Nellcor in 1986 and most recently has served as vice president of finance and corporate controller.

Nellcor Inc. designs, manufactures and markets high-performance electronic monitoring instruments for patient safety and management in operating rooms, recovery rooms, intensive care units and other areas of the hospital. Nellcor is the leading producer of pulse oximeters used in hospitals for the continuous measurement of patient oxygen status.

#90037p0025 02/06/1990 ~PR Newswire

ROCHESTER, NY (FEB. 6) PR NEWSWIRE - Eastman Kodak Company (NYSE: EK) today reported record sales and lower earnings for both its fourth quarter and the year 1989. The reduction in 1989 net earnings was attributed primarily to restructuring costs which will lead to future improvements in earnings and cash flow. Higher operating costs, higher interest expense and the unfavorable impact of exchange rate changes further reduced 1989 results.

Sales for the fourth quarter totaled $4.89 billion, an increase of 8 percent over the $4.54 billion posted for 1988. Earnings from operations declined 89 percent to $70 million compared with the restated $658 million a year ago. Due to the restructuring costs, the company reported a loss for the fourth quarter of $60 million, compared with net earnings of $312 million for the fourth quarter of 1988. On a per-share basis, the loss amounted to $.19 compared with earnings per share of $.96 for the 1988

fourth quarter.

Without the restructuring costs, operating earnings for the quarter would have been $595 million, a reduction of 10 percent, while net earnings would have amounted to $262 million, down 16 percent. Without the restructuring costs, earnings per share would have been $.80 for the quarter.

For the year, sales totaled $18.40 billion, an increase of 8 percent over the $17.03 billion reported for 1988. Earnings from operations declined 43 percent to $1.59 billion from the restated $2.81 billion achieved a year ago. Net earnings amounted to $529 million, down 62 percent from the $1.40 billion recorded in 1988. Earnings per share were $1.63 versus $4.31 the previous year.

Operating earnings for the year without restructuring costs of $875 million, would have amounted to $2.47 billion, down 12 percent. Net earnings without the $549 million effect of restructuring costs would have declined 23 percent to $1.08 billion. Earnings per share would have totaled $3.32 for the year.

Increased unit volume in the Imaging segment for both the quarter and the year resulted in sales gains that were partially offset by unfavorable effects of foreign currency rate changes. Worldwide sales increases were paced by volume growth in every business, with particular strength in 35 mm color negative film and photographic papers.

For the fourth quarter, segment sales were $1.93 billion, an increase of 9 percent over the $1.77 billion posted a year ago.

#90037p0026 02/06/1990 ~PR Newswire

EAST AURORA, NY (FEB. 6) PR NEWSWIRE - Moog Inc. (AMEX: MOG.A, MOG.B) today announced net earnings for the first fiscal quarter of $1.6 million or $.20 per share which compare with a loss of $411,000 or $.05 per share for the first quarter a year ago. Consolidated net sales were $73.0 million, 15 percent above net sales of $63.6 million in last year's first quarter.

"It was a solid quarter and we are on track," Robert T. Brady, president, said. "We've achieved profitable results for the last four quarters as a result of an improving mix of business together with efficiencies achieved through the company's restructuring."

Brady reported that moderate sales increases are projected despite U.S. defense budget constraints. "We have been upgrading our technology and capabilities in recent years and are a strong international competitor in high-performance actuation controls," Brady said. "Our business is growing because we are supplying complete control systems as well as components. Potential applications for our military and commercial products continue to expand and our penetration of international markets is rising steadily. We are positioned with excellent products and technologies and we think that we have the flexibility to adapt to the changes ahead."

Backlog of new orders at Dec. 31, 1989, increased to $239 million from backlog of $236 million at the end of the previous quarter and $235 million a year ago.

Operating profit increased sharply for the Domestic Controls segment to $5.5 million from $1.0 million for the first quarter a year ago. Sales for the segment were $51.9 million, 20 percent above sales of $43.3 million for the comparable quarter last year. Performance was generally strong within the segment. Earnings were dampened by further increases in estimated costs to complete development work -- principally for the Short Range Attack Missile (SRAM) and the Standard Missile, part of the Aegis defense system. Moog is developing electromagnetic control systems for these tactical weapons.

International Controls sales rose 4 percent to $21.2 million from $20.4 million a year earlier. Operating profit declined to $2.4 million from $3.1 million for the first quarter of fiscal 1989. "The year got off to a slow start overseas," Brady observed. "The pace should pick up as the year progresses." New orders increased 9 percent for the segment from the year earlier period and backlog climbed to $45.5 million at the close of December, 21 percent above backlog at the close of fiscal 1989.

Brady said that he expects performance for the company will continue to improve throughout the year.

Moog Inc. is an international manufacturer of precision controls for aerospace, defense and industrial applications.

#90037p0030 02/06/1990 ~PR Newswire

CHARLEVOIX, MI (FEB. 6) PR NEWSWIRE - Consumers Power Company's Big Rock Point nuclear plant generated 50,850 megawatt-hours of electricity during January, its second-best monthly total in more than two decades. The plant's output was 2 percent higher than its rated capacity.

"This demonstrates that Big Rock Point remains a strong generator of electricity," said William J. Beckman, Big Rock plant manager. "The plant is running well."

The January production success comes on the heels of a very strong year for the plant. During 1989, Big Rock Point produced a total of 416,754 megawatt-hours of electricity, the seventh-best production year in its history. The plant ran continuously at full power throughout January and, during 1989, was only out of service for scheduled refueling and for two brief maintenance outages.

Owned and operated by Consumers Power Company, Big Rock Point's present rated capacity is 67 megawatts of electricity, enough to serve a community of 50,000 people.

Consumers Power Company, the principal subsidiary of CMS Energy Corporation (NYSE: CMS), is Michigan's largest utility serving almost 6 million of the state's 9 million residents in 67 of the 68 Lower Peninsula counties.

#90037p0031 02/06/1990 ~PR Newswire

HOUSTON (FEB. 6) PR NEWSWIRE - Novell Inc. (NASDAQ: NOVL) and Compaq Computer Corporation (NYSE: CPQ) have announced a technology development agreement to apply the resources of both companies toward the enhancement of network system fault tolerance. The intent of the effort is to develop one or more products which take advantage of Novell's system fault tolerance technology and Compaq's multi-processing technology to reach new levels of overall reliability for networks based on PC systems.

The agreement - effective immediately - covers design, development, testing and marketing of any resulting products. The design target is the development of both hardware and software extensions to support the use of mirrored servers in Novell NetWare environments. Through the use of two separate servers in a network (one a redundant, mirrored image of the other) network reliability can be substantially increased.

The agreement is a natural step for both companies, as customers considering network-based solutions become more dependent on system up-time, according to Mike Swavely, president, Compaq North America. "PC systems like the COMPAQ SYSTEMPRO, which started shipping in December 1989 have become the server solution of choice for many networked environments. In fact, high-performance network solutions based on the COMPAQ SYSTEMPRO and Novell NetWare 386 are already being used in mission-critical

applications as an alternative to minicomputers. This joint effort will focus on advancing the level of reliability of network solutions based on Novell NetWare 386 and COMPAQ SYSTEMPRO," Swavely says.

Compaq Computer Corporation is a world leader in the manufacture of PC systems, and desktop, portable, and laptop personal computers. Additionally, IDC estimates that Compaq is the leader in the U.S. PC LAN server market, with the largest market share of any manufacturer. Founded in February 1982, Compaq is a FORTUNE 500 company with 1989 worldwide sales of $2.9 billion. COMPAQ products are sold in 61 countries through a network of more than 3,000 authorized COMPAQ computer dealers.

Novell is the leading independent provider of open, high-performance system software products. The company's NetWare network operating system has become a standard for personal computer-based local area networks. Novell's revenues for fiscal year 1989 were $422 million.

WASHINGTON (FEB. 6) PR NEWSWIRE - Telematics International, Inc. (NASDAQ: TMAX) is introducing the following communications products at the Communication Networks '90 Exposition, COMNET Booths 2-3.

S9000 FRAME RELAY EXCHANGE (FRX) -- A high-performance statistical network switch. The new frame-relay backbone switch is well suited for wide-area networks requiring high-performance transfer rates (2,500 to 10,000 + packets per second) and high communications channel line speeds (up to 10Mbps per channel). The S9000 FRX provides the flexibility to migrate multimedia traffic onto a single backbone network.

S240 PROGRAMMABLE COMMUNICATIONS PROCESSOR (PCP) -- An extremely versatile data communications system. Expanding the powerful Telematics PCP product line, the cost-effective S240 offers users 32-bit MC68020 technology with a high throughput communications engine. Providing high performance for up to 32 full-duplex channels, the S240 can function as a packet switching backbone node, an X.25 concentrator node, an asynchronous/synchronous protocol access node, an ETHERNET LAN to X.25 WAN access node, or a network control center.

ACCESS COMMUNICATIONS PROCESSOR (ACP) 10 -- A new member of the ACP product line which provides low-cost X.25 network access for sites with a small number of devices. The ACP 10 can be deployed as an Asynchronous PAD, an Asynchronous Switching PAD, an X.25 Packet Switch, a 3270/3770/5250/5294 SNA Switching PAD or as a multiprotocol PAD that combines all these functions. The ACP10 will support switching in excess of 50 packets per second when used as an X.25 Concentrator/Switch and support six multi-protocol ports. To optimize attachment to the backbone network, one of the ports can be operated at up to 64 Kbps.

SMARTNET REVISION 8.0 -- A software release that enhances functionality and performance of the SmartNet X.25 product line. Revison 8.0 improves SmartNet connectivity by supporting up to 32 asynchronous ports on the S3000 SmartNet and by improving bandwidth available for synchronous ports. Packet switching throughput on all SmartNet products is doubled with Revision 8.0 -- S3000s can achieve in excess of 200 packets per second and S4000s can achieve 135 packets per second.

Founded in 1982, Telematics designs, manufactures and markets computer systems and software products designed specifically for voice and data communications applications and networks. The company's products include a full range of programmable packet switching systems, low-end protocol converters and switches, T1 multiplexers, and frame relay switches.

ST. PETERSBURG, FL (FEB. 6) PR NEWSWIRE - Milton Roy Company (NYSE: MRC) announced today that it has filed suit in the United States District Court for the Eastern District of Pennsylvania against Crane Co. (NYSE: CR) for

alleged violations of the federal securities laws.

Richard E. Schmidt, chairman and president of Milton Roy, stated, "We have become convinced that Crane is attempting through a number of false and misleading statements and actions to unlawfully manipulate the market for Milton Roy stock. While publicly claiming to have an interest in the acquisition of Milton Roy at $21 per share, Crane has secretly pursued a scheme to extract a 'greenmail' premium for its 488,300 Milton Roy shares."

Schmidt added, "We will not be intimidated by direct or indirect threats of proxy fights or tender offers into paying to Mr. Evans or his company any form of greenmail."

Schmidt concluded, "The board of directors continues to believe that the future prospects of Milton Roy are excellent as an independent company. All our shareholders will benefit from the anticipated improved financial performance and from the favorable outlook in the major markets served by the company."

Milton Roy Company manufactures a broad range of analytical instrumentation and process control products for use in industrial, educational and laboratory applications.

NEW YORK (FEB. 6) PR NEWSWIRE - Sutton Holding Corp. announced today that it has extended the expiration date of its cash tender offer for all of the outstanding shares of common stock of DeSoto, Inc. (NYSE: DSO) (including the associated preferred share purchase rights) at $50 per share, until midnight New York City time, on Monday, Feb. 12, 1990. The offer was previously set to expire at midnight, New York time on Monday, Feb. 5, 1990.

Sutton Holding Corp. was advised by the depositary for the tender offer that as of 7 p.m. New York City time, on Monday, Feb. 5, 1990, 2,258,542 shares of common stock had been validly tendered and not withdrawn which, together with the shares beneficially owned by Sutton Holding Corp. and its affiliates, collectively represent approximately 70.2 percent of all outstanding DeSoto shares. Sutton believes that these shares also represent approximately 80.1 percent of the shares of common stock not owned by either Sutton Holding Corp. and its affiliates or by the DeSoto stock ownership plan and officers and directors of DeSoto.

William Spier, chairman of Sutton Holding Corp., said, "We remain committed to our $50 per share cash offer and look forward to the Delaware Chancery Court decision regarding our suit against the company and its poison pill. We have asked the court to require the company to redeem its poison pill so that shareholders will have the opportunity to make their own determination whether to accept our offer, without interference from the board of directors."

ATLANTA (FEB. 6) PR NEWSWIRE - Georgia-Pacific Corp. (NYSE: GP) said today that its wholly owned subsidiary, NM Acquisition Corp., has extended its tender offer for all outstanding shares of common stock (including the associated preferred share purchase rights) of Great Northern Nekoosa Corp. (NYSE: GNN) for $63 in cash for each share and associated right.

The offer and withdrawal rights of the offer will now expire at 5 p.m., New York City time, Wednesday, Feb. 21, 1990, unless extended.

The offer was previously scheduled to expire Feb. 5. As of 5 p.m. Feb. 5, 41,572,332 shares of Great Northern Nekoosa stock had been validly tendered and not withdrawn, including shares tendered pursuant to notices of guaranteed delivery. The tendered shares represent more than 75 percent of Great Northern's outstanding common stock. In addition, Georgia-Pacific and NM Acquisition Corp. together own 349,900 shares.

T. Marshall Hahn Jr., chairman and chief executive officer of Georgia-Pacific, said, "With more than 75 percent of Great Northern's shareholders once again tendered into our offer, we believe the shareholders think our offer is fair and are strongly requesting action from their board -- action that we are convinced would create a globally more competitive company -- on our $63 in cash, fully financed offer."

#90037p0043 02/06/1990 ~PR Newswire

CINCINNATI (FEB. 6) PR NEWSWIRE - The Kroger Co. (NYSE: KR) reported today 1989 fourth quarter after-tax earnings of $5.3 million, or 7 cents per share, before an extraordinary item, the results of both record sales and cash flow.

The Company said fourth quarter operating cash flow from continuing units increased 10.6 percent to a record $229.1 million. Sales from continuing units in the quarter rose 8.3 percent to a record $4.653 billion.

For the full year 1989, sales from continuing units totaled $18.832 billion, up 7.5 percent over the previous year, while operating cash flow totaled $896.2 million, an increase of 22.0 percent over 1988.

The Company said it was especially encouraged by a 7.2 percent increase in sales from identical stores in the fourth quarter. For the full year, identical store sales increased 5.3 percent.

An after-tax extraordinary loss of $51.3 million from the write-off of deferred financing costs related to its 1988 bank credit agreement resulted in a net loss of $45.9 million, or 56 cents loss per share, for the fourth quarter. In the comparable 1988 fourth quarter, Kroger had a net loss of $119.0 million, or $1.57 loss per share, when a $128.7 million after-tax restructuring charge was recorded.

For all of 1989, Kroger had a loss of $16.3 million, or 23 cents per share loss before the extraordinary item. Including the extraordinary loss, Kroger's net loss for 1989 was $72.7 million, or $0.92 loss per share, compared to net earnings of $34.5 million, or 24 cents per share in 1988.

WAUKESHA, WI (FEB. 6) PR NEWSWIRE - Hein-Werner Corporation (AMEX: HNW) today reported record preliminary results for the year ended Dec. 31, 1989.

For the year ended Dec. 31, 1989, sales are approximately $113.3 million.

Earnings per share are expected to be a record $1.50.

Joseph L. Dindorf, president and chief executive officer, stated, "We are very pleased with these results in a tough economic and business climate. We believe our performance is a direct reflection of our market strength, low break-even levels and product positioning worldwide and our ability to adjust quickly to changing business conditions."

Dindorf continued, "We have successfully recapitalized the company and believe Hein-Werner now has the necessary flexibility to take advantage of acquisitions and growth opportunities as they arise."

Dindorf added, "Over the next five years we have a goal to achieve $250 million in net sales while we improve the return on sales and equity. We

feel we are well positioned to meet these objectives."

Hein-Werner Corporation is a leading worldwide manufacturer and marketer of collision repair, automotive service and fluid power equipment. The company has manufacturing operations in the United States, Canada, Mexico and Europe.

PITTSBURGH (FEB. 6) PR NEWSWIRE - Chambers Development Co. Inc. (AMEX: CDVB) reported today that for the fourth quarter of 1989, net sales increased 44.3 percent, earnings from operations gained 47.4 percent, and net earnings rose 50.1 percent, compared with the same period of 1988.

For the three month period ended Dec. 31, 1989, net sales reached $52.4 million, compared with $36.3 million during the fourth quarter of 1988, while earnings from operations advanced to $10.7 million from $7.3 million for the comparable 1988 period. Net earnings rose to $7.7 million for the fourth quarter of 1989, up from $5.1 million in the prior year.

Both primary and fully diluted earnings per share for the quarter increased 27.3 percent to $.28 from $.22 reported in the fourth quarter of 1988.

Net earnings for the year totaled $27.1 million on net sales of $181.9 million, compared to net earnings of $19.5 million, before the cumulative effect adjustment discussed below, on net sales of $137.0 million for 1988. These results represent a 39.2 percent increase in net earnings, before adjustment, and a 32.7 percent increase in net sales over 1988.

The financial results for 1988 reflect the cumulative effect adjustment that occurred during the first quarter of that year, which resulted from

the company's adoption of Financial Accounting Standards No. 96 -- Accounting for Income Taxes. This change in accounting principle increased net earnings $1.3 million and primary and fully diluted earnings per share by $.06 and $.05 per share, respectively.

Primary earnings per share for the year 1989 increased 26.2 percent to $1.06 from $.84, before adjustment, for the prior year, and fully diluted earnings per share of $1.03 increased 27.2 percent from $.81, before adjustment, for 1988.

Chambers Development Co., headquartered in Pittsburgh with offices in Georgia, Indiana, New Jersey, Rhode Island, Texas and Virginia, is a leading environmental firm offering services in collection, hauling, disposal, recycling and landfill development.

Chambers also provides security services through its wholly owned subsidiary, Security Bureau Inc., which is among the 20 largest U.S. security guard and patrol companies.

ATLANTA (FEB. 6) PR NEWSWIRE - Georgia Gulf Corp. (NYSE: GGC) announced today that it is issuing the following letter to stockholders from James R. Kuse, chairman and chief executive officer:

"On February 5, 1990, GG Acquisition Corp., a wholly-owned subsidiary of NL Industries Inc., commenced an unsolicited tender offer to purchase, subject to certain conditions, all of the outstanding shares of common stock of Georgia Gulf at $45 per share. NL Industries' majority stockholder is a company controlled by Harold Simmons.

"Your board of directors, with its financial and legal advisors, is currently considering the tender offer. On or before February 16, 1990, the company will advise you of its recommendation with respect to whether you should accept or reject the tender offer and the reasons for making its recommendation.

"The board of directors encourages you to defer your decision whether to accept or reject NL Industries' offer until you have had the benefit of and reflected on the company's recommendation. Since the offer does not expire until March 5, 1990, you will have sufficient time to receive the company's recommendation before deciding whether to accept or reject the tender offer.

"All of us at Georgia Gulf thank you for your past and continuing support."

CHERRY HILL, NJ (FEB. 6) PR NEWSWIRE - Subaru of America (NASDAQ: SBRU) announced today it will display two concept vehicles at the 82nd Annual Chicago Auto Show to be held at McCormick Place, Feb. 10-18.

The two concept vehicles, the Subaru SRD-1, a concept station wagon developed jointly by a team of Japanese and American designers, and the SVX, an exciting 2-plus-2 that resembles the next-generation Subaru sports coupe, will be appearing together for the first time in the United States. Both vehicles made their international debut last year in Japan at the Tokyo Motor Show, and have been enthusiastically received by both the news media and the public.

In addition, the all-new Subaru exhibit will debut the Subaru Traction Center in Chicago, a unique display that dramatically demonstrates the Subaru 4WD and ABS braking technologies by allowing observers to walk underneath a Subaru Legacy that is suspended overhead. While underneath, a mini-theatre dramatizes a variety of road and weather conditions that helps underscore the safety features available on the Subaru Legacy.

The Legacy, an all-new compact entry, quickly attained the distinction for

1989 as the top selling 4WD car in the United States. The 1990 Subaru lineup offers three other distinct models, each competitively positioned in the market. Also on display will be the Justy, a minicompact entry which is the lowest priced 4WD passenger car sold in the United States. The subcompact Loyale line features the Subaru station wagon, the number one selling import wagon for nine years in a row. In the sports coupe segment is the Subaru XT6, the least expensive 6-cylinder 4WD car sold in the United States.

Subaru of America, the exclusive U.S. marketer of Subaru products manufactured by Fuji Heavy Industries Ltd. of Japan, is unique in the automotive industry -- it's still the only auto company to offer a complete line of front-wheel-drive and 4-wheel drive cars. Its stock is traded on the national Over-the-Counter market.

MINNEAPOLIS (FEB. 6) PR NEWSWIRE - Consul Restaurant Corporation (NASDAQ: CNSL) announced today it has signed a letter of intent to purchase three Mexican dinner house restaurants in the Minneapolis and St. Paul markets.

The three units, currently operated as Esteban's Mexican Restaurants, would be converted to Chi-Chi's Mexican Restaurantes, and would increase the number of Chi-Chi's operated by Consul in the Twin Cities market to 10 and in all markets to 51.

"This agreement is an important step in our strategy of leveraging Chi-Chi's existing presence in key markets," said William D. Etter, president and chief operating officer. "These units will complement our existing Twin Cities operations because they are ideally located and have been extremely well run."

The purchase is subject to approval of definitive agreements by directors of both corporations. The three restaurants are located in Anoka, Burnsville and Maplewood.

Consul, the largest franchisee of Chi-Chi's restaurants, operates 39 full-service Chi-Chi's, nine Chi-Chi's el Pronto! quick-service units and one Magnolia's seafood dinner house. They are located in six states and six provinces of Canada.

#90037p0060 02/06/1990 ~PR Newswire
WESTBOROUGH, MA (FEB. 6) PR NEWSWIRE - New England Critical Care, Incorporated (NASDAQ: NECC) today reported record sales and earnings for the year and the fourth quarter ended Dec. 31, 1989.

Sales for the fourth quarter were $26.8 million, an increase of 82 percent over the $14.7 million reported for the same period in the prior year. Net income for the quarter was $2,939,000, an increase of 68 percent over the $1,750,000 reported for the same period in 1988. Income per share was 45 cents for the quarter as compared to 30 cents for the same quarter in 1988.

New England Critical Care sales for 1989 were $82.9 million, an increase of 71 percent over the $48.4 million reported in 1988. Net income for the year was $8.5 million, an increase of 54 percent over the $5.5 million reported in 1988. Primary earnings per share was $1.38 for the year compared to 95 cents in 1988. Fully diluted earnings per share was $1.35 for 1989 compared to 95 cents in 1988.

The company also announced that its board of directors had approved a 2 for 1 stock split, payable in the form of a stock dividend on March 31, 1990, to shareholders of record as of Feb. 28, 1990. When retroactively restated to reflect the stock split, income per share for the fourth quarter of 1989 was 22 cents as compared to 15 cents in 1988, primary earnings per share for 1989 was 69 cents as compared to 47 cents for 1988, and fully diluted earnings per share was 67 cents in 1989 and 47 cents in 1988.

Founded in 1981, NECC was one of the first companies to provide infusion therapies such as parenteral nutrition, antibiotic therapy, chemotherapy and pain management therapy to patients in their homes. As a leading provider of these services in the alternate site health care marketplace, NECC today offers more than 18 types of home infusion therapies, with specialized services to specific patient populations including AIDS and pediatrics. New England Critical Care's headquarters are located at 50 Washington Street, Westborough, Mass. 01581. The shares of the company's common stock are traded over-the-counter on the NASDAQ National Market System under the symbol NECC.

#90037p0061 02/06/1990 ~PR Newswire
NEW YORK (FEB. 6) PR NEWSWIRE - Mitsubishi Corporation announced that ACC

Acquisition Corporation has today commenced a tender offer for all outstanding shares of common stock of Aristech Chemical Corporation (NYSE: ARS) at $27.00 per share net to the seller in cash. ACC Acquisition has been organized by Mitsubishi Corporation and, after consummation of the acquisition of Aristech, will be owned by Mitsubishi; certain members of Aristech Chemical's senior management, led by Thomas Marshall, Aristech's chief executive officer; and Blackstone Capital Partners, L.P. The Blackstone Group, MIC Consulting Inc. and the Nikko Securities Co. International, Inc. are serving as the dealer managers for the tender offer.

As previously announced, the tender offer is being made in connection with the merger agreement executed on Jan. 31 among Aristech Chemical Corporation, ACC Acquisition Corporation and Mitsubishi. The tender offer is conditioned upon, among other things, there being validly tendered and not withdrawn that number of shares which when added to the shares being contributed by certain members of Aristech management constitute a majority of the outstanding shares, and the receipt of financing pursuant to existing commitments that Mitsubishi has secured from certain banks.

Mitsubishi, a leading Japanese general trading company, is an important intermediary in the trade of many raw materials.

Aristech, headquartered in Pittsburgh, is a producer and marketer of polymers and related products and basic, intermediate and industrial chemicals.

The offer and withdrawal rights expire at 12:00 midnight, New York City time, on Wednesday, March 7, 1990, unless extended, in the sole discretion to the extent permitted in the Merger Agreement, of ACC Acquisition Corporation, by giving oral or written notice of such extension to the Bank of New York, the depositary, and making public announcement thereof.

The terms and details of the offer are contained in the offer to purchase which is being mailed to the stockholders of Aristech Chemical Corporation and which is also available from Georgeson & Company, Inc., the information agent.

#90037p0062 02/06/1990 ~PR Newswire

MINNEAPOLIS (FEB. 6) PR NEWSWIRE - Inter-Regional Financial Group, Inc. (NYSE: IFG) (IFG), today reported net earnings for the year ended Dec. 31, 1989, of $3,564,000, or 43 cents per share. This compares with a net loss of $6,838,000, or 94 cents per share, in 1988. Net earnings for 1989

included an extraordinary gain of $686,000, or 9 cents per share, from the utilization of accumulated tax loss carryforwards and the purchase of IFG's outstanding convertible subordinated debt. In 1988, the company recorded an extraordinary gain of $881,000, or 12 cents per share, from the purchase of outstanding IFG convertible subordinated debt.

Net revenues (revenue less interest expense) for 1989 totaled $236,540,000 an increase of 16 percent over net revenues of $203,094,000 in the prior year. The acquisition of Milwaukee Financial Group was included for the full year in 1989.

"Our 1989 results reflect significantly improved trading and underwriting results and substantially higher net interest income," said Irving Weiser, chief executive officer. "While we are pleased that we were able to return to profitability in 1989, we recognize that our cost structure will have to be changed in order to achieve acceptable earnings in the current market environment. As of year end, we have completed the liquidation of the IFG Leasing portfolio, and, as a result, corporate overhead expenses associated with the leasing company will be reduced by approximately $3 million, beginning in 1990."

Fourth-quarter 1989 net earnings totaled $287,000, or 3 cents per share, compared with a net loss of $4,343,000, or 58 cents per share, in the comparable 1988 period. "The 1988 fourth-quarter results were adversely affected by the addition of reserves at Dain Corporation," said Weiser.

Net revenues for the 1989 fourth quarter totaled $63,369,000, compared with $52,502,000 in 1988.

IFG provides full-service securities and investment banking services in 20 states through its subsidiary firms Dain Bosworth Incorporated, Minneapolis, and Rauscher Pierce Refsnes, Inc., Dallas.

#90037p0065 02/06/1990 ~PR Newswire

CONCORD, CA (FEB. 6) PR NEWSWIRE - The Office Club Inc. (NASDAQ: OCLB) today reported financial results for the fourth quarter which ended Dec. 31, 1989.

Net sales for the year increased 182 percent to $146.7 million from the previous year's $52.1 million. Net sales also increased for the twelfth consecutive quarter to a record $47.4 million, an increase of 144 percent over the $19.4 million in sales for the fourth quarter of 1988.

The Office Club incurred a loss of $2.4 million or 40 cents per share in 1989, compared to a net loss of $3.2 million or 76 cents per share in 1988. The Office Club reported a net profit of $573,000 or 10 cents per share in the fourth quarter of 1989, compared to a net loss of $949,000, or 21 cents per share in the fourth quarter of 1988 and a loss of $2,113,000 or 36 cents per share, in the third quarter of 1989.

The company attributed its first quarterly profit to a reduction in aggregate pre-opening expenses, continued economies of scale relative to general and administrative expenses, and increased warehouse contribution. Mark Begelman, president of The Office Club, said that "The fourth quarter was particularly gratifying in that the company generated its first quarterly profit despite the inventory and revenue losses incurred as a result of the Oct. 17, 1989 earthquake which impacted the San Francisco Bay Area."

Fourth quarter results reflected continuing strong performance from existing warehouses and the addition of two new facilities in Stockton, Calif. and Albuquerque, N.M. Comparable warehouse sales for the fourth quarter increased 31.9 percent from the prior year's period for the 11 facilities opened more than one year. Five of the facilities in the comparable warehouse period were closed between one and four days as a results of the Oct. 17, 1989 earthquake.

The Office Club Inc. sells high quality, brand name office products through a fast-growing network of retail membership warehouses in California, Oregon, Washington, Colorado, Texas, Nevada, New Mexico and Arizona. The company operated 32 warehouse facilities as of Dec. 31, 1989. Business, non-profit and home office customers are offered one-stop shopping at the lowest competitive prices for office supplies, office furniture, office machines, microcomputers and related products. Credit, telephone ordering and delivery services are available.

SAN DIEGO (FEB. 6) PR NEWSWIRE - Xscribe Corp. (NASDAQ: XSCR) announced today that its quarter ended Dec. 31, 1989, resulted in a net loss of $397,000, compared to the net loss of $3,310,000 (including non-recurring charges of $1,900,000) for the same quarter of the previous year. Revenues in the current quarter were $4,556,000 compared to $5,522,000 for the comparable quarter of the prior year.

The company's net loss for the nine months ended Dec. 31, 1989, was $1,619,000 compared to a net loss of $5,063,000 for the comparable nine

month period of the prior year. Revenues for the nine months ended Dec. 31, 1989, were $12,289,000 compared to $17,461,000 for the nine months ended Dec. 31, 1988. Current quarter operations provided positive cash flow of $413,000, while operations in the comparable prior year quarter used $1,882,000 of cash.

The company also announced today a three year extension of its line-of-credit agreement with City National Bank. Initially, the company could borrow up to $5 million under this new agreement. Under the terms of the agreement, the available amount decreases by $100,000 each month during the next three years. As of Feb. 6, 1990, the company owes $2,800,000 under this agreement and accordingly, no principal payments are due until October 1991.

Xscribe Corp. designs and markets a wide variety of high- technology software and hardware products for legal professionals, including computer aided transcription (CAT) systems for court reporters, microcomputer-based systems for litigation support, and real-time captioning systems for the hearing impaired.

TAMPA, FL (FEB. 6) PR NEWSWIRE - Poe & Associates Inc. (NASDAQ: POEA) announced 1989 operating results.

Net income for 1989 was $0.81 per share or $3,109,000 as compared to $1.10 per share or $4,109,000 reported in 1988. Total revenue for 1989 was $41,674,000, an increase of 19 percent from the $35,108,000 reported in 1988.

Results for 1989 and the quarter ended Dec. 31, 1989 included a charge of $.58 per share resulting from the settlement of the litigation between Poe Dependable Insurance Co. and Jose M. Alvarez. The settlement reached in February provides for an intitial cash payment by Poe of $2 million, and future payments over 10 years having a present value of $1,600,000. The settlement also provides for a future agency relationship between Poe and Dependable through which Poe can earn part or all of the future payments based on the amount of premium volume produced.

As a result of the settlement discussed above, the company suffered a loss in the fourth quarter of $(465,000), or $(0.12) per share, compared to a net income of $384,000 or $0.10 per share in 1988. Total revenue for the 1989 fourth quarter was $11,313,000, an increase of 49 percent from the $7,583,000 reported in 1988. Revenue in the fourth quarter of 1989 included a non-recurring commission related to a major insurance program,

contributing approximately $0.27 per share to net income.

The company previously announced the board's declaration in January of a $.10 per share cash dividend payable on Feb. 27 to stockholders of record Feb. 9.

Poe & Associates Inc., a general insurance agency headquartered in Tampa, Fla., is among the nation's leading independent insurance agency organizations. The company has offices throughout Florida and in Arizona, California, Georgia, Illinois, New Jersey, North Carolina and Texas.

PRINCTON, NJ (FEB. 6) PR NEWSWIRE - CYTOGEN Corp. (NASDAQ: CYTO) announced today that George W. Ebright has been elected chairman of its board of directors.

Ebright, 51, succeeds Robert F. Johnston, 53, founder of CYTOGEN, who has served as chairman of the board since the incorporation of the company in 1980. Johnston remains a director of the company.

Ebright, who will continue as president and chief executive officer, joined CYTOGEN in February 1989. Previously, he served as president and chief operating officer and a member of the board of directors during a 26-year career at SmithKline Beckman Corp.

Johnston noted that Ebright achieved a number of significant objectives during the past year, including the timely filing of the OncoScint(R) Colorectal PLA, technology licenses with Lilly and Bracco, a marketing and

distribution agreement with EuroCetus and the successful completion of the preferred stock offering. "Under George's direction, CYTOGEN has become a dynamic company focused on product commercialization. His election to chairman is in recognition of his accomplishments and his ability to successfully lead an early stage biopharmaceutical company," Johnston said. He added that Ebright's appointment is part of a long-term corporate plan to recognize and capitalize on the talents and abilities of CYTOGEN management.

Ebright expressed the appreciation of the CYTOGEN board. "We are grateful for the valuable contributions that Bob has made to CYTOGEN's growth and his dedication to the company. We look forward to his continued counsel as a member of our board of directors."

CYTOGEN Corp. is a biotechnology company developing unique delivery systems for therapeutic and diagnostic agents by linking them to monoclonal antibodies in such a way that the function of the antibodies as the delivery vehicles are optimized. Current product development efforts at CYTOGEN are focused on the diagnosis and treatment of cancer and cardiovascular disease.

ODESSA, TX (FEB. 6) PR NEWSWIRE - Falcon Oil & Gas Company, Inc., (NASDAQ: FLOG), today announced strong gains in estimated revenues and net earnings for the fiscal year ended Jan. 31, 1990, achieving new record highs in both categories. Revenues for the year just ended amounted to approximately $3,000,000, as against $1,888,000 reported for the prior fiscal year, while net earnings amounted to approximately $680,000, or 30 cents per share, versus $350,000, or 19 cents per share reported a year before. The past fiscal year marks the ninth consecutive year in which Falcon has reported profitable operations, a period during which wide variations in oil and gas prices have occurred.

It was disclosed that the pre-tax present dollar value of reserves in only the proven developed producing category, discounted at a 10 percent annual rate, exceeded $12 million, versus a comparable discounted value of $6.8 million for such reserves at Jan. 31, 1989. Comparative number values for all reserve categories are $16.9 million at Jan. 31, 1990, versus $11.2 million at Jan. 31, 1989.

Falcon also disclosed the acquisition of a 22.5 percent working interest in three producing gas wells in Harris County, Texas for a consideration of $210,000. At the sale time, it was noted that the sale of interests in seven wells in Oklahoma for $312,500 had been effected. It was pointed out

that proceeds from the sale of the Oklahoma well interests were used to help retire 135,000 shares of the company's common stock which was subject to a put to Falcon at a price of $3.00 per share or $405,000.

WASHINGTON (FEB. 6) PR NEWSWIRE - MCI Communications Corp. (NASDAQ: MCIC) today announced the availability of the first phase of MCI PORTFOLIO Billing, a service that allows large business customers to track telecommunications bills by location, regardless of the number of services used or site locations.

With MCI PORTFOLIO Billing, a customer can specify how and where their charges for MCI services are billed -- consolidated and billed in a single invoice to corporate headquarters, or billed by multiple invoices to regional, divisional or other company-designated offices.

An invoicing and management reporting package, MCI PORTFOLIO Billing enables large corporate customers with numerous invoices to better define and control billing services based on their individual corporate structure and information requirements.

Scheduled to be available in March, the location level billing service will be initially offered to MCI's Vnet customers as an option to their combined invoices.

The PORTFOLIO Billing is designed to complement MCI PORTFOLIO Reporting, a comprehensive management information and reporting service, which will be generally available this spring.

MCI PORTFOLIO Reporting provides customized summary reports of key statistics and management information based on the customer's organizational structure, in a single package.

With PORTFOLIO Billing, customers are afforded greater flexibility and convenience, as well as enhanced billing features for as many locations as the customer designates.

The new service is part of MCI's strategy to provide consolidated management reporting and billing services for all of MCI's business services, according to Reich.

MOUNTAIN VIEW, CA (FEB. 6) PR NEWSWIRE - Silicon Graphics Inc. announced that its common stock began trading today on the New York Stock Exchange (NYSE) under the symbol SGI.

"Silicon Graphics has grown in size and sophistication over the past nine years and is now a global company with affiliates in Europe and the Pacific Rim. We believe that listing on the world's most prestigious exchange is consistent with our business accomplishments," said Edward R. McCracken, president and chief executive officer. "Silicon Graphics and our stockholders will benefit greatly from the increased visibility that listing on the NYSE affords. And, the listing will also broaden our access to international capital markets and increase opportunities for a more diversified shareholder base."

Silicon Graphics Inc. is a leading manufacturer of graphics workstations and servers. These computer systems are used by engineers, scientists and creative professionals in design, manufacture and marketing of products and services.

WASHINGTON (FEB. 6) PR NEWSWIRE - In a first step toward extending its MCI Vnet Service internationally, MCI Communications Corporation (NASDAQ: MCIC) today announced that it will interconnect with British Telecom to permit MCI's U.S. Vnet customers to include the United Kingdom on their virtual networks.

MCI's Vnet Service will be connected with British Telecom's International FeatureNet Service, providing both companies' respective customers with access to Vnet's communications management functions and competitive prices on an international basis.

Used by many of the nation's Fortune 500 corporations and government institutions, MCI's Vnet Service affords the benefits of a private line network at competitive costs, with expanded feature functionality and control.

The announcement, made at the Communications Networks '90 Exposition annual conference here, signifies "MCI's further commitment to the global telecommunications requirements of business," said Jack Reich, vice president of product marketing for MCI.

"MCI and British Telecom have a long history of partnership and we're delighted to join them in bringing our customers the services they need to communicate more successfully in today's changing global climate," Reich said.

MCI Vnet is most often used for telephone calls, but also supports facsimile and data communications at speeds up to 2400 bps. Currently, calls and data transmission to the United Kingdom by MCI Vnet customers are handled by the standard International Direct Digit Dialing or via private channels which have fixed monthly costs.

British Telecom is expected to inaugurate its International FeatureNet service in the autumn. Shortly after, MCI and BT are expected to begin trials of the new service.

Once operational, calls to the U.S. from the United Kingdom will be processed by MCI Vnet centralized databases, Reich said. These databases provide instructions to MCI's intelligent network for customized routing, access and special features, including the use of private seven- and ten-digit inter-office dialing plans to reach both private and public network telephones.

Reich said the company plans to further expand the Vnet Service to include additional international locations.

MCI offers a full range of domestic and international communications services. International services include worldwide direct dialing, telex, facsimile, electronic mail, private voice and data networks, and television transmission. MCI's offices in nearly 50 countries worldwide are positioned to support the full range of global telecommunications services.

#90037p0080 02/06/1990 ~PR Newswire

WASHINGTON (FEB. 6) PR NEWSWIRE - MCI Communications Corporation (NASDAQ: MCIC) today announced several advanced features for MCI Vnet Service that will add flexibility and management capabilities to the long distance service it provides to large multi-location corporations.

The new enhancements to its virtual private network service, introduced at the Communication Networks '90 Exposition annual conference here, provide additional routing capabilities and allow for greater customization of its customers' Vnet Service. The new features include the ability to eliminate call blockage through an automatic routing of overflow calls to different termination facilities or locations.

Available second quarter 1990, the Vnet enhancements include:

- "Customized Announcements." In addition to standard network announcements, i.e., "Your call cannot be completed as dialed," customers can record customized voice announcements. An example would be, "You have dialed an invalid ACME Net number. Please call the ACME Net help desk at 999-9999 for assistance." In addition the Direct Termination Overflow feature of Vnet has been enhanced to allow the caller to be directed to a customized message.

- "Multiple Network ID." For multi-subsidiary corporations, this feature allows each subsidiary, with its own sub-network, to benefit from the corporation's traffic volume discount.

- Dial 1 Access locations, formerly limited to 2-digit ID codes, now have the capability of using up to 7-digit verifiable ID codes, the same as for dedicated access line locations.

- "Point of Call Routing." This allows customers who have their own private line networks to route MCI Vnet calls into their network at the point closest to the caller, allowing for more cost-effective routing.

- "800 Service Integration" permits MCI Vnet and 800 Service calls to be completed over the same dedicated termination facilities, instead of requiring separate lines for each service.

- "800 Remote Access" simplifies calling for traveling employees. As an alternative to the MCI Vnet card, the caller simply calls a customer specific 800 number and seven digit on-net number.

Also included in the new MCI Vnet enhancements are operator services availability, Calling Station Identification, Hotline Services and Configuration Management.

#90037p0085 02/06/1990 ~PR Newswire

WEST CHESTER, PA (FEB. 6) PR NEWSWIRE - QVC Network Inc. (NASDAQ: QVCN) announced today that sales for its fourth quarter, ended Jan. 31, 1990, rose to approximately $280 million, up 28 percent from pro-forma sales of $218 million in the same period the year before.

Sales on a pro-forma basis for the full fiscal year were approximately $860 million, an increase of 43 percent as compared to pro-forma sales of $603 million for the previous fiscal year.

QVC acquired CVN Cos. Inc. on Oct. 31, 1989. For the purposes of the pro-forma comparison, all periods include sales from CVN's televised-shopping operations as if the acquisition had occurred at the beginning of the fiscal year ended Jan. 31, 1989. Not included are sales from CVN's "COMB" mail-order business, which is being divested by QVC.

On a standard ("GAAP") accounting basis, which excludes CVN sales prior to the actual Oct. 31, 1989, acquisition but includes sales from continuing CVN operations after the acquisition, QVC's fourth-quarter sales were approximately $280 million compared with $68 million reported in the year-earlier quarter. Similarly, on a GAAP accounting basis, QVC's full fiscal year sales were approximately $451 million as compared to $193 million reported last year.

QVC Chairman Joseph M. Segel said that he expects QVC's audited revenues and earnings report to be ready in mid-March.

The QVC and CVN televised shopping programs are broadcast live by satellite, 24 hours a day, seven days a week, and are carried by cable television systems to a total of more than 32 million homes throughout the country. Its programs are also received by more than 2 million U.S. homes that have their own satellite dishes.

Segel also said, "The merging of the QVC and CVN programs is progressing smoothly. The CVN program is gradually becoming more like the QVC program. CVN is now following QVC's strict policy of on-screen disclosure of shipping and handling charges. CVN is also adjusting its graphics and presentation style to more closely resemble QVC's. At the same time, QVC is steadily increasing the variety of its merchandise offerings through the addition of CVN inventory, and developing new software to provide customers with the CVN credit plans that have been largely responsible for CVN's high average dollar amount per order.

"By March 30, the old CVN program will be phased out. All cable systems carrying the CVN program but not carrying the QVC program will convert to the enhanced QVC program," he added.

"For our second shopping channel on cable systems that have been carrying both QVC and CVN, we originally planned to launch a new shopping program with most of the hours sponsored by a variety of different merchants. As we progressed with development of that concept, however, we concluded that its complexity and the resources it required would not provide a satisfactory return on investment.

"We are now putting the final touches on an entirely different plan for our second channel. The new plan is more practical than the 'multi-merchant' format and is more certain to produce an appropriate return on

investment. We expect to be able to announce the details of this plan very shortly," Segel said.

#90037p0088 02/06/1990 ~PR Newswire

HUDSON, MA (FEB. 6) PR NEWSWIRE - Artel Communications Corporation (NASDAQ: AXXX), Hudson, Mass. today announced its operating results for the fourth quarter and the year 1989. For the fourth quarter 1989, Artel sales were $3,351,000, an 88 percent increase over the same period of the previous year. Sales in the fourth quarter were somewhat higher than expected due in large part to customers requiring shipments which had been earlier scheduled for shipment during the first quarter of 1990. Net income for the fourth quarter was approximately $505,000 or 12 cents per share, an improvement of $572,000 over the same period of the previous year when a net loss of $67,000 or 2 cents per share was recorded. Included is an extraordinary tax credit in the form of net operating loss carryforwards of $133,000 or 3 cents per share.

For the year 1989, revenues were $12,211,000 representing an increase of 107 percent over the previous year. Included in the 1989 revenues is $2,800,000 from international licensing and marketing agreements. Sales from shipments and services showed an increase of 60 percent over the previous year. Sales of FiberWay(R), Artel's flagship product, increased by 128 percent during the year and constituted a majority of the fourth quarter sales.

Net income for the year was $1,658,000, an improvement of $2,714,000 over the previous year when a net loss of $1,056,000 was recorded. Included is an extraordinary tax credit in the form of net operating loss carryforwards of $514,000 or 13 cents per share. Earnings per share were 41 cents compared to a net loss of 30 cents per share for the previous year.

Return on equity for 1989 was 32 percent. Artel ended the year with cash and marketable securities of $4,236,000, an increase of $3,397,000.

Robert L. Bowman, Artel's president and CEO noted that, "For Artel, 1989 was a year of achievement. We saw many of our strategies and plans come to fruition providing us with a solid foundation on which to build the future. For 1990, Artel is striving to improve on its record growth. Nonetheless, as Artel confidently moves into the decade of the nineties, the company recognizes that it has many challenges and uncertainties before it. Artel is a relatively small company participating in the early stages of explosive new markets and, therefore, expects that quarterly variations in revenues and earnings may occur until these markets

stabilize."

Artel Communications Corporation is a leading supplier of advanced state-of-the-art fiber optic based intelligent backbone networks, high resolution graphics and video transmission products. FiberWay(R) is Artel's unique multi-service fiber optic high speed local/metropolitan area network product.

ROCKVILLE, MD (FEB. 6) PR NEWSWIRE - The Investment ANALY$T service from Telebase Systems, Inc., Bryn Mawr, Pa., has been added to the Finance menu

of online service offerings on the GEnie service.

The GEnie service is an online consumer information service for personal computer enthusiasts offered by GE Information Services.

Telebase's Investment ANALY$T provides three essential services to investors using the GEnie service: Current and historical stock price data stock performance analysis, and stock screening and selection.

Investment ANALY$T is also an information tool which can be used to track portfolios, identify market trends, monitor competitors, check insider movement, and gather strategic intelligence.

The ANALY$T service delivers quotes for NYSE, AMEX and NASDAQ stocks and mutual funds. The stock performance analysis options, which include price/volume charts, insider trades, buy/sell indicators, company news and other indicators, are available in easy-to-read chart or graph formats.

The stock screening and selection options enable investors to combine up to 135 different company characteristics to develop a rank order list of the 25 companies most closely matching the investor's unique selection criteria.

Some of the other business & financial services offered on the Finance menu of the GEnie service include: GEnie Quotes Securities Database, the Executive Desk Register, and an Investors' RoundTable. The GEnie service also provides access to the following business & financial services: Dow Jones News/Retrieval and VESTOR Investment Advisor.

The GEnie service, which became operational in late 1985, is one of the fastest growing online consumer information services today with more than 180,000 individual subscribers throughout the U.S. and Canada and in 20 cities in Japan.

For further information in the United States on the GEnie service, please call 1-800-638-9636. GE Information Services, a division of General Electric Company (NYSE: GE), is headquartered in Rockville, Md.

NOTE: Investment ANALY$T is a ServiceMark of Telebase Systems, Inc. GEnie is a ServiceMark of General Electric Company.

#90037p0097 02/06/1990 ~PR Newswire

PITTSBURGH (FEB. 6) PR NEWSWIRE - The Federal Home Loan Bank of

Pittsburgh announced today that Calvin D. Baker has joined the bank as vice president and executive director of community investment.

Baker will assume responsibility for the bank's Community Investment and Affordable Housing programs.

Baker was previously chairman of the board of Atlantic Financial, serving in that position from the date of Atlantic's formation in 1982 until his retirement in October 1989. From 1954 to 1982 he was employed by Community Federal Savings, a predecessor organization to Atlantic Financial, and served as its president and chief executive officer from 1962 through 1982.

Baker has a prestigious record of participation in numerous community housing programs and other community activities. He currently serves as vice chairman of Mayor W. Wilson Goode's Philadelphia Housing Policy Board which assists the city with planning and administering community development and housing services. Formerly, Baker served on the Mayor's Task Force on Housing Policy and Task Force on Cooperative Housing. He currently serves as a member of the Planning Committee of the initiative by the Gray Panthers to conceive and conduct national forums on the affordable housing issue. He is a member of the Philadelphia Home Builders' Association Affordable Housing Initiative and chairs its Financial/Legislative Committee.

Baker is a member of the Blue Ribbon Committee on Drug Abuse under the leadership of Pennsylvania state Sen. Hardy Williams (D-Philadelphia). He is chairman of the board of the Philadelphia Rehabilitation Plan which is charged with the responsibility of reclaiming and rehabilitating abandoned homes for disposition to low-income families. He is a director of the Delaware Valley Housing Council. Baker is a member of the board of directors of the Pennsylvania Area Council for Economic Education and of the World Affairs Council of Philadelphia. He is also a member of the board of directors of the Central Philadelphia Development Corp. where he directs a special task force to find solutions for the homeless of the region.

The Federal Home Loan Bank of Pittsburgh extends credit and provides banking services to eligible financial institutions for the purpose of financing home mortgages and related activities. The bank operates in the Third District of the Federal Home Loan Bank System, which includes the states of Delaware, Pennsylvania and West Virginia.

#90037p0101 02/06/1990 ~PR Newswire

MARTINSVILLE, VA (FEB. 6) PR NEWSWIRE - Tultex Corporation (NYSE: TTX), one of the nation's largest producers of fleeced activewear, showed a profit downturn for the fourth quarter and fiscal year ending Dec. 30, 1989, Dick Hunnicutt, chairman and chief executive officer, reported today.

For the 12 months, sales were $334,020,000 compared with $334,294,000 in 1988, and net income was $5,034,000 or 18 cents per share compared with $19,873,000 or 72 cents per share for the prior year.

Fourth quarter sales were $122,994,000 compared with $130,404,000 in 1988, and earnings were $2,043,000, or 7 cents per share compared with $11,686,000 or 42 cents per share for the fourth quarter of 1988.

Sales and earnings for the 1988 year were restated due to the company's change in its fiscal year-end from the Friday nearest Nov. 30 to the Saturday nearest Dec. 31.

Return on equity, which averaged 19.6 percent for the ten years ended in 1988, was 4 percent in 1989. The company's long-term goal is to average a 20 percent return on equity.

Tultex, a vertically integrated producer of fleeced knit activewear and leisure time apparel, operates yarn and apparel manufacturing plants in Virginia and North Carolina.

TROY, MI (FEB. 6) PR NEWSWIRE - R.P. Scherer Corporation announced today that it has signed a letter of intent for the sale of PACO Pharmaceutical Services, Inc., to an investor group led by Russell Haines, PACO's president, and Tullis Cook & Company.

The purchase price for PACO is approximately $39 million, in a combination of cash and assumption of debt.

PACO, located in Lakewood, N.J., is a leading contract packager and manufacturer of pharmaceutical and consumer products.

Completion of the transaction is subject to buyers' ability to obtain necessary financing, to receipt of necessary consents and to compliance with federal and state laws, as well as certain other conditions. It is expected that the closing will occur within the next 120 days. Terms of

the transaction were not disclosed.

Sale of PACO is a part of the divestiture program undertaken by Scherer following its buy-out by the investor group led by Shearson Lehman Hutton Holdings, Inc. in May of 1989. Prior to the announcement of the sale of PACO, Scherer had completed divestitures of three other of its subsidiaries which constituted its Diversified Health Care Group.

The divestiture program is the result of Scherer's decision to refocus its activities to its core drug dosage delivery systems.

R.P. Scherer Corporation is a leading developer and manufacturer of drug dosage delivery systems. Scherer's proprietary and patented dosage delivery systems optimize the efficacy of drugs by regulating the dosage, rate of absorption, and place of release. In addition to being the world's largest developer and manufacturer of softgels, Scherer's dosage delivery range includes the patented Scherersol and Zydis systems. The company operates a global network of 14 facilities in 13 countries.

#90037p0105 02/06/1990 ~PR Newswire

PHOENIX (FEB. 6) PR NEWSWIRE - Zila, Inc. (NASDAQ: ZILA) today announced it has granted to Bausch & Lomb Incorporated, exclusive international (non-U.S.) rights to manufacture and market its line of unique, non-prescription oral health care products.

Included in the agreement are:

- Zilactin (R), for canker sores, fever blisters and cold sores. Fifty percent of the public suffers form recurring canker sores - painful ulcers that occur in the mouth, on cheeks, gums and tongue. Eighty-five percent suffer from painful and unsightly cold sores and fever blisters on the lips and around the edges of the mouth.

- ZilaBrace (tm), for those suffering from cuts and abrasions on the inner cheek, caused by newly installed braces and other dental appliances. In the United States, 1.2 million new braces are installed each year.

- ZilaDent (tm), for the gum sores that plague denture wearers - 50 million in the United States alone.

The three Zila products are in wide U.S. distribution; a fourth, Zilactol (tm), will enter U.S. markets in the Spring.

Bausch & Lomb expects foreign sales to begin in Canada during the current

quarter. Bausch & Lomb will pay an undisclosed sum for the exclusive marketing rights, and will pay royalties to Zila based on a percentage of sales with an agreed-upon minimum guaranteed annual sales volume. The agreement gives Bausch & Lomb the right to use the Zilactin, ZilaBrace and ZilaDent names in foreign markets.

Zila, based in Phoenix, Ariz., is a publicly owned company with shares trading on the NASDAQ over-the-counter market, trading symbol "ZILA".

Bausch & Lomb is a Fortune 500 company (1989 sales of $1.2 billion) with leadership positions in worldwide health care and optics markets. Bausch & Lomb said this agreement marks an important expansion of the company's oral care business, which is in the early stages of development in international markets. Bausch & Lomb's Oral Care Division currently markets the Interplak (R) Home Plaque Removal Device and the Interprobe (tm) Periodontal Charting and Examination system.

"With this agreement," said Zila President Joseph Hines, "Zila attains two critical objectives: Zila's products begin international distribution and will benefit from association with Bausch & Lomb as that company expands into the oral care market. Either of these steps would have significantly contributed to growth in Zila's sales and prestige; together, we believe that they will provide Zila with the income and recognition it needs to continue its strong trend of increasing profitability and product line expansion."

Hines also noted that the association with Bausch & Lomb may provide further benefits in the form of cooperative projects utilizing Bausch & Lomb's sophisticated research and development capabilities. Hines said, "We have only scratched the surface of potential applications of Zila's patented bioadhesive formula."

Zilactin and its bioadhesive component have been the subject of several clinical studies reported in medical/dental journals over the last two years.

One such study found that Zilactin provides pain relief from canker sores for up to six hours, continuing its effectiveness even during eating and drinking.

A second study showed that Zilactin remained in place, providing protection and pain relief, at least three times longer than competing products. The report also noted that Zilactin provides a smooth, comfortable film, while other products were described as "gritty, granular easily displaced."

A third peer-reviewed journal article stated that "use of the liquid form of the compound resulted in total destruction of infectious HSV 1" on

contact, even when diluted 1:10. Zila President Hines said the company shortly will begin marketing this liquid product, under the brand name Zilactol (tm).

Independent research using the Zila compound is currently being conducted to confirm its value in the treatment of herpes zoster (commonly known as "shingles"), genital herpes (HSV-2) and genital warts (condyloma).

For the 1989 fiscal year which ended July 31, Zila net sales totaled $2,557,798, up 109 percent over the prior year; net income for FY 1989 totaled $124,118. First quarter FY '90 net sales totaled $908,772, with net income of $80,589. "Zila's strong cash position, with no long term debt," said Hines, "should allow the company to take advantage of new growth opportunities as they arise."

In the United States, Zila has promoted its products primarily to dentists pharmacists and other health professionals, with almost no direct consumer advertising. Zila has produced a steady trend of sales and profit growth:

Fiscal Year	Net Sales	Net Profit
1989	$2,557,798	$ 124,118
1988	1,223,887	(264,975)
1987	317,629	(440,893)
1986	166,461	(646,226)

ROCHESTER, NY (FEB. 6) PR NEWSWIRE - Curtice Burns Foods (AMEX: CBI) and its companion organization, Pro-Fac Cooperative, Inc., announced today the purchase of Brockport Cold Storage Company, nc., for an undisclosed amount.

The company also announced the appointment of John D. Porter to the newly-created position of president and chief executive officer of the company's Meat Snacks Group.

The Brockport acquisition, completed today, was announced in principle on September 5, 1989. The Brockport Cold Storage facility will be managed by the Comstock Michigan Fruit Division of Curtice Burns Foods.

According to David J. McDonald, president and chief executive officer of Curtice Burns, "The addition of Brockport Cold Storage will enable us to enhance the level of customer service we provide, and to increase our utilization of storage space in our frozen food packaging and distribution operations."

-- New President of Meat Snacks Group -- John D. Porter will become president and chief executive officer of Curtice Burns Foods' Meat Snacks Group, headquartered in Denver, Colorado. He will be in charge of both the Smoke Craft and Lowrey's Meat Specialities Divisions of Curtice Burns.

Mr. Porter was previously senior vice president of worldwide marketing and sales for Dole Packaged Foods Company, a subsidiary of Castle and Cooke. Before that, he served as president of Tree Sweet Products, and also of Swift Grocery Products Company.

Curtice Burns president David McDonald commented, "We see major opportunities for sales and earnings growth in the meat snack category. John Porter's extensive marketing and management experience will be a great asset to us in this important part of our business."

Curtice Burns Foods is a processor and marketer of regional branded private label, and food service products throughout the United States and Western Canada. The company's sales exceeded $800 million in the fiscal year ended June 30, 1989.

CONTACT: Joan Miller of Curtice Burns Foods, 716-383-1850, or Stuart D. Sheppard of Ketchum Public Relations, 212-536-8868, for Curtice Burns Foods

CHICAGO (FEB. 6) PR NEWSWIRE - A newly formed European affiliate of the Reliable Corp., one of the United States' leading direct marketers of office products, has acquired Universal Direct, a United Kingdom- based direct marketer of office products.

The European affiliate purchased Universal Direct from John Menzies PLC, a prominent U.K.-based retail, wholesale, and distribution services group. Menzies, an equal participant in the venture with Reliable, retained 50 percent interest in Universal Direct. A purchase price was not disclosed.

Reliable and Menzies formed the alliance because of their shared belief that Universal Direct represents an ideal vehicle for expansion in the unified European market. Universal Direct's closer ties with Reliable will increase the technical and marketing resources available for future expansion in the $20-billion-a-year European office-products industry.

Universal Direct was formed in 1987 to tap an undeveloped market for direct mail office products in the United Kingdom. Reliable, a veteran of the highly sophisticated U.S. direct-mail market, has been a consultant to Universal from the oneset, providing expertise in direct marketing,

business planning and merchandising.

Under the agreement, Universal Direct's operations will be overseen by Reliable's U.S-based management team. Universal Direct will retain its existing operational structure.

Each year, privately held Reliable Corp. distributes over 35 million office products catalogs to small and mid-sized companies nationwide. The 73-year-old firm also provides several million consumers with its award-winning HomeOffice(R) catalog, featuring a variety of unique items for the home workspace. The company's 1989 sales were $150 million. Besides its Chicago headquarters, Reliable has two additional distribution facilities in Stone Mountain, Ga., and New Castle, Del.

CALABASAS, CA (FEB. 6) PR NEWSWIRE - Players International, Inc. (NASDAQ: PLAY) today reported increased revenues and net income for the third quarter of fiscal 1990, ended Dec. 31, 1989.

For the three months, Players generated revenues of $4,096,200, an increase of 31 percent from the $3,128,900 reported in the comparable period of fiscal 1989. Income from operations rose to $409,500 compared to the $240,400 in last year's third quarter. Net income after income taxes was $313,000, or $0.04 per share, compared to the $204,100, or $0.03 per share, earned in the same period last year.

For the nine months ended Dec. 31, 1989, revenues increased 39 percent to $11,950,100 from the $8,583,200 reported for the first nine months of fiscal 1989. Income from operations more than tripled to $1,432,900 from the prior year's $367,100. Net income was $3,612,000, or $0.46 per share, compared to the $282,200, or $0.04 per share, for the comparable nine month period. The fiscal 1990 figure includes $3.5 million in pre-tax proceeds from a contract settlement in the first quarter.

"Our operating income, which we believe to be the best indicator of the company's performance, showed significant improvement over the prior-year levels. These operating gains continue to reflect the growing renewal income from Players Club memberships, which are a recurring source of cash flow and earnings," said David Fishman, vice chairman. Income from special projects, which was a greater factor in the company's second quarter, was not a meaningful contributor to the third quarter results.

Looking ahead, Fishman noted that given the positive revenue and operating income trends to date, the company's outlook for the fiscal fourth quarter

is for continued strong financial performance.

Players International specializes in marketing services and products to the gaming industry worldwide. The company operates Players Club, a membership club with more than 82,000 members, designed to deliver discounts and other benefits to recreational gamers; International Gaming Promotions, marketer of gaming tournaments and special events; Players World Travel, a travel agency; has an agreement for the marketing of electronic cash advance system; through 50 percent-owned affiliates, publishes a monthly newspaper for gaming enthusiasts; and, operates cruise ship casinos.

TROY, MI (FEB. 6) PR NEWSWIRE - Energy Conversion Devices, Inc. ("ECD") (OTC: ENERC) and its subsidiary, Ovonic Battery Company, Inc. ("OBC"), announced today that it had entered into a license agreement with Hitachi Maxell Ltd. of Japan ("Hitachi Maxell"), a leading international consumer products company.

This new agreement, which follows OBC's successful completion of a one-year joint development program with Hitachi Maxell, provides Hitachi Maxell with a royalty-bearing, nonexclusive license to manufacture small portable Ovonic batteries in Japan and to sell such batteries worldwide,

subject to existing agreements.

In addition, Hitachi Maxell will fund a second joint development program to be conducted at OBC for further improvements in the technology. In connection with this agreement, Hitachi Maxell will pay to ECD/OBC the sum of $1,900,000 (before Japanese withholding taxes). OBC shall receive a total of $850,000 by mid-March and the remaining $1 million (before Japanese withholding taxes), of which $400,000 will be credited as advanced royalties, will be paid to ECD/OBC upon commencement of Hitachi Maxell's production of Ovonic batteries. Stanford R. Ovshinsky, president and chief executive officer of ECD, noted that this is a very significant business relationship and is an important step in ECD's strategy toward mass production of Ovonic batteries worldwide.

Ovonic batteries, based on proprietary materials technology developed by ECD and OBC, store approximately twice the energy of conventional nickel-cadmium batteries of the same size. These batteries do not contain toxic materials such as lead, cadmium or mercury which pose serious environmental problems. OBC noted that there is a rapidly growing market for rechargeable batteries. The Ovonic battery technology is ideally suited for a new era in energy storage which requires increased power and environmentally safe electrical energy storage for both small consumer products and larger industrial applications. Ovonic batteries offer the further advantage of not having a "memory effect" and will offer a convenient "drop in" replacement for nickel-cadmium batteries in portable, battery-operated devices such as cellular telephones, lap-top computers, two-way radios and other electronic and household appliances.

ECD/OBC noted that Varta Batterie AG ("Varta"), the largest European battery manufacturer, already has a nonexclusive license to manufacture in Europe and sell Ovonic batteries worldwide. ECD/OBC is also negotiating several business agreements in order to further increase the commercialization of its battery technology throughout the world.

ECD/OBC technology also has applicability for industrial and military batteries as well as for electric vehicles.

ECD, based in Troy, is the pioneer in amorphous materials technology. The company and its subsidiaries license technology and manufacture and sell products in the fields of energy, information and synthetic materials based upon technology ECD and its subsidiaries have developed in these areas. ECD's photovoltaic and battery products are environmentally safe and address such environmental problems as the greenhouse effect and atmospheric pollution.

WASHINGTON (FEB. 6) PR NEWSWIRE - Synernetics Inc. today introduced Component SMT(tm), the first commercially available, standard-compatible station management (SMT) product for Fiber Distributed Data Interface (FDDI) systems. The announcement marks the availability of the final component needed to implement FDDI systems, providing developers with the FDDI building block they need to speed interoperable FDDI products to market.

SMT forms the intelligent framework that unifies all local area network (LAN) attachments -- from supercomputers and workstations to networking equipment -- into a cohesive LAN system. Synernetics' Component SMT distributes network management capabilities to all attachments throughout the LAN, regardless of equipment type and vendor, data protocols and application environments. Component SMT enables management and control of all connections within the LAN, regardless of distance or lack of physical access to specific systems.

Component SMT's open interface enables network management applications to export FDDI LAN management to any point within extended networks. Using this capability, complete FDDI LAN systems can be conveniently adapted to network management application environments such as SNMP, OSI, and NetView(tm).

Component SMT interfaces with FDDI chip sets such as those from Advanced Micro Devices and National Semiconductor. It runs on commonly available microprocessors, including the Motorola(tm) 680x0 family, the AMD 29000, and the Intel(tm) 80x86 family. Component SMT requires minimum operating environment support. It runs with popular single- or multi-user operating systems such as MS-DOS(tm) and UNIX(tm) or real-time operating systems such as VxWorks(tm) and VRTX(tm). It can also run without a formal operating system.

Synernetics will begin shipping Component SMT during the first quarter of 1990. An introductory package that includes Component SMT and 100 run-time licenses will be available for $39,500 through June 1990.

Synernetics Inc. is a leading developer and marketer of high-speed LAN system products. Using FDDI as their central technology, products and services from Synernetics enable computer users to get the full benefit from high-performance LAN systems based on industry standards.

WASHINGTON (FEB. 6) PR NEWSWIRE - NCR Comten today announced at the Communication Networks show a new Network Integration Services offering for users seeking to integrate their local area networks (LANs) with their wide area networks (WANs) and to integrate standards-based networking with SNA.

The new Network Integration Services will provide users with network consulting, project management, network design and integration, custom hardware and software, and network support and maintenance services. By focusing specifically on network integration, the new services will help users plan and manage the growing complexity of multi-vendor networking and consolidating network resources.

Network Integration Services include, but are not limited to, the following services:

- Network Design and Integration - develop network blueprints to solve networking problems, develop functional specifications, design integrated hardware and software solutions, install and test components.

- Project Management - budgeting, negotiate and manage third party suppliers, plan and ensure delivery of resources at time required.

- Network Consulting - develop requests for proposal information (RFIs) and price quotations (RFPs), document network requirements, analyze/isolate problems in established networks.

- Network Support and Maintenance Services - serve as central service contact for all types of networking hardware and software problems.

- Custom Hardware and Software - develop new code or components or modify existing products when standard, off-the-shelf products are unavailable.

The new services are targeted at both end users and established systems integrators. End users have the option of contracting all or portions of the Network Integration Services, depending on their requirements, through NCR's worldwide marketing organizations. Systems integrators can also subcontract with NCR Comten's Network Integration Services for the networking component of an overall systems integration project.

NCR Comten provides standards-based and SNA-compatible networking systems. A subsidiary of NCR Corporation (NYSE: NCR), NCR Comten is headquartered in St. Paul, Minn., with more than 70 sales/service facilities located throughout the United States and Canada.

MORRIS TOWNSHIP, NJ (FEB. 6) PR NEWSWIRE - Allied-Signal Aerospace Company's Garrett GmbH unit has been selected to supply the auxiliary power unit (APU) for the Eurofighter aircraft to be jointly built by West Germany, Italy, the United Kingdom and Spain.

Garrett GmbH, in Raunheim, West Germany, will lead an international team that will design and build the unit, under a $45 million development contract. The other team members are Alfa Romeo Avio S.p.A. in Italy, Normalair-Garrett Limited in the United Kingdom, and Industria Sevillana de Automocion, S.A. in Spain. The program has a potential for 800 APU production units with a total contract value in excess of $150 million.

"The Eurofighter contract win clearly establishes Garrett GmbH as the dominant European supplier of auxiliary power units for the newest generation of both commercial and military aircraft," said Werner Strittmatter, president of Garrett GmbH.

Garrett GmbH currently builds the APU for the Airbus A320 passenger aircraft, and will build the units for the Airbus A330 and A340 airliners scheduled to enter service in 1992.

Allied-Signal Aerospace Company is a unit of Allied-Signal Inc. (NYSE: ALD), an advanced manufacturing company with businesses in aerospace, automotive products, and engineered materials.

TORONTO (FEB. 6) PR NEWSWIRE - Lucky Eagle Mines Limited, a newly formed exploration company jointly owned and managed by Hecla Mining Company (NYSE: HL) and Agnico-Eagle Mines Limited (NASDAQ: AEAGF), today announced that encouraging drill results have been obtained on two promising gold projects.

Meadowbank Project The 1989 exploration program on the Meadowbank Project, located 60 miles northwest of Baker Lake in the Northwest Territories, Canada, focused on detailed follow-up of the Third Portage discovery previously identified by prospecting crews in 1987 and 1988. Ground

magnetic and electro-magnetic (EM) surveys combined with detailed mapping and sampling were completed over the area prior to diamond drilling. Field work on the Third Portage discovery indicates a zone of highly anomalous gold values returned from a frost-heaved iron formation.

Twelve of the 13 diamond drill holes covering a 1,300 foot strike length tested the mineralized trend to a 300-foot depth. All holes contained gold values indicating the zone to be open on strike and to depth. Two of the better intercepts were returned in Holes 10 and 13, located at each end of the mineralized trend, opening up the strike length to at least 1,300 feet. Drill Hole No. 10 at the north end intersected a 45-foot section averaging .464 oz. gold per ton and No. 13 at the south end cut 15.7 feet averaging .598 oz. gold per ton. Visible gold was observed in all diamond drill holes except No. 12.

Hole No. 11 was drilled on an island located 1,000 feet southwest of the Third Portage discovery to test a gold bearing frost-heave flanked by a strong EM conductor under the lake. This intersected 6.6 feet averaging 0.415 oz. gold per ton.

Prospecting and geophysical surveys located another showing approximately one mile along strike and north of the Third Portage discovery, designated as the North Portage showing. Grab samples ran up to 1.4 ounces gold per ton in a geological setting similar to the Third Portage area. Other promising exploration targets were outlined by geophysics north and south of Third Portage underlying the lake.

Lucky Eagle, Hecla and Agnico-Eagle are participating equally under an option to earn a 55 percent interest in the Meadowbank Project from joint venture partners Asamera Minerals Inc. (currently holding a 60 percent interest) and Comaplex Minerals Corp., a subsidiary of Comaplex Resources International Limited (currently holding a 40 percent interest). A budget of US$975,000 has been allocated for the 1990 summer drilling program.

Trout Creek Project Trout Creek is a gold exploration property located three miles south of the Marigold mine in Humboldt County, Nev. A recently completed reverse-circulation drilling program intersected anomalous gold mineralization, confirming and extending an area of mineralization discovered in 1988. Forty-five drill holes were completed in 1989 and forty-three holes were completed in January 1990, bringing to 152 the total number of drill holes on the project. Assays are pending on 26 of the holes, however, results to date indicate a disseminated gold deposit about 1,500 feet long by 500 feet wide. The mineralization occurs at depths ranging between 200 and 400 feet as disseminations mostly in Paleozoic quartzites and siltstones. Additional work will be required to determine if there is continuity of mineralization between drill holes and whether a commercially mineable deposit exists.

Hecla, listed on the New York and Pacific Stock Exchanges, is a major U.S. producer of silver and gold. Agnico-Eagle, listed on the Toronto and Montreal Stock Exchanges and NASDAQ in the United States, is a Canadian gold and silver producer.

NEWPORT BEACH, CA (FEB. 6) PR NEWSWIRE - American Health Services Corp. (NASDAQ: AHTS), an operator of diagnostic imaging centers, and OmniCorp Holdings Inc. entered into a definitive agreement today, pursuant to which OmniCorp will purchase 3,783,783 shares of the company's Series A Cumulative Senior Convertible Preferred stock and warrants to purchase 500,000 shares of the company's Common stock for an aggregate consideration of $7,015,000.

The closing of the transaction is subject to certain customary closing conditions and regulatory approval. American Health anticipates that following this infusion of equity capital, the company will enter into a new working capital line of credit with its primary lender secured by the company's accounts receivable.

S. Lewis Meyer, president and chief executive officer of American Health Services, stated, "This additional capital and credit will enable the company to continue to pursue its expansion program nationwide."

American Health Services Corp. develops and operates diagnostic/treatment centers affiliated with hospitals, health maintenance organizations, multi-specialty clinics, and physician group practices. The company has 28 centers in operation, with several more under construction or in development, making American Health Services the largest operator of fixed-site, hospital- affiliated diagnostic imaging centers in the nation.

CHATTANOOGA, TN (FEB. 6) PR NEWSWIRE - Constar International Inc.'s (NYSE: CTR) earnings growth continued in the fourth quarter, with fully diluted earnings per share from continuing operations increasing 16 percent for the quarter and 28 percent for the full year over the same

periods in the prior year.

The nation's largest plastic container manufacturer had net income from continuing operations for the most recent three-month period of $4.8 million, or $.65 per share fully diluted, against $3.4 million, or $.56 per share, a year ago. Income for the quarter included $.03 per share from the company's recently established European joint venture operations. In the fourth quarter of 1988, the company also reported income from discontinued operations of $4.2 million, or $.70 per share, primarily as a result of a gain on the sale of its restaurant chain. Sales for the most recent quarter were $130 million compared to $141 million in the fourth quarter of 1988.

For all of 1989, Constar's net income from continuing operations of $16.1 million, or $2.41 per share fully diluted, was 28 percent higher than the comparable $1.88 per share reported a year earlier. Net income for 1988 included income from discontinued operations of $2.2 million, or $.37 per share. Sales for the year were $543 million, about equal to the $544 million reported a year earlier.

"We are pleased with the results for the fourth quarter and the year. Income and earnings per share from continuing operations were at record levels," said Charles F. Casey, Constar's chairman and chief executive officer. Particularly noteworthy is the fact that fourth quarter profits rose despite somewhat lower sales. Casey said lower soft drink unit volume, precipitated by unseasonably cold weather and promotion of metal cans by bottlers, and the company's lower sales prices in recognition of lower raw material costs all contributed to the lower sales level. He commented that the management of Constar's Sewell Plastics subsidiary is to be congratulated for their ability to successfully react to a dynamically changing market. This marks the ninth consecutive quarter in which operating profits surpassed those of comparable prior year periods.

Reduced interest expense, lower corporate expenses and lower preferred dividends, partially offset by an increase in the number of common shares outstanding, also contributed to the record performance for 1989.

Constar International Inc. is the largest manufacturer of plastic containers in the United States. Through it wholly owned subsidiary, Sewell Plastics, Inc., manufacturing is carried on in 23 facilities coast to coast in 16 states. Additionally, through its Wellstar joint venture overseas, plastic containers are now produced at four production facilities in The Netherlands, France and England.

CONTACT: James J. Goldman of Constar, 615-267-2973 or Dick Kosmicki, 203-357-7204, for Constar

COLUMBIA, SC (FEB. 6) PR NEWSWIRE - Emery Worldwide, responding to an increase in South Carolina's air freight volume, today announced it has expanded its airlift capacity for the state by upgrading its daily flight into Columbia's Metropolitan Airport from a B-727 to a larger DC-8 aircraft.

According to Lewis H. Bowers, southeastern area vice president, the company's air freight volume throughout the state has increased by 20 percent in the last six months, necessitating the switch to the larger aircraft. The DC-8, with its 90,000-pound capacity, more than doubles Emery Worldwide's cargo-handling capabilities for South Carolina.

With the move to the DC-8, Columbia also becomes the stop-over point for Emery Worldwide's daily flight to and from San Juan, Puerto Rico. The flight, originating at the carrier's freight-sorting hub in Dayton, Ohio, previously made a stop in Charlotte, N.C.

After dropping off cargo in Columbia in the morning, the Emery Worldwide DC-8 flies to San Juan. At night, the plane returns from San Juan to pick up freight before flying to the company's hub in Dayton, where cargo is sorted for delivery anywhere around the world.

In addition to Columbia, Emery Worldwide's South Carolina shipping network includes terminals in Charleston, Florence and Greenville. The terminals are among more than 350 operated by Emery Worldwide in North America and 90 countries overseas.

With one of the world's largest freighter fleets, Emery Worldwide delivers any size or weight shipment -- including envelopes, parcels and heavy freight -- to any business address in the world. The carrier provides Same Day, Next Day AM and PM, and Second Day delivery in the United States and Canada, and Courier Express, Air Cargo and Air Economy service for overseas shipments.

Emery Worldwide, based in Palo Alto, Calif., is a subsidiary of Consolidated Freightways, Inc. (NYSE: CNF), a $4 billion diversified transportation company with businesses in long-haul and regional trucking, air freight, ocean container freight and intermodal rail service.

PIRAEUS, Greece (FEB. 6) PR NEWSWIRE - Anangel-American Shipholdings

Limited (NASDAQ: ASIPY) announced that an extraordinary general meeting held on Feb. 5, at its offices in Piraeus, Greece had approved, inter alia the following resolutions:

1. J.P. Flaherty, executive vice president of American Express Bank Ltd., was elected as an 'A' director. The board now consists of C. F. Kanellakis, president; J. A. Angelicoussis, chairman; D. A. Stylianou, treasurer, representing the Class B shareholders, and D. J. Butters (Shearson, Lehman, Hutton Group Inc.), J. P. Flaherty (American Express Bank Ltd.), vice president, S. S. Gordon (Stamford Company Inc.) representing the Class A shareholders.

2. The memorandum and articles of association of the company were amended to allow the authorized share capital of the company to be increased by 5 million junior cumulative non-voting preference shares of US$10 each.

The board of directors has the power to authorize the issuance, terms and sale of such shares. The board stated that it had no immediate intention of issuing such shares, which will be issued to fund shipping related investment. In addition, the board will limit the issue of such shares so that all preference shares in issue will not amount to more than 20 percent of the company's capital base.

3. The memorandum and articles of association of the company were amended to empower the purchase by the company of any of its outstanding Class A or B ordinary shares. The board also announced that it has authorized a subcommittee of one 'A' and one 'B' director to exercise this power up to a limit of 1 million ordinary shares. No such shares will be purchased during the currency of any dividend reinvestment plan election period or prior to the release of any price sensitive information. The board also stated that it has not set any particular price or quantity targets for the operation of this program but that purchases will be carried out from time to time for the purpose of enhancing shareholder value and as an appropriate use of the company's available funds.

Other resolutions passed at the meeting were not of material significance and related to improving the provisions of the articles of association relating to conduct of general meetings, delivery of proxies, appointment of directors etc.

In a general address to shareholders, the chairman of the board announced his confidence in the quality of the company's assets and reaffirmed the board's policy of paying out at least one-third and historically up to one-half of the company's net income as dividends.

WILMINGTON, DE (FEB. 6) PR NEWSWIRE - KAO Corporation of America (KCOA) will be featured on the "American Spotlight" series to be aired on Sunday, Feb. 18, at 3:30 p.m. EST, 2:30 p.m. Central.

The series is produced in Chicago by CSTV and is aired on The Learning Channel. It reaches an audience of 3.3 million cable viewers. The Feb. 18 program is a 30-minute, in-depth tour of KCOA and its subsidiaries.

Program host Nancy Sellers introduces KCOA as "a new player on the American industrial scene." A wholly owned subsidiary of Kao Corporation of Japan, KCOA is headquartered in Wilmington. Its American operations include The Andrew Jergens Co., KAO Infosystems Co., High Point Chemical Co., Kao Sofina Cosmetics and Goldwell USA.

In the 30-minute program Sellers interviews Kenneth E. Wattman, president of KCOA, who elaborates on such issues as Japanese-American business relationships and the role of Japanese technology in the American marketplace. She also talks with Peter W. McGuirk, president of Kao Infosystems Co. McGuirk discusses the future of the computer industry, including a trend toward smaller disks with higher storage capacity.

"American Spotlight" presents an overview of KCOA's U.S. operations,

highlighted by interviews with Ken Stevens of High Point Chemical Corp., in High Point, N.C., and Tim Zimmerman of The Andrew Jergens Co., in Cincinnati.

Much of the program is devoted to Kao Infosystem Co.'s (KIC) new state-of-the-art disk manufacturing facility in Plymouth, Mass. Completed in 1989 at a cost of $60 million, the plant has the capacity to manufacture more 3.5-inch disks than any other North American company. On a tour of the plant, television viewers see how disks are made using the most advanced equipment available. The program focuses on the fact that KIC manufactures its own raw materials and controls quality through automation.

"American Spotlight" is seen on The Learning Channel on many cable television systems throughout the United States. Local cable listings should be checked for viewing information

CALGARY, ALBERTA (FEB. 6) PR NEWSWIRE - Agnico-Eagle Mines Ltd. (NASDAQ: AGE; Montreal, Toronto: AGE), Asamera Minerals Inc., (Montreal, Toronto: AUA) Comaplex Minerals Corp. (Toronto: CXR), Hecla Mining Company (NYSE: HL) and Lucky Eagle Mines Limited announce that positive drill results have been obtained on the Meadowbank Project, located approximately 60 miles northwest of Baker Lake in the Northwest Territories.

The 1989 detailed drilling program on the Third Portage showing followed up on 1987 and 1988 exploration programs. Twelve diamond drill holes have to date identified a mineralized trend over a 1,300-foot strike length. This trend remains open along strike to the north and south, and at depth which has been tested only to 300 feet.

Assay results, which have been confirmed by independent analysis, indicate gold mineralization in two types of geologic settings in iron formation. Ore grade intercepts were encountered in all 12 holes, notably at the north end of the section where hole 89-10 encountered a 45-foot section averaging 0.464 ounces of gold per ton, and hole 89-13 located at the south end of the trend which encountered almost 16 feet averaging 0.598 ounces of gold per ton. A 13th hole, 89-11, intersected ore grade material on an island 1,000 feet southwest of the discovery zone.

A follow-up drill program is planned to test the continuity, size and extent of the Third Portage discovery, and to evaluate the watercovered targets to the south and the North Portage occurrence to the north. The

program is expected to start by mid-year, 1990. A budget of CDN $1,150,000 has been established for the drilling.

Agnico-Eagle, Lucky Eagle and Hecla have an option to earn a collective 55 percent interest in the project by spending CDN $3,500,000 prior to Jan. 1 1994. Expenditures to date are approximately CDN $1,000,000. After earn-in, Asamera Minerals would have a 27 percent interest and Comaplex Minerals would have an 18 percent interest. Agnico-Eagle, Lucky Eagle and Hecla would have 18.33 percent each.

Agnico-Eagle is listed on the Toronto and Montreal stock exchanges and on NASDAQ, symbol AGE. Asamera Minerals Inc. is listed on the Toronto and Montreal Exchanges, symbol AUA. Comaplex Minerals Corp. is a wholly owned subsidiary of Comaplex Resources International Ltd., which is listed on the Toronto Exchange, symbol CXR. Hecla is listed on the New York and Pacific Stock exchanges, symbol HL. Lucky Eagle is a newly formed exploration company owned jointly by Agnico-Eagle and Hecla.

#90037p0147 02/06/1990 ~PR Newswire

KANSAS CITY, MO. (FEB. 6) PR NEWSWIRE - Citing continuing strong quarter-to-quarter performance by its US Sprint long-distance unit and steady growth by its local communications companies, United Telecommunications, Inc. (NYSE: UT) today reported that 1989 income from continuing operations increased 156 percent to $363 million, or $1.72 per share, compared to $142 million, or 68 cents per share, in 1988.

US Sprint continued to account for much of United Telecom's growth in revenues and operating profit. Fourth quarter 1989 operating revenues of $1.2 billion represent an increase of 7 percent over the third quarter and 28 percent over fourth quarter 1988. For the year, US Sprint's operating revenues totaled $4.3 billion, an increase of 27 percent over 1988 operating revenues of $3.4 billion.

"Revenue growth was achieved in all market segments as the company continued its strong performance in sales of both existing and new products," said William T. Esrey, United Telecom president and chief executive. "The results reflect only a minimal impact from the federal government FTS2000 contract since those services didn't begin to come on line until the fourth quarter," he added.

US Sprint 1989 fourth quarter operating income totaled $81 million,

compared to an operating loss of $176 million for the fourth quarter of 1988. The 1988 fourth quarter loss included a $195 million non-recurring business restructuring charge. Operating income for US Sprint in 1989 was $227 million, compared to a 1988 operating loss of $386 million.

"US Sprint's 1989 results underscore our 1983 decision to invest in the creation of a long-distance company that offers unrivaled quality and reliability as well as competitive pricing," said Esrey. "We have every reason to believe the progress in our 1989 performance will continue into 1990."

Esrey said US Sprint "continues to lead in bringing the benefits of new technology to its customers." Recently it announced the availability in the first half of 1990 of a voice recognition FON card. "This exciting new technology will allow customers to use a voice password to access our network, and complete calls using voice commands," he said.

Revenues from United Telecom's local communications operations increased 5 percent from $2.5 billion in 1988 to $2.6 billion in 1989. Operating income in 1989 reached $636 million, up 6.5 percent from $597 million in the prior year.

Esrey said 160,000 access lines were added in 1989, bringing the total for the local communications companies to nearly 4 million. Long-distance call volume in local operations grew by 12.5 percent in 1989.

Consolidated net income for 1989 was $363 million, or $1.72 per share, compared to $509 million, or $2.48 per share, in 1988. Net income for 1988 included an after-tax gain of $367 million, or $1.80 per share, from discontinued operations resulting primarily from the sale of the company's cellular and paging operations.

PAOLI, PA (FEB. 6) PR NEWSWIRE - Ametek Inc. (NYSE: AME) today reported record sales and increased earnings in the fourth quarter and for the full year of 1989.

The diversified industrial manufacturer said sales for the year were up 13 percent to $587.8 million, highest in the company's history on a restructured basis, with net income of $38.3 million increasing 9 percent above 1988's income from continuing operations.

Sales in the recent fourth quarter were up 20 percent to $152.1 million, a record for any three-month period, and produced net income of $7.3 million

or 17 cents per share. In the fourth quarter of 1988, Ametek's income from continuing operations was $4.7 million or 11 cents per share earned on sales of $126.4 million. Net income in the final quarter of 1988 was reduced to $2.8 million or 7 cents per share from losses incurred by businesses which were spun off to form Ketema Inc. (AMEX: KTM) on Nov. 30, 1988, when the new company's shares were distributed to Ametek stockholders.

Sales for the full year of 1989 reached $587.8 million and produced net income of $38.3 million or 87 cents per share, compared to the $35.1 million or 80 cents per share earned from continuing operations in 1988 on sales of $520.5 million. In 1988, income benefited from an accounting change for income taxes and was decreased by losses incurred by Ketema businesses and charges related to the spin-off, resulting in net income of $30.6 million or 70 cents per share.

STAMFORD, CT (FEB. 6) PR NEWSWIRE - GTE today reported that consolidated net income for the fourth quarter of 1989 reached a quarterly high of $392 million, 20 percent more than the $326 million reported a year ago.

Earnings per share increased 20 percent to a record $1.15, which compares with 96 cents in the fourth quarter last year. Consolidated revenues and sales for the quarter totaled $4.6 billion, 7 percent more than the $4.3 billion reported last year.

Consolidated revenues, net income and earnings per share also reached record levels for the full year. Net income of $1.4 billion was 16 percent more than the $1.2 billion earned in 1988, while earnings per share were $4.16, up 16 percent over the $3.58 reported last year. Consolidated 1989 revenues and sales totaled $17.4 billion, 6 percent higher than the $16.5 billion reported in 1988.

"1989 was an outstanding year for GTE," said James L. "Rocky" Johnson, chairman and chief executive officer. "During the year, we met and overcame many business and regulatory challenges and continued to implement the previously announced reorganization of telephone operations " Johnson said.

"The 1989 financial results confirm the soundness of the strategies we have implemented to revitalize our core businesses and meet the challenges of the '90s," the GTE chairman stated.

NEW YORK (FEB. 6) PR NEWSWIRE - Richard J. Condon, former Police Commissioner of New York City, has joined PaineWebber Incorporated as senior vice president and director of worldwide security, it was announced today by Paul B. Guenther, president of PaineWebber Incorporated (NYSE: PWJ).

Guenther said, "Dick Condon has had a long and distinguished career with New York's police force as one of its most respected members. He brings to PaineWebber unique managerial skills and knowledge that can be applied to a broad range of security needs, from physical security to management information systems. We're delighted to welcome him to PaineWebber."

A member of the police force since 1957, Condon, 54, served most recently as the 35th Police Commissioner of the New York City Police Department. During his police career, Condon directed a number of law enforcement agencies in New York City and New York State. He has gained broad experience in criminal justice, investigations, and crime prevention, and has authored reports on white collar crime enforcement, the use of deadly force, and police corruption in New York City.

Condon has received numerous awards for his work on New York's police force. He was named Man of the Year by the Detectives Endowment Association and the John Jay College Alumni Association. He also received a Distinguished Public Service Award from the School of Criminal Justice and Rockefeller College and a Distinguished Practitioner Award from the New York City Bar Association. In addition, the New York Bar Association recognized Condon for Outstanding Police Contribution to the Criminal Justice System.

Condon received his M.A. in criminal justice from John Jay College of City University and his B.A. in English language and literature from Pace University. He was also selected to attend the FBI's National Executive Institute and the Senior Command Course of the British National Police College. A father of three, he and his wife, Charlotte, reside in Staten Island.

PaineWebber Incorporated is one of the nation's leading full-service securities firms, serving the investment and capital needs of a worldwide client base.

RIVERTON, WY (FEB. 6) PR NEWSWIRE - U.S. Energy Corp. (NASDAQ: USEG) and its 44 percent owned subsidiary Crested Corp. (NASDAQ: CBAG) announced today that they had entered into an agreement to sell between 500,000 and 700,000 pounds of uranium oxide (U3O8) to a major domestic utility in annual installments from 1993 through 1998.

This is the sixth uranium sales contract U.S. Energy and Crested, d/b/a USE/CC have entered into with major U.S. utilities on behalf of their Partnership with Cycle Resource Investment Corp. USE/CC continues to bid on additional contracts for the sale of U3O8 to domestic and foreign utilities to meet the large amount of their unfulfilled requirements during the 1990s.

U.S. Energy and Crested are diversified mineral companies with interests in uranium, molybdenum, gold, and other base and precious metals properties.

DEERFIELD BEACH, FL (FEB. 6) PR NEWSWIRE - CheckRobot (NASDAQ: CKRB), Charles J. Beech, president and chief executive officer of CheckRobot Inc. reported today concerning the progress of the company's business.

"Our ACM (R) systems continue to receive a very positive response in the marketplace. Five significant food retailers are currently using CheckRobot automated checkout machines, and we are scheduled to install ACM systems for seven more major retailers in the near future. Consumer response to our products has been overwhelmingly positive. Additionally, we are beginning to market the ACM system in Europe. Early indications are there is significant interest in our product among major European supermarket chains."

Beech further noted that CheckRobot continues to receive a high level of support from its two major shareholders who have indicated their intent to fully support the company in every way possible, including financial support.

Beech also stated that the company's Advanced Promotion Technologies joint venture with Procter & Gamble and the Donnelley Marketing Division of Dun and Bradstreet Corporation is progressing. The electronic marketing systems of APT are enjoying a positive response from both retailers and

consumers. The future of APT is very promising.

Reacting to a recent sudden drop in the price of the company's common stock, Beech stated, "Any attempt on our part to explain the sudden drop in market price would be pure speculation. We can say without question that the drop in market price in no way reflects any fundamental change in our company's condition or management's expectations for the future. Indeed, management is convinced that significant accomplishments have been made in the current fiscal year that will direct our company to success in the future."

Beech concluded by saying that the board and management of CheckRobot are convinced the company is well on the way to meeting its long-term objectives.

CheckRobot develops and markets ACM automated checkout machines for supermarkets. Using laser bar-code scanners and a proprietary merchandise security system, the ACM allows shoppers to scan and checkout merchandise themselves before paying centrally located cashiers.

WASHINGTON (FEB. 6) PR NEWSWIRE - The Washington Post Company (AMEX: WPO.B) today reported net income of $197.9 million for 1989, a decrease of 26.5 percent from net income of $269.1 million in 1988.

Earnings per share were $15.50 in 1989, down 25.9 percent from $20.91 the previous year.

Included in 1988 earnings are net after-tax non-recurring gains of $103.1 million ($8.01 per share) from the sale of the company's interests in cellular telephone operations, partially offset by restructuring charges at Newsweek. Excluding these non-recurring items, net income and earnings per share increased 19 percent and 20 percent, respectively, in 1989.

Revenue for 1989 totaled $1,444 million, a 5.6 percent increase over revenue of $1,368 million in 1988.

For the fourth quarter of 1989, the company's net income was $51.1 million ($4.06 per share), a gain of 38.4 percent over net income of $36.9 million ($2.87 per share) for the fourth quarter of 1988, which included the Newsweek restructuring charges. Excluding these charges, 1989 fourth quarter net income was 3 percent higher than in 1988.

Revenue for the fourth quarter was $381.4 million, a 2.9 percent gain over revenue of $370.8 million in the 1988 fourth quarter.

LAFAYETTE, LA (FEB. 6) PR NEWSWIRE - Offshore Logistics Inc. (NASDAQ: OLOG) a supplier of marine and aviation services worldwide, today reported gross revenues for the second quarter ended Dec. 31, 1989, of $24.9 million compared to $21.5 million reported for this same period of the prior year.

Net income improved from $3.3 million for the quarter ended Dec. 31 last year to $3.8 million for the same period this year.

For the six month period ended Dec. 31, 1989, gross revenue was $49.4 million compared to $41.6 million a year ago. Net income was $8.0 million this year compared to net income of $6.4 million for the six months last year.

James B. Clement, president and chief executive officer, said that the increases in current quarter and year-to-date revenues and net income resulted from the strong demand for services in the company's domestic helicopter operations. We are pleased with our continued high levels of activity and expect demand to remain strong at least for the remainder of this fiscal year.

As announced last week, the company sold a 220-foot anchor handling vessel which had been employed in the North Sea. The company acquired the vessel in January 1988, and operated it since that time. This sale generated cash proceeds of $5.6 million and a net gain of $2.3 million which will be included in net income for the quarter ended March 31.

The tabulated results for the periods ended Dec. 31, 1989, and 1988, are as follows (dollars in thousands except earnings per share):

SAN ANTONIO, TX (FEB. 6) PR NEWSWIRE - The board of directors of Diamond Shamrock, Inc. (NYSE: DRM) today increased the corporations' regular quarterly dividend one cent to 12 cents per common share, payable on March 7 to stockholders of record on Feb. 20. This is the second annual dividend increase and the twelfth consecutive quarterly dividend of the corporation.

The board also declared a dividend of 50 cents per share on each of the $2 convertible exchangeable preferred stock, payable on March 15 to stockholders of record on Feb. 20.

"Diamond Shamrock's record earnings from continuing operations in 1989 and continuing strong refining industry environment along with our commitment to increase shareholder value warrant this second annual dividend increase " Chairman and CEO Roger R. Hemminghaus commented.

Annual Meeting Set The board also set the company's third annual stockholders meeting for 10 a.m., Tuesday, May 1, at the Fountain Plaza Hotel, 37 NE Loop 410 in San Antonio.

The annual report, notice of annual meeting, and proxy statement and ballots will be mailed in late March to stockholders of record on March 16 1990.

Diamond Shamrock, Inc. is a regional refiner and marketer of petroleum products with annual sales of approximately $2.1 billion. The San Antonio-based corporation has two Texas refineries, markets gasoline and diesel through approximately 2,000 Diamond Shamrock branded outlets, processes natural gas, and stores and markets natural gas liquids.

#90037p0181 02/06/1990 ~PR Newswire

KANSAS CITY, MO (FEB. 6) PR NEWSWIRE - A substantial improvement in operating results for the third quarter of fiscal 1990 was reported today by AMC Entertainment Inc. (AMEX: AEN).

Before gain on disposition of assets, a pre-tax loss of $1,127,000 was recorded for the current period, in comparison to a loss of $13,756,000 in

the like period a year earlier. The announcement was made by Stanley H. Durwood, chairman and chief executive officer. "Looking at earnings before gain on disposition of assets, depreciation and taxes (EBDT) for domestic operations, both the quarter and the 39 weeks reflect substantial gains over the previous year," said Durwood. "For the quarter, domestic EDBT of $6,516,000 compared with a loss of $261,000 for the like period a year earlier. For the 39 weeks we recorded domestic EBDT of $27,140,000 versus $14,820,000 for the comparable period of fiscal 1989. We are extremely pleased by our improved results thus far this year. It was a record-breaking year for the motion picture industry, and the outlook for next summer's product appears excellent.

After gains on disposition of assets and provision for income taxes, net earnings for the first 39 weeks of fiscal 1990 were $7,877,000 (46 cents per share), versus earnings of $733,000 (6 cent loss per share) for the nine months a year earlier. The net loss for the fiscal third quarter was $1,205,000 (9 cents per share), compared with net earnings a year earlier of $11,659,000 (68 cents per share). Both the nine-month and third quarter data for fiscal 1989 include a gain of $24,615,000 from the sale of United Kingdom operations.

Total revenue for the recent 13 weeks was $97,320,000 compared with $112,185,000 a year earlier. Revenue for the recent 39-week period was $334,261,000 compared with $359,004,000 a year ago. The reductions were a result of the sale of 375 of the company's screens to TPIE and the sale of the United Kingdom operation.

As of Dec. 28, 1989 AMC owned or managed 1,659 screens in 27 states and the District of Columbia. The company operates the second largest U.S. motion picture theatre circuit.

HOUSTON (FEB. 6) PR NEWSWIRE - Texas Air Corporation (AMEX: TEX) today reported 1989 financial results, including a full-year net profit for its largest unit, Continental Airlines.

Texas Air (reflecting the results of Continental, Eastern Air Lines, System One Holdings, as well as Texas Air itself) reported a fourth-quarter consolidated net loss of $362.8 million, or $9.17 per share, on revenues of $1.7 billion. For the full year 1989, Texas Air reported a consolidated net loss of $885.6 million, or $22.71 per share, on revenues of $6.7 billion. These results compare to a 1988 fourth- quarter net loss of $224.4 million and a full year consolidated net loss of $718.6 million, or $18.88 per share.

Continental recorded 1989 net income of $3.1 million on revenues of $5.1 billion, which is a $318.6 million improvement from 1988 when Continental reported a net loss of $315.5 million on revenues of $4.7 billion.

In the fourth quarter of 1989, Continental recorded a net loss of $56.1 million on revenues of $1.2 billion. This is a $43.1 million improvement from the 1988 fourth quarter net loss of $99.2 million on revenues of $1.1 billion.

Included in Continental's full-year and fourth quarter 1989 results were nonrecurring net gains of $81.2 million and $10.6 million, respectively, largely from asset sales and debt retirements, which compare to nonrecurring gains of $34.2 million and $9.8 million in the comparable 1988 periods.

Eastern Airlines reported a fourth quarter 1989 net loss of $282.6 million before preferred stock dividend requirements of $12.3 million on revenues of $482.2 million. Eastern's fourth quarter results include $182.1 million of capital gains, which were offset by special charges totaling $153.7 million relating to a back pay award to certain pilots, pension curtailment costs, Chapter 11 expenses, and asset impairment charges. Eastern's fourth-quarter 1989 results compare to a net loss of $101.7 million on revenues of $844.4 million in the same period a year earlier.

For the full year 1989, Eastern incurred losses of $852.3 million before preferred dividend requirements of $46.3 million. Eastern's revenues for 1989 were $1.5 billion. In 1988, Eastern recorded a $335.4 million loss on full-year revenues of $3.8 billion.

ST. LOUIS (FEB. 6) PR NEWSWIRE - Emerson Electric Co. (NYSE: EMR) achieved record results in net earnings and earnings per share for the first quarter of fiscal 1990, Charles F. Knight, chairman and chief executive officer, announced today at the company's annual stockholders' meeting.

Emerson's earnings per common share for the three months ended Dec. 31, 1989, were $0.64 per share, an increase of 4.9 percent over earnings per common share of $0.61 for the same period a year ago. Net earnings were $141,890,000 for the first quarter of fiscal 1990, an increase of 3.8 percent over net earnings of $136,756,000 for the first quarter of fiscal 1989.

The company's net sales for the quarter were $1,646,090,000, compared with $1,719,788,000 for the first quarter a year ago. The primary reason for the 4.3 percent decline in sales was the company's divestitures during the last half of fiscal 1989 of operations with annual sales of approximately $365 million. Excluding the impact of divestitures, the company's sales for the quarter showed a modest increase.

In other actions taken at the annual meeting, the stockholders elected seven directors and overwhelmingly rejected two stockholder proposals which were opposed by management.

WINDSOR LOCKS, CT (FEB. 6) PR NEWSWIRE - The Dexter Corporation (NYSE: DEX), a leading specialty materials producer, reported that for the year 1989, Dexter achieved record sales of $848.7 million from continuing operations compared with $827.3 million in 1988. Earnings for 1989 were $43.0 million, or $1.73 per share, 7 percent over earnings from continuing operations of $39.9 million, or $1.61 per share in 1988. Net income in 1988, after providing for discontinued operations was $35.5 million, or $1.43 per share. There was no impact from discontinued operations in 1989.

Sales from continuing operations in the fourth quarter of 1989 were $207.4 million, an increase of 2 percent over the same period a year ago. Both income from continuing operations and net income for the quarter were $8.5 million, or $.34 per share, compared with $8.6 million, or $.35 per share, in the fourth quarter of 1986.

The 2 percent in sales for the fourth quarter of 1989 compared with the same period of 1988 resulted from the net effect of volume increases of 3 percent, price increases of 1 percent and a 2 percent decrease due to the effect of lower currency exchange rates on international sales. Products with strong sales performance in the fourth quarter of 1989 compared with the fourth quarter of 1988, included magnetic materials serving the computer and electronics markets, engineered nonwoven medical products, food and beverage container coatings and plastisol screen printing inks. Sales of molecular biology products at majority- owned Life Technologies, Inc. were also strong.

The Dexter Corporation is a Fortune 500 company producing specialty materials. Founded in 1767, Dexter is the oldest company listed on the New York Stock Exchange.

SWEPSONVILLE, N.C. (FEB. 6) PR NEWSWIRE - Less than six years after manufacturing its first lawn mower in the United States, Honda Power Equipment Mfg. (HPE) today began export of 50,000 lawn mower engines a year to Europe.

The export engine, the GXV140, is an all-new five horsepower 140cc aluminum alloy engine manufactured exclusively by HPE at the Swepsonville, North Carolina plant. The engine will be exported to Honda France Industries (HFI) in Orleans, France for assembly into 19-inch and 21-inch lawn mowers produced by HFI and sold throughout Europe.

With production now reaching 175,000 lawn mowers a year, HPR will begin production this month of complete lawn mower models for export by American Honda to European markets and Japan. Exports of the HPE-build lawn mowers will total about 12,000 per year.

"The market for power products and lawn mowers is very competitive, and the export of engines and lawn mowers to Europe and Japan is evidence that our associates can produce quality products for the world market," said Koji Tsujita, president of Honda Power Equipment Mfg.

"North Carolina is proud to be a part of the plans of Honda Power Equipment Mfg. to enter the international market with their unique products manufactured in our state," said Governor James G. Martin. "Honda has always been a good corporate neighbor in North Carolina."

"Our suppliers deserve credit for this achievement as well," noted HPE's Tsujita. "We have more than 40 local suppliers in North Carolina and elsewhere in the United States whose quality parts are represented in each and every lawn mower exported from HPE."

Domestic content of lawn mowers produced by HPE has risen significantly since the company began production in August, 1984, boosted by the start of engine manufacturing in 1988. With the addition of new suppliers in June, 1990, domestic content will be 70 percent.

Engine production at HPE employs state-of-the-art aluminum die casting and machining of engine cylinder blocks and cylinder heads. This $15 million engine expansion has enabled HPE to produce 200,000 lawn mower engines per year.

The United States is the world's largest market for lawn mowers, and Honda Power Equipment Mfg. supplies all the Honda push and walk-behind self-propelled lawn mowers sold by Honda dealers in the United States. Currently, HPE manufactures seven basic lawn mower models in 30 variations including cast aluminum and steel decks, self-propelled and push models, in both 19-inch and 21-inch cutting widths.

COLUMBIA, SC (FEB. 6) PR NEWSWIRE - South Carolina National Corporation (NASDAQ-NMS: SCNC) today announced that it has amended an existing employee savings program to include a leveraged employee stock ownership plan (ESOP).

Under the terms of the program, the ESOP will purchase approximately 1.1 million shares of South Carolina National Corporation's common stock, or about five percent of the common shares outstanding. The ESOP's purchase of shares will be funded by a $25 million loan from SCNC. The purchase of common stock will be made in the open market from time to time and is expected to be completed by the end of 1990. The shares held by the ESOP will be allocated to employees over time, generally replacing the Corporation's matching contribution to the existing benefit plan.

"We believe both shareholders and employees will benefit from increased employee ownership in the company," said James G. Lindley, chairman and chief executive officer. "The program should reduce the future cost of providing certain employee benefits, improve return on equity and, at the same time, allow our employees to benefit directly from future appreciation in our company's stock price."

As of December 31, 1989, SCNC had 21.6 million shares of common stock outstanding, assets of $6.2 billion, and a book value per common share of $20.19. South Carolina National Corporation is the parent company of

South Carolina National Bank, Provident Financial Corporation, SCN Discount Brokerage Services, Inc. and SCN Capital Management Corporation.

DALLAS (FEB. 6) PR NEWSWIRE - Motel 6, L.P. (NYSE: SIX) today reported revenues for 1989 of $424.7 million, a 26 percent increase over 1988. Income before depreciation and interest was $189.0 million, an increase of $38.9 million, or 26 percent, over 1988. Net income for the year was $11.2 million compared to $5.3 million in 1988.

As a result of opening 74 additional motels in 1989, depreciation expense increased to $57.8 million in 1989 after giving effect to a change in the depreciable lives of properties. Interest expense increased $27.5 million as a result of additional debt financing associated with expansion and higher interest rates.

Motel 6 changed the depreciable lives of motel buildings and improvements effective Jan. 1, 1989. The effect of this change was to decrease depreciation expense and increase net income by $5 million.

Motel 6, whose units trade on the New York Stock Exchange, is the nation's largest chain of exclusively company-operated economy motels with 523 locations and 60,100 rooms in 42 states.

ARLINGTON HEIGHTS, IL (FEB. 6) PR NEWSWIRE - Motorola Inc.'s (NYSE: MOT) Radio Telephone Systems Group announced today the signing of a memorandum of understanding with Stentofon A/S of Trondheim, Norway.

The agreement between the two companies has the primary purpose of being a supplier for the GSM, or pan-European Digital Cellular System in Norway.

Motorola and Stentofon will consider the formation of a joint venture company which, at a later date, could include engineering, manufacturing, service and commercialization of cellular radio telephone systems in the Nordic countries.

Motorola has already supplied a GSM validation system to the four Scandinavian administrations, installed in Oslo, and has successfully tested live on-the-air GSM calls. The signing of today's agreement demonstrates both companies' commitment to serving the Norwegian market.

Motorola is the world's leading designer, manufacturer and supplier of cellular systems, infrastructure equipment and subscriber products.

Stentofon is a leading Norwegian-based supplier of telecommunication equipment to world markets.

EDISON, N.J. (FEB. 6) PR NEWSWIRE - KCS Group, Inc. (NASDAQ: KCSG) today reported record first quarter net income of $990,000, or 56 cents per share, compared to $417,000, or 23 cents per share, for the same period in fiscal 1989.

The fiscal 1989 first quarter results include a loss from continuing operations of $125,000, or 7 cents per share, and income from discontinued operations of $542,000, or 30 cents per share.

Revenues for the first quarter of fiscal 1990 increased 9.2 percent to $17.6 million, compared to $16.1 million for the same period in fiscal 1989.

James W. Christmas, president, said, "The financial picture for KCS is continuing to improve and the impact of the restructuring activities completed during fiscal 1989 is beginning to materialize and bear fruit.

"All of our companies' operations have improved and our newly formed energy consulting services business has closed on its first project," he said. "Having the patience to wait and find the right opportunities, and pay close attention to financial objectives has been the key to our success," Christmas said.

KCS Group is a holding company presently engaged in oil and gas services, exploration, production and transportation, energy marketing and energy consulting.

#90037p0223 02/06/1990 ~PR Newswire
NEW YORK (FEB. 6) PR NEWSWIRE - It was announced today by Bjorn Ahlstrom, president and chief executive officer of Volvo North America Corporation, and Irwin L. Jacobs, chairman of the board of Minstar, Inc. and Genmar Industries, Inc., that Volvo has agreed to acquire a 20 percent equity interest in IJ Holdings, Minstar's parent company, for $100 million. This transaction, which involves conversion of the Minstar note which Volvo purchased on Oct. 21, 1988, is subject to government approval.

It was also announced that Volvo and Genmar will enter into a long- term supply agreement under which Volvo Penta of America, the marine power division of Volvo North America and a leading manufacturer of marine propulsion systems, will supply increasing levels of Genmar's engine requirements. Genmar is the world's largest independent manufacturer of recreational boats under the Wellcraft, Hatteras, Larson, Glastron, Lund, Crestliner, Cajun, Ski Supreme, Windsor Craft, Triumph and Aquasport trademarks.

Jacobs stated, "Volvo's agreement to make this equity investment in our

company further demonstrates its commitment to becoming a leader in supplying marine engines to the recreational boating industry in the U.S. We will be pleased to have Volvo as a stockholder." Jacobs stressed that this was not a step toward vertical integration and that Genmar would continue to operate as an independent boat manufacturer giving its dealers and their customers a choice in marine engines. He indicated that Genmar and Volvo Penta would aggressively work together in the areas of technology, distribution and dealer development. "In the final analysis," Jacobs stated, "our dealers and their customers will determine the engine of preference."

According to Ahlstrom, "This agreement will once again underscore Volvo's determination to remain a major participant in the American recreational marine business. We are delighted to form this permanent alliance with one of the finest boat building groups in the world. At the same time," he emphasized, "we are committed to serving the rest of the boat building industry as the leading independent marine power company."

CINCINNATI (FEB. 6) PR NEWSWIRE - Ford Motor Company (NYSE: F) will show its all-new 1991 Ford Escort and Ford Explorer to Cincinnati-area car and truck buyers for the first time tonight at the Greater Cincinnati Auto Expo, which runs through Sunday (Feb. 11) at the Dr. Albert B. Sabin Convention Center.

The show will be open to the public from 4 to 10 p.m. weekdays, 11 a.m. to 10 p.m. Saturday and 11 a.m. to 6 p.m. Sunday.

Visitors to the Ford Division exhibit will receive a certificate good for an additional $200 rebate - over and above the regular factory rebate - on any Ford vehicle delivered from dealer stock between Feb. 7-17 at participating dealerships.

The Escort, available in three body styles - two-door hatchback, four-door hatchback and four-door station wagon - is part of a family of cars which will be sold in all major worldwide markets, including 500,000 in North America.

The $1.9 billion project is the largest association program any auto company has attempted, and represents a maturing of Ford's partnership with Mazda, which was responsible for Escort's engineering. The interior design, as well as Ford's traditional aerodynamic exterior design, were wholly Ford's responsibility.

The Escort will be assembled at Ford's Wayne (Mich.) Integral Stamping and Assembly Plant, with additional production at the company's Hermosillo plant in Mexico.

Unveiling the Ford Explorer - recently named by 4-Wheeler Magazine as its 1990 Truck of the Year - and, an all-new entry in the fast- growing sporty compact utility vehicle market segment, Lake said:

The lineup includes two- and four-door, two-wheel and four-wheel- drive models. The four-door Explorer model should appeal to families who want the added versatility of a utility vehicle. The two-door model should suit the younger buyer who wants versatility along with unique and bolder styling cues, Lake said.

The Explorer is powered by a 4.0-liter electronically fuel-injected (EFI) V-6 engine - the largest ever in a Ford compact light truck. It generates 155 horsepower and is teamed with a standard five-speed manual overdrive or optional four-speed automatic overdrive transmission.

LIVERPOOL, N.Y. (FEB. 6) PR NEWSWIRE - Advanced Medical Products (AMP) (NASDAQ: ADVA) reported today it had received federal Food and Drug Administration (FDA) approval (510(K)) to market a new generation of Ambulatory Blood Pressure Monitoring (ABPM) products.

The products include the first combination ABPM/Holter System available for simultaneous 24-hour monitoring of hypertension, cardiac arrhythmias and ischemia, and the first ABPM system to give physicians full disclosure of pressure waveforms. Utilizing the company's research and development expertise in applying microelectronic and software technology to new diagnostic products for clinical medicine, Advanced Medical Product's ABPM products are intended to provide physicians actively involved in the screening, diagnostic and management of cardiovascular problems with new state-of-the-art efficacious tools. The FDA approval does not constitute a product endorsement or imply product efficacy. The company expects to introduce the product in the second calendar quarter of 1990.

"The introduction of these ABPM products significantly expands the clinical applications for AMP's products," said Clarence Groff, president and CEO of AMP. "Leading physicians and medical journals around the world have documented the superiority of ABPM to office blood pressure measurements for the diagnosis and management of hypertension. Our ABPM products are designed to overcome the problems such as size, weight, noise and accuracy of the few early generation competitive products that are on

the market. We expect the ABPM market to rapidly develop with AMP positioned to capture a significant share."

Hypertension is America's most prevalent and commonly treated disease, known often as the "silent killer." One in three adults in the United States has hypertension requiring some form of treatment. Cardiovascular disease is the leading cause of death in the United States. The American Heart Association reports that each year, more than 400,000 Americans are victims of sudden cardiac death. Advanced Medical Products is an emerging leader in the design of a new generation of clinical diagnostic systems, which are instrumental in the diagnosis of cardiovascular disease, hypertension and prevention of sudden cardiac death.

#90037p0230 02/06/1990 ~PR Newswire

PEAPACK, N.J. (FEB. 6) PR NEWSWIRE - NYCOR, Inc. (NASDAQ: NYCO) today reported that revenues for the fourth quarter of 1989 ended Dec. 31, 1989 increased to $1.5 million compared to $629,000 from continuing operations a year ago. Net income totaled $1.2 million, or five cents per share, in the fourth quarter of 1989 versus $38,000, or a loss of three cents per share of income from continuing operations after payment of the preferred dividend, in the prior year. Including discontinued operations in the 1988 quarter, there was a net loss in the fourth quarter of last year of $568,000, or eight cents per share.

For the year ended Dec. 31, 1989, revenues from continuing operations were $5.4 million versus $2.3 million in 1988. Income from continuing operations for 1989 was $3.7 million, or 12 cents per share, compared with $281,000, or a loss of 12 cents per share after payment of the preferred dividend, in 1988. Including discontinued operations, net income totaled $56.5 million, or $3.89 per share for 1989 versus $1.5 million or a loss of four cents per share, in the prior year.

NYCOR revenues from continuing operations currently are comprised primarily of interest income, as the company sold or discontinued its manufacturing operations as of the second quarter of 1989.

The company's objective is to make a substantial acquisition of underperforming manufacturing assets based on NYCOR's balance sheet strength, which includes cash of $73.3 million and no debt. Stockholders' equity per share at Dec. 31, 1989 totaled $3.74 on a fully diluted basis.

FOXBORO, MA (FEB. 6) PR NEWSWIRE - The Foxboro Company (NYSE: FOX) indicated today that its fourth quarter losses will exceed prior expectations.

President Gary K. Willis said he now expects losses for the period will be approximately $14.8 million, or $1.20 per share. As a result, he said the company would experience a full-year 1989 loss of approximately 33 cents per share.

Willis attributed the loss to the following factors: continued unabsorbed expenses resulting from an aggressive inventory reduction program and lower production volumes from domestic manufacturing operations; ongoing expenses associated with the implementation and application of software for the company's I/A series systems; and a series of year-end charges

taken to recognize losses incurred to date on major projects.

Also included in the results will be a one-time gain from the settlement of a major project which had been the subject of arbitration.

"Our project losses," Willis said, "stem primarily from our European operations, where I/A series systems sold initially had accumulated excess costs in order to meet specifications."

"However, we introduced significant software enhancements last fall," Willis added, "and since these enhancements have stabilized the product, those projects currently being booked will not incur the same difficulties. Nevertheless, during the first half of 1990, we expect to see a continuing negative impact of older systems which will accrue similar excess costs."

"Systems costs within the United States have already been stabilized, and we anticipate steady improvement in profitability throughout the coming year."

Willis added that Foxboro will continue its aggressive inventory reduction program.

"Although this strategy penalizes us in the short term," Willis observed, "it remains part of a long-term effort to improve our manufacturing methods as well as our cash flow."

"While there are indications that the earnings shortfall is temporary and should be resolved over the next two quarters," Willis said, "the company's directors voted to omit the common stock dividend payment for the first quarter of 1990 pending the realization of those improvements."

HOUSTON (FEB. 6) PR NEWSWIRE - Pogo Producing Co. (NYSE: PPP) today announced that it has concluded new bank financing arrangements with a group of institutions led by the Bank of Montreal. The credit agreement will allow Pogo lower borrowing costs and fees than the company presently enjoys. Additional features of the agreement include an extended revolving period and expanded operating flexibility.

The facility is an unsecured revolving credit of up to $90 million. Borrowings may be made at the prime rate or a rate based on bank certificate of deposit rates. The credit agreement has an initial expiration date of April 30, 1992 and provides for three one-year

extensions subject to the mutual consent of the company and the banks.

Proceeds of the credit will be used to refinance the $60 million outstanding bank debt under Pogo's existing $90 million bank credit agreement. The balance of the credit will be available for general corporate purposes although no additional borrowings are presently anticipated.

Since 1986 Pogo has reduced its senior debt (including production payment obligations) from $309 million to approximately $136 million. Total debt is now less than $320 million versus $515 million of debt and redeemable preferred stock at the beginning of 1986.

SIMI VALLEY, CA (FEB. 6) PR NEWSWIRE - Micom Communications Corp. has announced the availability of XNMS (X.25 Network Management System) Release 2.0, one of the msot feature-packed PC-based network management systems available in its price range, according to the company.

Micom's XNMS Release 2.0 is a real-time PC-based network management system with a new completely mouse-driven user interface and a number of new capabilities. Running on any Intel 80386-chip based AT-type personal computer, XNMS 2.0 gives network managers a multi-layer graphic representation of any size network, up to 500 nodes, fully visible on a PC screen. Each layer display shows changes in the status of all nodes and links by a change in color, alerting the network manager immediately to the location of the network problem.

Additionally, through the use of a remote pager capability, MICOM has brought off-site network management to the XNMS 2.0. In instances where network managers leave their office -- even go across town -- but still need to be alerted of network malfunctions, the XNMS 2.0 product interfaces with most major brand remote "beepers" and paging services.

XNMS 2.0 also supports a remote console via an asynchronous dial- up interface. If an event should require monitoring the network from a remote terminal, the user can dial in through asynchronous dial modem and use the Control Center to diagnose and troubleshoot the network from an off-site location.

MICOM has also increased the number of backround screens available on the system to include additional maps of international areas and the United States. U.S. pricing of XNMS 2.0 is $15,000-$20,000, depending on the application.

MICOM Communications Corp. is a world wide supplier of local area network (LAN) and wide area network (WAN) products including twisted- pair based systems, multiplexors, protocol convertors, modems, data/voice integration devices, and fully integrated X.25 networking systems. The company is located at 4100 Los Angeles Ave., Simi Valley, Calif., 93063. Telephone: 800-MICOM U.S. or 805-583-8600.

#90037p0241 02/06/1990 ~PR Newswire

KANSAS CITY, MO (FEB. 6) PR NEWSWIRE - Today, Kansas City Power & Light Co. (NYSE: KLT) announced that its board of directors declared a quarterly dividend of 64 cents per share on its common stock, payable March 20, 1990 to stockholders of record on Feb. 27, 1990.

That action continues KCPL's indicated annual level of dividends at $2.56 per share. In addition, the board of directors declared regular dividends on the preferred stock, payable June 1, 1990, to shareholders of record on May 10, 1990.

Kansas City Power & Light today reported fourth quarter earnings per average common share of 65 cents, compared with 15 cents for the like period a year ago. The increase in earnings reflects higher kilowatt-hour (kwh) sales primarily attributable to cooler weather, lower maintenance expenses and strong interchange sales. Maintenance expenses declined primarily due to the continuous operation of Wolf Creek through the quarter compared to the unit being down for refueling and maintenance during the comparable 1988 quarter.

Earnings per average common share for the 12 months ended Dec. 31, 1989, were $3.31 compared with $3.20 for 1988.

The electric utility reported that fourth quarter operating revenues increased 6.9 percent to $170.6 million from $159.6 million in the prior year. For the twelve months ended Dec. 31, 1989, operating revenues decreased slightly -- 0.7 percent -- to $731.5 million $736.5 million for the like period a year ago.

With increases in the average number of residential and commercial customers, kwh sales increased 9.8 percent in the fourth quarter due to a colder than usual heating season. Kwh sales remained constant for the year 1989 compared to 1988.

Fourth quarter 1989 net income increased to $21.6 million from $6.4 million a year ago. For the 12 months ended Dec. 31, 1989, net income increased 2.8 percent to $108.6 million compared with $105.7 million in the prior-year period.

Kansas City Power & Light provides electric service to about 409,000 customers in a 4,700 square-mile area in eastern Kansas and western Missouri, including metropolitan Kansas City.

ALBUQUERQUE, N.M. (FEB. 6) PR NEWSWIRE - Paul B. Goldberg, a long- time technical systems manager from Lockheed Electronics Corporation, has been named president and chief operating officer of Summa Medical Corporation (NASDAQ/NMS: SUMA).

Goldberg comes to Summa from Lockheed Electronics Company, a subsidiary of Lockheed Corporation, where he served as director of the systems analyses division since it was started in 1974. Goldberg was responsible for designing, developing and bringing to the marketplace major sensor system products for Lockheed. He continues to serve as a consultant to Lockheed.

Summa also announced today the appointment of Alan H. Kaplan as vice president and general counsel for the company.

Like Goldberg, Kaplan spent nearly 15 years at Lockheed Electronic Company where he served as corporate counsel and secretary, and as general manager of the information engineering division.

Kaplan's division was responsible for designing and developing large computer based information storage and retrieval systems and data recorders for space and other special applications.

Francisco Urrea, Jr. who continues as chairman and chief executive officer said, "The addition of Mr. Goldberg and Mr. Kaplan to the Summa management team gives us the expertise to manufacture, productize and market our high-definition television and related technologies."

Goldberg has a master's degree in economics from ICAF, Ft. McNair, Va., and a B.S. in physics from City College, New York. He has done post-graduate work in mathematics at the University of Pennsylvania and California Polytechnic Institute.

#90037p0246 02/06/1990 ~PR Newswire

TROY, MI (FEB. 6) PR NEWSWIRE - Ovonic Imaging Systems, Inc. ("OIS") (OTC: OVONC) announced that it has been contracted to develop a flat panel display prototype for a Horizontal Situation Indicator ("HSI") as a replacement for the existing electromechanical instruments on the KC-135, E-3A and F-15 aircraft.

The contract was awarded by Science Applications International Technology ("SAIT"), of San Diego, which is under contract for development of the overall instrument package with the Air Logistics Command at Warner Robins Air Force Base. SAIT is a division of Science Applications International Corporation ("SAIC").

The purpose of the development is to apply state-of-the-art technology to existing weapons systems in order to achieve a significant increase in reliability. Initial studies at Warner Robins indicate that the existing HSI experiences lower Mean-Time-Between-Failure (MTBF) than desired, and the existing technology (electromechanical, servo driven indicator) is not only difficult to repair, but expensive and requires excessive maintenance.

The HSI has been identified as being representative of a class of instruments of similar size and function which can benefit from the applications of digital electronics and flat panel display technology. Following a review of all candidate display technologies, SAIT selected active matrix liquid crystal display as the technology of choice, and awarded the development contract to OIS.

In this period of tightened budgets, the modernization of cockpit instrumentation is often a viable alternative to new aircraft programs.

Active matrix LCDs, being electronic displays, are extremely versatile because the same instrument can be used to display different types of data.

SAIC is an employee-owned, diversified, high technology corporation with sales of approximately $1 billion annually.

OIS develops electronic displays and scanning systems. Currently, OIS is focusing its proprietary display technology on avionic and military applications in order to become a leading U.S.-based manufacturer of flat panel displays.

DALLAS (FEB. 6) PR NEWSWIRE - The Missiles Division of LTV Missiles and Electronics Group today received its second production contract from the U.S. Army for a new conventional, surface-to-surface missile known as the Army Tactical Missile System, or Army TACMS.

The U.S. Army Missile Command awarded LTV a $59.6 million fixed- price contract for low-rate initial production of 104 Army TACMS missiles together with associated equipment and repair parts. The company also received a $6.8 million contract for engineering services in support of production.

Work will be performed principally at the Missiles Division headquarters near Dallas. Final assembly of the missiles will be done at LTV's El Paso, Texas, facility. Delivery of the 104 missiles is expected to be completed by late 1991.

"This award affirms the importance of Army TACMS during a critical time when worldwide instability is an issue," said Jay Musselman, LTV's senior vice president for fire support and deep attack programs. "Because Army TACMS has sufficient capability to deter would-be aggressors, it can be seen as a stabilizing influence."

The Army awarded LTV its first low-rate initial production contract for Army TACMS in February 1989. The $44.6 million fixed-price contract was for delivery of 66 missiles together with associated equipment and repair parts.

In December 1989, Army TACMS successfully completed the development test phase with the firing of the 26th missile at White Sands Missile Range, N.M. The operational test phase, where the Army tests the system under actual field conditions, is expected to begin this spring and last about

three months.

LTV won the competition to design and produce Army TACMS in March 1986 after almost a decade of research and testing. The resulting conventional missile will give Army battlefield commanders the capability to attack enemy ground targets deep behind the front lines and disrupt the flow of reinforcements.

Each missile is approximately 13 feet long, 2 feet in diameter and has a range of more than 60 miles (100+ kilometers).

The launcher for Army TACMS is another LTV product, the M270 launcher which also fires Multiple Launch Rocket System (MLRS) rockets. Each M270 launcher is capable of carrying two Army TACMS missiles packed in individual containers. Both the launcher and the MLRS rockets are produced at LTV's Camden, Ark., facility.

The Missiles Division manufactures missiles, rockets and space systems and is involved in a wide variety of advanced technology research and applications. It is one of three divisions of LTV Missiles and Electronics Group which also produces electronics, avionics and military vehicles.

ST. LOUIS (FEB. 6) PR NEWSWIRE - Strong fourth-quarter sales of its newly acquired hospital drug product, Thrombinar(R), allowed Jones Medical Industries, Inc. (NASDAQ: JMED) to "significantly" exceed market projections for both the quarter and fiscal year ended Dec. 31, 1989, Dennis Jones, chairman and CEO, reported today.

Jones Medical net income for the final quarter rose 102 percent to $700,000 or 20 cents per share, compared with $347,000, or 10 cents per share, for the fourth quarter of 1988. Quarterly sales increased 61 percent to $4,544,000 from $3,039,000 for the final quarter of 1988.

For fiscal 1989, Jones Medical reported sales of $13,322,000, a 30-percent increase over 1988 sales of $10,245,000. Net income rose 31 percent for the year to $1,595,000 or 46 cents per share based on 3,475,000 shares outstanding, compared to $1,221,000 or 35 cents per share, for 1988 based on 3,466,000 shares outstanding.

Mr. Jones explained, "Thrombinar's higher margins allowed us to improve our overall gross margins from 41 to 52 percent for the comparative fourth

quarters. Our operating income also increased 129 percent to $1,457,000 or 32 percent of sales, compared with $636,000 or 21 percent of sales, a year ago.

"We are very pleased with Thrombinar because it has allowed us to continue our uninterrupted record of eight consecutive years of increased sales and earnings. Most importantly, it has given JMED management a keen focus for future growth of our branded hospital drug products."

Mr. Jones noted the buildup of a dedicated hospital sales force to cover 12 major markets by the 1990 year end is on schedule with five highly experienced people already employed. "We, therefore, are most optimistic we can maintain our historical 30- to 40-percent compounded growth rate in both sales and earnings in 1990," Mr. Jones concluded.

#90037p0261 02/06/1990 ~PR Newswire

DENVER (FEB. 6) PR NEWSWIRE - Apache Corp. (NYSE: APA) today announced that 1989 earnings from continuing operations quadrupled to $22.1 million from $5.4 million the year earlier on record oil and gas production and increased gas marketing income.

Per share earnings from continuing operations increased to 64 cents in 1989 from 23 cents in 1988 despite a greater number of shares outstanding.

Net income of $22.1 million, or 64 cents per share, on revenues of $246.9 million compared to 1988's $9.0 million, or 38 cents per share, on revenues of $141.7 million. Fourth quarter 1989 net income of $7.1 million, or 18 cents per share, on revenues of $65.7 million compared to $2.8 million, or 8 cents per share, on revenues of $54 million for the corresponding period in 1988.

Oil and gas reserves ended the year at a record estimated 573 equivalent billion cubic feet (EBcf) of gas as reviewed by Ryder Scott Company Petroleum Engineers. Reserve additions totaled 152 EBcf, or 147 percent of the year's record production. Of this quantity, 104 EBcf were from drilling, with the balance from positive reserve revisions and acquisitions.

Apache also reported a stronger balance sheet at year-end 1989, resulting from a $114 million reduction in long-term debt to $196 million. The improvement was primarily attributable to the conversion of subordinated debentures into equity, which rose to 64 percent of the company's total capitalization from 40 percent a year earlier.

Apache is an independent oil and gas exploration and production company with securities traded on the New York and Midwest Stock Exchanges (symbol APA).

#90037p0262 02/06/1990 ~PR Newswire

WASHINGTON (FEB. 6) PR NEWSWIRE - The following statement was released today by Captain Skip Copeland, chairman of the Eastern Airlines pilot group of the Air Line Pilots Association.

The statement came in response to comments by Robert Miller, attorney representing preferred creditors in Eastern's bankruptcy proceedings. In a Feb. 1, 1990 article in the Wall Street Journal, Miller is reported to have said that the preferred shareholders "have lost faith in Eastern's plans to emerge from bankruptcy law proceedings."

I would like to endorse Robert Miller's suggestion that Eastern be sold. All recent reports indicate that, without immediate attention, Eastern Airlines is doomed. Eastern pilots represented by the Air Line Pilots Association have to ask: Why?

When competition in the airline industry is already at a critical low, why should Eastern - a national resource with a proud history of service to the traveling public - be allowed to die?

With his dismal record of failure and his long history of corporate bloodshed and employee abuse, why is Frank Lorenzo still granted asylum by the bankruptcy court, the Departments of Labor and Transportation, and the president of the United States?

Why can't Eastern get passengers on their aircraft even with rock-bottom

prices? What does the public know that the bankruptcy court, the Departments of Labor and Transportation, and the president seem to be missing?

When other airlines are making record profits, why was Frank Lorenzo's Texas Air Corp. rating on $400 million of senior debt lowered, as TAC remains on CreditWatch with negative implications? And why has Continental Airlines stock dropped from $23.375 a share last spring to $6.25 a share at the beginning of February?

Why should Frank Lorenzo be permitted to profit personally at the expense of Eastern employees, creditors, and airline passengers?

Why did it take the bankruptcy court and the majority of Eastern's creditors committee nearly a year to comprehend the message that Eastern's striking unions tried desperately to deliver to them since March 1989: that Frank Lorenzo has no intention of rebuilding Eastern or of honoring any obligations he can evade?

Why, when a loyal core of experienced, capable employees is available, does Eastern management entrust its operations to less experienced new hires? Why don't those who have the power to do the right thing just do it: Save Eastern Air Lines. Force Frank Lorenzo to put in place at Eastern a management committed to building an airline, and eject through the back door those who are content to oversee a controlled liquidation.

WASHINGTON (FEB. 6) PR NEWSWIRE - GE Information Services (GEIS), owner and operator of one of the world's largest commercial teleprocessing networks, today announced the completion of its major expansion in the United States of the availability of 2400 bps (bits per second) asynchronous dial-up access to its information services. Such 2400 bps

network access is now available in 510 U.S. cities.

GEIS is now the leader in 2400 bps access in the United States, offering significantly more cities with 2400 bps access than any other network service.

In addition, many network access locations provide tri-speed modem service offering GEIS clients the convenience of dialing a single telephone number for 300, 1200 or 2400 bps access to the GEIS network. The tri-speed capability allows clients to standardize and simplify automated logon scripts.

Internationally, GEIS also has expanded its 2400 bps service and now offers direct access to the network in 17 countries: Australia, Austria, Canada, Denmark, Egypt, Finland, France, Hong Kong, Italy, Japan, Luxembourg, Netherlands, Norway, Singapore, Sweden, United Kingdom, and Venezuela.

Such 2400 bps dial-up access to the GEIS network is also available from other foreign locations, where local 2400 bps dial-up access is not available, through PDN gateways maintained by GEIS.

For further information about 2400 bps access to the GEIS network in the United States, please call 1-800-433-3683.

GE Information Services, a division of General Electric Company (NYSE: GE) USA, is headquartered in Rockville, Md. It offers a wide range of value-added services for network-based business applications, systems integration and software development services, and network management services.

UNIVERSAL CITY, CA (FEB. 6) PR NEWSWIRE - Joshua Donen has been promoted to executive vice president of production for Universal Pictures, effective immediately, it was announced by Casey Silver, president of production.

Donen most recently was senior vice president of production, having joined the company in 1985 as vice president of production. Among the motion pictures he has supervised are "K-9," "Ghost Dad" and "The Hard Way."

"Josh Donen has played a key role in the resurgence of Universal Pictures " said Silver. "His energy and insight will be invaluable in the development of Universal's motion picture slate for 1990 and beyond."

Prior to joining Universal, he was vice president, west coast production for ABC Motion Pictures. He began his career in the entertainment industry in 1981 as an agent at the William Morris Agency.

NEW YORK (FEB. 6) PR NEWSWIRE - Pan American World Airways today reported that January traffic increased 23.3 percent over the same month a year ago with load factor up 6.2 points, from 54.4 percent to 60.6 percent. January was Pan Am's third consecutive month of double digit traffic growth.

Revenue passengers miles were 2.342 billion, compared with 1.899 billion a year ago, and available seat miles were 3.865 billion, compared with 3.490 billion, which represents an increase of 10.7 percent over a year ago.

Pan Am said traffic increased in all areas of operations, with its largest division, the Atlantic, showing a 25.3 percent increase in traffic, an 3.3 percent increase in available seat miles and an 11 point increase in load factor, from 51.6 percent to 62.6 percent this year.

Traffic in the domestic market was up 38.8 percent in January this year, capacity was up 31.4 percent, and load factor increased 2.8 points, from 49.3 percent to 52.1 percent. The large increase in capacity and even greater traffic increase reflects a major expansion at Pan Am's Miami hub.

In Latin America, traffic was up 6.6 percent, capacity was up 7.2 percent and load factor, at 67.2 percent, was down slightly, from 67.5 percent.

Scheduled freight ton miles were down 1 percent, from 51.5 million to 51 million.

Pan Am traffic statistics include Pan American World Airways' operations only, and do not include Pan Am Shuttle or Pan Am Express flights.

HOUSTON, (FEB. 6) PR NEWSWIRE - Oceaneering International, Inc. (NASDAQ: OCER) announced today that it has filed a registration statement with the Securities and Exchange Commission covering the proposed offering of 4,205,325 shares of Oceaneering common stock by ENSERCH Corporation.

The registration statement was filed at the request of ENSERCH, the

selling shareholder, in accordance with its previously announced plans to divest itself of holdings in the oil field services industry in order to focus attention on its primary businesses.

Shearson Lehman Hutton Inc. and Morgan Keegan & Company, Inc. are to be the managing underwriters for the sale of the common stock. In connection with this offering, the underwriters may purchase an additional 420,000 shares, that are issuable by Oceaneering, pursuant to an over-allotment option.

The registration statement relating to these securities has been filed with the Securities and Exchange Commission today, but the registration statement is not yet effective. These securities may not be sold, nor may offers to buy be accepted pursuant to this registration statement prior to the time it shall become effective. This announcement shall not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of these securities in any state in which such offer, solicitation, or sale would be unlawful prior to registration or qualification under the securities laws of any such state.

Oceaneering, together with its affiliate companies, is one of the world's largest underwater services companies. Oceaneering supplies a comprehensive range of integrated technical services to a wide array of industries. Principal services are directed to the offshore oil and gas industry and include drilling support; subsea construction; production systems; facilities maintenance and repair; survey and positioning; engineering, and specialized inspection, both offshore and onshore.

(FEB. 6) - Bell Atlantic (NYSE: BEL) and New Jersey Bell will discuss

Caller ID and preview new Caller ID commercials for the news media on Thursday, Feb. 8, at 10:30 a.m. at the Intercontinental Hotel in New York.

Much like a peephole in a door, Caller ID lets customers "see" who is calling before they answer the phone. Incoming phone numbers are displayed on a unit that is attached to the customer's phone line.

The commercials will be shown on TV stations in the New York metropolitan area beginning Monday, Feb. 12. They will support a special 90-day waiver of the service connection fee by New Jersey Bell for Caller ID and other Bell Atlantic IQ Services.

Bell Atlantic spokespeople will show the commercials and answer questions on Thursday, Feb. 8, at the Intercontinental Hotel, South Parlor, Second Floor, 111 E. 48th St. (between Park and Lexington). A press packet and videos of the ads will be available at the briefing and afterward from Suzanne Cleary, 703-974-5455.

NOTE: Bell Atlantic is a registered trademark. IQ Services is a service mark.

CONTACT: Sandy Granzow, 703-974-3615; or Suzanne Cleary, 703-974-5455 or, after hours, 202-543-4417.

FREEPORT, NY (FEB. 6) PR NEWSWIRE - LeaRonal, Inc. (NYSE: LRI) today announced the appointments of Richard F. Kessler as executive vice president, David Rosenthal as vice president of finance, Donald Thomson as vice president-technology, and James L. Martin as assistant vice president.

Kessler has been with LeaRonal since 1965. Kessler previously held the position of vice president-market technology. He has a B.S. in chemical engineering from Rensselaer Polytechnic Institute and a master of science in chemical engineering from the University of Pennsylvania.

Rosenthal has been with LeaRonal for the past 13 years. He is currently chief financial officer and treasurer of the organization. Rosenthal has a B.S. in accounting from SUNY at Buffalo, N.Y.

Thomson has been with LeaRonal for 31 years and started with the company as a laboratory technician and previously held the position of assistant vice president of product development-precious metals. He holds patents dealing with alloy and pure gold plating formulations. Thomson has a B.S. in chemical engineering from the Polytechnic Institute of Brooklyn.

Martin has been engaged in the electronics and metal finishing industry

since 1966. He has been employed by LeaRonal, Inc. and its United Kingdom subsidiary for the past 15 years during which time he held positions as research and development manager and currently research director. Martin graduated with a B.Sc. Honors from the Heriot Watt University, Edinburgh, Scotland, and conducted post-graduate research work at the University of Manchester Institute of Science and Technology, England. Martin also holds a M.Sc. from the Victoria University of Manchester.

Ronald Ostrow, president and CEO, said the appointments are further steps taken by LeaRonal to coordinate its growing worldwide staff to meet the requirements of its expanded customer base.

The board of directors of LeaRonal Germany has announced the appointment of Karl-Hans Fuchs as managing director. He succeeds Gerhardt Wunnerlich, who has retired from this position. Fuchs was previously sales/managing director-southern region for Schering AG, Berlin, West Germany, and has approximately 20 years experience in the printed circuit and metal finishing industries.

LeaRonal is a worldwide supplier of specialty chemicals that are used in the electronics and metal finishing industries.

#90037p0295 02/06/1990 ~PR Newswire

GAITHERSBURG, MD. (FEB. 6) PR NEWSWIRE - Life Technologies, Inc. (NASDAQ: LTEK) today reported that for the fourth quarter ended Dec. 31, 1989, net income was $3.3 million, compared with $2.7 million for the same period last year. Earnings per share increased 20 percent in the fourth quarter of 1989 to $.24 per share. Net income for 1989 was $13.2 million, or $.97 per share, both records for continuing operations and 10 percent higher than results for 1988.

For the fourth quarter of 1989, net sales were $32.9 million, a decrease of $0.7 million, or 2 percent, compared with the same period last year. Higher unit sales of products other than fetal bovine serum and divested product lines increased sales for these products by $3.4 million, or 15 percent, compared with the fourth quarter of 1988. Lower fetal bovine serum sales of $3.0 million and lower currency exchange rate effects of $0.8 million, when compared with the fourth quarter of 1988, more than offset the increase in non-fetal bovine serum product sales.

Gross margins in the fourth quarter of 1989 benefited from fetal bovine serum unit costs decreasing at a rate greater than unit selling prices. The LIFO reserve was reduced by $2.2 million in the fourth quarter of 1989 mostly because of the unit cost decreases of fetal bovine serum.

Marketing and administrative expenses in the fourth quarter of 1989 were 16 percent higher because of the company's continued commitment to the growth of all major product groups and its strengthened management team. The investment in research and development programs was 40 percent greater in the quarter, primarily due to increased expenditures for life science products sold to its research and industrial customers.

Operating income for the fourth quarter of 1989 was $4.5 million, a 17 percent increase over the results for the same period in the prior year. Investment income was 42 percent greater than the fourth quarter of 1988, because of higher investment balances.

For the year ended Dec. 31, 1989, the company achieved record sales of $134.2 million, an increase of $4.8 million, or 4 percent, over last year. Compared with 1988, higher unit sales of product lines other than fetal bovine serum and divested product lines increased sales for these by $15.4 million, or 17 percent. Lower fetal bovine serum sales of $5.9 million and foreign exchange effects of $3.9 million reduced sales in the 1989 period.

Gross margins in 1989 increased in proportion to sales because of improved margins on fetal bovine serum sales and change in product mix, as fetal bovine serum represented a lesser portion of total sales in 1989. The cost of fetal bovine serum declined in 1989, causing a reduction in the LIFO reserve of more than $6 million, compared with a $1.9 million increase for 1988. Marketing and administrative expenses were 21 percent greater in 1989 over 1988, as the company increased its marketing effort in all major product lines and strengthened its management team. Research and development expenses increased 30 percent, mostly due to higher spending for life science research and industrial products.

Operating income for 1989 was $18.1 million, an increase of 2 percent or $0.4 million, over last year, which included a $0.6 million gain on the disposal of a product line. Income from non-operating sources increased 86 percent in 1989 because of increased investment income.

Net income for 1989 was $13.2 million, or $.97 per share, an increase of 10 percent when compared with 1988. Earnings per share of $.88 for 1988 included a $.03 gain from the disposal of a product line in Europe.

President and Chief Executive Officer Dr. J. Stark Thompson stated, "We are extremely pleased with our record sales and net income for 1989. It is significant that fetal bovine serum represented 23 percent of sales in 1989 compare with 29 percent of sales in 1988. This decline was the result of lower fetal bovine serum sales in most markets. As a result of our targeted sales growth of research, industrial and diagnostic products, fetal bovine serum should represent less than 10 percent of annual sales by the mid-1990s."

Life Technologies, Inc. develops, manufactures and supplies more than 2,000 products used principally in life science research, commercial manufacture of genetically engineered products and human diagnostics. The company believes it is the leading supplier of sera and other cell growth media as well as a leading supplier of enzymes and other biological products necessary for recombinant DNA procedures.

BRAINTREE, MA. (FEB. 2) PR NEWSWIRE - The Braintree Savings Bank (NASDAQ: BTSB) announced today net income for the year 1989 of $901,000, a 32.2 percent decrease from 1988 results of $1,328,000. 1989 earnings per share were 58 cents on 1,562,224 average common shares and equivalents outstanding compared to 85 cents in 1988 on 1,570,832 average common shares and equivalents outstanding. 1989 results include securities/loan sale losses of $152,000 vs. gains of $92,000 in 1988. Net income for the quarters ending Dec. 31, 1989 and 1988 were $49,000 and $151,000, respectively. Earnings per share were 3 cents and 9 cents for the comparative periods.

In spite of an increase in nonperforming loans, the bank maintained a net

interest margin for 1989 of 3.87 percent compared to 3.91 percent for 1988.

The provision for possible loan losses was $1,080,000 in 1989 vs. $225,000 in 1988 bringing the reserve for possible loan losses to $1,287,000, or 1.02 percent of gross loans at Dec. 31, 1989, compared to the reserve for possible loan losses of $717,000, or .55 percent of gross loans at Dec. 31 1988. The loan loss provision for the fourth quarter of 1989 and 1988 was $630,000 and $180,000, respectively. Loan charge-offs, net of recoveries, were $510,000 in 1989 vs. $142,000 in 1988.

According to Winthrop Sargent, IV, chairman, president and CEO, "The continued softening of the local real estate market and the New England economy has resulted in a substantial increase in the bank's level of nonperforming assets and loan charge-offs. While we are addressing the current loan problems with great diligence, there are no signs of a near term improvement and, thus, it will be necessary to maintain the loan loss reserve at a prudent level until such time as stability in the real estate market beomes apparent."

Nonperforming assests were as follows:

Nonperforming Assets (in thousands)	12/31/89	12/31/88
Nonaccrual loans:		
Commercial business and commercial real estate	$ 4,759	$ 178
Other	3	0
Total	4,762	178

TROY, MI (FEB. 6) PR NEWSWIRE - Officials of Chrysler Corporation (NYSE: C) and General Motors Corporation (NYSE: GM) confirmed today they have signed an agreement which creates the first manufacturing joint venture company between two major U.S. auto manufacturers. The new company, called New Venture Gear, Inc. (NVG), combines Acustar's New Process Gear facility in Syracuse, N.Y., and GM's Hydra-matic plant in Muncie, Ind.

"The agreement begins a new era for the American automobile industry," said Gerald Greenwald, vice chairman of Chrysler. "It's a cooperative effort that will help all of us be more competitive in the worldwide market."

William E. Hoglund, executive vice president of General Motors, said, "This is a win-win situation that means greater job security for the employees of both facilities. It's a creative arrangement that allows NVG to become a major player in the global manual transmission and components markets."

Acustar, Chrysler's stand-alone parts subsidiary, holds 64-percent equity in the new manual transmission and four-wheel-drive products firm, with General Motors retaining a 36-percent ownership. Both Chrysler and General Motors have signed long-term supplier agreements for manual transmission and four-wheel-drive componentry with the new firm.

David R. Zimmer was named president and chief executive officer of NVG. Zimmer was the former vice president and general manager, Electronics Products for Acustar. He has extensive background and experience in planning, finance and manufacturing.

NVG is the world's largest producer of four-wheel-drive transfer cases. The combined capabilities of its New Process Gear and Muncie Transmission facilities also allow an unprecedented economy of scale for continuing manual transmission development and production in North America.

KING OF PRUSSIA, PA. (FEB. 6) PR NEWSWIRE - "Success '90," the popular national marketing and business planning symposium series created by the U.S. Small Business Administration (SBA) and Bell Atlantic (NYSE: BEL), is coming to northeast Pennsylvania for the first time on Friday, April 27, 1990.

The comprehensive, one-day workshop designed to provide small business owners and executives with the marketing savvy and business planning

skills to survive and prosper in the 1990s, will be held at Split Rock Lodge at Lake Harmony, Pa. Conference attendees are invited to take advantage of the amenities offered by Split Rock Lodge which is located near Interstate 80 in the Pocono Mountain resort area.

To date, more than 13,000 entrepreneurs across the country have attended the popular workshops since the program began in 1985.

The third of seven workshops to be held during 1990 in SBA's mid- Atlantic region, the Lake Harmony Success '90 will offer participants an affordable opportunity to learn practical business skills in interactive courses taught by nationally recognized small business entrepreneurs.

Courses this year include: developing strong marketing and business plans, growth management, marketing strategies for minorities and women- owned businesses, powerful public relations, using a personal computer as a marketing tool, controlling cash flow, creating a strong company image through graphics, launching a second career and developing high-performance employees.

New courses for 1990 include: how to buy and sell a franchise, new marketing techniques for professional service firms, exporting and -- back by popular demand -- how to enhance your personal presentation skills.

In addition to the workshops and lunch with the speakers, Success '90 will feature exhibits and information booths on a wide variety of topics, sponsored by SBA and Bell Atlantic in cooperation with the National Federation of Independent Business Foundation.

Attendees can also purchase audio cassette tapes of the day's workshops or video cassette tapes from the newly-created Small Business Video Library.

Success '90 at Split Rock Lodge is limited to 300 participants. The pre-registration fee is $125 and includes all conference material, breaks, lunch and a reception. Qualified military veterans are eligible for a $50 discount. Twenty-dollar discounts are also available to Bell Atlantic Yellow Pages advertisers and multiple attendees from the same firm each can receive a $25 discount.

FARMINGTON HILLS, MI (FEB. 6) PR NEWSWIRE - Douglas & Lomason Company (NASDAQ-NMS: DOUG), a major supplier to the automotive industry of seating and ornamental trim, announced Timothy A. Hernden has joined the firm as director of sales. He replaces Harold R. Dombrowski, who retired as vice

president and automotive sales manager of the company after 24 years of service.

Prior to joining Douglas & Lomason, Hernden had been with Chrysler Corporation for 21 years, serving most recently as Vehicle Procurement manager. He brings with him invaluable experience in all phases of component development, planning, quality assurance, and "just-in-time" delivery, the company said. Hernden received his M.A. from Central Michigan University and B.A. from Detroit College of Business. Married with two children, he lives in Clarkston, Mich.

In addition to auto parts, Douglas & Lomason Company manufactures beverage and food delivery truck bodies and trailers; conveyors, pulleys and packaging equipment; and a commercial-grade trisodium phosphate.

BETHESDA, MD. (FEB. 6) PR NEWSWIRE - American DreamCar, Inc. (NASDAQ: DCAR) today announced that it had signed Village Ford, Inc. of Ridgewood, N.J. and Stohlman Oldsmobile, Inc. of Alexandria, Va. as dealers for its line of classic American Muscle cars.

In making the announcement, Robert Seasonwein, president and chief executive officer of American DreamCar said, "We are particularly pleased to have our first two dealers be in the New York City and Washington metropolitan markets. Village Ford and Stohlman Oldsmobile are large, established dealers who will be able to provide American DreamCar customers with quality service for these delightful cars."

Seasonwein went on to explain that the company, which went public in 1989, will begin shipping cars to dealers out of its Cleveland plant next month. Several finished cars have already been shipped to the National Automobile Dealers Association (NADA) Convention in Las Vegas which opens Feb. 10. At that meeting, the company will introduce its product line to new car dealers and the press.

AT the NADA meeting, American DreamCar executives will be interviewing additional prospective dealers. The company intends to establish eight to 12 dealers in 1990 and expand its dealer network as the company increases production capacity.

American DreamCar re-manufactures a specialty line of cars including 1957 Chevrolet Bel Air Sport coupes, 60's era Mustangs, Pontiac GTOs, Oldsmobile 442s, Dodge Chargers, Chevrolet Camaros, Cadillac Convertibles

and the like. The re-manufacturing process involves stripping each car to the frame and then replacing or rebuilding every part of the car. Each car gets a re-built V-8 engine, air conditioning, power steering, disc brakes, stainless steel exhaust, AM/FM stereo tape deck, new interiors, and a host of other performance and appearance items.

"We want to make the cars of the 50s and 60s live again," said Seasonwein. "Our cars look as good as when Detroit built them. But they feel much more like modern cars because of all of the new technology we add in the re-manufacturing process."

NEW YORK (FEB. 6) PR NEWSWIRE - Metro Mobile CTS Inc. (AMEX: MMZ.A and MMZ.B) and Southern Union Co. (NYSE: SUG) announced (i) the completion of the distribution of the common stock of SU Acquisition Inc. ("Newco") by Metro Mobile to its stockholders (the "Distribution"), followed immediately by (ii) the merger of Newco with and into Southern Union (the "Merger"). These transactions were in accordance with the previously announced Amended and Restated Cash Merger Agreement, dated Aug. 10, 1989, among Southern Union, Metro Mobile and Newco.

As a result of the Merger, shares of Southern Union common stock outstanding before the Merger were automatically converted into the right to receive $13.80 per share as of the closing of the Merger.

Shares of Southern Union 10 percent Cumulative Preferred Stock have been redeemed for $108 per shares set forth in Southern Union's Notice of Redemption dated Jan. 3, 1990. Such shares will also receive dividends through the Redemption Date, which, in accordance with that Notice of Redemption, is Feb. 6, 1990.

Southern Union shareholders will be receiving instructions and a letter of transmittal from Continental Stock Transfer & Trust Co., the paying agent, explaining how to receive payment upon surrender of certificates formerly representing their shares of Southern Union common or preferred stock.

As a result of the Distribution, holders of Metro Mobile common stock as of Jan. 22, 1990, received one share of Newco common stock for every four shares of Metro Mobile Class A and/or Class B common stock then owned. As a result of the Merger, the Newco common stock was converted into an equal number of shares of Southern Union common stock.

#90037p0318 02/06/1990 ~PR Newswire

ROGERS, CT (FEB. 6) PR NEWSWIRE - Rogers Corporation (AMEX: ROG) reports record 1989 sales of $174,948,000, 8 percent higher than 1988's $162,476,000. Net income for the year was $1,607,000 or 53 cents per share, compared with $1,015,000, or 33 cents per share earned in 1988.

Fourth quarter sales were $46,486,000, up 19 percent from $39,127,000 in the comparable 1988 period. Profits were $648,000, or 21 cents per share in the fourth quarter of 1989, compared to the net loss of $1,214,000, or 40 cents net loss per share, in the 1988 fourth quarter.

Norman L. Greenman, president of Rogers Corporation, said, "Although 1989 earnings were better than in the prior year, they were still well below our target margins. In the short-term, to make further significant performance gains, we must continue the turnaround that started around mid-year in our largest profit center, the Flexible Interconnections Division, and, in addition, successfully ramp production in our new facility for multimetal tape automated bonding components, one of our Rogers High-Speed Interconnections (ROHSI) products. In the medium-term, we must convert our ROHSI development program into a group of commercial products; and we can report significant progress in that area, with appreciable sales expected to start in 1990. Because of its early and long-term commitment, Rogers is a recognized leader in high-speed, high-density interconnections for the emerging, more demanding computer industry requirements."

Greenman went on to say that "one of the most encouraging events of the year was the greatly improved performance in the latter half of 1989 in the Flexible Interconnections Division, after the management and organization changes that took place in the second quarter. This operation was in the black by the fourth quarter, helping to make that quarter the best of the year for Rogers; and the division has good prospects for further sales and profit improvement in 1990."

"Polymer Products sales in 1989 increased 17 percent and operating profits more than doubled because of significant gains in the composite materials, Poron(R) Materials and Molding Materials Divisions," Greenman said.

Greenman concluded that "Rogers has clearly taken a long-term approach, which has brought us to the point where we can begin to see the payoff to our shareholders for that long-range focus.

Based in Rogers, Conn., Rogers manufactures a broad range of engineered material and components for the electronics and other selected industrial

markets.

#90037p0322 02/06/1990 ~PR Newswire

ST. PETERSBURG, FL (FEB. 6) PR NEWSWIRE - Geonex Corporation (NASDAQ: GEOX) reported today an increase in revenues and earnings as the company completed the first quarter ended Dec. 31, 1989.

Revenues for the three months were $7,374,000 compared to $5,881,000 during the first quarter of fiscal 1989, an increase of 25 percent.

Net income for the first quarter was $261,000 or $.08 per share based on 3,472,000 weighted average shares outstanding. Net income of $236,000 or $.07 per share based on 3,407,000 shares outstanding was reported for the same period last year.

Revenue growth was generated primarily from new mapping activities on the West Coast. Profits were constrained by the initial start-up costs for the Egypt contract. This $27,000,000 project which started in January, 1990 is anticipated to generate revenues of approximately $6,000,000 during the current fiscal year. In addition, an expected slowdown in seasonal surveying activity contributed to a lower profit margin. Company earnings will begin to reflect some benefit from the Egypt project during the second quarter, however, management expects substantially greater contributions during the last half of fiscal year 1990.

Domestic business continues to expand with the award of a major new GIS project in Seattle. Geonex has opened an office in Seattle to handle the project as well as to develop an increased presence in the Northwest.

Geonex continues to maintain cash and short term investments at $5,541,000. Working capital is at $7,250,000 as compared to $6,836,000 on Sept. 30, 1989.

As Geonex enters the second quarter, it has assignments of $54,000,000. Geonex believes it can maintain planned growth in revenues and profits for the remainder of fiscal 1990.

Geonex Corporation, based in St. Petersburg, Fla. is the nation's largest geo-information company. Using the most advanced technology, Geonex provides mapping, and resource interpretation services to telephone, electric and gas utilities, local, state and federal government agencies and a variety of commercial industries. Geonex has overall competence in mapping for agriculture and forestry as well as oil, gas, and mineral exploration. In the environmental and hazardous waste area, Geonex

provides the following services through two units: analysis and testing services; and environmental hazardous waste investigation and data base management services.

HOLLAND, MI (FEB. 6) PR NEWSWIRE - At a special ceremony in Detroit in December of 1989, Donnelly was awarded the highest quality award given by Chrysler Corporation ... the Pentastar.

The Pentastar Award was presented by R.A. Lutz, president of Chrysler Corporation. Each year, Chrysler presents this award to a select group of suppliers who have demonstrated an excellent level of performance in Chrysler's Supplier Rating System. These suppliers have excelled in the crucial areas of quality, price, delivery and technology.

Donnelly currently holds top quality awards from all of the major domestic auto manufacturers, including the "Q1" from Ford Motor Company and the "Spear 1" from General Motors. In addition to the recently received "Pentastar Award," Donnelly also holds the "Quality Excellence" rating from Chrysler. All of these top quality awards require that suppliers meet stringent standards for total performance and are only awarded to a few of the thousands of suppliers to car makers. Donnelly also has received top quality recognition from major foreign automakers, both in the U.S. and overseas.

Donnelly Corporation (AMEX: DON) is an international, rapidly growing, technology-oriented company dedicated to serving customers around the world with high-quality fabricated, molded, and coated glass products for the transportation and electronics markets. The company has been based in Holland since 1905 and today operates from 12 separate facilities in western Michigan. In addition, Donnelly has a major manufacturing facility in Naas, Ireland, a marketing liaison office in Tokyo, a manufacturing facility under construction in Mount Pleasant, Tenn., and an Advanced Technology Center in Tucson, Ariz. Donnelly is also recognized as a leader in the application of participative management practices.

PITTSBURGH (FEB. 6) PR NEWSWIRE - A.J. Carvelli, vice chairman and chief executive officer of Pannier Corp., a manufacturer of industrial marking tools and equipment, has announced the promotion of four divisional vice

presidents.

Frederick H. Armstrong has been promoted to vice president, Pittsburgh Division, and director of marketing and sales. He joined Pannier in 1988 as director of sales and marketing, responsible for the marketing and sales for all products manufactured at Pannier's Pittsburgh Division.

Peter R. DeBlasis of Venice, Fla., has been promoted to vice president, Southern Division, and general manager. He joined Pannier's Southern Division as manager in 1982. A graduate of the Detroit College of Applied Sciences, DeBlasis holds a degree in manufacturing management.

Scott D. Heddaeus has been promoted to vice president, Pittsburgh Division and plant manager. He most recently served as plant manager of the Glenshaw plant. A graduate of Grove City College, Heddaeus holds a master's of business administration degree from the University of Pittsburgh.

Wolfgang Stahl has been promoted to vice president, Pittsburgh Division, and director of research and development. He had been director of research and development at the Glenshaw facility.

Pannier Corp. is one of the world's leading designers and manufacturers of industrial marking and identification equipment. The Pittsburgh-based company also has a Graphics Division in Warminster, Pa., which manufactures fiberglass embedded signs, and a Precision Machine Division in Sarasota, Fla., which specializes in production machining.

#90037p0329 02/06/1990 ~PR Newswire

CONCORD, CA (FEB. 6) PR NEWSWIRE - The Office Club Inc. (NASDAQ: OCLB) today reported financial results for the fourth quarter which ended Dec. 31, 1989.

Net sales for the year increased 182 percent to $146.7 million from the previous year's $52.1 million. Net sales also increased for the twelfth consecutive quarter to a record $47.4 million, an increase of 144 percent over the $19.4 million in sales for the fourth quarter of 1988.

The Office Club incurred a loss of $2.4 million or 40 cents per share in 1989, compared to a net loss of $3.2 million or 76 cents per share in 1988. The Office Club reported a net profit of $573,000 or 10 cents per share in the fourth quarter of 1989, compared to a net loss of $949,000,

or 21 cents per share in the fourth quarter of 1988 and a loss of $2,113,000 or 36 cents per share, in the third quarter of 1989.

The company attributed its first quarterly profit to a reduction in aggregate pre-opening expenses, continued economies of scale relative to general and administrative expenses, and increased warehouse contribution. Mark Begelman, president of The Office Club, said that "The fourth quarter was particularly gratifying in that the company generated its first quarterly profit despite the inventory and revenue losses incurred as a result of the Oct. 17, 1989 earthquake which impacted the San Francisco Bay Area."

Fourth quarter results reflected continuing strong performance from existing warehouses and the addition of two new facilities in Stockton, Calif. and Albuquerque, N.M. Comparable warehouse sales for the fourth quarter increased 31.9 percent from the prior year's period for the 11 facilities opened more than one year. Five of the facilities in the comparable warehouse period were closed between one and four days as a results of the Oct. 17, 1989 earthquake.

The Office Club Inc. sells high quality, brand name office products through a fast-growing network of retail membership warehouses in California, Oregon, Washington, Colorado, Texas, Nevada, New Mexico and Arizona. The company operated 32 warehouse facilities as of Dec. 31, 1989. Business, non-profit and home office customers are offered one-stop shopping at the lowest competitive prices for office supplies, office furniture, office machines, microcomputers and related products. Credit, telephone ordering and delivery services are available.

LOS ANGELES (FEB. 6) PR NEWSWIRE - WSGP International, Inc. announced an agreement to sell First Interstate of Hawaii, Inc. to First Hawaiian, Inc. First Interstate of Hawaii, Inc. is the holding company for First Interstate Bank of Hawaii, the fourth largest commercial bank in Hawaii with total assets of approximately $812 million at Dec. 31, 1989.

First Hawaiian, Inc. will pay 2.3 times the book value of the bank at the time of closing plus the value of cash and cash equivalents in the holding company. First Interstate Bank of Hawaii's Dec. 31, 1989 book value was approximately $51.7 million.

WSGP International, Inc. is an international merchant banking firm headquartered in Los Angeles. The firm, founded in 1986 by William E. Simon and Gerald L. Parsky, is engaged in corporate and real estate

acquisitions. Its principals have completed a number of acquisitions in the financial services industry, including two commercial banks and five savings institutions with total assets currently in excess of $10.5 billion. An affiliate of WSGP International, Inc. completed the acquisition of First Interstate of Hawaii, Inc. in February, 1989.

William E. Simon, co-chairman of WSGP International, Inc. stated that "the acquisition of First Interstate of Hawaii, Inc. by First Hawaiian, Inc. represents a unique opportunity to merge two extremely strong Hawaii-based financial institutions, the combination of which will result in a larger, more efficient operation to better serve the banking needs of Hawaii." Simon noted that while the company had not been seeking a buyer, the strength of the offer and the purchaser will result in a transaction in the best interests of shareholders and employees. "The fact that First Hawaiian is a local institution with an outstanding reputation and deep commitment to its community, customers and employees was a key consideration in our decision to accept the offer."

The transaction is subject to approval by shareholders of First Interstate of Hawaii Inc., the board of governors of the Federal Reserve System and the Hawaii Commissioner of Financial Institutions and is expected to take six to nine months to complete.

Subsequent to closing the transaction, principals of WSGP International, Inc. will continue to maintain a strong presence in Hawaii through the ownership of HonFed Bank, a $3.1 billion federally chartered savings bank headquartered in Honolulu.

NEW YORK (FEB. 6) PR NEWSWIRE - Sutton Holding Corp. stated that it was gratified by the opinion of the Chancery Court of the State of Delaware relating to its effort to acquire DeSoto Inc. (NYSE: DSO).

The court's holding that "the directors of DeSoto Inc. have not properly discharged their fiduciary duties in considering the (Sutton) tender offer" and its admonition to the DeSoto board to "face up to their fiduciary duties" and to "take the necessary steps to assure a maximization of shareholder value" supports Sutton's longstanding position that DeSoto cannot ignore Sutton's generous $50 per share cash tender offer. The opinion stated that there was a "reasonable probability that the (DeSoto) directors actions in response to the tender offer have not been reasonable and therefore have not been rational and in good faith."

William Spier, chairman of Sutton, said, "We believe the court has sent a clear message to DeSoto. It must act now to maximize value. We trust the DeSoto directors will no longer ignore their fiduciary responsibilities and the overwhelming sentiment of DeSoto stockholders. Although we are disappointed that the court did not order the immediate redemption of DeSoto's poison pill, the court made it clear that the pill could only be used to provide additional time for DeSoto to maximize value. DeSoto must now accept our $50 offer or provide greater value to its stockholders."

SMYRNA, TN (FEB. 6) PR NEWSWIRE - Jerry L. Benefield, president and chief executive officer of Nissan Motor Manufacturing Corporation U.S.A., today announced three promotions related to the company's $490 million expansion:

-- Timothy Litwinski -- director, Plant Engineering
-- David D. Jones -- director/plant manager, Component Assembly
-- Vincent F. Sorgi -- director, Production Control, Manufacturing

Litwinski will be responsible for overseeing Nissan's departments for Facilities and Conveyor Design; Expansion Design and Construction; and Systems, Utilities and Paint.

Jones will oversee the company's assembly areas for Sentra engines, new 6-cylinder engines, axles and plastic components.

Sorgi will be responsible for inventory control, transportation, parts arrangement and production scheduling.

All three of the new directors have been members of Nissan's management team since 1981.

Litwinski has been project manager for Nissan's new Paint and Plastics Plant since October 1988 and previously served as engineering manager and department manager of Nissan's existing Paint Plant. From 1971 to 1981, he held various engineering and supervisory positions at Ford Motor Company.

Jones was nost recently trim operations manager in Nissan's Vehicle Assembly Plant. He has also been quality assurance manager in the Product Quality Division, paint operations manager in the Paint Plant and chassis operations manager in the Vehicle Assembly Plant.

From 1964 to 1981, he worked as a quality control staff specialist,

engineer, production superintendent and instructor of industrial engineering for Chrysler Corp.

Sorgi was most recently department manager of Material Handling in the Vehicle Assembly Palnt. He was previously department manager and section manager of Inventory Control, Manufacturing. From 1966 to 1981, he held various positions at Chrysler Corporation including production control manager prior to joining Nissan.

The three new management positions were created to support a major expansion under way at Nissan. The company is adding 1.2 million square feet to its facility to accomodate the production of a third vehicle, a four-door passenger car currently in design. The new vehicle will increase Smyrna's annual production capacity from the current 240,000 vehicles to 440,000 vehicles when it is launched in 1992.

DETROIT (FEB. 6) PR NEWSWIRE - Manufacturers National Corporation (OTC: MNTL) announced it has acquired certain assets and assumed certain liabilities of the former Skokie Federal Savings and Loan, F.A., in Skokie Ill., from the Resolution Trust Corporation, a federal agency acting as receiver for the savings and loan.

The assets, deposits and offices will be folded into Affiliated Bank/North Shore National, one of seven banks Manufacturers National Corporation operates in Illinois through the bank holding company Affiliated Banc Group, Inc. AB/North Shore National will assume all deposits and secured liabilities, totaling approximately $665 million.

The purchase and assumption in on a "clean" bid basis: the assets acquired are primarily cash, investment securities and one- to four-family residential mortgages, and the mortgages are subject to "put- back" provisions. If the mortgages do not meet certain criteria, the Resolution Trust Corporation will repurchase them.

"The acquisition of Skokie Federal's assets will enable Manufacturers National Corporation to expand its presence in the Illinois market. And, it will enable customers of the former savings and loan to take advantage of the wide variety of financial products Manufacturers specializes in, such as trust, employee benefit and international services," said Dean E. Richardson, chairman of the board, Manufacturers National Corporation.

With the addition of eight offices, AB/North Shore National now operates 10 offices in Chicago, Skokie, Glencoe, Woodstock, Kenilworth and Barrington.

Manufacturers National Corporation is a bank holding company headquartered in Detroit. It operates four subsidiary banks in Michigan, including its principal bank subsidiary, Manufacturers National Bank of Detroit, and seven banks in the metropolitan Chicago area through Affiliated Banc Group Inc. The corporation also operates financial subsidiaries in Delaware, Florida and Illinois.

TULSA, OK (FEB. 6) PR NEWSWIRE - Kern River Gas Transmission Company today announced that it has formally accepted its optional certificate from the Federal Energy Regulatory Commission (FERC) to construct its natural gas pipeline from Wyoming to California.

"This certificate is our ticket to forge ahead with our plans," said Cuba Wadlington Jr., executive vice president of Kern River.

"We expect to start laying pipe by the end of the year."

Acceptance of the FERC certificate is subject to possible subsequent commission orders or requests for rehearing.

Kern River began detailed design and engineering for the pipeline last summer and is scheduled to award construction contracts during the third quarter of this year. Plans call for the pipeline to be in service by the end of 1991.

The 36-inch-diameter pipeline will be 904 miles long; it will provide California with gas supplies from Canada and from the Overthrust Region of the Rocky Mountains. Initial capacity will be 700 million cubic feet a day.

The Kern River pipeline will originate in southwest Wyoming and terminate in Kern County, Calif., where the natural gas will be used for enhanced oil recovery, production of electricity, cogeneration of electricity and steam, and distribution by gas utilities.

Kern River is a joint venture of The Williams Companies, Inc. (NYSE: WMB) and Tenneco Inc. (NYSE: TGT).

The Williams Companies, Inc. is a Tulsa-based corporation that operates a nationwide digital telecommunications network and more than 25,000 miles of pipelines, which transport natural gas and petroleum products.

Tenneco Inc., is a Houston-based, diversified company with major business interests in natural gas pipelines, farm and construction equipment, shipbuilding, automotive parts, packaging, chemicals and minerals.

PONTIAC, MI (FEB. 6) PR NEWSWIRE - First Federal Bancorp, Inc. (FFB) (AMEX: FFS), the holding company for First Federal Savings Bank and Trust of Pontiac, reported a net loss of $1.4 million or $.39 per share for its second quarter ended Dec. 31, 1989, compared to earnings of $1.0 million or $.28 per share for the second quarter of the prior year.

First Federal Savings Bank and Trust (FFSBT), the primary FFB operating company, also announced it was consolidating two branch locations in March bringing the total number of branch reductions this year to three.

FFB is traded on the American Stock Exchange under the symbol FFS. The loss resulted from one-time-only, non-recurring charges of $1.8 million, including:

- A special $1.1 million provision for loan losses, primarily in consumer loans; - A loss on the disposition of assets; - Expenses related to settlement of an employment contract and retirement benefits for a retired officer.

RESTON, VA. (FEB. 6) PR NEWSWIRE - The board of directors of Freddie Mac (NYSE: FRE) today elected Leland Brendsel, the corporation's president and chief executive officer, as chairman of the board.

The directors also voted to retire Freddie Mac's 100,000 shares of non-voting common stock held by the 12 district Federal Home Loan Banks (FHLBs) at their $1,000 per share par value, effective immediately.

The non-voting common shares, which do not trade, were issued in 1970 to

the FHLBs in exchange for the banks' initial $100 million capitalization of Freddie Mac when the corporation was created by Congress. Freddie Mac's congressional charter authorizes the corporation to retire these non-voting common shares at par.

Freddie Mac's only other class of stock is voting common stock, which is publicly held and traded on the New York and Pacific Stock Exchanges.

Commenting on today's board action, Chairman Brendsel said: "I'm very proud to take my place among this distinguished group, and I thank my board colleagues for their vote of confidence in me and in Freddie Mac's future as a financially strong, well-managed corporation. We've made enormous strides in 20 years, building on a foundation that has made it possible for Freddie Mac to finance one in eight American homes today. As we face a new era in the mortgage lending, securities investment and homebuying arenas, we also know that with challenge comes opportunity. In 1990 and beyond, we intend to meet both with confidence and vision."

Brendsel said that the non-voting common stock was being retired because the purpose for which Congress authorized its issuance -- the initial capitalization of Freddie Mac -- had been served. In expressing his thanks to the FHLBs for providing startup capital for Freddie Mac in 1970, he also noted that, in the ensuing years, the 12 FHLBs and their member thrifts received "an excellent return on that investment by any standard."

"Since 1970, the thrift industry through the FHLB system has realized over $3.4 billion on an initial $100 million investment, a return that has averaged more than 22 percent annually, a rate exceeding that of other high-quality equities. This $3.4 billion includes dividends paid to both the FHLBs and their member institutions over the years, as well as the aggregate market value of the participating preferred stock held by thrifts."

Freddie Mac is a stockholder-owned corporation chartered by Congress in 1970 to create a continuous flow of funds to mortgage lenders in support of homeownership and rental housing. By linking the capital markets with the mortgage markets, Freddie Mac brings the efficiencies and lower costs of the secondary mortgage market to the lender, the investor and the homebuyer. Over the years, Freddie Mac has helped finance one in eight American homes, including more than half a million apartment units.

RESTON, VA (FEB. 6) PR NEWSWIRE - Systems Center, Inc. (NYSE: SMX) today

reported revenues of $22,791,134 for the quarter ended Dec. 31, 1989, up 28 percent from $17,810,871 for the same period in 1988.

Net income increased 55 percent to $5,403,074 (68 cents per share), compared with $3,478,636 (45 cents per share) for the fourth quarter last year.

For the year ended Dec. 31, 1989, revenues increased 28 percent to $66,237,522 from $51,682,800 for the year 1988. Net income for the year increased 43 percent to $10,623,983 ($1.33 per share) from $7,408,510 (98 cents per share) for the same period last year. Net income through Dec. 31, 1989, included a one-time adjustment of $639,586 (8 cents per share), recorded during the first quarter of 1989. This adjustment was attributed to a mandated change in the method of accounting for income taxes.

In making the earnings annoucement, Systems Center President John J. Barry stated: "We are extremely pleased to have met our dual 1989 objectives of integrating two acquisitions while achieving significant financial growth. The company closed the year with its ninth consecutive quarter meeting or exceeding analyst expectations."

Systems Center, Inc., founded in 1981, develops, markets, and supports network software including Network DataMover products for data transfer among multiple operating environments and network administration products for SNA networks; systems software products for IBM's VM operating system; and relational database software for IBM's SQL/DS and DB2. The company's products are marketed in 55 countries worldwide.

#90037p0359 02/06/1990 ~PR Newswire

UNION, N.J. (FEB. 6) PR NEWSWIRE - TransNet Corporation (NASDAQ-NMS: TRNT) announced today that its board of directors has adopted a shareholder rights plan under which common stock purchase rights will be distributed as a dividend at the rate of one right for each share of common stock outstanding as of the close of business on Feb. 16, 1990.

The shareholder rights plan is intended to protect all TransNet shareholders against unfair and coercive takeover tactics and hostile acquirors who may seek to acquire control of TransNet without paying all shareholders a full and fair price. The shareholder rights plan is not intended to prevent a fair and equitable acquisition of TransNet and will not do so. The rights plan is designed to assist the board of directors in obtaining maximum shareholder value in the event of a change of control of TransNet. The plan will not affect any prospective acquiror willing to

negotiate in good faith with the board of directors. The rights will expire on Feb. 6, 2000, unless previously redeemed.

The board of directors has studied rights plans for some time and has noted the adoption of such plans by a large number of public companies. The board of directors has determined that the adoption of such a plan is prudent because it will provide the board with assistance in protecting the interests of the company's shareholders and in maximizing shareholder value in a takeover situation.

Each right will entitle holders of TransNet common stock to buy one newly issued share of common stock of the company at an exercise price of $7.50. The rights will be exercisable only if a person or group acquires 20 percent or more of the outstanding shares of the company's common stock, or announces a tender or exchange offer which would result in its ownership of 20 percent or more of the outstanding shares of the company's common stock, or if a person owning at least 10 percent of the outstanding shares of the company's common stock is determined by the board of directors to be an adverse person (as defined in the rights plan).

Under the terms of the rights plan, if any person or group becomes the beneficial owner of 20 percent or more of the outstanding shares of the company's common stock except pursuant to a tender offer for all shares at a fair price, or, under certain circumstances, if the board of directors determines that a 10 percent or more stockholder is an adverse person, each right not owned by such person or related parties will enable its holder to purchase, at the right's then-current exercise price, shares of common stock of the company (or, in certain circumstances as determined by the board, a combination of cash, property, common stock or other securities, or a reduction in the exercise price) having a value equal to twice the right's exercise price. In addition, if the company is involved in a merger or other business combination transaction with another person in which its common stock is changed or converted, or sells or transfers 50 percent or more of its assets or earning power to another person, each right that has not previously been exercised will entitle its holder to purchase, at the right's then-current exercise price, shares of common stock of such other person having a value equal to twice the right's exercise price.

Except under certain circumstances specified in the shareholder rights plan, the company generally will be entitled to redeem the rights at $.01 per right at any time until the board of directors determines that a 10 percent or more stockholder is an adverse person or the tenth day after a public announcement that a person or group has acquired 20 percent or more of the company's common stock. At any time after a person or group has acquired 20 percent or more of the company's common stock, the board of directors may exchange the rights, in whole or in part, at an exchange ratio of one share of common stock for each right.

Details of the shareholder rights plan will be mailed to all stockholders.

DENVER (FEB. 6) PR NEWSWIRE - Western Gas Resources Inc. (NYSE: WGR) announced today that it is proceeding with the design and construction of a butane isomerization unit.

The facility will be located South of Gillette, Wyo. and will be constructed at a cost of approximately $14 million. The facility will convert normal butane to iso-butane which will be sold to refineries for use in upgrading the octane content of motor gasoline. The facility is expected to begin operation in the fourth quarter of 1990 and will serve the Northern Rocky Mountain refinery markets.

Western Gas Resources through its ownership in Western Gas Processors Ltd. (NYSE: WGP) owns and operates 18 natural processing facilities throughout the Rockies and Southwestern United States. Western is currently seeking additional gas processing and marketing opportunities throughout the United States.

#90037p0367 02/06/1990 ~PR Newswire

CAMBRIDGE, MA (FEB. 6) PR NEWSWIRE - Polaroid Corporation (NYSE: PRD) today reported higher worldwide sales as well as significantly higher operating profits for the fourth quarter of 1989 and substantially higher operating profits for the full year.

Worldwide sales for the quarter were $538.1 million compared with $533.2 million in the 1988 fourth quarter.

Polaroid's 1989 fourth quarter operating profits were 14 percent higher than the comparable period the year earlier. Operating profits for the quarter were $75.8 million which included provisions of approximately $9 million to increase reserves related to several operational matters including potential environmental issues and expenses associated with the previously announced divestiture of ancillary businesses.

Fourth quarter 1988 adjusted operating profits were $66.5 million, which excludes restructuring costs charged in that quarter and includes profit sharing expenses which would have been incurred in the absence of those

costs.

Polaroid's 1989 fourth quarter net earnings were $46.5 million. After deducting dividends on preferred stock in the quarter, primary earnings per common share were 72 cents. In last year's fourth quarter, the company lost $7.5 million, or 10 cents per share, which included a pre-tax charge of $54.9 million to cover costs primarily associated with the company's comprehensive restructuring plan and Shamrock-related expenses.

I. MacAllister Booth, Polaroid's president and chief executive officer, said, "Our fourth quarter results reflect the continuing momentum of Polaroid's plan to balance our current profitability with our long-term strategic objectives. Our results attest to the significant progress and fundamental changes made at Polaroid in 1989, all building and delivering value to our shareholders. This past year, we increased productivity, focused our research and development activities, controlled our overhead and developed new marketing perspectives for growth in the 1990s. As a result, operating profits for 1989 were 69 percent higher than in the company's previous record year."

Worldwide sales for the full year were $1.90 billion compared with $1.86 billion in 1988. Operating profits increased 87 percent to $304.2 million from $162.4 million in 1988, excluding expenses related to an unsuccessful takeover attempt by Shamrock Holdings as well as costs associated with the company's restructuring.

Net earnings for the year were $145 million which includes a pre-tax charge of $40.5 million resulting primarily from Shamrock litigation expenses. After deducting dividends on preferred stock in 1989, primary earnings per common share were $1.96. Last year the company lost $22.6 million, or 34 cents per share, which included a pre-tax charge of $151.9 million to cover costs primarily associated with the company's comprehensive restructuring plan and Shamrock-related expenses.

"Worldwide sales grew despite the negative effect of international exchange rates," Booth said. "Our sales growth was achieved primarily through instant film revenues, and sales of videocassettes and conventional film. We are proud of our acheivements this past year, yet we recognize we have much more to do, particularly in stimulating sales growth. To this end, we already have in place new marketing programs and new advertising approaches.

"We have established a foothold for conventional film worldwide, despite intense competition, and we will begin beta-testing our revolutionary new electronic imaging system for the medical field this year," Booth continued.

The company has purchased approximately 3.4 million shares as of Dec. 31,

1989, which is nearly half of its previously announced stock repurchase program. Total common shares outstanding as of Dec. 31, 1989 wewre 52,109,561.

Polaroid Corporation, with sales of almost $2 billion, is the worldwide leader in high quality, hardcopy instant imaging. The company supplies instant photography cameras and film; and conventional and electronic visual communication products to the consumer, business, industrial and scientific markets.

#90037p0371 02/06/1990 ~PR Newswire

STURBRIDGE, MA (FEB. 6) PR NEWSWIRE - SpecTran Corporation (NASDAQ: SPTR) today reported profitable operating results for its fourth quarter and a reduced net loss and positive cash flow from operations for the year ended Dec. 31, 1989.

Revenues for the fourth quarter of 1989 increased 70 percent to $2,498,812 compared with revenues of $1,470,278 for the fourth quarter of 1988. The net income for the 1989 fourth quarter of $92,332 or $.02 per share, compared with a net loss of $251,228 or $.05 per share for the same period in 1988.

Revenues for the 1989 year increased 72 percent to $8,002,112, compared with revenues of $4,642,841 for the 1988 year. The net loss for the 1989 year of $346,914 or $.08 per share, compared with a net loss of $1,627,955 or $.35 per share in the 1988 year, a reduction of 79 percent.

Commenting on the results, SpecTran's President and Chief Executive Officer, Raymond E. Jaeger, said, "The profitable fourth quarter of 1989 was a significant achievement made possible by a strong market demand for the company's multi-mode products for a variety of applications. Ongoing manufacturing yield and efficiency improvements have offset the approximately 60 percent decline in sales prices that has occurred since 1985, enabling the company to achieve a gross profit margin of 36.1 percent for their 1989 year. Due to volume limitations in the company's patent license with Corning, however, growth in revenues in 1990 will depend on a number of factors in addition to maintaining our market share in the face of increased active domestic production capacity. These include sales not affected by the Corning license limitation to customers such as Corning, AT&T and the U.S. government, higher specialty sales and the impact of the expiration of certain Corning patents from 1989 through mid-1992.

"Results for the 1989 year and fourth quarter continued to be adversely impacted by provision for legal fees related to the class action litigation initiated in 1986 by three stockholders of the company. The provision amounted to $583,025 for the 1989 year and $383,694 for the 1989 fourth quarter. Exclusive of the provision for class action legal fees, SpecTran would have earned net income of $236,111 for the 1989 year. In recording the 1989 provision, we have attempted to provide fully for all of the remaining estimated litigation costs. We believe this unwarranted lawsuit is completely without merit and places an unneeded expense burden

on our operations. While we continue to press for a favorable resolution, we recognize that it is impossible to predict the outcome of the litigation. We expect that the trial will begin sometime in 1990.

"SpecTran continued to generate positive cash flow from operations in the 1989 fourth quarter, amounting to $106,644. During the 1989 fourth quarter, however, cash and cash equivalents declined by $247,334 primarily due to debt retirement and acquisition of equipment. For the 1989 year, the company generated $397,772 of positive cash flow from operations, with cash and cash equivalents declining by $708,492 primarily due to the purchase of short-term investments amounting to $499,393, the acquisition of property and equipment of $382,109 and reduction of debt $243,332.

"While management remains committed to improving the prospects of the company, we can not be certain of achieving comparable results in the first quarter of 1990 as a result of continued strong competition and normal seasonal fluctuations in market demand."

SpecTran Corporation develops, manufactures and markets glass optical fibers.

NEW YORK (FEB. 6) PR NEWSWIRE - Kidder, Peabody Group Inc. today announced the appointment of Richard W. O'Donnell as chief financial officer and chief administrative officer, succeeding Charles V. Sheehan. The appointment is effective immediately.

Sheehan will continue to head Kidder, Peabody's retail group. O'Donnell, 44, has been a managing director and head of operations for Kidder, Peabody since April 1986, having joined the firm as director of quality assurance and management controls in June 1985. He was corporate treasurer of Lehman Brothers Kuhn Loeb 1983-1985 and was a senior vice president of Shearson Lehman Brothers, Inc. following the merger of the two firms. He also is a former corporate controller of the Crane Company, and was senior audit manager of Peat, Marwick, Mitchell & Co. 1972-1980. He was a financial analyst for Allied Chemical Corporation 1969-1972. O'Donnell is a lawyer and a certified public accountant.

Kidder, Peabody is a leading global investment banking and brokerage concern. GE Financial Services holds an 80 percent interest in the 125-year-old company.

DALLAS (FEB. 6) PR NEWSWIRE - Herbert D. Kelleher, chairman and president of Southwest Airlines (NYSE: LUV) today announced that Lieutenant Gov. William P. Hobby had become a member of the board of directors of Southwest Airlines. Gov. Hobby's addition to the Southwest Board increases its size from six to seven members.

Kelleher stated that: "We welcome Gov. Hobby to the Southwest Airlines board of directors and are honored by his acceptance of our invitation. Gov. Hobby is that rarest of individuals in modern times: a citizen-statesman. His success in business and leadership in public

affairs and public office provide a breadth of experience and insight that will enrich our deliberations."

Hobby has served as Lieutenant Governor of Texas for a record 18 years. During his tenure as Lieutenant Gov., he has assiduously worked to upgrade the quality of education; expand human services; and balance the state budget. He is chairman of the Legislative Budget Board; the Legislative Coucil; and the Legislative Education Board. He also serves as vice chairman of the Criminal Justice Policy Council.

Gov. Hobby has received the Santa Rita Award, the highest honor of the University of Texas; has been honored for his contributions to mental health by the Texas Mental Health Association; was selected as Texan of the year at the 23rd Annual Texas Legislative Conference; was a recipient of the Mirabeau B. Lamar Award for distinguished service to higher education; and was honored for his contributions to transportation by the Texas Good Roads and Transportation Association.

Gov. Hobby has had a distinguished career in journalism, serving as executive editor of the Houston Post for 18 years, during which time he was elected as president of the Texas Daily Newspaper Association and served several times a a member of the advisory committee for Pulitzer Prizes in journalism. Presently, Gov. Hobby is chairman of H & C Communications, a privately owned broadcasting company, and serves on the boards of Rice University, where he also teaches, and the Houston Area Research Corp.

CHICAGO (FEB. 6) PR NEWSWIRE - Robert H. Malott, chairman and chief executive officer of FMC Corp. (NYSE: FMC), today announced the planned appointment of Robert N. Burt as president of FMC, succeeding Raymond C. Tower, effective March 1, 1990. Malott said he plans to recommend Burt's election to FMC's board of directors at its regularly scheduled meeting on Feb. 16.

Tower is retiring from FMC and from its board of directors after 44 years with the company. He has been president and chief operating officer since 1977 and a member of the board of directors since 1970.

Burt, 52, joined FMC in 1973 and held several key management positions. From 1977 to 1983 he served as general manager of the agricultural chemical operations, and from 1983 to 1988 he was general manager of FMC's Defense Systems Group. He was elected vice president in 1978 and elected to his current position of executive vice president in 1988. He was

elected to FMC's board of directors last year.

Burt received a bachelor of science degree in chemical engineering from Princeton University and a master of business administration degree from Harvard Business School.

FMC Corp., headquartered in Chicago, is one of the world's leading producers of machinery and chemicals for industry, government and agriculture. The company operates 89 manufacturing and mine facilities in 24 states and 14 foreign countries. The company divides its businesses into five major segments: Industrial Chemicals, Performance Chemicals, Precious Metals, Defense Systems and Machinery and Equipment.

#90037p0383 02/06/1990 ~PR Newswire

LANSING, MI (FEB. 6) PR NEWSWIRE - Michigan Consolidated Gas Co. customers will pay $21.6 million more this year because of a decision today by state regulators to allow the utility to pass on "take-or-pay" (TOP) costs from interstate pipelines, and to exempt the utility from paying any share of those costs.

The Michigan Public Service Commission (MPSC) ordered MichCon's customers to pay for 100 percent of the utility's 1989 TOP costs, despite a December 1989 U.S. Court of Appeals decision that declared "unlawful" the method pipelines used to allocate the costs to local utilities, like MichCon.

That U.S. Court of Appeals ruling makes it impossible to know with any certainty the amount of TOP costs that will ultimately be allocated to MichCon and other local utilities, said Michigan residential and industrial ratepayer groups.

The Residential Ratepayer Consortium (RRC) and the Association of Businesses Advocating Tariff Equity (ABATE) maintained that MichCon should not pass any TOP costs on to customers until that amount is finalized. Otherwise, the groups said, customers may pay more than the courts ultimately decide they are responsible for. The RRC and ABATE will continue to pursue this before the MPSC.

Before the U.S. Court of Appeals decision, ABATE and the RRC had proposed that local utilities and customers should equitably split payment responsibilities for these TOP costs, because utilities benefited equally from the restructuring of the gas industry which resulted in the TOP costs. This rationale is consistent with the Federal Energy Regulatory Commission (FERC) position for allocating TOP costs among different segments of the gas industry, and New York and Pennsylvania have adopted

similar policies.

While the MPSC acknowledged it has the authority to order MichCon to absorb some TOP costs, the MPSC refused, stating that it believes only customers benefited from the industry restructuring.

Yet, MichCon's revenues have continued to exceed the utility's authorized rate of return for the last five years, the RRC and ABATE noted, which contradicts the MPSC's opinion.

MARINA DEL REY, CA (FEB. 6) PR NEWSWIRE - Fuji Electrocell Corp. (OTC) announced today that an agreement was reached in principal between the top management of Fuji Electrocell and Fuji Electrochemical, the Japanese battery manufacturer, to resume a normalization of relationships. Rinzo Iwai, president of Fuji Electrochemical, expressed his desire to see Fuji batteries successfully marketed in the United States by Fuji Electrocell. Management of both companies have come to tentative agreements as to pricing and delivery capabilities.

Further, discussions are taking place regarding the expansion of Fuji Electrochemical, and the feasibility of building factories in North America for the benefit of Fuji Electrocell. Finalization of these agreements are expected within the next month in order to allow the agressive re-entry into the marketplace of the Fuji Electrocell batteries by mid-1990.

Jay Freedman, chief executive officer of Fuji Electrocell Corp. (FEC), stated that he was pleasantly surprised by the cooperation and interest exhibited by Fuji Electromechanical in rebuilding the corporate image of FEC, and their desire to assist FEC completely in penetrating the North American market in a substantial manner.

BOSTON (FEB. 6) PR NEWSWIRE - Home Owners Savings Bank F.S.B. (NYSE: HFS) today reported a net loss of $9.4 million or ($2.03) per share for the first fiscal quarter ending Dec. 31, 1989. This compares with net income of $2.5 million or 1 cent per share, for the first quarter of fiscal 1989. Per share amounts reflect the dividend requirements of the preferred stock.

Several factors contributed to the loss, including the cost of excess liquidity, unrealized tax benefits and increased professsional fees relating to restructuring and regulatory activities. Also contributing to the loss is the continuing softness in the mortgage market and a reduced yield on mortgage-derivative investments.

Headquartered in Burlington, Home Owners is the largest thrift based in Massachusetts and serves customers in all 50 states.

MORGANTOWN, WV (FEB. 6) PR NEWSWIRE - A new diagnostic cardiology procedure now available at West Virginia University Hospitals (WVUH) provides improved evaluations of heart and valve functions, it was announced today.

Trans-esophageal imaging is a procedure that images the heart from back to front with a tube that is inserted through the mouth into the esophagus. The procedure eliminates the limitations that result from standard echocardiography, which images the heart from front to back with a probe on the exterior chest wall.

Two procedures were performed last week for the first time at Ruby Memorial Hospital.

Although echocardiography can continue to be used on most patients, those with artificial valves, lung disease, mass or blood clots in the heart, or suspected heart valve infections will receive more accurate readings from trans-esophageal imaging. The procedure is also useful for patients who are difficult to image because of excessive tissue or injury to the chest wall.

Trans-esophageal imaging also can be used to monitor the heart during surgery. "It gives a good idea of how the heart is reacting to the added stress," said Dr. Mark Borsch, the only cardiologist at WVUH who presently performs the diagnostic procedure.

"Echocardiography has been a very useful technique in cardiology, while trans-esophageal imaging offers another tool in select patients," said Borsch.

The technology for trans-esophageal imaging was available in the 1970s, but the instruments were rigid," said Borsch. he said a flexible scope was

developed to reduce the discomfort experienced by the patient and the procedure is now more common.

Trans-esophageal imaging is currently available at WVUH and the Charleston Area Medical Center, but will become more widely used in the future.

Borsch traveled to the Yale New Haven Medical Center in Connecticut to gain experience with the procedure.

#90037p0395 02/06/1990 ~PR Newswire

CINCINNATI (FEB. 6) PR NEWSWIRE - The Kroger Co. (NYSE: KR) reported today 1989 fourth quarter after-tax earnings of $5.3 million, or 7 cents per share, before an extraordinary item, the results of both record sales and cash flow.

The Company said fourth quarter operating cash flow from continuing units increased 10.6 percent to a record $229.1 million. Sales from continuing units in the quarter rose 8.3 percent to a record $4.653 billion.

For the full year 1989, sales from continuing units totaled $18.832 billion, up 7.5 percent over the previous year, while operating cash flow totaled $896.2 million, an increase of 22.0 percent over 1988.

The Company said it was especially encouraged by a 7.2 percent increase in sales from identical stores in the fourth quarter. For the full year, identical store sales increased 5.3 percent.

An after-tax extraordinary loss of $51.3 million from the write-off of deferred financing costs related to its 1988 bank credit agreement resulted in a net loss of $45.9 million, or 56 cents loss per share, for the fourth quarter. In the comparable 1988 fourth quarter, Kroger had a net loss of $119.0 million, or $1.57 loss per share, when a $128.7 million after-tax restructuring charge was recorded.

For all of 1989, Kroger had a loss of $16.3 million, or 23 cents per share loss before the extraordinary item. Including the extraordinary loss, Kroger's net loss for 1989 was $72.7 million, or $0.92 loss per share, compared to net earnings of $34.5 million, or 24 cents per share in 1988.

Kroger Chairman and Chief Executive Officer Lyle Everingham said the 1989 fourth quarter and full year operating results reflect the Company's "ability to execute an aggressive retailing and financial strategy in a very challenging competitive environment. Kroger maintained its strong

market position and responded to the needs of our customers, and in doing so, we were able to set the stage for continued growth in 1990 and beyond."

Everingham noted that sales results were uniformly strong throughout the Company's supermarket and convenience store divisions. He noted that sales momentum was continuing so far in 1990, with both total sales and identical store sales continuing to grow at a strong pace in the first five weeks of the new year.

During 1989, the combination of better than anticipated proceeds from asset divestitures and improved operating results enabled the Company to reduce its outstanding debt and retire its preferred stock for a total of $372 million, including $125 million of scheduled payments. Kroger also was able to negotiate more favorable terms under its new credit agreement, and to replace portions of its debt with lower interest, longer term debt.

NEW YORK (FEB. 6) PR NEWSWIRE - AMAX Inc. (NYSE: AMX) today reported unaudited net earnings of $360 million, equivalent to $4.19 per primary common share, in 1989, the third highest total in the Company's 102 year history. The 1989 results compared with record 1988 net earnings of $741 million, equivalent to $8.42 per primary common share.

The 1988 results included a nonrecurring pretax gain of $164 million on the sale of a 25 percent interest in two primary aluminum plants and a $125 million gain from a federal income tax settlement, while 1989 earnings were reduced by $42 million as a result of the Chevron Corporation's exercise in August of its one-time right to receive an additional payment on the 15.2 million shares of AMAX common stock that AMAX purchased from Chevron in 1988. The full year and fourth quarter 1989 earnings also include $19.6 million in revenues for amounts previously collected under a coal supply contract and a charge of $22.2 million to reduce the carrying value of an idled coal mine in Utah.

Sales in 1989 of $3.9 billion were unchanged from the prior year. Operating earnings of $591 million compared with $707 million in the prior year. The decline was largely attributable to reduced primary aluminum metal available due to the sales of the interests in the two primary aluminum plants that were part of a strategic plan to replace higher cost primary capacity with more competitive facilities.

For the 1989 fourth quarter, AMAX reported net earnings of $58 million, equivalent to 67 cents per primary common share, which included the items mentioned above. This compared with net earnings of $288 million,

equivalent to $3.50 per primary common share a year ago. The 1988 fourth quarter included the $164 million gain on the sale of the interest in the aluminum smelters.

Fourth quarter 1989 sales were $903 million, compared with $999 million a year earlier. Operating earnings were $97 million, compared with $197 million in the 1988 fourth quarter.

Allen Born, Chairman, Chief Executive Officer and President, called 1989's results extremely satisfying, although down from 1988's record achievements.

RICHMOND, VA (FEB. 6) PR NEWSWIRE - Heilig-Meyers Company (NYSE: HMY), the Richmond-based home furnishings retailer, today announced that it had completed the purchase from Reliable Stores, Inc. of certain assets related to 34 stores and four warehouses in Tennessee, Kentucky, West Virginia, and Virginia. The transaction included the purchase of three parcels of real estate and the sub-lease of or assumption of the lease obligation on the remaining locations.

William C. DeRusha, Chairman and Chief Executive Officer, stated that these stores provide a good fit with the Company's existing operations and enable the Company to increase its penetration of the market areas involved. He added that he was pleased that the acquisition was accomplished quickly with minimum disruption of the operation of the new stores.

Heilig-Meyers Company, a Virginia corporation, presently operates 315 in 12 states.

HASTINGS, MN (FEB. 6) PR NEWSWIRE - Micro Display Systems Inc. (OTC Pink Sheets) announced today it has agreed to license its full page monochrome video controller manufacturing rights to Samsung Electronics Co. Ltd., of Korea, for inclusion in Samsung's high resolution video products. Under the agreement, Samsung obtains the right to manufacture full page monochrome video controller cards utilizing MDSI's design in exchange for initial license fees and subsequent royalties over the term of the contract.

Samsung is a major international electronics company based in Seoul, Korea with annual sales of approximately $30 billion.

"Our full page monochrome products have received many honors over our company's history," said Scott McCallum, vice president -- operations. "Signing this type of an agreement with a company of Samsung's stature and market presence is another highlight in these products' long series of successes."

Jerry Crary, chairman and chief executive officer stated, "This agreement is another step in the company's plan to return to profitability. Partnerships like this greatly facilitate the development and promotion of The Genius(R) product line and strengthen our position in the marketplace. We are very pleased with this agreement and excited about the potential future prospects for subsequent opportunities involving other Genius products."

#90037p0412 02/06/1990 ~PR Newswire

DENVER (FEB. 6) PR NEWSWIRE - Key Production Company Inc. (NASDAQ: KPCI) today reported 1989 earnings of $3.1 million, or 26 cents per share, on revenues of $32.5 million. This compared with a loss of $1.5 million, or 12 cents per share, on revenues of $34.8 million, including Key's pro rata share of its predecessor's operations, during 1988. Administrative costs 31 percent below those of 1988, higher oil prices and favorable gas contract and property ownership settlements contributed to the company's financial performance.

For the fourth quarter of 1989, net income totaled $1.2 million, or 10 cents per share, on revenues of $8.6 million. The quarter was positively impacted by a non-recurring gas contract settlement that increased net income by $236,000, or 2 cents per share. Net income for the 1988 fourth quarter totaled $515,000, or 4 cents per share, on revenues of $7.9 million.

Production for the year was 12.9 billion cubic feet of natural gas and 522,000 barrels of oil, down 11 percent and 20 percent, respectively, from 1988 levels as a result of the 1988 sale of marginal producing properties and natural production declines inherent in Key's stated policy of repaying debt and funding dividends rather than reinvesting to replace reserves. Product prices averaged $1.67 per thousand cubic feet (Mcf) of gas and $17.28 per barrel of oil for the year compared with $1.69 per Mcf and $13.87 per barrel for the like period last year.

Cash from operations of $16.8 million was sufficient to fund dividends during the year totaling $3.2 million and to reduce debt, including current maturities, by $13.0 million, or 31 percent, to $28.5 million.

LOS ANGELES (FEB. 6) PR NEWSWIRE - WSGP International, Inc. announced an agreement to sell First Interstate of Hawaii, Inc. to First Hawaiian, Inc.

First Interstate of Hawaii, Inc. is the holding company for First Interstate Bank of Hawaii, the fourth largest commercial bank in Hawaii with total assets of approximately $812 million at Dec. 31, 1989. First Hawaiian, Inc. will pay 2.3 times the book value of the bank at the time of closing plus the value of cash and cash equivalents in the holding company. First Interstate Bank of Hawaii's Dec. 31, 1989 book value was approximately $51.7 million.

WSGP International, Inc. is an international merchant banking firm headquartered in Los Angeles. The firm, founded in 1986 by William E. Simon and Gerald L. Parsky, is engaged in corporate and real estate acquisitions. Its principals have completed a number of acquisitions in the financial services industry, including two commercial banks and five savings institutions with total assets currently in excess of $10.5 billion. An affiliate of WSGP International, Inc. completed the acquisition of First Interstate of Hawaii, Inc. in February, 1989.

The transaction is subject to approval by shareholders of First Interstate of Hawaii Inc., the board of governors of the Federal Reserve System and the Hawaii Commissioner of Financial Institutions and is expected to take six to nine months to complete.

Subsequent to closing the transaction, principals of WSGP International, Inc. will continue to maintain a strong presence in Hawaii through the ownership of HonFed Bank, a $3.1 billion federally chartered savings bank headquartered in Honolulu.

HOUSTON (FEB. 6) PR NEWSWIRE - Kern River Gas Transmission Co. today announced it has formally accepted its optional certificate from the Federal Energy Regulatory Commission (FERC) for construction of its

proposed natural gas pipeline from Wyoming to California.

"This certificate is our ticket to forge ahead with our plans," said Ewell H. Muse III, president of Kern River. "We expect to start laying pipe by the end of the year."

Acceptance of the FERC certificate is subject to possible subsequent commission orders or requests for rehearing.

Kern River began detailed design and engineering for the pipeline last summer and is scheduled to award construction contracts during the third quarter of this year. Plans call for the pipeline to be in service by the end of 1991.

The 36-inch-diameter pipeline will be 904 miles long; it will provide California with gas supplies from Canada and from the Overthrust Region of the Rocky Mountains. Initial capacity will be 700 million cubic feet per day.

The Kern River pipeline will originate in southwest Wyoming and terminate in Kern County, Calif., where the natural gas will be used for enhanced oil recovery, production of electricity, cogeneration of electricity and steam, and distribution by gas utilities.

Kern River is a joint venture of units of Tenneco Inc. (NYSE: TGT) and The Williams Cos. Inc. (NYSE: WMB).

Tenneco Inc. is a Houston-based, diversified company with major business interests in natural-gas pipelines, farm and construction equipment, shipbuilding, automotive parts, packaging, chemicals, and minerals.

The Williams Cos. Inc. is a Tulsa-based corporation that operates a nationwide fiber-optic telecommunications network and more than 25,000 miles of pipelines, which separately transport natural gas and petroleum products.

#90037p0425 02/06/1990 ~PR Newswire

MONTREAL (FEB. 6) PR NEWSWIRE - Repap Enterprises Inc. today announced results of operations for the year ended Dec. 31, 1989. Revenues reached a new high of $1,221.8 million, up 19 percent over 1988 revenues of $1,028.3 million. Net income was reported at $93.1 million ($1.79 per share) compared to $92.8 million in 1988 ($1.79 per share). Cash flow from operations amounted to $232.1 million compared to $223.7 in 1988.

Operating profit before depreciation was up slightly over 1988 as a result of higher pulp prices and increased coated paper shipments, offset partially by higher administrative costs. Depreciation expense increased by 32 percent to $57.8 million, reflecting the operation of new facilities during the year.

Net income would have been higher by $11 million or $0.21 per share had the average exchange rate remained at 1988's level of $0.81.

Repap's shipments of coated paper increased to 545,000 tons in 1989, 16 percent greater than 1988, and exceeded pulp shipments for the first time in Repap's history. The $1.5 billion capital investment program in state-of-the-art technology was completed with the successful startup of the second coated paper machine, designated A-2, at Newcastle, New Brunswick, in December. The A-2 coated paper complex represents an investment of approximately $450 Cdn. million with an annual capacity of 250,000 tons per year at full design capacity.

Repap Enterprises Inc. is a fully integrated North American paper and pulp company with market pulp mills at Skeena Cellulose Inc. in British Columbia, and at Miramichi Pulp & Paper Inc. in New Brunswick; a sack kraft paper mill at The Pas, Manitoba, Canada, and coated paper operations at Midtec Paper Corporation in Wisconsin, and at Miramichi Pulp & Paper Inc.

#90037p0428 02/06/1990 ~PR Newswire

GOLDEN, CO (FEB. 6) PR NEWSWIRE - AMAX GOLD INC. (NYSE:AU; TORONTO: AXG) reported production of 307,387 ounces of gold for 1989, a 28 percent increase over 1988 production and unaudited net earnings for the year of $33.3 million or 55 cents per share. This compared with $43 million or 72 cents per share for 1988. Gross operating margin for 1989 was $59.4 million compared with $66.2 million for 1988.

Sales for 1989 were $121.6 million, a 16 percent increase over 1988. Amax Gold's gold marketing program enabled the company to offset a substantial decline in the gold market with an average realized price of $411 per ounce of gold. This was achieved despite the Comex average price for the year of $382 per ounce.

While pre-tax earnings remained constant at $44.4 million for 1989 compared to 1988, the reduction in net earnings was due to a higher net tax expense of $11.1 million for 1989.

Cash production costs for the year were $132 per ounce compared with $110 per ounce for 1988. Cash production costs for 1989 were higher as a result of the increase in the Nevada net proceeds tax and more higher cost production attributable to the Wind Mountain and Waihi mines.

Unaudited fourth quarter 1989 net earnings were $5.1 million or 8 cents per share compared with $4.4 million or 7 cents per share for the fourth quarter 1988.

Amax Gold produces and explores for gold in the United States and New Zealand and owns approximately 48 percent of the shares of Canamax Resources Inc., a gold mining and exploration company in Canada. Amax Gold is listed on the New York and Toronto stock exchanges and is 87 percent owned by AMAX Inc.

SEATTLE (FEB. 6) PR NEWSWIRE - During the past several months, The Boeing Company (NYSE: BA) has realigned and renamed several of its divisions involved in defense and space work.

This release is to clarify the realignment and the correct names and spelling of the group and its divisions.

The proper corporate name encompassing all company operations worldwide, both civil and military, is "The Boeing Company." Also acceptable is "Boeing." Frank Shrontz is chairman and chief executive officer of the company.

The company's defense and space programs are all part of the Boeing Defense & Space Group (with an ampersand, please.) B. Dan Pinick is president of the group.

Operating divisions of the group include "Boeing Aerospace & Electronics," headquartered in Kent, Wash.; "Boeing Helicopters," headquartered in Philadelphia; and "Boeing Military Airplanes," headquartered in Seattle.

Boeing Aerospace & Electronics has major defense and space contracts that include NASA's space station, missiles, space transportation vehicles, space defense, surveillance aircraft and communications aircraft.

Boeing Helicopters has contracts to modernize and upgrade U.S. Army and Navy-Marine Corps medium-lift helicopters. In addition, Boeing Helicopters is a prime participant in two key new rotorcraft programs, including the Bell-Boeing V-22 Osprey tiltrotor and the Boeing-Sikorsky light helicopter (LHX) for the Army.

Boeing Military Airplanes is the company's development and production arm for advanced military aircraft. It is a key supplier to the U.S. Air Force B-2 bomber program and co-developer of the YF-22 Advanced Tactical Fighter. Its Wichita branch produces the new Air Force One fleet and modernizes B-52 and KC-135 aircraft.

CONTACT: David Suffia or Sherry Nebel of Boeing Aerospace & Electronics, 206-773-2816.

#90037p0445 02/06/1990 ~PR Newswire

CALGARY, Alberta (FEB. 6) PR NEWSWIRE - Gulf Canada Resources Limited's (AMEX, Montreal: GOU) cash generated from continuing operations before exploration expenses was $419 million for the year ended Dec. 31, 1989, compared with $409 million in 1988. Higher oil prices, higher volumes and lower finance charges all contributed to the improvement. Reduced activity for the northern drilling system had a negative impact.

Earnings from continuing operations were $52 million in 1989, compared with $67 million in 1988. After discontinued operations, 1989 earnings were $46 million. In addition to the factors affecting cash generation, earnings were positively affected by lower exploration expenses and negatively affected by declining tax benefits.

During 1989, Gulf reduced its debt position by $389 million, primarily by using the proceeds from the sale of the oil and gas assets of Home Petroleum Corporation, the issuance of a second series of senior preference shares, and the sale of accounts receivable.

Gross sales of crude oil, natural gas liquids and synthetic crude oil were up 2 per cent in 1989, to 100,400 barrels per day. The increased contribution from the company's Indonesian operations more than offset declines in Western Canada. Gross sales of natural gas were up 3 percent to 344 million cubic feet per day.

#90037p0446 02/06/1990 ~PR Newswire

SAN FRANCISCO (FEB. 6) PR NEWSWIRE - The U.S. Environmental Protection Agency (EPA) today announced that a federal Grand Jury has returned an 11-count indictment against Aerolite Corp., Reno, Nev., and Arthur Thomas for knowingly discharging toxic pollutants into the public sewer system of Reno. This is the first criminal prosecution by EPA in Nevada for violations of any environmental statute.

"This indictment serves notice that industries cannot knowingly pollute the environment without facing criminal prosecution," said Keith Takata, acting water management division director. "Companies must take responsibility for pretreating their toxic wastes so that these wastes do not harm the environment."

According to the indictment, Thomas, an owner of Aerolite Co., an electroplating firm, is charged with 10 counts of knowingly discharging highly acidic waste water between Jan. 24 and Feb. 19, 1988, to a sewer system that is hooked up to the Reno/Sparks publicly-owned waste treatment plant. Water from the plant discharges to the Truckee River. Highly acidic waste water can impair the sewage treatment process and cause corrosive structural damage to a sewer treatment system.

Thomas is also charged with one count of knowingly discharging waste water contaminated with cyanide, lead, chromium, nickel, copper, zinc and cadmium into the sewer system on Feb. 24, 1988. This water was also highly acidic. Heavy metals can pass through a treatment plant process and be released into the environment or severely damage a waste treatment plant's ability to properly treat waste, causing pollutants to be discharged. These toxicants can also cause contamination of sewage sludge which then poses a hazardous waste disposal problem for waste treatment plants. Cyanide can produce toxic sewer gases which may be hazardous to human health and worker safety.

These actions violated federal pretreatment standards and local regulations. These standards limit the amount of toxicants industries can discharge to a treatment plant.

Thomas is subject to maximum penalties of three years in prison and $250,000 per count.

Industrial waste investigators for the city of Reno, the Reno City Attorney's Office and the local police department initiated the investigation and forwarded it the EPA's Office of Criminal Investigation and Department of Justice for further action.

Aerolite, which uses a chemical process for electroplating and anodizing various products, discontinued operations in February 1988.

#90037u0148 02/06/1990 ~United Press International

WASHINGTON (FEB. 6) UPI - Former President Ronald Reagan, ordered by a federal judge to surrender part of his diaries in the Iran-Contra trial of

John Poindexter, sought to withhold the writings through a claim of executive privilege.

Reagan also was ordered Monday to testify on videotape in the Feb. 20 trial of Poindexter, his one-time national security adviser, who faces five felony charges stemming from the Iran-Contra scandal.

The rulings by U.S. District Judge Harold Greene rebuked Reagan, who has been trying to avoid taking the stand under oath or turning over his diaries.

In addition, a legal scholar said Reagan might have difficulty prevailing with the claim of executive privilege, which was used unsuccessfully by former president Richard Nixon at the height of the Watergate scandal.

''No court has ever upheld an absolute privilege for a former president to refuse to testify for any reason at all under any circumstances,'' said Laurence H. Tribe, a constitutional law expert at Harvard University.

''Particular questions might be objectionable because of national security implications, but there is no principle to protect a former occupant of the Oval Office,'' Tribe said.

''This issue is far from over,'' Tribe added, ''but the strength of the demand for the evidence clearly exceeds the force of any executive privilege that can be claimed.''

In ordering Reagan to testify on videotape, Greene gave the former president a Feb. 9 deadline to raise a claim of ''executive privilege.'' Greene also set a Feb. 9 deadline for raising questions about the use of classified information in the case.

At issue is Poindexter's role in the complex scandal involving secret weapons sales to Iran, efforts to win freedom for American hostages in Lebanon, and financing of covert operations to aid the Nicaraguan Contra rebels.

Late Monday afternoon, Reagan's lawyer, Theodore Olson, filed a motion invoking executive privilege and asking Greene to throw out the subpoena for Reagan's diaries on constitutional grounds. The judge's initial ruling said the diaries had to be surrendered Monday, but Olson's appeal delayed the effect of that part of the order.

Olson's motion did not address the unexpected order for Reagan's videotaped testimony, although under Greene's earlier ruling that issue may be appealed until Feb. 9.

Reagan ''has attempted in this court to heed the Supreme Court's

admonition that a claim of presidential privilege should not be made lightly,'' Olson told the judge, but ''former President Reagan hereby asserts his claim to the constitutionally protected privacy of his diaries.''

The judge made no immediate ruling on Reagan's claim of executive privilege.

It would be the first time Reagan has testified at any Iran-Contra legal proceeding. Reagan successfully avoided having to appear - or testify on videotape - at the trial of former White House aide Oliver North, the Marine lieutenant colonel already convicted in the scandal.

Greene said it would be ''inconceivable'' for Reagan to be exempt from ''the duty of every citizen to give evidence,'' since the United States is ''a republic that subscribes neither to the ancient doctrine of the divine right of kings nor to the more modern conceit of dictators that they are not accountable to the people whom they claim to represent or to their courts of law.''

#90037u0150 02/06/1990 ~United Press International

WASHINGTON (FEB. 6) UPI - The Energy Department has decided to abandon efforts to use key parts of a mothballed Colorado plant for nuclear weapon-grade plutonium in favor of building a new facility nearby, the Washington Post reported Tuesday.

Agency officials and congressional sources told the Post that the new facility adjacent to the troubled Rocky Flats, Colo., plant is estimated to cost $565 million.

Sources told the Post that the Energy Department's decision came after new estimates indicated $1 billion will be needed to completely salvage the facility, which has been plagued by problems and shutdowns.

The Rocky Flats plant processes plutonium to be fashioned into the metallic hemispheres incorporated in nuclear weapons. It cost $215 million and took eight years to build, but it was shut down soon after its 1982 opening because of equipment malfunctions and extensive, unexpected contamination by plutonium, a highly radioactive and cancer-causing element.

The facility known as Building 371 was to have replaced two other plants at the site that dated from the 1950s and were causing excessive worker radiation exposure.

Those plants were shut recently for safety modification and for an

accounting of the plutonium inside their machinery.

The problems have left the government without an operating facility to produce significant amounts of plutonium scrap or recycle plutonium from retired nuclear warheads.

Sources told the Post that deliveries of new warheads using recycled plutonium may be delayed if the older plants cannot be restarted by April or May.

Department officials said the decision to build an adjacent facility, rather than relocate the plant, was made because of the danger and expense of transferring tons of hazardous plutonium to a new site.

#90037u0197 02/06/1990 ~United Press International

(FEB. 6) UPI - Los Angeles District Attorney Ira Reiner appointed a new prosecutor Monday to take the reins in the re-trial of Raymond Buckey, the only remaining defendant in the McMartin Pre-School molestation case. A spokeswoman for Reiner said the move in NO way reflects poorly on the two attorneys who failed to convict Buckey and his mother on 52 counts in the lengthy case.

A Los Angeles federal judge entered a plea of NOT guilty for a Honduran man accused of the 1985 murder of a U-S narcotics agent. Juan Ramon Matta Ballesteros has long been linked to the torture-slaying of Drug Enforcement Administration Agent Enrique Camarena, but refused to enter a plea. He said the court has NO jurisdiction over him.

It appears as if the Roman Catholic Church in Poland is ready to ease strained relations with Jewish leaders. The Cardinal in Krakow Monday announced the creation of a foundation to collect funds to finance moving Carmelite nuns from their controversial headquarters at Auschwitz, the former Nazi death camp.

The American Cancer Society has good news for American men. For the first time since the group started compiling statistics in 1953, the number of lung cancer deaths among U-S males is expected to decrease this year. But the society reports cancer will claim the lives of about 30 percent of Americans now living.

Ecologists, firefighters and foresters battling a four-day-old fire in a nature preserve 135 miles northeast of Rio de Janeiro say the blaze threatens to wipe out one of the world's rarest animals- Brazil's gilded lion monkeys. The fire already has burned one-fourth of the reserve which

is home to 250 gilded lion monkeys.

Virginia's attorney general moved Monday to prevent the federal government from forcing the enrolment of women at Virginia Military Institute because other state facilities provide comparable services for females. A Justice Department spokeswoman compared the state's argument to NOT renting an apartment to blacks because of the availability of others.

#90037u0282 02/06/1990 ~United Press International

(FEB. 6) UPI - Michael Jordan, Larry Bird and Patrick Ewing can breathe a sigh of relief - even as Charles Barkley grunts in pain.

Barkley, hobbled by a pulled thigh muscle, will put in his command appearance at the All-Star Game Sunday in Miami but only under threat of suspension from the league.

One day after the Philadelphia 76ers forward announced plans to skip the showcase in order to rest the left thigh, the NBA intervened Monday. At issue with the league was Barkley's plans to struggle through his team's games this week as the 76ers close in on the team record for consecutive victories.

''They told me that if I'm able to play for the Sixers in our three games this week, I can play in the All-Star Game,'' Barkley said after hobbling through his team's 12th straight triumph Monday night, 114-89 over the Utah Jazz. ''And that if I skip the All-Star Game, I'm suspended for the games next week.

''That Eastern Conference team doesn't have much talent. They need me.''

Barkley's counting on Jordan and the eastern contingent to let him off about as easy as Philadelphia did Monday night, when Barkley sat out the last 16 minutes as Hersey Hawkins led Philadelphia's attack with 20 points and Johnny Dawkins had 16 to keep the team tied with the New York Knicks for first place in the Atlantic Division.

Noticeably impeded, Barkley started and helped Philadelphia extend the NBA's longest winning streak of the season, two short of the club's record.

''I don't feel that well and I didn't play that well but we won so I'm happy,'' said Barkley, who had 16 points, 8 rebounds and 5 assists in 27 minutes. ''I don't care (how I feel) as long as we win.''

The Jazz, who got 29 points from Karl Malone, were blown out for the second time in two days. Detroit defeated Utah 115-83 on Sunday.

Philadelphia's 12-game winning streak is its longest since the 1984-85 season when the 76ers won 13 straight games. The 76ers cleared the bench for most of the final period as they won for the seventh straight time at home and improved their record at the Spectrum this season to 19-3.

''When you can have one of these games and the starters rest and the other guys contribute, it's a good experience,'' Hawkins said.

-- AROUND THE NBA --

In other games, New York handled Miami 116-107, Washington topped Golden State 135-129, Seattle edged Charlotte 101-100, and Cleveland defeated the Los Angeles Clippers 100-84.

KNICKS 116, HEAT 107

At New York, Ewing contributed 24 points, 11 rebounds and a career-high 9 blocked shots against Miami. Charles Oakley finished with 24 points and 11 rebounds also as the Knicks maintained a share of first place in the Atlantic Division.

BULLETS 135, WARRIORS 129

At Landover, Md., Bernard King scored 30 points and Jeff Malone delivered 11 of his 28 points during a 45-point third period that catapulted Washington past Golden State, which is winless at the Capital Centre since 1983. Ledell Eackles added 29 points and Darrell Walker produced his third triple-double of the season with 15 points, 10 assists and 15 rebounds. Washington rolled up its highest scoring total of the season, eclipsing a 127-point effort in an overtime loss against New York on Jan. 9.

SUPERSONICS 101, HORNETS 100

At Charlotte, N.C., Xavier McDaniel scored 22 points and Olden Polynice scored 3 points in the final minute to lead Seattle to its third consecutive victory. Nate McMillan added 14 points, Derrick McKee and Quentin Dailey 11 each, and Dana Barrows and Michael Cage 10 each for the SuperSonics. Cage also had 10 rebounds. The loss was Charlotte's eighth in a row, 14th in 15 games and third under interim coach Gene Littles.

CAVALIERS 100, CLIPPERS 84

At Richfield, Ohio, Mark Price scored 20 points, including nine in the decisive third quarter, and seven Cleveland players scored in double figures against Los Angeles.

#90037u0321 02/06/1990 ~United Press International

CAIRO, Egypt (FEB. 6) UPI - Egypt expressed hope the attack on a bus near Cairo that killed nine Israeli tourists and wounded 17 other people would not cripple the Middle East peace process, but apparently the ambush has forced Israel, Egypt and the United States to postpone a crucial meeting next week.

The Islamic Jihad, in a written statement sent Monday to an international news agency in Amman, Jordan, made the latest claim to the attack, which occurred Sunday on a highway 37 miles east of Cairo and near the Suez Canal.

''Our struggle with the Jews will continue until victory and with the help of God to smash all those who dream about a peaceful solution'' in the Middle East, said the statement by the Islamic Jihad, which said an offshoot of its organization carried out the assault.

In 1989, the Islamic Jihad issued three communiques in Amman claiming responsibility for attacks against Israeli targets in the Israeli-occupied territories, including a July attack on an Israeli bus.

Sunday, a previously unknown organization calling itself the Group for Oppressed Prisoners claimed it carried out the attack.

In Cairo, an Interior Ministry spokesman said police had arrested a Palestinian man from Rafah, the Israeli-Egyptian border town from where the Egyptian tour bus set off Sunday on its journey, in connection with the attack. The spokesman gave no further details.

Nine Israelis died in the attack, and 16 Israelis and one Egyptian were wounded, officials said.

Egyptian Foreign Minister Esmat Abdel-Meguid condemned the ''criminal act '' but advised Israel not to allow the incident to obstruct the peace process.

The incident, however, apparently led to the postponement of a meeting that had been tentatively scheduled for next week in Geneva between the foreign ministers of the United States, Egypt and Israel to promote an Israeli-Palestinian dialogue, Egyptian and Israeli sources said.

The Geneva meeting was proposed to be held after U.S. Secretary of State James Baker consults in Moscow with Soviet counterpart Eduard Shevardnadze.

''We are ready to take part in the (Geneva) meeting if the other parties are also ready to do so,'' state-run Egyptian media quoted Abdel-Meguid as saying.

Egyptian President Hosni Mubarak said he hoped the attack would not hinder the peace process, ''but should rather be an incentive for both sides to continue their endeavors to reach a comprehensive peace.''

In Jerusalem, reports indicated Israel would probably move to put aside the proposed Geneva meeting for now.

Israeli Deputy Foreign Minister Binyamin Netanyahu said that any discussion of the long-awaited meeting of U.S., Israeli and Egyptian foreign ministers would be premature. Netanyahu also denied that a meeting had been scheduled for next week in Geneva.

Israeli Prime Minister Yitzhak Shamir, speaking in Jerusalem, declined to say if the incident would hinder Mideast peace initiatives, saying the attack was intended to ''kill a large number of Jews.''

Sunday's bus attack was the latest in a string of assaults in Egypt against Israeli and U.S. targets since 1979, when Egypt and Israel signed the peace treaty. In one incident in 1985, an Egyptian soldier later described as deranged shot to death seven Israeli tourists on a Sinai beach.

#90037u0327 02/06/1990 ~United Press International

WASHINGTON (FEB. 6) UPI - Sen. Daniel Moynihan, D-N.Y., defended his plan to cut Social Security taxes, but Republicans attacked it as a ''twin toxic menace'' that would bankrupt the retirement fund by 1998.

Moynihan's bill to roll back payroll taxes by $55 billion over the next two years has created a firestorm of controversy on Capitol Hill about what, if anything, to do with the huge and growing Social Security trust fund surplus.

The Bush administration and Congress have used the surplus - nearly $65 billion this year and an estimated $80 billion in fiscal 1991 - to mask the size of the federal deficit.

Some lawmakers have called that practice ''thievery'' and ''embezzlement'' and have filed legislation to stop the practice.

Moynihan's bill would roll back the Jan. 1 payroll tax increase, from 6.06 percent to 6.2 percent, and then cut it to 5.1 percent on Jan. 1, 1991. The tax rate would go back up when the post-war baby boom generation starts retiring in about 20 years.

The measure would increase to 5.6 percent in 2012, 6.2 percent in 2015, 7.0 percent in 2020, 7.7 percent in 2025 and 8.1 percent in 2045.

President Bush opposes Moynihan's bill and, during his State of the Union address, told Congress ''the last thing we need to do is mess around with Social Security.''

Gwendolyn King, who is head of the Social Security agency, repeated the administration's opposition at the Senate hearing Monday.

''I believe major surgery (on Social Security) at this time would be ill advised,'' King said. ''I don't believe this is the time to go backwards.''

She said Moynihan's plan to revert to a pay-as-you-go Social Security system ''puts us back on that same roller coaster'' that led to the 1983 Social Security crisis.

Lawmakers that year voted for a rescue plan that imposed a series of payroll tax increases to build up reserves, providing plenty of money to pay benefits when baby boomers retire.

While several Finance Committee members, including Chairman Lloyd Bentsen, D-Texas, thanked Moynihan for forcing a debate on the issue, none of the lawmakers at the hearing backed his bill.

Some, such as Sen. John Heinz, R-Pa., were forceful in their opposition.

''The Moynihan proposal will almost certainly bankrupt the Social Security system in short order,'' Heinz said. ''We should reject the Moynihan plan because its sugar coating hides a twin toxic menace - poison that will bankrupt Social Security and burden the many to the benefit of the few.''

Heinz said he believes the Moynihan plan would create a rapidly growing shortfall in the retirement fund in 1992 and will completely bankrupt it so that ''it won't be able to make any payments in 1998.''

Moynihan disputed that claim, saying in a statement that his bill ''would put in the law a schedule of Social Security contribution rates that would finance benefits, and maintain a year's reserve, for the next 75 years.''

Senate Republican leader Robert Dole of Kansas, a Finance Committee member said lawmakers ''may have over-rescued the system'' in 1983 but said he opposes Moynihan's bill.

''I don't find a lot of support in my state for reducing payroll taxes,'' Dole said.

Bentsen said Moynihan had raised ''an issue that can no longer be ignored'' but said he was worried about how to replace the $55 billion Moynihan's bill would cost.

Comptroller General Charles Bowsher testified against continued use of the surplus to mask the deficit because ''it has encouraged the avoidance of the hard choices'' needed to get a balanced budget. He said he hoped Moynihan's bill would ''provide the catalyst to compel such action.''

Robert Ball, who led the Social Security Administration from 1962 to 1973, expressed reservations about a pay-as-you-go system.

But Robert Myers, an architect of Social Security in the 1930s, its chief actuary from 1957 to 1970 and a former deputy commissioner, spoke in favor of Moynihan's pay-as-you-go financing plan.

#90037u0329 02/06/1990 ~United Press International

(FEB. 6) UPI - President Bush Monday said it's too soon to set an effective stategy to combat global warming. Bush's comments disappointed many environmentalists. A Sierra Club official said- quote- ''The president just gave us a lot of hot air.'' Congressional Democrats joined the chorus of criticism, with Connecticut Democrat Joseph Lieberman saying Bush wasquote- ''resurrecting the wimp image'' on the environmental issue.

Police in Rio de Janeiro say most of the 47 people killed in weekend violence were victims of ''death squads'' reportedly hired by merchants fed up with deliquents NOT kept in line by police. Police statistics reveal the Brazilian city averages 400 murders a month... a figure that authorities contend has contributed to tourism slump. Although Rio hotels usually run 90 percent full during the last three weeks of February, this year they're only 65 percent full.

Saying- quote- ''He put his own needs above the well-being of his patients,'' a Los Angeles judge today sentenced Czechoslovak-trained obstetrician to 53 years to life. Dr. Milos Klvana's medical incompetence and negligence led to the deaths of eight infants and one fetus between 1982 and '86. Superior Court Judge Judith Chirlin also denounced state medical authorities, saying they bore responsibility for NOT revoking Klvana's license.

Despite tremendous internal strife, Soviet President Gorbachev opened Monday's Communist Party plenum in Moscow in stunning fashion. He initiated the two-day gathering by hinting that he'll allow political competition, a reversal of his former policies. He then challenged the party to restructure itself to co-operate with- quote- ''all the forces committed to perestroika.''

Iran-Contra special prosecutor Lawrence Walsh had his hands full Monday as he witnessed the legal jockeying in the trial of John Poindexter. It

included former President Reagan's use of executive privilege to try to strike down a federal judge's order that he turn over excerpts of his diaries. Walsh also threatened to try retired Air Force Major General Richard Secord on criminal charges despite a plea bargain reached in November. Walsh accused Secord of ''bad faith'' for filing an appeal after reaching a compromise with Walsh.

Opposition leaders in Nepal say the kingdom's government has arrested 117 people in the past two days, apparently to stifle opposition calls for pro-democracy demonstrations and strikes. Among those taken into custody were sympathizers of the banned Nepali Congress Party and several members of the seven-party leftist front that supports the Congress Party.

#90037u0345 02/06/1990 ~United Press International
(FEB. 6) UPI - TV HIGHLIGHTS:

WEDNESDAY, FEBRUARY 7

6:30 p.m.
PBS, ''Nightly Business Report.''

7 p.m.
(Note: In some regions, news is broadcast at 6 or 6:30 p.m. Check with local affiliates for details.)
ABC, ''ABC's World News Tonight with Peter Jennings.''
CBS, ''CBS Evening News with Dan Rather.''
NBC, ''NBC Nightly News with Tom Brokaw.''

8 p.m.
ABC, ''Growing Pains'' - Mike goes back to high school as a substitute teacher and experiences firsthand the same grief he put his teachers through when he was a student.
CBS, ''Grand Slam'' - Having started their own agency, Hardball and Gomez's first case is to find a dog - a dog everyone seems to be after.
NBC, ''Unsolved Mysteries.''
PBS, ''National Geographic Special: Bali, Masterpiece of the Gods'' - This program captures the culture of the tiny Indonesian island of Bali, whose vibrant religious beliefs find expression in music, dance, and art.

8:30 p.m.
ABC, ''Head of the Class.''

9:00 p.m.
ABC, ''Doogie Howser, M.D.'' - Vinnie, determined to become a filmmaker, butts heads with his father Carmine, who's equally determined

that his son will carry on the family shower head business. Then Carmine has a heart attack.
CBS, ''Jake and the Fatman'' - With the impending marriage of his sister to a boyhood friend who may have minor Mafia connections, Jake returns to Los Angeles, which may mark the end to the nuptial plans.
NBC, ''Night Court.''

9:30 p.m.
ABC, ''Anything But Love'' - Robin doesn't want to celebrate her ''unanniversary'' alone, so she invites Hannah and Marty to dinner; fireworks erupt when she spots her ex-husband dining at ''their'' special Italian restaurant with his latest flame.
NBC, ''Dear John.''

10 p.m.
ABC, ''China Beach'' - Peace breaks out in Vietnam when Dr. Dark and the Wizard use a pirate radio station to announce the end of the war, sending troops, medical staff and officers into a frenzy of goodbyes, stateside phone calls and major league celebrations.

(FEB. 6) UPI - ALMANAC:

Today is Monday, Feb. 12, the 43rd day of 1990 with 322 to follow.

This is Abraham Lincoln's birthday.

The moon is waning, moving toward its last quarter.

The morning stars are Mercury, Venus, Mars and Saturn.

The evening star is Jupiter.

Those born on this date are under the sign of Aquarius. They include philanthropist Peter Cooper in 1791; Abraham Lincoln, 16th president of the United States, and biologist Charles Darwin, both in 1809; actor Lorne Greene in 1915; and baseball player and sports commentator Joe Garagiola in 1926 (age 64).

On this date in history:

In 1877, Alexander Graham Bell's new invention, the telephone, was publicly demonstrated with a hookup between Boston and Salem, Mass.

In 1953, the Soviet Union broke off relations with Israel after terrorists bombed the Soviet legation in Tel Aviv.

In 1973, the first American prisoners of war in North Vietnam were released. A total of 116 POWs were flown from Hanoi to the Philippines.

In 1980, the International Olympic Committee rejected a U.S. proposal to postpone or cancel the 1980 Summer Games or move the site from Moscow as a protest against the Soviet invasion of Afghanistan.

A thought for the day: Abraham Lincoln said, ''When you have got an elephant by the hind leg, and he is trying to run away, it is best to let him run.''

(FEB. 6) UPI - ALMANAC:

Today is Tuesday, Feb. 13, the 44th day of 1990 with 321 to follow.

The moon is waning, moving toward its last quarter.

The morning stars are Mercury, Venus, Mars and Saturn.

The evening star is Jupiter.

Those born on this date are under the sign of Aquarius. They include Bess Truman, wife of President Harry S. Truman, in 1885; artist Grant Wood in

1892; entertainer ''Tennessee'' Ernie Ford in 1919 (age 71); actors George Segal in 1934 (age 56) and Oliver Reed in 1938 (age 52); and musician Peter Tork of the Monkees in 1944 (age 46).

On this date in history:

In 1635, the oldest public institution in America - the Boston Latin School - was founded.

In 1945, Soviet forces captured Budapest. The 49-day battle killed more than 50,000 German troops.

In 1974, the Soviet Union expelled dissident writer Alexander Solzhenitsyn.

In 1984, Konstantin Chernenko succeeded the late Yuri Andropov as Soviet leader; Chernenko died 13 months later and was succeeded by Mikhail Gorbachev.

A thought for the day: Martin Luther King Sr. advised, ''Don't hate, it's too big a burden to bear.''

(FEB. 6) UPI - ALMANAC:

Today is Wednesday, Feb. 14, the 45th day of 1990 with 320 to follow.

This is St. Valentine's Day.

The moon is waning, moving toward its last quarter.

The morning stars are Mercury, Venus, Mars and Saturn.

The evening star is Jupiter.

Those born on this date are under the sign of Aquarius. They include Polish astronomer Nicholas Copernicus in 1473, suffrage leader Anna Howard Shaw in 1847, comedian Jack Benny in 1894, sports commentator Mel Allen in 1913 (age 77), Teamsters union president Jimmy Hoffa - also in 1913, broadcaster Hugh Downs in 1921 (age 69), and actress-singer Florence Henderson in 1934 (age 56).

On this date in history:

In 1886, the West Coast citrus industry was born. The first trainload of

oranges left Los Angeles for eastern markets.

In 1903, President Theodore Roosevelt signed a law creating a Department of Commerce and Labor.

In 1933, an eight-day bank holiday was declared in Michigan in a Depression-era move to avert a financial panic. $50 million was rushed to Detroit to bolster bank assets.

In 1979, Iranian guerrillas stormed the U.S. Embassy in Tehran, trapping Ambassador William Sullivan and 100 staff members. Forces of the Ayatollah Khomeini later freed them but the incident foreshadowed the embassy takeover in November.

A thought for the day: Swiss theologian Karl Barth said, ''Laughter is the closest thing to the grace of God.''

#90037u0363 02/06/1990 ~United Press International
WASHINGTON (FEB. 6) UPI - Congress should seize the opportunity in rewriting farm policy laws this year to emphasize environmental and food safety, a coalition said Tuesday, urging special programs to help farmers adopt new techniques.

The coalition of 11 major consumer and environmental groups proposed

creation of an Environmental Stewardship Program to bear some of the cost of preventing ground water pollution, along with setting goals for a ''substantial reduction'' of pollution from agricultural sources.

Farmers would be required to keep records of pesticide and fertilizer use. In areas where farm chemicals pose a threat to water quality, farmers would have to develop a plan of ''cost-effective measures to achieve a substantial reduction'' in chemical use without ''undue'' cost to the farmer.

''Farm policy is environmental policy. Farm policy is consumer policy,'' the coalition said in presenting its agenda. ''And this particular farm bill presents an unprecedented opportunity to enact badly needed and long overdue reforms of agricultural policy - reforms that will mutually benefit the environment, consumers and farmers.''

The coalition's proposals included changes in farm program rules to eliminate biases against use of resource-conserving farming methods, such as crop rotations, establishment of standards for organically produced food, and revision in food grading standards that now encourage use of chemicals to avoid surface blemishes.

The 1985 farm policy law, which expires this year, represented the first time farm program and environmental goals were linked. It created a set of programs that paid farmers to take highly erodible land out of crop production and made the loss of farm program benefits the price for failing to practice soil conservation.

Under the coalition's plan, those programs would be strengthened in the new farm bill.

In addition, the Environmental Stewardship Program would be used to buy easements to prevent hazardous runoff from farm operations, pay farmers to experiment with ways to prevent pollution in top-priority areas, and share the cost of building manure management facilities.

Coalition members said environmental and consumer concerns ''should be addressed in ways that make economic sense to farmers.'' They also said farmers already are making efforts to protect the environment and the government should help.

#90037u0381 02/06/1990 ~United Press International

WASHINGTON (FEB. 6) UPI - A study of fatal truck accidents by the National Transportation Safety Board showed one-third of the drivers killed had

alcohol or drugs in their bloodstream, a published report said Tuesday.

The findings will be used by the board later this year to support recommendations for increased drug testing and a lower maximum limit for alcohol levels in the blood of commercial drivers, The Washington Post said.

The NTSB study - the first in-depth examination of the role of drugs and alcohol in fatal truck accidents - concentrated on accidents in eight sample states between Oct. 1, 1987, and Sept. 30, 1988.

The survey found 33 percent of the drivers had been using drugs or alcohol including marijuana, cocaine and amphetamines. But the board emphasized its findings do not mean one-third of all truck drivers on the road are impaired.

''Fatigue was the number one cause of fatal accidents,'' the NTSB report said, adding that drug and alcohol use were a close second. It said fatigue and substance abuse were frequently present in the same accident.

The NTSB study covered only accidents in which the driver was killed, and involved only trucks that weighed 10,000 pounds or more.

In 1988 trucks were involved in 28 percent of all fatal accidents and 18.8 percent of all accidents, according to statistics compiled by the National Safety Council.

A federally mandated drug testing program scheduled to begin last December has been stalled by court challenges from associations representing truck owners and operators.

Current regulations limit a trucker's blood-alcohol level to 0.04 percent and a driver can be ordered off the road for 24 hours if any level of alcohol is found. The board plans to recommend that the level be dropped to a more stringent 0.01 percent, the Post said.

The states surveyed by the NTSB were California, Colorado, Georgia, Maryland, New Jersey, North Carolina, Tennessee and Wisconsin, which accounted for 25 percent of all fatal truck wrecks during the one-year study period.

#90037u0411 02/06/1990 ~United Press International

(FEB. 6) UPI - A cold front stretching along the Pacific Coast brought chilly temperatures, rain and snow to much of the West Tuesday while thunderstorms rumbled into the nation's midsection and light showers sprinkled parts of Texas.

The front moving east from the ocean brought heavy swells of up to 30 feet to the Oregon and Washington shores and the National Weather Service warned small boats to take precautions against stormy conditions.

The weather service issued snow advisories for the Coast Range, the Cascades, and the Siskiyous, with up to a half-foot of new snow expected.

In California, forecasters warned of light rain and possible snow from the state's northern border as far south as the San Francisco Bay area.

A band of thunderstorms moved through the Midwest early Tuesday, moving out of Missouri and headed for Illinois and southern Iowa, where temperatures were in the 30s and 40s.

A low-pressure system brought clouds and light rain to parts of the Southwest, with isolated showers reported from Mt. Vernon, Texas, to Broken Bow, Okla. Forecasters said increasing cloudiness would bring scattered showers and thunderstorms to Oklahoma and Louisiana Tuesday.

High pressure kept skies clear over most of the South but temperatures were chilly. The NWS said it was 35 degrees Knoxville, Tenn., 40 in Charleston, S.C., 43 in Jacksonville, Fla., 45 in Atlanta and 70 in Miami.

A weak cold front moved into New England, bringing clear but frigid weather across the region. Temperatures dropped into the single digits in Maine and New Hampshire.

Clear skies stretched across most of Pennsylvania, New Jersey, Delaware, Maryland and West Virginia, where temperatures ranged in the 20s and 30s.

#90037u0467 02/06/1990 ~United Press International
(FEB. 6) UPI - A House committee says President Reagan's tax reforms helped the rich but NOT the poor in the 1980's. The report shows that the effective tax rate for the poorest 20 percent of American families was dramatically higher than real income... while just the opposite was true for the richest 20 percent.

Prosecutors in the trial of Exxon Valdez captain Joseph Hazelwood say Hazelwood's drunken actions led to the worst oil spill in U-S history. The Exxon Valdez hit a reef in Alaska's Prince William Sound... spilling nearly 11-Million gallons in the worst oil spill in American history.

The American Cancer Society has some good news for male smokers. It says in a report that the number of lung cancer deaths among American men is expected to drop during 1990. The A-C-S says about 92-thousand American men will die from lung cancer in 1990. That's down from 93-thousand in

1989.

Two groups now are claiming responsibility for an attack on a bus near Cairo that killed nine Israeli tourists and wounded 17 other people. A written statement from Islamic Jihad said the group hopes... quoting here... ''to smash all those who dream about a peaceful solution'' in the Middle East.

President-elect Rafael Calderon of Costa Rica is pledging to fight drug trafficking. The 41-year-old president-elect gave NO details of what measures he's planning to combat drug activities in Costa Rica. But his vow yesterday drew the largest cheer from his audience of several hundred supporters.

-30- 1676

#90037u0576 02/06/1990 ~United Press International

(FEB. 6) UPI - A crucial meeting in Moscow today... President Bush heads to the west coast... Jesse Jackson heads for Africa... and the postal service will get a report card. Those stories and more, next from U-P-I.

Reports from the Soviet Union indicate a purge today of Communist Party hard-liners at the Central Committee meeting.

Firings generally occur on the final day of a Central Committee meeting... but Soviet President Gorbachev, who's also leader of the Communist Party... has asked for another plenum in three weeks. Gorbachev wants to discuss his draft program to make the party more democratic.

NO dismissals today would indicate that those Politburo members rumored for removal would be left dangling until the next meeting. Gorbachev also could defer firings to a Party Congress that he wants held in June and July.

Gorbachev is warning that the Communist Party must prepare to contend with other parties for power under a proposed multi-party system.

Rumors of the impending dismissals swirled yesterday... one day after speakers at a massive pro-democracy demonstration called for a suspension of the Central Committee's activity.

President Bush will be playing to an appreciative audience when he makes his pitch for continued U-S military strength during a three-day swing out West.

Bush will makes stops at defense-related facilities in California and Nebraska... warning that despite the dissipation of the Cold War, America must NOT lower its guard.

This afternoon Bush will attend war games at Fort Irwin, California, where he'll watch troops using pin-point laser sights in place of live ammunition. The display is intended to dramatize the leaner, meaner image the Army has adopted for military threats of the 1990's.

Bush faces a tough fight from Capitol Hill Democrats on his 307-BILLION-dollar defense budget for fiscal 1991. Democrats charge that Bush is ignoring new geo-political realities taking shape in eastern Europe... andthe collapse of communism and moves toward pluralism in the Soviet Union.

Defense Secretary Cheney has announced plans to cut overall troop strength by about 54-thousand this year and 36-thousand next year. Two divisions would be de-activated for savings of more than one-BILLION dollars in fiscal 1991.

-30- 2479

#90037u0583 02/06/1990 ~United Press International

(FEB. 6) UPI - Former Democratic presidential hopeful and civil rights leader Jesse Jackson leaves today for Zambia en route to South Africa.

Jackson reportedly hopes to meet black activists and South African government leaders to discuss the implications of a sweeping reform package announced on Friday by President de Klerk.

De Klerk hopes to end South Africa's protracted racial conflict by releasing jailed black nationalist leader Nelson Mandela and lifting a 30-year ban on the African National Congress.

Yesterday in London, Jackson met with British Prime Minister Thatcher. She rejected Jackson's appeal for Britain to isolate South Africa with sanctions to bring a swift end to the nation's policies of racial separation.

Jackson said in a sermon on Sunday that de Klerk's reform plan inspired both hope and caution because South Africa remains a long way from becoming a multi-racial democracy. Jackson said ''If Mandela is freed tomorrow, he still could NOT vote or hold office.''

Former President Reagan is taking new steps in his attempt to avoid testifying in the ongoing Iran-Contra trials.

U-S District Judge Harold Greene yesterday ordered Reagan to surrender part of his diaries and to testify on videotape for the February 20th trial of Reagan's one-time national security adviser, John Poindexter.

Reagan is claiming executive privilege as a way to withhold the writings. But one legal expert predicts Reagan might have difficulty winning his argument.

Constitutional law expert Laurence Tribe says NO court has ever upheld an absolute privilege for a former president to refuse to testify for any reason under any circumstances.

Greene has already reviewed the diaries and says some 30 entries are relevant to Poindexter's defense.

Poindexter faces five felony charges stemming from the arms-for-hostages scandal.

-30- 2049

#90037u0592 02/06/1990 ~United Press International

(FEB. 6) UPI - The American Cancer Society says it expects to see a drop in the number of lung cancer deaths among U-S men during 1990.

The group says it would be the first decline since it began making such estimates in 1953. The cancer society predicts that about 92-thousand American men will die from lung cancer this year... down from 93-thousand in 1989.

Society spokeswoman Joann Schellenbach says the decline in lung cancer cases and deaths is a result of young men quitting cigarettes some time back. The group says cigarette consumption fell from 563-BILLION cigarettes in 1988 to 542-BILLION in 1989.

But Schellenbach says the mortatlity rate for men over the age of 65 continues to increase. And the Cancer Society says the incidence of lung cancer continues to climb among women.

It adds that despite the improvement among younger men, lung cancer remains the number one cancer killer in the United States. The Cancer Society predicts that lung cancer will account for 142-thousand of the estimated 510-thousand cancer deaths in 1990.

The price of mailing a letter may go up five cents next February.

Postmaster General Anthony Frank was in Los Angeles yesterday where he announced the proposed rate hike which... if approved... would raise the price of mailing a first-class letter to 30 cents.

Frank also said the Postal Service has awarded a 23-point-four-Million-dollar contract to the Price Waterhouse accounting firm to measure the delivery time of first-class mail from 86 major cities.

But Frank denies that the boost in delivery prices is related to the cost of the study. He cites inflation and increased labor costs as reasons the Postal Service is seeking the increase.

The three-year Price Waterhouse study will test more than two-Million pieces of mail a year. It'll be the first time that the Postal Service has used an outside agency to measure delivery time.

Frank says the study is necessary before service can be improved.

-30- 2168

#90037u0628 02/06/1990 ~United Press International

(FEB. 6) UPI - Louisiana Coach Dale Brown put his players in a classroom setting Monday night and they responded with success.

Learning from a chalkboard talk, Brown's 12th-ranked Tigers scored an 86-68 triumph over Mississippi State, breaking a five-game losing streak that spanned three years against the Bulldogs.

''We had written that on the blackboard, 'The streak is over,''' Brown said after LSU improved to 16-4 and 7-3 in the Southeastern Conference.

All-American Chris Jackson said he realized in the second half when LSU went on a 12-2 tear that the streak would end.

''I was excited. I was happy we were going to win,'' Jackson said. ''I feel great. Now instead of listening to them talk, I can talk.''

Mississippi State Coach Richard Williams stressed the Tigers' motivation.

''It was a crusade for LSU, and I have to give them credit for the way they played,'' he said.

With LSU leading 37-34 at the half, Jackson and Maurice Williamson keyed a 12-2 spurt.

The Tigers stretched their lead to 58-42 with 12:30 remaining on Vernel Singleton's 6-footer.

The Bulldogs, who fell to 11-8, 4-7 in the SEC, weren't finished. Williams went to a motion defense that resulted in 11 straight points and cut the LSU lead to 62-57 with eight minutes remaining.

Brown countered with a 2-3 matchup zone that shut down Mississippi State's offense, and the Tigers went on a 12-point run of their own to seal the triumph.

''When you play a team like Mississippi State that controls the tempo as well as they do, 18 points is a big win,'' Brown said.

Williamson added 20 points for LSU and Jackson had 19. Mississippi State was led by Cameron Burns with 26 points and Greg Carter with 13.

-- AROUND THE NCAA --

In other games involving ranked teams, No. 6 Syracuse downed Seton Hall 74-65, No. 7 Nevada-Las Vegas ripped San Jose State 105-69 and No. 16 La Salle defeated St. Peter's 72-59.

At Syracuse, Stephen Thompson scored 16 of his 26 points in the second half, helping the Orangemen improve to 17-3 overall and 7-3 in the Big East. Derrick Coleman, who added 19 points and 9 rebounds, sealed the victory by stealing a pass and breaking for a slam dunk for a 73-65 lead with 20 seconds left.

At Las Vegas, Larry Johnson scored 18 points and grabbed 16 rebounds to boost the Runnin' Rebels to 10-1 in the Big West Conference and 17-4 overall as they handed the Spartans their sixth loss in a row.

At Philadelphia, Lionel Simmons scored 26 points and pulled down 10 rebounds to help LaSalle to a Metro Atlantic Athletic Conference victory. Doug Overton added 14 points, while Tony Walker led St. Peter's with 24 points.

In other games, it was: Massachusetts 85, Vermont 70; Penn State 64, Lehigh 60; Temple 81, St. Bonaventure 64; North Carolina 87, Miami 74; Virginia Commonwealth 70, Memphis St. 69 in overtime; and Virginia Military 86, William & Mary 66.

(FEB. 6) UPI - Prices on the Tokyo Stock Exchange closed slightly higher Tuesday in slow trading encouraged by Monday's rally on Wall Street.

The Nikkei Average of 225 selected issues, which eased 18.74 points Monday gained 35.42 points to 37,666.83.

The broader-based Tokyo Stock Exchange index of all major stocks moved up 3.02 points to 2,766.13.

An estimated 530 million shares changed hands, compared with 406 million shares Monday.

Advances outpaced declines 537 to 378, while 214 issues remained unchanged.

Elsewhere in Asia, stocks closed higher in fairly active trading on the Hong Kong Stock Exchange helped by excess cash from the Singapore and Malaysian markets.

The Hang Seng Index gained 36.22 points to 2,792.89. The property sector rose 76.88 points, industrials were up 50.89, financials gained 17.91 and utilities closed up 5.53 points.

Volume amounted to 754 million shares, above the 623 million shares traded Monday.

Stocks closed higher in fairly active trading on the Singapore Stock Exchange as some late profit taking trimmed the advance.

The Straits Times Industrial Index gained 4.85 points to 1581.08. The narrower All Singapore Index rose 0.49 point to 443.34.

Volume was about 203 million shares.

In Australia, stocks closed slightly higher in moderate trading on the Sydney Sharemarket led by a rally in the top gold mining issues.

The demand for gold stocks pushed the overall market higher as the All Ordinaries Index gained 2.3 points to 1668.9 in a volume of around 84.4 million shares.

#90037u0736 02/06/1990 ~United Press International

PARIS (FEB. 6) UPI - The United States has informed France that a presidential pardon for convicted pro-Iranian terrorist Anis Naccache could help win the release of U.S. hostages in Lebanon, the daily newspaper Le Figaro reported Tuesday.

The newspaper said President Bush told President Francois Mitterrand in a recent telephone conversation that the Naccache affair was raised during U.S.-Iranian negotiations over the release of nine American hostages from Lebanon.

Naccache, who is Lebanese, was convicted and sentenced to life in prison on March 10, 1982, for a 1980 assassination attempt on former Iranian Prime Minister Chapour Bakhtiar in France.

Bakhtiar, the last prime minister under the shah of Iran before the Iranian revolution, survived the attack but a police officer and a woman bystander were killed.

The Iranian negotiators described the release of Naccache as one of the conditions for a favorable outcome to the talks, the newspaper said.

Citing unnamed sources close to the Foreign Ministry, the article said Bush asked Mitterrand if he was planning to settle the Naccache affair - a major source of tension between Paris and Tehran.

Iranian officials claim France promised to release Naccache during talks that led to the release of French hostages from Lebanon in 1988.

Mitterrand reportedly told Bush there were no major obstacles that would prevent him from issuing such a pardon and that the possible liberation of American hostages could provide a reason to accelerate the process.

U.S. negotiators immediately informed Tehran of Mitterrand's reply, sparking rumors last week in Beirut the captors had been informed and that the U.S. hostages might be released soon, the newspaper reported.

Le Figaro said Naccache, 39, will be released in 1991 or 1992.

The pardon will take the form of a reduction of Naccache's sentence from life to 20 years in prison, which would allow the convicted terrorist to

ask for parole, the newspaper said. Under the law, he would be eligible for parole after serving half the 20-year sentence, or 10 years.

Since Naccache has already served nearly 10 years in prison, he could theoretically be released on parole in late 1991 or 1992, the article said.

Naccache ended a four-month hunger strike last month at the request of the French and Iranian governments. The hunger strike, aimed at winning his release from prison, sparked fears of a renewal of pro-Iranian terrorism in France if Naccache died.

#90037u0747 02/06/1990 ~United Press International

ATHENS, GREECE (FEB. 6) UPI - An Iranian exile group said Tuesday that Iranian authorities executed political prisoners even as a U.N. delegation visited the country to investigate charges of human rights violations.

The Baghdad-based Mojahedin Khalq organization said: ''The mullahs' regime ... executed some more political prisoners in various cities during and after the United Nations investigative mission's visit to Iran.''

A delegation led by Reynaldo Galindo Pohl, representing the U.N. Human Rights Commission, visited Iran between Jan. 21-30 at the invitation of President Akbar Hashemi-Rafsanjani, to investigate charges of human rights violations in Iranian prisons.

The Iranian government does not officially respond to statements from the Mojahedin, its most unrelenting critic, and there was no immediate confirmation from independent sources of the exile group's charges.

In a statement telexed to Athens, the Mojahedin said those executed ''had been tortured over a long period.''

The exile group identified the victims as Ali Reza Tazehkandt, Ahad Aghai, Reza Rastegar, Rahim Qadaksaz, Majid Parsiana, Razavi (no first name given), Sayyed Ali and Hassan Saffaran.

''The regime's guards arrested Sayyed Ali, a worker who supported the Mojahedin, on Jan. 19 in Tehran and executed him the same night,'' the statement said.

Saffaran, 48, a father of four, ''was also executed as a Mojahedin supporter. He had been arrested in early 1989 and was brutally tortured for months,'' the exile gorup said.

Earlier, the Mojahedin said Iran's ruling clerics carried out a massive operation of deception to mislead the U.N. delegation.

''Several days before the United Nations investigative mission was due to arrive in Tehran, the regime's leaders ordered the mass transfer of thousands of political prisoners to different locations,'' the group said in a statement Monday.

On Jan. 12, nine days before the U.N. team arrived in Tehran, ''about 11,000 of Tehran's political prisoners were moved.''

Quoting information it said was received from inside Iran, the statement said that ''guards took some of (the 11,000 prisoners) to various prisons in Karaj,'' about 25 miles west of Tehran.

Some 6,000 to 7,000 additional prisoners ''were kept in 26 train cars in unknown locations throughout Tehran province,'' and 200 to 300 prisoners ''were crammed into each car.''

The statement said the operation was planned to deceive Pohl's delegation and keep it from questioning prisoners about human rights violations in Iranian jails.

Iranian authorities ''had 106 guards dressed in prison garb pose as inmates at Evin Prison's library'' in Tehran during Pohl's visit. Another 700 guards posing as inmates were shown to the delegation eating a meal in a prison hall, the statement said.

Prison authorities also ''set up Ping-Pong tables and similar equipment (on prison premises) in a bid to whitewash the torture and intolerable pressures political prisoners are really subjected to,'' the Mojahedin said.

Other such scenarios were organized throughout the U.N. team's visit to the prisons, the exile group said.

Pohl and his delegation visited Iran after charges at the United Nations that Iran consistently violated human rights in its prisons, where torture and executions were reportedly common.

Last year Iran's official media reported that more than 1,500 people were hanged or stoned to death in Iranian prisons on charges of trafficking in narcotic drugs, murder, armed robbery, rape and other sex crimes.

The Mojahedin said several of those hanged as drug traffickers were in fact political prisoners.

#90037u0752 02/06/1990 ~United Press International

ANNAPOLIS, MD (FEB. 6) UPI - Political candidates in Maryland would be forced to submit to drug tests and report the results along with their financial disclosures every year under bipartisan legislation proposed by two state senators.

Sens. Howard Denis, a Republican, and Frank Shore, a Democrat, filed legislation Monday night intended to keep every elected position in the state drug-free.

''If drugs are the No. 1 problem for society, and I believe it is, and if elected officials have a credibility problem, and I believe they do, it behooves us to take a leadership rule and lead by example,'' said Denis.

Specifically, the two senators said it is unfair for the state to demand drug testing for thousands of state employees while political officeholders are held to a lesser standard.

''If drug testing is (found to be) unconstitutional, if drug testing is inaccurate, it shouldn't apply to anyone,'' said Denis.

The legislation would require candidates seeking office, or in office, to file the results of a drug test from an approved clinic along with the financial disclosure form filed each year.

There would be no penalties for any candidate filing a form with a positive test, but the result would be made public.

''I think the penalty might be the public exposure,'' Denis said, adding that the lack of a clearly defined punishment may help the bill's chances.

Shore said he explained the legislation to Gov. William Schaefer and received a favorable - if tentative - response.

''He said he wouldn't have a problem with the test,'' said Shore.

Sen. Julian Lapides, a Baltimore Democrat who co-chairs a legislative ethics panel, said he would back the bill.

''I have no problem making us part of the process,'' Lapides said. ''If it comes to the floor, it will get my vote.''

However, Denis acknowledged that the legislation faces a tough battle - especially from those General Assembly members who consider all drug testing an invasion of privacy.

''It's a question of what is sauce for the goose is sauce for the gander '' Denis said.

Denis and Shore both represent Montgomery County, an upscale suburb of Washington, D.C., whose mayor is in a drug treatment facility in Florida.

#90037u0770 02/06/1990 ~United Press International

MANILA, PHILIPPINES (FEB. 6) UPI - Philippine Finance Secretary Jesus Estanislao said Tuesday he had protested the United States's abstention on a recent vote on a $390 million loan Manila was seeking from the World Bank.

"Everybody voted in favor of the loan, but the United States for reasons known only to itself abstained from making any vote," Estanislao told reporters.

He said he had sent a letter to U.S. Ambassador Nicholas Platt protesting the abstention. "I told Ambassador Platt this is a purely bad signal at a very bad time," Estanislao said. "I don't like those signals and if they're trying to deliver a message, certainly that is not the appropriate way of delivering a message."

He said this was the second time the United States abstained on a vote on a Philippine loan. He said similar action was taken recently on an unspecified "financial sector loan."

The $390 million loan was finally approved by the World Bank for three projects designed to boost power generation and alleviate energy shortages. One of the complaints aired by mutineers in the bloody Dec. 1-9 uprising against President Corazon Aquino's government was breakdown in the delivery of services.

Estanislao said he did not know if the U.S. action was related to exploratory talks in March or April on the 1947 pact governing six American bases in the Philippines, including the sprawling Clark Air Base and Subic Bay Naval Station. The treaty expires in 1991.

Aquino earlier protested a $96 million cut in military and economic aid to the Philippines pledged this year in return for continued use of the bases under a 1988 executive agreement.

Under the pact, Washington pledged to secure its best efforts to secure Congress approval of $962 million in aid to Manila in the last two years of the treaty.

Aquino also has protested a $40 million reduction in the $200 million aid Washington committed last year under a multilateral aid plan to the Philippines, which is saddled with a $28 billion foreign debt.

Elliot Richardson, U.S. President George Bush's representative to the aid plan, said the Philippines must demonstrate its capacity to use loans effectively if it wants to restore the full amount requested.

#90037u0803 02/06/1990 ~United Press International

(FEB. 6) UPI - President Bush has welcomed a ''new era'' of peace in Europe, but he still wants the United States to increase its military spending. Bush is traveling to Fort Irwin, California, today to begin a three-day tour promoting his military spending policies. Bush is seeking more than 300-BILLION dollars for the military in his fiscal 1991 budget. He says caution must be exercised, despite the changes in Europe.

U-S District Judge Harold Greene is telling former President Reagan to hand over parts of his personal diaries for use in the Iran-Contra trial of former national security adviser John Poindexter. Greene says about 30 entries in the diaries are relevant to Poindexter's defense. The judge also ordered Reagan to supply a videotaped testimony for use in the February 20th trial. Reagan is claiming executive privilege as a means of withholding the writings.

The rumored purge of hard-liners from the Soviet Union's Communist Party may or may NOT come today. Today is the final day of the party's crucial plenum and firings usually take place on the last day of the meetings. But Soviet President Gorbachev's request for another plenum within one month to discuss further democratic reforms has led some observers to believe NO firings will take place before then.

U-S Secretary of State Baker will be in the Soviet Union tomorrow to meet with leaders of the communist superpower. Baker is headed to Moscow via Prague, Czechoslovakia, where he'll meet that nation's president. The secretary of state delayed his trip to Moscow by two days so his talks with Soviet leaders would take into account the changes brought about by the plenum.

#90037u0849 02/06/1990 ~United Press International

CHICAGO (FEB. 6) UPI - Smokers aged 8 to 19 appear to face an increased

risk of coronary heart disease similar to that found among adults who smoke, a new study shows.

The study, published Monday in the journal Pediatrics, cited research on the effect of smoking on the cholesterol profiles of both children and adults. The comparison found similar shifts in cholesterol blood levels in children and adults who smoke cigarettes.

''Given the changes in the (cholesterol) variables, it is reasonable to assume that increased risk does exist, even among smokers in the 8- to 19-year-old age group, for the onset of coronary artery disease later in life,'' the study found.

''Moreover, because the degree of change in ... cholesterol levels is significantly greater in younger smokers than in adults, the risk may be actually greater in this population,'' the study added.

Past studies in adults have show smoking significantly boosts cholesterol levels, which in turn raises the risk of heart disease.

#90037u0918 02/06/1990 ~United Press International
LONDON (FEB. 6) UPI - Two U.S. Air Force planes crashed within hours of each other in British territory, leaving one crew member dead, two others presumed dead and prompting a one-day suspension of jet fighter operations Tuesday.

''The reason is primarily to give us a chance to catch our breath and review our procedures,'' said Air Force spokesman Capt. Raymond Martell said after 3rd Air Force commander Maj. Gen Marcus Anderson suspended all U.S. tactical fighter operations for a day.

''We have nothing to indicate that there is anything wrong with our safety measures but the general believes this is a prudent measure after two unfortunate crashes in two succesive days,'' Martell said.

The suspension following one crash in central England and one in Wales did not apply to flights by tankers and transport aircraft.

Martell said the first crash occurred at 5:50 p.m. Monday when an F-111E bomber stationed at a Royal Air Force base in Upper Heyford crashed into a wasteland of inlets and sandbars near the town of Boston, 140 miles north of London.

''One body has been recovered and the missing crewman is now presumed dead '' Martell said, adding personnel were still combing the wreckage. ''We have no idea at this time what caused the crash during a routine training mission.''

He said the crew members were pilot Capt. Clifford W. Massengill, 30, of Edenton, N.C., and weapons systems officer 1st Lt. Thomas G. Dorsett, 26, from Pensacola, Fla. He did not say which crewman's body had been found.

Martell said the second plane, an A-10 Thunderbolt II based at RAF Alconbury in Cambridgeshire, crashed at 9:20 a.m. Tuesday in Wales near the town of Capel-y-ffin, some 150 miles west of London.

He reported the plane - designed for use in troop support - was on a tactical training mission when it slammed into the Black Mountains, a desolate area often used for training British special force units.

Martell said a joint British-U.S. search party found a body in the rugged region believed to be that of the pilot.

''There were indications that the pilot was the body found ... but we don't have positive identification yet. Sometimes that's difficult after a crash,'' Martell said. ''We don't have any indications of any deaths on the ground.''

The U.S. Air Force mainly operates out of eight bases in Britain, and its last crash occurred April 17, 1989, when an A-10 and its pilot were lost. The Pentagon announced last week it plans to close three of its facilities in Britain.

#90037u0921 02/06/1990 ~United Press International

PHOENIX, AZ (FEB. 6) UPI - Joe Bugel, assistant head coach for the Washington Redskins, is to be named head coach of the Phoenix Cardinals at a news conference Tuesday afternoon.

Club officials declined to confirm Bugel's hiring, but General Manager Larry Wilson told The Arizona Republic, ''You wouldn't be embarrassed'' if the newspaper reported that Bugel was Wilson's selection.

Bugel, who has never been a head coach, also refused to comment on the report.

Bugel would replace interim Coach Hank Kuhlmann who took over Nov. 20 after Gene Stallings was fired when he said he would not seek a contract extension after the 1989 season. The Cardinals were 0-5 under Kuhlmann.

Bugel, 49, has been with the Redskins for nine years and previously was with the Detroit Lions in 1975-76 and the Houston Oilers in 1977-80. He also served as an assistant coach at Western Kentucky, Navy, Iowa State and Ohio State.

Bugel was a finalist in 1988 for the head coaching job with the Los Angeles Raiders, but withdrew his name.

The Republic said Bugel was offered the job after San Francisco 49er offensive coordinator Mike Holmgren decided to stay with the Super Bowl winners. The newspaper quoted a source as saying the Cardinals made an informal offer to Holmgren, but were turned down.

Other candidates interviewed by Wilson for the job were New York Giants defensive coordinator Bill Belichick, Fresno State Coach Jim Sweeney, Kuhlmann, Los Angeles Rams defensive coordinator Fritz Shurmur and Cincinnati Bengal offensive coordinator Bruce Coslet.

The Cardinals, in their second season in Arizona, finished 5-11 in 1989

after being hit hard by injuries. The mid-season departure of Stallings, a favorite amonayers and fans, also served as a disruption.

#90037u0932 02/06/1990 ~United Press International

HOUSTON (FEB. 6) UPI - A jury began deliberations Tuesday in a $355 million lawsuit filed by 222 homeowners who claim Monsanto Co. dumped dangerous chemicals at a waste site near their homes with no concern for their health or safety.

The suit seeks to force Monsanto, chief user of the Brio Site, to pay $1.6 million to each homeowner. That figure equals Monsanto's daily profit margin, attorneys for the homeowners claimed.

Testimony in the trial began four months ago, and the case had to be moved to a larger courtroom Monday to accommodate the large number of people involved. Some participants still were forced to remain outside the courtroom during final arguments.

Current and former residents of the Southbend subdivision in southeast Houston claim they have suffered various ills, from upset stomachs to headaches, as a result of living near the dump site. Some testified they fear they will develop cancer in the future because they live so close to the site.

Attorneys for Monsanto argued the suit is a conspiracy against the chemical company by builders and developers of the subdivision. The developers and builders earlier settled a suit filed against them by the homeowners, then joined forces with them against Monsanto.

The company also claimed it is only one of many companies that have used the dump site for years, and that the toxic waste site existed before the subdivision was developed.

Monsanto attorneys noted Monday that the homeowners already have been paid by the builders and developers and will split any damages with them. "The aroma that pervades the courtroom from a deal like this is so bad that all the perfume in Paris couldn't cover it up," Monsanto attorney Robert Hall told jurors.

Attorneys for the homeowners urged jurors to send a message to corporations by finding Monsanto liable for hundreds of millions of dollars in damages.

#90037u0934 02/06/1990 ~United Press International

(FEB. 6) UPI - Day two of meetings by top Soviet Communist Party leaders brings reports of possible impending dismissals of party hardliners who oppose President Gorbachev's policies. The Soviet Communist Party may also give up its monopoly on power.

The Bush administration is taking a wait-and-see attitude toward what may be the emergence of a multi-party political system in the Soviet Union. President Bush has done NOTHING recently to hide his support for Gorbachev's policies.

President Bush flies to California today... where he'll observe U-S military maneuvers and plead for continued U-S military strength, despite the diminished threat from the Soviet Union and Eastern Europe.

In South Africa, senior government officials say that President de Klerk's drastic racial reform measures will have NO effect on the policy of apartheid... including segregated education and racially exclusive suburbs.

The Reverend Jesse Jackson is on his way to South Africa today via Zambia. In London yesterday, Jackson said he hopes to meet black activists and government leaders to discuss the implications of de Klerk's sweeping reform package.

A House committee report released yesterday says former President Reagan's tax cuts nearly a decade ago ultimately benefitted the rich, but NOT the poor. The study says the rich paid lower taxes on more income during the 1980's.

The poor, on the other hand, felt a sharper tax bite without the parallel rise in income. The statistics add fuel to Democratic claims that wealthier Americans do NOT need, or deserve another tax break, such as Capital Gains.

-30- 1779

#90037u0937 02/06/1990 ~United Press International

(FEB. 6) UPI - Three prominent police chiefs are calling on President Bush and Congress to support legislation that would ban 14 assault weapons. The law enforcement officials also want tough penalities if drug traffickers use the weapons.

A report in says a federal study of fatal truck accidents shows that one-third of the drivers killed had alcohol or drugs in their bloodstream. The study examined a year's worth of accidents in eight states.

Security sources in Lebanon say the forces of Christian leader General Michel Aoun launched a new offensive today against a rival Christian militia north of Beirut. The factions are battling for control of

Lebanon's Christian sector.

Former Atlanta Mayor Andrew Young launched an effort to become Georgia's first black governor. The 57-year-old minister pledged to provide leadership that will protect a woman's right to choose abortion.

In Los Angeles, a 49-year-old Czechoslovakian-born physician has been sentenced to 53 years to life in state prison after being deemed responsible for the deaths of eight infants through incompetence and gross negligence.

The Labor Department say worker productivity slowed in the last three months of 1989. Some analysts say the report may set the stage for steeper inflation in the future.

Police in Brazil say merchants and businessmen are taking the law into their own hands by hiring death squads to kill delinquents who are NOT controlled by police. At least 47 people were killed in Rio de Janeiro during the weekend.

WASHINGTON (FEB. 6) UPI - Senate Democratic leader George Mitchell said Tuesday that behind-the-scenes negotiations on a compromise clean air bill are making ''good progress,'' but conceded the legislation could still run into a filibuster.

Mitchell, of Maine, told reporters that negotiators, including the administration, have reached tentative agreements on two of the four major provisions in the bill and talks are continuing on the other two.

Mitchell said tentative decisions have been reached on control of air toxics and emissions from stationary sources.

He said negotiators were starting discussions on emissions from mobile sources, such as cars, and would tackle possibly the most difficult issue - acid rain.

''I hope we can reach agreement,'' Mitchell said, quickly adding that he planned to resume Senate deliberations on the bill, probably later Tuesday ''with or without an agreement.''

Mitchell said a filibuster was ''still a possibility'' despite recent progress and was uncertain if he could get the 60 votes needed to kill a talkathon.

''Many senators have not reached a decision on how they would vote on

cloture,'' Mitchell said. ''A large number have not made a decision on how they will vote.''

Mitchell declined to specify compromises on the two agreed issues, and said senators from both parties would be briefed later in the day at meetings.

''We are making a good faith effort on all sides,'' Mitchell said. ''We want the strongest bill in the most effective way.''

Mitchell brushed off complaints from environmental groups that the bill is being written in secret and not in the Senate chamber.

''The response is we don't have the votes for cloture,'' Mitchell said. ''I assume they want a bill.''

Mitchell said negotiations, which became intense late last week when it became apparent the bill was being stymied, actually began last fall before the bill was reported to the Senate.

Initiated by William Reilly, administrator of the Environmental Protection Agency, the meetings last fall were limited to members of the drafting committee and, at times, included White House chief of staff John Sununu and other administration officials.

Mitchell said those talks led to a bill which included about 80 percent of the administration's recommendations.

President Bush, who has made a clean air bill a top priority for the 1990 legislative session, has said the Senate bill is too costly and is burdensome on industry.

Bush has threatened to veto the measure as written.

#90037u0997 02/06/1990 ~United Press International
PITTSBURGH (FEB. 6) UPI - Pittsburgh Penguins star center Mario Lemieux said he probably will undergo surgery after the season for a protruding disc in his back, and team officials are worried the injury may be career-threatening.

Lemieux said Monday he will ''probably have surgery after the season.'' He was scheduled to practice wearing a new brace, but he did not skate because his lower back was too stiff.

''As to whether or not it's a career-threatening problem, we don't know yet,'' said Paul Martha, Penguins general counsel. ''Anytime you have a player - any player - injured or bothered by something, it's a concern. And when he's your highest-scoring player, you're particularly concerned.''

Lemieux entered Tuesday night's game at the Civic Arena against the New York Islanders with a streak of 42 consectutive games in which he had scored a goal or assisted on one. He needed a point in nine games to tie Wayne Gretzky's NHL record of 51 set during the 1983-84 season with the Edmonton Oilers.

Lemieux, the NHL's two-time defending scoring champion, had 40 goals and 70 assists, five points ahead of Gretzky in the league scoring race.

Penguins trainer Skip Thayer said Lemieux's chronic back problems likely will require surgery. Skating for Lemieux is painful, but he does not risk further injury to his back by playing, Thayer said.

''We have had the best doctors here in Pittsburgh look at Mario, and we

are considering possibly having a doctor from the West Coast look at him '' said Martha.

One of those physicians is Dr. Arthur White, who performed back surgery on San Francisco 49ers quarterback Joe Montana in 1986. White, of St. Mary's Hospital of San Francisco, removed a ruptured disc associated with a congenital spinal condition, and the surgery has been credited with saving Montana's career.

The Edward J. DeBartolo family owns both the 49ers and the Penguins.

Lemieux said he does not expect the back pain to ease before the end of the season.

''It'll probably get worse,'' he said.

#90037u1003 02/06/1990 ~United Press International

JOHANNESBURG, SOUTH AFRICA (FEB. 6) UPI - At least six people were killed, including a black man ''necklaced'' with a burning tire and a policeman found stabbed to death, in a flare-up of factional fighting in the strife-torn province of Natal, police said Tuesday.

Scattered incidents were reported elsewhere in the country over the past 24 hours, including clashes between demonstrators and police east of Johannesburg in the black township of Tembisa, where police fired tear gas and shotguns to ward off attacks on railway cars and private vehicles.

President Frederik de Klerk announced last week the government's intention to meet black demands to lift a 43-month-old state of emergency as soon as possible but he cited continuing strife in Natal as one of the key reasons for retaining many of its provisions, including police powers of detention without charge.

A Johannesburg newspaper reported Tuesday that the demand for firearms has risen nationwide in the wake of the reforms announced by de Klerk.

Arms dealers linked the surge in demand to the lifting of bans on anti-apartheid organizations, the Johannesburg Star said.

''People are ordering whatever they can get, prices have become irrelevant '' said the Star, quoting a Johannesburg arms wholesaler.

Police said they found the bodies of six people Monday in Natal, where factional fighting between supporters of the African National Congress and conservative Inkatha movement of Zulu leader Mangosuthu Buthelizi has left as many as 3,000 dead since 1987.

Five injuries were reported in Natal as rival groups clashed in various black townships and hurled petrol bombs and stones at private houses and vehicles. In one incident, police came under fire.

In the township of Mpumalanga, groups of blacks threw petrol bombs and looted houses, causing extensive damage, the unrest report said, providing only sketchy details. A woman was killed in one attack.

In the same area, a black man died after a tire was placed around his neck and set alight in a so-called ''necklace killing.'' It was unclear what provoked the killing.

In the township of KwaMashu, police found the body of another man burned to ash and the body of a member of the South African Police with stab wounds.

Two groups clashed near the town of Sweetwaters, then exchanged gunfire with police who arrived at the scene. One policeman and a woman in the group were wounded.

Closer to Johannesburg, police confirmed using tear smoke Monday to disperse illegal demonstrations in the township of Tokoza, where mobs hurled stones at police and set a number of vehicles on fire. One policeman was injured, the report said.

Police said demonstrators protesting poor living conditions stoned trains and cars in the black township of Tembisa, where unofficial sources said as many as 18 people suffered injuries during protests. Police fired tear gas and shotguns to ward off the attack, and two people with petrol bombs were arrested.

Using the state of emergency regulations, police declared Tembisa an unrest area and order three foreign television camera crews to leave the area.

#90037u1009 02/06/1990 ~United Press International

SRINAGAR, INDIA (FEB. 6) UPI - About 10,000 Indian students demonstrated along the India-Pakistan border and two bombs damaged property in Srinagar Tuesday as tension increased following a border clash between Indian troops and Pakistani Moslems.

The Indian students, angered by Monday's reported border crossing into India by Pakistani supporters of Moslem separatists in Kashmir, stayed out of classes and held demonstrations in several towns along the border, shouting ''down with Pakistan,'' the Press Trust of India reported.

The two bombs that expoded in and around Srinagar, the summer capital of Jammu and Kashmir State, damaged a building, destroyed a passenger bus and injured two people, police reported.

The explosions, believed to be set off by pro-secession Moslem militants, came on the fifth consecutive day of a weeklong general strike called by militants who want predominately Moslem Kashmir to secede from Hindu-dominated India, a move that is supported by Moslem Pakistan.

On Monday, Indian troops fired on Pakistani supporters of Kashmir's Moslem separatists, wounding 10, in a disputed border clash that has exacerbated the lowest point in Indo-Pakistani relations since their 1971 war.

The two neighbors are at loggerheads over the bloody popular insurrection in the disputed Kashmir region, which comprises the northern portion of India's Himalayan Jammu and Kashmir state.

The Indian government said the troops fired after about 100 Pakistani supporters streamed across the border into India and set crops ablaze, but the Pakistani government has disputed the claim, saying Indian security forces fired across the border into Pakistan, killing one man and wounding 12 others.

Local officials contacted by telephone in Sialkot, 155 miles southeast of Islamabad, said Indian personnel fired when a lone demonstrator dashed across the border in an attempt to rip down an Indian flag.

Moslem extremists called the weeklong strike in Kashmir to coincide with ''Solidarity Week'' in neighboring Pakistan, where widespread rallies and prayer meetings marked support for Moslems demanding secession of Kashmir.

India's Foreign Ministry spokesman, Aftab Seth, on Tuesday blamed Pakistan for the border clash.

''We once again urge Pakistan to make every effort to cool the temperature and lower the rhetoric in order to prevent unprovoked incidents of the kind that occurred yesterday,'' he said.

In Srinagar, most residents remained indoors and virtually all businesses were closed Tuesday even though Indian authorities lifted a curfew for 13 hours. Banks and government offices opened and public transport was available for the first time in several days.

The scene was virtually the same throughout the rest of the Kashmir Valley where most businesses closed in compliance with militant demands, witnesses said.

In Kak Pura, 12 miles south of Srinagar, security forces peacefully dispersed about 200 youths throwing stones at passing cars which were on public roads in violation of the strike.

The first bomb of the day exploded at 6:45 a.m. and partially damaged a building in a shopping complex in downtown Srinagar, a police official said. Two bystanders were injured and taken to a hospital for treatment.

The second bombing incident occured at 11 a.m. when an undetermined number of masked gunmen stopped a passenger bus along a road near Buchpora, a few miles north of Srinagar, the official said.

After ordering everyone off the bus and into a nearby rice field, the gunmen bombed the vehicle, the police official said. No injuries were reported.

More than 90 people have been killed since violence erupted in the region Jan. 20, according to officials. Most of the victims were shot by security forces during demonstrations for independence for Kashmir.

Virtually all 3 million residents of India's side of the predominantly Moslem region are demanding independence because they believe they have been neglected by the Hindu-dominated New Delhi government.

Pakistan openly supports the movement, but denies India's charge that it has trained and armed militants in the region.

Kashmir has long been a sore point between the two countries, which have fought three wars in the region since 1948.

#90037u1077 02/06/1990 ~United Press International

BOSTON (FEB. 6) UPI - Travelers who ask foreign embassies and consulates for information on which vaccinations they need to travel abroad should be careful about the advice they get. It may be wrong.

A telephone survey of 147 countries' embassies and consulates found 13 incorrectly stated vaccination against yellow fever was required while 13 said vaccination against cholera and 1 said vaccination against typhoid was required. Nine said smallpox vaccination was recommended or required.

''None of these countries were listed by the Centers for Disease Control as requiring any of these vaccinations for travel directly from the United States,'' Dr. Mary Nettleman of the University of Iowa Hospitals and Clinics in Iowa City wrote in a letter published in The New England Journal of Medicine.

''Although vaccination against typhoid may be wise for certain travelers, it is not an absolute requirement. Similarly, cholera vaccine commonly causes side effects and is only about 50 percent effective. Because the risk of cholera in travelers is low, it is doubtful that vaccination benefits either the traveler or the country of destination,'' she said.

While vaccination against yellow fever is prudent in travelers who may be exposed to the disease, several foreign offices which stated the vaccination was required represent countries not in affected areas, she said.

Since smallpox has been eradicated, the vacccine should never be recommended to travelers, Nettleman said.

''We conclude that it is inappropriate to look to embassies and consulates for the up-to-the-minute medical advice,'' she said.

Instead, travelers should check with their local physicians, a travel clinic, the federal CDC in Atlanta or their regional U.S. Public Health Service Quarantine Stations for the most reliable advice, she said.

''Physicians who are unaccustomed to dealing with international travel should seek advice from one of those sources or the recent medical literature,'' she added.

Nettleman said she decided to conduct the survey after ''several prospective travelers requested unneeded vaccinations on the basis of advice from an embasy or consulate.'' The findings confirm those of a similar study in Canada, she added.

#90037u1109 02/06/1990 ~United Press International

PARIS (FEB. 6) UPI - OPEC crude oil production declined 700,000 barrels a day to 23.3 million barrels daily in January, with Saudi Arabia, Kuwait and the United Arab Emirates responsible for the bulk of the reduction, the International Energy Agency said Tuesday.

Production remained above the 22 million barrels-a-day ceiling set by the 13-nation Organization of Petroleum Exporting Countries in November for the first six months of 1990 to support higher world prices.

Despite overproduction by the cartel, which pumps more than one-third of the world's oil, the oil market "has not yet shown any significant indications of oversupply," the IEA monthly report said. The IEA was established by the oil-consuming nations to monitor world oil trade.

Saudi Arabia pumped 5.3 million barrels a day in January, compared to 5.6 million barrels a day in December, IEA said. Kuwait pumped 1.7 million barrels a day, down from two million barrels a day in December and the United Arab Emirates pumped two million barrels a day, down from 2.3 million, IEA said.

The IEA summary echoed comments last week by a source with a major U.S. oil company, who said OPEC production averaged 23.4 million barrels daily, or about 600,000 barrels less than December's output. He said Kuwait and the UAE had each trimmed their daily output by 300,000 barrels to 1.8 million for Kuwait and 2.1 million for the UAE.

Kuwait had said it would abide by the 1.5 million barrels-a-day it was assigned in the November meeting. The UAE refused to accept any quota. The two also had produced way over their previous one million barrel-a-day quotas assigned in the June meeting of OPEC oil ministers. World prices have held firm despite continued OPEC overproduction thanks to burgeoning world demand for crude oil.

Prices, however, plunged Monday in what some traders said may be the first step in the long-anticipated downturn in the first half of the year because of OPEC overproduction.

#90037u1136 02/06/1990 ~United Press International

VATICAN CITY (FEB. 6) UPI - The Vatican will sign an accord with Hungary Sunday clearing the way for the establishment of full diplomatic relations for the first time since World War II, the Vatican announced Tuesday.

Chief spokesman Joaquin Navarro Valls said the re-establishment of full diplomatic relations is expected to follow a few days after Vatican Secretary of State Cardinal Agostino Casaroli signs the accord with

government officials in Budapest.

Hungary will become the second former communist-ruled state of Eastern Europe to re-establish full relations with the Vatican. Pope John Paul II's native Poland re-established them July 17, 1989.

The re-establishment of ties will climax a series of negotiations between the Vatican and the Hungarian government in recent weeks. After a private audience with the pope in the Vatican Jan. 18, Hungarian Foreign Minister Gyula Horn predicted full relations would be re-established ''within a few weeks.''

Cardinal Casaroli and three aides, including Archbishop Francesco Colasuonno, special envoy for relations with Eastern Europe, will fly to Budapest Wednesday and will remain in Hungary through Monday, the Vatican spokesman said.

The Vatican delegation will first attend cermonies in Esztergom, historic seat of Hungarian Catholic Primates, marking the 41st anniversary of the 1948 trial of late Hungarian Primate Cardinal Jozef Mindszenty.

The court sentenced Mindszenty to death on charges of plotting against the state, but later the sentence was commuted to life imprisonment. Mindszenty died in exile in Vienna in the mid-1970s and his name has recently been cleared, part of the sweeping reforms in Hungary.

Last month the Hungarian Parliament approved a law guaranteeing freedom of conscience and religion, the decisive step in a long series of moves toward reonciliation with the Catholic Church, to which 70 percent of Hungarians belong.

In December 1988 when progress toward reconcilation was under way, the pope accepted an invitation to visit Hungary, probably in 1991.

#90037u1141 02/06/1990 ~United Press International

WASHINGTON (FEB. 6) UPI - The Bush administration proposed changes in U.S. farm policy Wednesday to give farmers more opportunities to grow profit-making crops while reducing the amount spent on subsidies to prop up farm income.

The administration plan, a package of up to 70 ideas for the farm policy law to be written this year, included proposals to use the Conservation Reserve Program to protect water purity and creation of a permanent disaster relief program to replace the money-losing crop insurance program.

Agriculture Secretary Clayton Yeutter refused to estimate how much the

government would spend if the proposals are adopted. He repeatedly said farm income should run at a ''very satisfactory'' level despite a smaller federal contribution.

''I think it's achievable,'' Yeutter said.

During a news conference, Yeutter described the administration package as ''a set of amendments'' to the farm policy law written in 1985. It expires this year.

By proposing a set of ideas, the Bush administration took a different approach than past administrations that have offered legislation. Congress however, has a habit of disregarding administration farm bills.

A well-informed Agriculture Department source has said that by offering a package of ideas - most of them backed by suggested legislation - the administration could focus attention on the job of revising farm policy.

The major tool in the attempt to give farmers crop flexibility was a proposal to adopt a modification of the ''normal crop acreage'' system used in the 1970s. Under it, farmers would have more discretion to switch among crops rather than being locked into growing the same crop in order to preserve eligibility for subsidy payments.

Farmers would be allowed to grow oilseed crops, such as soybeans and sunflowers, on land normally devoted to crops eligible for subsidies without any financial penalty. Yeutter said that change would let farmers respond to growing world demand for oilseeds.

The Bush administration proposal retained most of the arsenal of weapons now in use to broaden the U.S. share of the world market. Yeutter said the retention of export subsidies and the cotton and rice ''marketing loan'' should demonstrate to U.S. competitors the need to agree to trade reforms.

''I ... hope they will remain at the (negotiating) table,'' he said.

The administration plan also proposed that land setaside requirements should be based on the expected supply and demand for a commodity, not just the supply as now is done. It also called for a more uniform set of subsidy rates for wheat, feed grains, rice and cotton.

In addition, the package would increase the effort to provide food stamps to homeless people and tighten up rules for getting loans from the Farmers Home Administration. The FmHA proposals include putting a 17-year limit on how long a farmer could get FmHA loans.

Meanwhile, a coalition of 11 major environmental and consumer groups announced their agenda for the farm bill. It proposed building on the

conservation provisions of the current law to enhance groundwater purity and food safety.

The coalition proposed an Environmental Stewardship Program to help pay the cost of water protection, requirements for farmers to try to reduce use of farm chemicals in environmentally sensitive areas, establishment of standards for organically grown food and removal of farm program rules that discourage farmers from using farming methods that can reduce use of chemicals.

Yeutter declined to pass judgment on the idea of requiring farmers to adopt a ''pesticide management plan'' but said he prefers the approach of encouraging farmers to voluntarily meet environmental goals.

The government has spent $85 billion on crop subsidies under the 1985 law, which had the goal of regaining export markets while protecting farm income.

(FEB. 6) UPI - Soviet President Gorbachev's UNprecedented call for the Communist Party to relinquish its monopoly on power has sparked fierce debate on the second day of a meeting of top party leaders. Gorbachev bluntly told the party brass to reform or perish in coming battles at the polls, as the Soviet Union evolves into a multi-party system. One member says Gorbachev's plan needs more work.

Secretary of State Baker arrived in Prague today for talks with Czechoslovak leader Vaclav Havel. There's speculation that Baker will announce new U-S financial aid for Prague before he travels to Moscow. Baker earlier stopped in Shannon, Ireland, and met with French Foreign Minister Dumas. The two men discussed the latest developments in the Soviet Union.

South African Foreign Minister Pik Botha says the Reverend Jesse Jackson picked the wrong time to visit South Africa... lending fuel to speculation that the government will NOT soon free Nelson Mandela. Jackson arrives tomorrow on a weeklong tour. The American civil rights leader is a vocal critic of South Africa's apartheid policies and advocates sanctions against Pretoria.

South African black nationalist leader Walter Sisulu says NO direct talks will be held soon between the African National Congress and the Pretoria government. Sisulu says he welcomes the lifting of the ban on the A-N-C and other reform measures announced last week by President de Klerk... but says the ''armed struggle'' will continue against the government.

CADET, MO (FEB. 6) UPI - Fire broke out in a mobile home in eastern Missouri early Tuesday, killing a family of five and the young daughter of a neighbor who had been spending the night with them, authorities said.

An investigator said the fire was caused by a wood-burning stove.

The victims were identified as Davie Light, 18; Michelle Miller, 22; their 3-week-old daughter, Jessica Light; Miller's two children, 3-year-old James and 1-year-old Alicia; and the neighbor child, 3-year-old Rachel Hafley.

Washington County Sheriff Ronnie Skiles said his department received a call reporting the fire at 5:26 a.m. Tuesday. He said one of his deputies was 1 1/2 miles from the scene at the time of the call and arrived within two minutes at the home in the Jarvis Trailer Court, about 55 miles

southwest of St. Louis.

''By the time he arrived, the trailer was completely engulfed in flames and the roof already had started collapsing,'' Skiles said.

After extinguishing the fire, firefighters found the bodies of the victims inside the trailer, which was not equipped with a smoke detector, authorities said.

Skiles said it appeared the unmarried couple had awakened and tried to escape from the burning trailer because their bodies were not found in bed. He said it appeared one child also had awakened and tried to escape, but the bodies of the other three children were found in their beds.

The victims apparently died of smoke inhalation, Skiles said.

An investigator from the Missouri State Fire Marshal's Office inspected the ruins of the mobile home and ruled the fire was caused by a wood-burning stove, the sheriff said. He said neighbors told authorities the family had installed the stove Monday.

''The flue or the stovepipe was probably 2 inches too short,'' Skiles said.

(FEB. 6) UPI - Despite proposing radical cuts in defense spending... President Bush says the United States must maintain its guard against unforeseen threats and congressional budget-cutters. Bush left Washington this morning for a three-day trip out West to defend his request for continued high levels of military spending. This afternoon the president will observe military maneuvers at Fort Irwin, California.

A coalition of 11 major consumer and environmental groups is urging Congress to seize the opportunity in rewriting farm policy laws this year to emphasize environmental and food safety. The coalition is urging special programs to help farmers adopt new techniques... including those for a ''substantial reduction'' of pollution from agricultural sources.

China has announced its latest move to tighten control on Chinese students. The government has adopted a policy on overseas study that requires all college graduates to work for five years before going abroad. Sources say that under the new policy, graduates who fail to perform the five-year work period in China must reimburse their universities for the entire period of tuition.

The Geneva-based Intergovernmental Committee for Migration says the number of Soviet Jew emigrating to the West instead of going directly to Israel

declined to just 164 in January... due largely to new U-S visa regulations. Last year, more than five-thousand Soviet Jews a month traveled to an I-C-M center in Vienna to be processed for settlement in the West.

#90037u1203 02/06/1990 ~United Press International

BOSTON (FEB. 6) UPI - On Valentine's Day, thoughts turn to the perfect gift, but while women dream of chocolates and roses, men are more likely to fantasize about slinky negligees, a researcher says.

Boston University researcher Kathleen White says the sexes have different expectations when it comes to romance and relationships, and those differences get even greater as the years go by.

Kathleen White, acting chairwoman of the university's psychology department, began interviewing 300 young adults, both married and single, 10 years ago. She is now following up on her subjects and says the disparity in views on romance becomes even greater with age.

The main complaint of women in their 20s is that their boyfriends or husbands rarely say the words ''I love you,'' White said.

''In their 20s it was certainly true that the women wanted men to say 'I love you' more directly,'' White said. ''I've had a number of men say to me, 'Why do I have to say it? I come home every day, I help around the home.' Some would even say 'I think if you say I love you too often it cheapens it.'''

While both men and women in their 20s place equal importance on sex, women freqently complain that their partners only become physically affectionate as a prelude to sex - or in an effort to resolve an argument.

''Very often women would like more physical expression of affection from them, specifically at a time when they are not fighting,'' White said. ''Women say 'I don't want to kiss and make up until we've got it settled.'''

The gap grows wider as the couples age.

''In their 20s, I did not see evidence that men are more interested in sex than women,'' White said. ''In their 30s, at least with married couples, the stereotypes are coming true.

''Couples in their 30s are living lives that are much busier and more stressful than they were in their 20s. Both husbands and wives say they just don't have time to relax together. They don't feel appreciated. On

one level, they know their partner loves them, but on one hand they wish their partner would show it more. Their job comes first, or the children come first.''

In such cases, each partner wants the other to make an extra effort to reaffirm their love, but ideas of what that effort should involve vary widely, White said. Women look for a gesture that symbolizes romance, while men want more frequent and exciting sex.

''The women, even the ones who don't have children, they're still working full time. It (sex) has become more routine. Both husbands and wives say they'd like more romance, but if anyone says they want more sex, it's the husband.''

And while men may say they want more romance, they equate the term with sex or believe romance should lead to the bedroom, White said.

''Women are talking about more emotional closeness; men are talking about physical closeness. Women need talking and cuddling, men want physical affection, including sex,'' she said, adding that married women in their 30s often feel too tired for sex.

''Even if their husbands have helped with household tasks they don't seem to have the energy.''

She said women anxious to revive the romance in their lives will think wistfully of a candelit dinner.

''The husbands, what they want to do is have the wife buy something from Frederick's of Hollywood and come prancing in.''

The good news, White says, is that compromises are easy to achieve - with a little communication. Couples who take the time to ask each other about their needs are happier, she said.

''They take time just to talk about how they're doing, what they're missing. They're responsive - they really listen to each other.''

These couples, White said, will occasionally surprise each other with small gifts. For example, the husband might do the dishes, if this is a task the wife traditionally performs, or the wife may allow the husband some time to himself before she asks him to help with the child-care.

''Some of them really do work at bringing in little surprises. One woman will get a crazy greeting card for her husband. He'll pick up flowers on the way home - something that makes her feel that he's thinking of her during the day.''

Such gestures do not require a lot of planning or a lot of time, and the investment more than pays off, White said.

''It really doesn't seem to take very much. Asking 'How do you feel, what do you want, is there anything I can do?' Anything. These couples are putting in an extra 45 minutes a month more than the other couples into their relationship but that extra 45 minutes are buying them so much.''

The key, said White, is to make sure you know what will please your partner.

She said one woman complained that her husband expected her to be pleased when he brought her tickets to a basketball game - even though she was not interested in sports.

''She says 'What my husband will do for a surprise for me is to get Boston Celtics tickets.' She'd rather have him bring one flower. For some women, tickets to the Celtics is what they would like most.

''It's so trite, but it really takes putting yourself into the other person's shoes.''

#90037u1204 02/06/1990 ~United Press International

HOLLYWOOD (FEB. 6) UPI - ''Driving Miss Daisy,'' a multiple winner at the recent Golden Globe Awards, remained in high gear to lead the national box office chart while ''Stella'' grabbed the No. 2 spot despite negative reviews.

''Driving Miss Daisy,'' starring Jessica Tandy as a prickly elderly Southern matron and Morgan Freeman as her long-suffering chauffeur, recorded a 5 percent increase in ticket sales in its second week in release.

However, all other holdover films experienced a drop averaging 21 percent.

It was a slow week for the nation's theater owners as overall grosses registered $68.8 million, down from 1989's record-setting $86.7 million for the same week.

So far this year, North America's 23,000 theaters have grossed $352.5 million. Last year the take was $357.3 million.

Contributing to this year's February box-office blues was the failure of three new films to light any bonfires.

Although ''Stella,'' ''Flashback'' and ''Heart Condition'' all landed in

the top 10, none did exceptional business.

In leading the rankings for the second consecutive week, ''Driving Miss Daisy,'' which picked up Golden Globes for best actor, actress and comedy, grossed $6 million in 895 situations for an eight-week total of $24.3 million.

''Stella,'' stars Bette Midler in a remake of the sudsy ''Stella Dallas,'' the 1937 tearjerker with the late Barbara Stanwyck in the title role. Despite uniformly horrendous reviews, ''Stella'' landed in the No. 2 spot by picking up $4.3 million on 1,033 screens.

Dropping down a tick from the previous week was ''Born on the Fourth of July,'' the Tom Cruise Vietnam War vet drama. It raked in $4 million in 1,309 theaters for a $44.4 million total in seven weeks, dropping faster than expected for a film destined for Oscar nominations.

Coming in at No. 4 was Sylvester Stallone's ''Tango & Cash,'' co-starring Kurt Russell, a cop-buddy picture also in its seventh week. The violent action flick ticked the tills for $3 million in 1,526 theaters for a total of $53.6 million.

''Flashback,'' a satirical comedy starring Dennis Hopper as a hunted ex-hippie from the 1960s and Kiefer Sutherland as an uptight FBI rookie trying to bring him to justice, grossed $2.9 million in 875 situations in its opening week, earning it the No. 5 spot.

The third newcomer, ''Heart Condition,'' is a comedy starring Bob Hoskins as a bigoted detective who gets a heart transplant from a black man, played by Denzel Washington, who returns to haunt him. In ninth place, it grossed a weak $2.1 million across 885 screens.

The top 10, last week's gross, total gross, weeks in release:

1. ''Driving Miss Daisy,'' $6 million, $24.3 million, 8 weeks.
2. ''Stella,'' $4.3 million, 1 week.
3. ''Born on the Fourth of July,'' $4 million, $44.4 million, 7 weeks.
4. ''Tango & Cash,'' $3 million, $53.6 million, 7 weeks.
5. ''Flashback,'' $2.9 million, 1 week.
6. ''Internal Affairs,'' $2.7 million, $19.4 million, 4 weeks.
7. ''The War of the Roses,'' $2.6 million, $75 million, 9 weeks.
8. ''Tremors,'' $2.4 million, $11 million, 3 weeks.
9. ''Heart Condition,'' $2.1 million, 1 week.
10. ''Steel Magnolias,'' $2 million, $67 million, 12 weeks.

#90037u1207 02/06/1990 ~United Press International

BEIJING (FEB. 6) UPI - China, in its latest move to tighten control on students, has adopted a tough policy on overseas study that requires all college graduates to work five years before going abroad or face steep fines, government sources said Tuesday.

Under the new policy, graduates who do not fulfill the five-year work period in China must reimburse their universities the full price of tuition for each year short of the target, the sources said.

The new regulation was passed during a meeting last month of the State Education Commission, which oversees all educational matters. Sources knowledgeable about government affairs said the commission issued the rule in a confidential document circulated to high-level officials.

Contacted by telephone, a commission spokesman denied the existence of the new measure. But the sources said the policy, which has not yet been announced, will take effect Feb. 10 and apply to China's 2 million college students.

Rumors of the impending measure had been circulating Beijing for months but sources said it has now become official government policy.

The meaure is the latest in a number of moves to tighten control over college students since last spring's student-led democracy movement, which spread nationwide.

After the brutal crackdown on the movement last June that left hundreds and perhaps thousands dead, the government announced all would-be graduate students must work for two years at ''grass-roots'' levels before continuing their studies.

Masters and doctoral students wishing to study abroad within the five-year limit also will be required to reimburse their home institutions the full amount of tuition.

China currently spends more than $414 a year on each college student, according to a recent official estimate, bringing the cost of four years of tuition to approximately $1,656 per student.

The sum is a fortune for the average college graduate, who makes well below the monthly $36 earned by workers.

The new measure applies to both government sponsored and privately funded exchange students, the sources said.

They said the required amount of tuition varies according to different schools and in some cases could reach a high of $4,761 per student.

The Chinese government is known to be distressed over the increasingly large percentage of overseas exchange students who choose to remain abroad.

An estimated 36,000 students studying in the United States may now legally extend their stays without returning to China, according to an administrative order given by President Bush. The order is intended to protect students from possible persecution at home.

Chinese students studying in the United States complained of being monitored and harassed after they participated in rallies protesting the Chinese government's violent crackdown on dissent last June.

China has not responded to Bush's order, although it warned sharply of ''retaliation'' if U.S. Congress passed a bill containing the same provisions. The bill was defeated two weeks ago by a narrow margin of four votes in the Senate.

Some sources say the Chinese government may have written off students now attending U.S. universities as permanently indoctrinated by the West, making them risky sources of dissent should they return.

''China may not want those students back at all,'' said a Western diplomat in Beijing.

Since the military crackdown in June, the government has waged a fierce campaign against ''bourgeois liberalism,'' a vague term for Western political and cultural influences.

China still accuses the United States and ''certain Western countries'' of whipping up last spring's pro-democracy protests in a plot to subvert the system.

But with the wave of political liberalizations sweeping Eastern Europe, China is left with a dwindling number of preferred destinations for overseas study.

#90037u1210 02/06/1990 ~United Press International

LOS ANGELES (FEB. 6) UPI - You probably are already familiar with the kernel of wisdom around which Joy Overbeck's new book has congealed: ''Love Stinks.''

The sentiment has been stated again and again in pop psychology books. Relationships do not behave the way you want them to. Love turns into seething resentment and disappointment grows like a weed. Eventually your heart breaks. It's really no fun at all.

In other words, love stinks. But it has its humorous side too, at least the way Overbeck looks at it.

''I mean, all those other books are so deadly grim. But this one's fun,'' says Overbeck, whose book is also full of wry wisdom and advice for anyone going through the dying throes of a relationship.

For instance: ''Your mother, in particular, will take it very hard. She has always seen your romantic life in terms of oceanography ... 'There's more than one fish in the sea.' However, now that you're planning to cut bait, the food chain has gone into sudden decline and, lo and behold, the sea is now 99.6 percent fish-free.''

The book's primary focus is on women who are discovering - or rediscovering - the agony of heartbreak, though the author says the advice contained therein applies equally to men. ''Men are aliens, sure. But women are aliens, too. There's no discrimination intended.''

It is no surprise to find out that ''Love Stinks'' (Pocket Books, 177 pp., $7.95) was born of experience.

''When I started writing, I was thrashing through a divorce myself, and there was this strange despair about it all. My moods were so drastic. I guess I was naturally attracted to the more quirky aspects of breaking up.''

So she took eight months and ''jollied myself out of depression,'' by writing ''Love Stinks.''

This path to emotional enlightenment led past a number of discoveries. For instance, Overbeck says she has discovered major differences between men and women.

''Men and women are entirely different species, which probably originated on separate planets. Men today are very jittery.

''Once, we had an agreement with them. They would give us all their money if we would worship them unceasingly. That's been called off now, and men think we don't need them - they've been replaced by ... the sperm bank. But they haven't. We're still mad about them.''

Mad about them over and over again.

''I think of this as serial monogamy,'' says Overbeck. ''You pick a partner for life and then pick another one. It's a very Los Angeles-type phenomenon - a television kind of thing, like changing channels.''

Overbeck, who lives in Denver, brings with her a solution to the problem

of how to get your life back together after ending that all-important, all-consuming relationship. You have to start dating again.

This is not easy or fun.

''You have to deal with your lifetime update. You know - filling your date in on everything that your ex already knew. My advice is to take your time. Never risk a nausea attack by sleeping with a stranger,'' Overbeck said.

''The real problem is that many women approach dating like it's 'Star Search with Ed McMahon' - a quest for the perfect yin to merge with your yang. Dating isn't a mystical search. It's recreational therapy. In fact, recreational dating is a necessary diversion, because while you're contemplating suicide, you'll be playing miniature golf, a sport in which there has never been a fatality.''

Overbeck reminds those in search of romance to remember that love, even if it does stink, is always interesting.

''Love is like a pinata. The more you whack it, the more surprises fall out.''

WASHINGTON (FEB. 6) UPI - Drug therapy is dramatically slowing disease progression among AIDS-infected homosexuals, but treatments appear to be missing intravenous drug users infected with the deadly virus, a study showed Tuesday.

Since the middle of 1987, when the AIDS-fighting drug AZT became widely available, up to one-third fewer cases of AIDS among homosexual men have been reported than the government had expected, the government study found.

The decline was even greater in New York, San Francisco and Los Angeles, where AIDS cases among homosexual men dropped as much as 72 percent from earlier projections during the final six months of 1988.

By contrast, the study detected little change in the the rate of AIDS cases reported among intravenous drugs users, who have little access to AZT and other expensive drug therapies.

The study has caused considerable controversy among top officials of the Public Health Service because it provides the first solid data that poor, inner-city communities with many AIDS patients may not be receiving new drugs.

Assistant Health Secretary James Mason said, ''This is a significant report since it provided independent evidence that early intervention and treatment for people with HIV infection slows progression of their disease.''

The AIDS-causing human immunodeficiency virus (HIV) is spread by sexual or blood-to-blood contact, such as drug users sharing contaminated needles. HIV can also be passed on from an infected mother to her baby.

It can take 10 years or more from the time a person is infected with HIV until he or she develops acquired immune deficiency syndrome. AZT is not a cure for AIDS, but past research has shown it can prolong life and slow progression of the disease.

The new study, conducted by National Institutes of Health researchers,

found as AZT use increased in the homosexual population, reported cases of AIDS fell far below predictions. Researchers noted AZT has become available to people with good insurance and access to sophisticated care, but not to many poor drug users who have developed AIDS.

One of the top priorities of Health and Human Services Secretary Louis Sullivan is to improve the health care of the disadvantaged, including widening the availability of AIDS treatments, Mason said.

''Plans should be made to deliver treatments to underserved populations,'' wrote the authors of the study, which will be published in The Journal of AIDS.

Researchers stressed that while AZT and other drugs such as aerosolized pentamidine have reduced how quickly HIV-infected people develop the fatal illnesses associated with AIDS, new HIV infections have continued to multiply.

''We must also continue our prevention efforts so that more people do not become infected with HIV,'' Mason said. ''This good news is not a substitute for sustained behavior choices.''

#90037u1265 02/06/1990 ~United Press International

(FEB. 6) UPI - Although it has been replaced in popularity by the home video explosion of the 1980s, Super 8 film still claims ardent followers who will celebrate their achievements at the only remaining festival devoted exclusively to films produced in the medium.

''A lot of people thought they had condemned Super 8 to death,'' said Albert Nigrin, an organizer of the second annual U.S. Super 8 Film Festival, to be held Friday at Rutgers University in New Brunswick, N.J. ''We're trying to make sure it stays at least partly in its heyday.''

Nigrin said the event is the nation's only remaining film festival devoted exclusively to films produced in Super 8, though other festivals feature Super 8 films along with other formats.

A total of 55 films were entered by filmmakers across the country, and nine finalists will compete for $1,000 in prize money.

Now virtually forgotten by the public and equipment manufacturers, Super 8 attained nearly a cult status during the 1970s rivaling the popularity of today's video camcorders.

Users of Super 8 ranged from organizations making documentaries that promoted their points of view to would-be Spielbergs making feature-length

narrative films.

The format had its own magazine, Super 8 Filmmaker, and camera makers offered sophisticated editing and sound equipment that could do virtually anything that could be done in a Hollywood studio. Advocates promoted it also as opening up the media of film and television to the masses.

The major television networks experimented with Super 8 to photograph news and some local television stations regularly used it for documentaries.

Super 8's attraction was its cost: less than $10 for a 3-minute roll of film and processing and less than $400 for a basic sound camera and projector.

The next cheapest film format, 16 millimeter, cost about $30 a roll for film and a sound camera and projector outfit easily ran $2,000 or more. The video equipment available at the time cost about $2,000 for a camera and recorder, but was only black-and-white and was aimed at schools or institutions, not consumers.

The grass-roots filmmaking movement came to an end in the early 1980s, when affordable, consumer-oriented videocassette recorders and cameras became widely available.

While video camcorders are popular for home movies, the expensive equipment needed for professional-quality editing has kept them from becoming as popular as Super 8 once was for more serious cinematic pursuits.

Despite the demise, Nigrin said there are still thousands of devotees who prefer Super 8 to video.

''Video is not really as resolute a medium as film,'' he said. ''Even with high-definition television the resolution of the image is not nearly as fine as Super 8. You're talking thousands of video pixels against millions of film pixels.''

The format continues to find professional use in specialized applications, such as the recent wave of television commercials employing hand-held cameras and grainy, black-and-white images, he said. Super 8 is not normally grainy, but the effect can be easily obtained when high-speed black-and-white film is used.

Nike's recent commercial featuring the Beatles hit ''Revolution,'' was filmed in Super 8, for example, he said.

The major users today are sculptors, painters or performance artists who want to document a project, or who want to move beyond their own medium to

film, he said. Would-be theatrical filmmakers who cannot afford 16mm continue to use Super 8, and colleges and universities use it to teach filmmaking, he said.

Among the films to be shown Friday are ''Aurelia,'' a 13-minute fantasy shot on location in Barcelona, Spain; ''This is the History of New York,'' a 23-minute documentary; and ''The Wish,'' a 3-minute black-and-white film combining live action, animation and segments drawn directly on the film.

Nigrin said no dramatic, theatrical films made it into the finals, partly because of poor acting and partly because they would be too long to show on the 3-hour program.

One of eight special merit awards will, however, be awarded to ''Gold is Where You Find It,'' a 72-minute docudrama about modern-day gold mining.

#90037u1273 02/06/1990 ~United Press International

WASHINGTON (FEB. 6) UPI - Oliver North asked a federal appeals court to throw out his Iran-Contra convictions Tuesday because his indictment and trial were improperly influenced by his nationally televised testimony to Congress.

North, a principal figure in the secret arms sales to Iran and covert Nicaraguan rebel aid operation, listened intently to 2 1/2 hours of

legalistic arguments in the same federal court building where he was convicted last year. His wife, Betsy, and his trial lawyer, Brendan Sullivan, were with him.

North's legal case was argued by Barry Simon, who complained to the three-judge panel about the ''unprecedented, pervasive publicity'' surrounding the fired White House aide's congressional testimony in July 1987.

North, a Marine lieutenant colonel who testified in his beribboned uniform appeared before the special Iran-Contra investigating committee after receiving a court-approved grant of immunity, meaning what he said could not be used against him during his trial.

Simon argued that North's convictions on three felony counts should be thrown out because Congress allowed the hearings to be televised, tainting witnesses who appeared before the grand jury and at North's trial. Those people, he said, could not ''put out of their minds'' elements of what they saw, heard or read about North's appearance.

North's testimony to Congress amounted to ''a coerced confession'' about his activities in the Reagan White House, Simon argued.

Simon also contended that Iran-Contra special prosecutor Lawrence Walsh did not take adequate precautions to shield grand jurors from exposure to the immunized testimony, which was broadcast live on television and radio and covered extensively by newspapers and magazines.

The appeals panel - three members of the U.S Circuit Court of Appeals for the District of Columbia - sat in the large ceremonial courtroom in the federal court building at the foot of Capitol Hill, where the Watergate trials were held.

The panel consists of Chief Judge Patricia Wald, named by President Carter and judges Laurence Silberman and David Sentell, both named by President Reagan.

There was no immediate indication when the panel would rule. In any case, the panel's decision can be appealed to the full appeals court and, ultimately, to the Supreme Court.

North was convicted May 4, 1989, of aiding and abetting the obstruction of Congress, destroying government documents and accepting an illegal gratuity - a $14,000 security fence at his home.

He was sentenced July 5, 1989, to 1,200 hours of community service at an inner-city drug rehabilitation center and fined $150,000. Despite his appeal, North has begun doing the community service work.

In his presentation, Simon also argued that trial Judge Gerhard Gesell had allowed other ''fundamental violations of the defendant's rights,'' including giving improper jury instructions.

The special prosecutor was represented by Gerald Lynch, who countered that Gesell had been ''diligent'' in handling questions before and during the trial about the possible influence of North's immunized testimony.

North's argument, Lynch said, essentially is that once a person testifies under immunity at nationally televised proceedings, he cannot be tried for any crime. That contention is absurd, Lynch said.

CHAMPAIGN, IL (FEB. 6) UPI - More than 16 percent of women students at the University of Illinois report they have been sexually assaulted by fraternity members in more than 63 percent of the cases, a university task force reported Tuesday.

The report by the Campus Task Force on Sexual Assault, Abuse and Violence called for ''the strongest possible measures'' in eliminating such crime and fraternity behavior.

The task force urged restrictions on alcohol consumption and suggested instituting programs aimed at eliminating ''the prevalent philosophies ... that lead to violence against women.''

The task force was appointed in September by Stanley Levy, vice chancellor for student affairs, after he received preliminary results from a survey mailed last spring to a computer-generated random sample of 1,460.

Of the 537 undergraduate women who responded to the survey, 16.4 percent reported criminal sexual assaults. Of those assaults, 63 percent of the offenders were identified as University of Illinois fraternity members.

''This survey tended to confirm in definite numbers much of what we had feared,'' Levy said. ''Not many campuses have been willing to do such a survey, but we wanted to know the reality.''

Of the sexual assault victims who answered questions regarding alcohol, 80.8 percent reported the offender had been drinking at the time of the incident and 71.1 percent reported they themselves had been drinking.

Other recommendations made by the task force include requiring all certified student housing units - and sororities and fraternities - to have a trained resident director of at least 24 years of age by fall 1991.

It also suggested the institution of a ''human relations'' program, to be required of all freshmen and transfer students, covering ''risk of and responsibility for sexual misconduct.''

#90037u1293 02/06/1990 ~United Press International

CAIRO, EGYPT (FEB. 6) UPI - Egyptian Foreign Minister Esmat Abdel-Meguid said Tuesday a meeting with his Israeli and U.S. counterparts has been postponed, but he denied the decision was based on a weekend attack on a bus carrying Israeli tourists in Egypt.

The United States and Israel has denied a three-way foreign ministers' meeting had been scheduled.

But Egyptian Foreign Ministry officials had said the meeting would take place in Geneva, Switzerland, after Secretary of State James Baker met in Moscow on Feb. 10-11 with his Soviet counterpart, Eduard Shevardnadze, provided that Israeli Prime Minister Yitzhak Shamir won a vote of confidence from his rightist Likud Party.

The Likud Central Committee meeting had been scheduled for Wednesday but was postponed in the wake of the tour bus attack on Israeli vacationers in Egypt Sunday in which nine Israelis were killed.

''We need some time yet before we can hold the trilateral meeting,'' state-run Cairo Radio quoted Abdel-Meguid, currently visiting Jeddah, Saudi Arabia, as saying.

''Contacts are currently under way, particularly with Baker, to set a new date for the meeting,'' the Egyptian foreign minister added.

Israel has repeatedly said no date or place has been set for such a meeting.

''No meeting is set between Mr. (Israeli Foreign Minister) Arens and Mr. Baker, or a tripartite meeting. Nothing is set,'' an Israeli Foreign Ministry spokesman said. ''There is no meeting set or planned right now.''

The ministry spokesman said only that Israel expected the next step in the peace process to be a meeting of Israeli, Egptian and U.S representatives.

Published reports in the United States said that while Baker was as keen as Egypt to push the Middle East peace process forward, the United States would not agree to any meeting until the foreign ministers of Egypt and Israel had worked out all possible obstacles.

Abdel-Meguid said the decision was not related to the bus attack that killed nine people and expressed hope the incident would not negatively influence Israeli-Egyptian relations.

''It is not the reason why the meeting with the U.S. and Israeli foreign ministers was postponed,'' he said.

Although both Israel and Egypt have not officially linked the bus attack to any deterioration in ties and hence to the peace process, Egyptian Interior Ministry sources said Egypt was doing everything possible to apprehend the killers of the Israelis, and to prevent a similar attack happening again.

An Interior Ministry source said authorities were still questioning a Palestinian suspect from Raffah, the Israeli-Egyptian border town where the Egyptian tour bus began its ill-fated journey before two masked men ambushed it.

The ministry source could not confirm reports that more Palestinians were also being detained in connection with the incident.

Israel has refused to deal with the PLO, which it regards as a terrorist organization, even though voices in the Jewish state have come out in favor of dialogue with the organization after its leader, Yasser Arafat, renounced violence and recognized Israel.

Western diplomats said Israel and Egypt, which is negotiating on behalf of the Palestine Liberation Organization, had been close to working out an agenda and participants for an Israeli-Palestinian dialogue.

#90037u1295 02/06/1990 ~United Press International

DETROIT (FEB. 6) UPI - Auto dealer satisfaction with the carmakers whose brands they sell reached a four-year low in 1989, with domestic nameplates once again trailing Asian and European makes, J.D. Power and Associates said Tuesday.

However, the California marketing information company said the drop in its Dealer Satisfaction Index is not unusual, given the current glut of unsold vehicles that has depressed dealer profits.

Power's annual study of 34 brand names showed that the top domestic franschises as ranked by auto dealers were Ford and Lincoln-Mercury - but those brands ranked below no fewer than 14 import nameplates.

Range Rover placed first, pushing Honda's Acura division to second place from the top spot in 1988. Mercedes-Benz held on to the No. 3 spot as it

did in 1988.

Chevrolet, Geo and GMC, all nameplates of General Motors Corp., scored a three-weay tie for last place, said the study, which ranks dealer satisfaction based on business terms, the manufacturer's service support, manufacturer's sales support and vehicle inventories.

Toyota's Lexus and Nissan's Infiniti dealers, which began operations late last year, were not included in the 1989 study.

But early data shows those brands may rank high in future studies, as may GM's Saturn Corp. division, which will start selling cars this fall, said J. Ferron, a partner in the Agoura Hills, Calif., company, who noted that many dealers hold multiple franchises, which enables them to more accurately compare manufacturers.

Ferron also noted that in general, dealers seem most unhappy with business terms, which includes items like investment, the number of competing dealers in the area and warranty payback arrangments.

According to data in the 1989 study, there is a strong correlation between sales, industry profits and dealer satisfaction.

But when asked why domestic brands placed below import nameplates once again, he said many dealers seem to feel they are not getting adequate sales and service support.

''There are also a lot more domestic dealers out there, so dealers may feel they are not getting the needed attention in other areas as well, like the quality of training,'' Ferron said.

''Domestic dealers tend to lag there,'' he noted. ''Manufacturers have to look at how well they are listening to dealers, and how they respond to dealer input.''

#90037u1303 02/06/1990 ~United Press International

BOGOTA, COLOMBIA (FEB. 6) UPI - Heavy rains and winds stopped rescue workers Tuesday from recovering all the bodies and examining the mangled fusilage of a small plane that crashed 80 miles west of Bogota, killing all 15 people aboard.

An official of the Civil Aeronautics Board told reporters that a travel warning had grounded helicopters ready to fly to the crash site, El Chembe one hour outside regional capital Ibague.

The small plane, a 22-seat Grumman G-1, owned by the Avianca subsidiary

Helicol, took off from Neiva, 155 miles southwest of Bogota, Monday morning for a 25-minute flight to Ibague.

The plane, carrying a four-man crew and 11 passengers, among them seven officials of a Shell Oil affiliate, Houston Oil Colombia, encountered bad weather near Ibague and lost radio contact with the control tower shortly after being diverted to a nearby airport.

Officials said the plane apparently slammed into a mountain due to poor visibility. The crash and ensuing fire killed all the people aboard and completely destroyed the plane.

The remains of the plane were spread over a 300-foot-wide area and the bodies of the victims were burned beyond recognition, El Espectador newspaper reported Tuesday.

RCN radio in Bogota said two of the bodies had still not been found by rescue teams. Missions on foot were impossible Tuesday morning because of rain-soaked mountain passes filled with mud.

This is the second Colombian plane crash this year. In January more than 70 people died when an Avianca 747 crashed on Long Island en route to Kennedy International Airport in New York.

#90037u1308 02/06/1990 ~United Press International

BATON ROUGE, LA (FEB. 6) UPI - A son and other family members mistakenly identified the corpse of a stabbing victim as being his father, then had the body shipped to a Texas funeral home for burial, police said.

Authorities said Martin Gomez, 50, was thought to have been stabbed to death outside a bus station Sunday. Police said they called the Gomez family after they found personal belongings of Martin Gomez near the corpse.

''The whole family identified him; I don't understand this,'' said family member Marilyn Bone.

The family had the body sent to Pankersley Funeral Home in Stamford, Texas and prepared to go to Texas for burial services.

On Monday night, Jeremy Gomez of Abilene, Texas, said his father called him from Earl K. Long Hospital in Baton Rouge. The elder Gomez said he had suffered a seizure and had been hospitalized Monday, police said.

''I just got through talking to my dad,'' said Jeremy Gomez. ''He's alive. Right now, I'm really shocked.''

Sam Pankersley, owner of the funeral home, said he was making preparations for the funeral when he was informed of the mistake.

''The son, Jeremy, called me and was to make arrangements Tuesday,'' Pankersley said. ''I never heard of anything like this before.''

Bone said she, too, was shocked by the family's mistake.

''I'm 64 years old, and I've never seen this happen before,'' she said. ''I don't know whose body they sent to Texas, but it wasn't Martin.''

Police said they had no idea who the stabbing victim is.

#90037u1313 02/06/1990 ~United Press International

PORTLAND, OR (FEB. 6) UPI - A male telephone caller claiming to be a police officer has phoned several women asking them to perform a series of sex acts in front of an open window to help a ''SWAT team'' supposedly stationed outside, officials said.

Police and sheriff's deputies said Monday they were investigating seven such incidents since Jan. 28 in which a man identifying himself as a Portland policeman asks the women on the phone to perform sex acts in front of the window to ''attract the subjects out of hiding'' for the ''SWAT team.''

Authorities said all of the calls appear to be from the same man.

''Members of the public are reminded that no police official would ask for the public's support through the commission of deviant acts,'' authorities said in a statement. ''If police representatives contact the public at large, it is with specific police business.''

#90037u1317 02/06/1990 ~United Press International

RICHMOND, VA (FEB. 6) UPI - The mother of an 8-year-old girl who was suspended for taking an unopened can of Billy beer to school for show and tell is outraged over the incident.

Melissa Woodfin said her daughter, Haley, should not have been suspended for taking the beer to school. The beer, regarded by many as a collector's item, was named after former President Jimmy Carter's late brother.

''I am furious,'' said the girl's mother. ''She took it for show and tell, she didn't run into a closet and pop it open.''

The girl was suspended last week from Skipwith Elementary School after bringing the beer to class. Woodfin said her daughter took the beer out of a display case from their home.

But Henrico County school superintendent William Bosher Jr. defended the decision to suspend the child, saying it was in keeping with the school system's rules on alcohol and drugs.

''As we do in all cases where there's a potentially illegal substance on the school grounds, we notified the police and the police came and met with the young person and the family,'' Bosher said.

The child must now undergo counseling and intervention under the school system's policy.

''Suspending young people is not what we are about,'' Bosher said. ''But we want to help young people understand that alcohol and drugs are not appropriate.''

#90037u1335 02/06/1990 ~United Press International

BOGOTA, COLOMBIA (FEB. 6) UPI - A Colombian arrested on drug trafficking charges was carrying an organizational chart that appeared to link ousted Panamanian dictator Manuel Noriega to the Medellin cartel, police sources reported Tuesday.

The suspect, Jesus Humberto Vega, believed to be a member of the imfamous Medellin cartel that reportedly supplies 80 percent of the cocaine consumed in the United States, was nabbed by plainclothes agents Monday in Bogota.

When he was arrested Vega had a chart containing 28 names of supposed associates, police said. The list was headed by Noriega, who surrendered to American forces following the invasion of Panama in December and is awaiting trial in Miami on drug trafficking charges.

The former dictator has long been suspected of working with Colombian drug organizations to launder drug money and ferry cocaine from the Andes to the United States.

A Bogota newspaper reported that this was the first time Colombian authorities had evidence linking Noriega and the Colombian cartels.

The chart also supposedly contained the names of individuals and companies that ran processed cocaine from Colombian clandestine laboratories through Panama and Mexico to the U.S. border, El Tiempo reported Tuesday.

Vega is reportedly wanted for smuggling six tons of cocaine to the United States and is believed an associate of Medellin cartel kingpin Pablo Escobar, the most wanted man in Colombia.

Vega is not on the U.S. Justice Department's list of the 12 most wanted Colombian drug traffickers and police did not say which U.S. state wants him.

Fourteen Colombians have been sent to the United States to face trial since President Virgilio Barco re-established extradition to battle warring drug cartels last August.

Also on the drug front, El Tiempo reported that U.S. Ambassador Thomas McNamara told Interior Minister Carlos Lemos Simmonds the United States is confident President Bush will be safe during his five-hour visit to Colombia on Feb. 15.

Bush is to meet with the presidents of Colombia, Peru and Bolivia to devise an international strategy to battle drug trafficking.

The president's trip has been haunted by press reports the drug traffickers are planning to assassinate him. Two weeks ago CBS reported the cartels were plotting to shoot down the president's plane with SA-7 shoulder-fired missiles as he arrived in Cartagena, the site of the summit.

Some 5,000 security agents are prowling the streets of the colonial city, checking identification and preparing for the high level visit. The summit is expected to take place in a visitors' mansion on Manzanillo Island, in the bay off Cartagena.

In Bogota, the month-long torture and killing spree continued as authorities found two more bullet-riddled bodies in the south of the capital Monday morning.

Police attribute the killings, which have claimed more than 50 lives in Bogota and Medellin in recent weeks, to battles between rival drug traffickers.

Many of the victims have police records of homicide, terrorism and drug trafficking, authorities say.

Officials in December said they feared a civil war between followers of slain drug king Jose Gonzalo Rodriguez Gacha, cut down by police on Dec. 15 in northern Colombia.

#90037u1347 02/06/1990 ~United Press International

NEW DELHI, INDIA (FEB. 6) UPI - A powerful bomb exploded Tuesday inside a movie theater in northern Uttar Pradesh state, killing five patrons and injuring 36 others, the Press Trust of India reported.

The news agency quoted police as saying they were not ruling out the involvement of militant separatist groups in the bomb blast at a cinema in Haldwani, 160 miles northeast of New Delhi.

Police, however, did not identify any militant group as responsible.

India faces separatist violence in the nearby state of Punjab as well as the northern state of Jammu and Kashmir.

The powerful bomb exploded as patrons watched a movie, killing five people and wounding 36 others, the news agency quoted officials as saying.

It said some of the wounded were in serious condition. The news agency said the victims were taken to a nearby hospital, but gave no further details.

The explosion occurred as thousands of Indian security forces were deployed throughout the Moslem-dominated Kashmir Valley to smother a widespread pro-secession movement spearheaded by fundamentalist Moslem militant groups. The militants want the Moslem area to secede from mostly Hindu India.

Since Jan. 20, nearly daily violence has left more than 90 people dead, according to officials who asked not to be identified. Most victims have been shot by security forces during pro-secession demonstrations.

Authorities eased curfews across the valley following improvement of the law and order situation.

The region's 3 million Moslems contend that India broke a pledge to hold a plebiscite to decide whether Kashmir should be part of India, part of Moslem Pakistan or independent.

Similarly, Sikh separatists in Punjab have been waging a bloody campaign since 1983 for a separate theocratic state. More than 6,000 people have died in the Sikh struggle during the past six years. No major incidents have been reported in Punjab, however, since the new government of Prime Minister V.P. Singh assumed power in December.

Moslem and Sikh militant groups allege their interests have consistently been ignored by the Hindu-dominated central government.

Moslems and Sikhs make up 12 percent and 2 percent respectively of India's

820 million people, most of whom are Hindus.

#90037u1382 02/06/1990 ~United Press International
WASHINGTON (FEB. 6) UPI - Assets at savings institutions, excluding those taken over by regulators, plunged by $6.5 billion in November for the sixth straight monthly decline, the government said Tuesday.

''Most of the shrinkage was likely due to thrifts' continuing strategy to reduce assets to comply with new capital requirements,'' said James Freund deputy chief economist for the Office of Thrift Supervision.

Assets at these thrifts declined by $3.5 billion in October, the agency said in a monthly report.

When including the savings institutions that are under federal conservatorship, the assets of all thrifts insured by the government fell by $8.8 billion in November compared to $6.3 billion in October.

''At the end of November, there were 275 institutions in the conservatorship program with total assets of $86.7 billion,'' the OTS said. ''Assets at conservatorship thrifts shrank $2.3 billion in November, exclusive of the effect of new conservatorships and liquidations.

''Deposit outflows were $2.2 billion in November, excluding interest credited, and $2 billion with interest credited,'' the agency said of the thrifts seized by the government.

The OTS also reported:

-Deposit balances at thrifts not under conservatorship increased slightly in November, including $2.7 billion of interest credited, while net withdrawals, excluding interest, were just under $2.7 billion, down from $3.9 billion in October and $7 billion in November 1988.

-Including savings institutions under conservatorship, net new deposit withdrawals stood at $4.9 billion in November. Interest credited was $2.9 billion, which resulted in a $1.9 billion overall decline in deposits, compared to a $3.3 billion fall in October.

-Mortgage-pool securities held by ''non-conservatorship'' thrifts declined by $4.5 billion in November, while mortgage holdings dropped by $1.8 billion and non-mortgage loan securities fell by $500 million, similar to October results.

-Savings institutions not run by the government originated $14.3 billion in mortgage loans in November, a decline of 22 percent from the previous

year, while borrowings declined by $7.7 billion - twice the October drop.

#90037u1395 02/06/1990 ~United Press International

WARSAW, POLAND (FEB. 6) UPI - The most prominent architects of the agreement to legalize the Solidarity movement said on its first anniversary Tuesday that the accord had paved the way for the dismantling of communism in Poland and the East bloc.

Bronislaw Geremek, the chairman of the Solidarity parliamentary caucus, said that after only a year, the round table accords that led to the formation of the Solidarity-led government ''are a historical act.''

''They made the process of changes that swept through Poland and Central Europe,'' he was quoted as saying by the official news agency PAP.

It was Feb. 6, 1989 when Interior Minister Czeslaw Kiszczak, dozens of communist officials and Solidarity leader Lech Walesa, accompanied by several union activists who were recently freed from prison, sat down at a huge oak table in the captial's 19th century palace.

As a result of the talks, the Solidarity union became legal and authorities agreed to hold semi-democratic elections to Parliament on June 4.

The union won by a landslide in the elections and created the first non-communist coalition government in four decades in the East bloc, led by Solidarity activist Tadeusz Mazowiecki.

Moscow did not respond with the threats some feared, which encouraged other Eastern European countries to follow the road Poland had taken by agitating for democratic reform, the officials said.

Geremek said Poland's round-table talks became a model on how to implement democratic reform in a peaceful way.

''The fact that the idea was very catching in the whole Central Europe also points to the significance of the Polish round-table,'' he said. ''Attempts to implement it have been undertaken in all these countries.''

Some political experts believe the other East bloc countries outpaced Poland in their reforms because they will hold full, democratic Parliamentary elections this year.

Under the Polish round-table accord, free elections were scheduled to be held in 1993. But because of the sweeping political changes in the region, Solidarity is considering holding them sooner.

Andrzej Stelmachowski, marshall of the senate, said the changes, such as the disbanding of the Polish Communist Party last week, ''may put the issue of early Parliamentary elections on the agenda.''

Some communist Polish officials argue that to speed up Poland's pace of reform may endanger the Polish model of peaceful change. But the accelaration of reforms appears imminent, despite resistence among the communist members in the Solidarity government, observers say.

Authorities recently announced elections to regional governemnts will be held in April, one year ahead of schedule.

#90037u1412 02/06/1990 ~United Press International

NEW YORK (FEB. 6) UPI - NBC won the Nielsen ratings race for the 84th week out of the last 85, with help from David Letterman, Art Carney and a ''Lethal Weapon,'' it was reported Tuesday.

NBC was the most-watched network on Monday, Wednesday, Thursday and Saturday nights, with ABC taking Tuesday and Friday and CBS holding onto Sunday, despite some strong counter-programming.

In the odd couple department, the two most-watched programs on network television Sunday night were ''60 Minutes'' (CBS) in fifth place and ''America's Funniest Home Videos'' (ABC) in seventh place.

Among the Sunday movies, NBC's airing of the theatrical cop film, ''Lethal Weapon,'' was the winner in 12th place, with ABC taking 19th place in the movie time period with the ''Sammy David Jr. 60th Anniversary Celebration.'' The first installment of the CBS miniseries ''Family of Spies'' ranked 28th.

The David Letterman anniversary show on Thursday night came in 17th, but NBC has a lock on Thursday nights anyway.

''Where Pigeons Go To Die,'' the Michael Landon project starring Art Carney, ranked 24th, tied with part of its Monday night competition on CBS ''Murphy Brown.''

There was good news and disaster for CBS in the new series department. ''City'' starring Valerie Harper tied for 35th with its lead-in, ''Major Dad,'' coming in ahead of ''The Hogan Family'' (NBC), in 37th. ''The Hogan Family'' used to be called ''Valerie'' after its original star, Valerie Harper.

The disaster was ''Grand Slam,'' which had ranked 15th when it was

introduced in a special premiere following the Super Bowl the previous week. Last week, in its regular Wednesday time slot, it plummeted to a tie for 68th. The show had a 30 share in its premiere, but sank to a 13 share last week.

''The Simpsons'' continued as a winner for Fox, in a tie for 31st place - the highest rated Fox show of the week.

NBC won the ratings race for the week ending Feb. 4 with a 15.0 rating and a 24 share, according to the A.C. Nielsen Co. ABC took second place with a 13.5 rating and a 22 share, while CBS was third with an 11.7 rating and a 19 share.

The 20-week-old season-to-date ratings show NBC with a 14.9 rating and a 25 share, ABC with a 13.0 rating and a 22 share, and CBS with a 12.3 rating and a 20 share.

In the evening news ratings, ABC's ''World News Tonight'' with Peter Jennings continued as No. 1 with an 11.1 rating and a 20 share. ''NBC Nightly News'' with Tom Brokaw came in second for the fourth week in a row with a 10.4 and a 19 share and ''CBS Evening News'' with Dan Rather remained to the cellar with a 10.0 rating and an 18 share.

Each ratings point represents about 921,000 households and a share is the percentage of TV sets tuned to a particular show.

The top 10 programs for the week ending Sunday, Feb. 4, according to the A.C. Nielsen Co., were:

1. Roseanne (ABC)
2. Cheers (NBC)
3. The Cosby Show (NBC)
4. Golden Girls (NBC)
5. 60 Minutes (CBS)
6. Empty Nest (NBC)
7. America's Funniest Home Videos (ABC)
8. Wonder Years (ABC)
9. Coach (ABC)
10. Unsolved Mysteries (NBC)

#90037u1418 02/06/1990 ~United Press International

LONDON (FEB. 6) UPI - Britain's highest-ranking naval officer said Tuesday women will soon serve on Royal Naval vessels, ending a centuries-old tradition under which a figurehead was the only female aboard Britain's fighting ships.

First Sea Lord Adm. Julian Oswald predicted the decision would be happily accepted by male swabbies, despite a belief among old sea dogs that the presence of a woman on a ship can bring bad luck.

''A few sailors are superstitious but it is not only women that are bad luck at sea,'' he told a news conference. ''It is vicars and black cats and chaps with double-barreled names and all sorts of things, so I don't think we can exclude them on that ground.''

Armed Forces Minister Archie Hamilton made the announcement in Parliament late Monday, saying the decision was rooted in ''the Royal Navy's manning position and in the light of developments in other navies and domestic-social trends.''

Despite the looming sailor shortage, conservative legislator and former naval serviceman Jonathon Sayeed criticized the decision because ''jealousies and tensions'' could erupt below decks.

Hamilton explained that seawomen - who will be volunteers from the Women's Royal Navy Service - would have separate quarters and bathrooms from the men, but for the first time could do hazardous duty.

''They will be in potential combat roles,'' added Royal Navy spokesman Nick Smith. ''How do you differentiate who will be hit in a barrage?''

The decision ends one of the last all-male bastions in Britain, where the Wrens were initially created for administrative duties to ''release a man for sea service'' during World War I. Other navies with seawomen include the Dutch, Norwegian and Israeli.

The first Wrens will go to sea next week and Smith said they could comprise a maximum of 20 percent of the crew, but would probably reach about 15 percent by year's end. Postings will be available aboard the aircraft carriers HMS Invincible and HMS Ark Royal, a commando landing vessel named the HMS Fearless, and various other training ships and frigates, he said.

''Initially I think it is very frightening, but on a ship you have a job to do and I think you have not got much time to think about anything else '' 2nd officer Tella Franklin said about her expectations of starting work as a weapons engineer aboard the HMS Norfolk next week.

Oswald said Britain could yet see its First Sea Lady, but added: ''That's if they don't mind waiting 43 years, which is how long it took me.''

#90037u1421 02/06/1990 ~United Press International

NEW YORK (FEB. 6) UPI - A jury Tuesday began deliberating the fate of reputed Mafia boss John Gotti, who is accused of ordering the shooting of a union official in an assault case that could send him to prison for life.

In more than two hours of instruction to the jurors, the judge stressed that Gotti's alleged position at the helm of the Gambino crime family, the nation's most powerful organized crime structure, does not give them license to convict Gotti if the government has not proven its assault case ''beyond a reasonable doubt.''

''With regard to La Cosa Nostra, or the Mafia ... being associated with such an entity is not a crime in itself and membership is not a substitute of proof of the elements of the charges contained in this indictment,'' Acting Justice Edward McLaughlin told the jury of seven men and five women at state Supreme Court in Manhattan.

Gotti, 49, reputed godfather of the Gambino crime family, is accused of ordering John O'Connor's shooting in retaliation for the trashing of a mob-linked restaurant built with non-union labor.

The judge also announced that four alternate jurors, who have been sequestered with the rest of the panel for the entire 12-day trial because of fears of jury tampering, will not be released immediately.

A court source said the alternates were being held as a security precaution because they have become friendly with their fellow jurors and have information that could be valuable to someone interested in tampering with the sitting panel.

In summations Monday, Assistant District Attorney Michael Cherkasky told jurors the lawyer for Gotti was nothing more than a mob henchman who lashed out at the government when it threatened his client's ''dark power.''

Gotti's lawyer, Bruce Cutler, claimed prosecutors had whipped up a ''corrupt'' case built on Mafia hysteria. He urged the jury to restore the court's ''integrity'' by acquitting Gotti of assault and conspiracy.

The May 7, 1986, shooting of O'Connor, a business agent for Carpenters Union Local 608, was allegedly carried out at Gotti's behest by a murderous Irish gang known as the Westies.

With one more conviction, Gotti, a convicted killer and hijacker, could be branded a ''persistent felon'' and sent to prison for life. But Gotti has consistently slipped from the government's grip in recent years.

In 1985, he went to trial for assaulting a refrigerator repairman and robbing him of $325 during an argument over a parking space in Queens. The

repairman learned who Gotti was, checked himself into a hospital, developed amnesia and said he could no longer remember who hit him. The judge had no choice but to dismiss the charges.

Gotti also was acquitted in 1986 of running an 18-year racketeering enterprise that included gambling, loansharking, truck hijackings, armored car robberies and three murders from 1968 to 1985.

NEW BRUNSWICK, N.J. (FEB. 6) UPI - Johnson & Johnson, the pharmaceutical and personal care products giant, Tuesday reported fourth-quarter net income rose 10.3 percent to $203 million, or 61 cents a share, from $184 million, or 55 cents a share, in the year-earlier quarter.

For all of 1989, Johnson & Johnson said its net income climbed 10.9 percent to $1.08 billion, or $3.25 a share, from $974 million, or $2.86 a share, in 1988.

Total sales for 1989 were $9.76 billion, up from $9 billion the previous year.

Johnson & Johnson Chairman Ralph Larsen said 1989 was ''the most profitable year in Johnson & Johnson's history,'' and credited sales growth in the company's pharmaceutical divisions for the increased profits.

Johnson & Johnson products include such brand names as Tylenol, Mylanta and Ortho.

KEY WEST, FL (FEB. 6) UPI - Officials of this small free-wheeling island resort say they've learned from the mistakes of Fort Lauderdale and Daytona Beach and will try to control Spring Break before the annual collegiate influx begins to control the city.

The Key West City Commission has been spreading the word with sharply worded letters to 210 colleges and universities east of the Mississippi River, warning students to behave or stay at home.

''We're not saying don't come; you're not welcome,'' said Assistant City Manager Ron Herron, who wrote the letter at the request of the commission. ''We're just saying there are things you should be aware of.''

For instance, officials said they will not tolerate underage or public drinking, sleeping on the beach or overcrowded hotel rooms.

The letter said students also should be aware that Key West hotels cost $100 to $300 a night and the only campground is usually full.

''If they have a place to stay and they can follow our rules, then they're welcome,'' said Commissioner Jimmy Weekly.

About 20,000 students came to the 2-by-5-mile island of 26,000 residents last year and officials say twice that many may arrive this year.

This year's message contradicts the city's famed anything-goes reputation and serves as another indication that it is evolving from a bohemian cultural enclave into a middle class hideaway.

But the transformation is not one that sits well with all islanders.

Anthony ''Capt. Tony'' Tarracino, a retired tavern owner who was elected mayor in November, said the city is being too harsh on the students.

''We swallowed goldfish years ago and had sex in rumble seats,'' he said. ''Youth has to be served.''

The Spring Break population in Key West has increased every year since 1986, when Fort Lauderdale - the Spring Break capital for decades - imposed a public drinking ban and other restrictions that saw the rush plummet from 350,000 at the time to 50,000 last year.

Daytona Beach staged a public relations blitz that attracted a lot of the college Easter vacation business, but last year officials there asked Fort Lauderdale for tips on controlling the students.

Some Key West officials say they want to nip that potential problem in the bud. A tersly worded letter from the city's hotel and motel association to the Spring Break Advisory Task Force said the students bring little in revenue and damage the resort's image.

''If not confronted,'' it said, ''Spring Break could take Key West on a wild roller coaster ride where the last leg, inevitably, is straight down to ground zero.''

The task force made 14 recommendations to the city to help with control during Spring Break but none was designed to keep students away, said Kathy Woodman, an assistant city manager who is citizen liaison to the task force.

''This is not a warning. It is just to advise the students that this is a small island, it is fragile and it is expensive,'' she said.

''The letter was done not to discourage any of the Spring Breakers, but just to let them know how it really is here so that the student who has $20 or $30 a night for a hotel knows our rooms don't go for that,'' she said. ''We don't want them to be discouraged or turned back and not enjoy Spring Break.''

#90037u1433 02/06/1990 ~United Press International

CAPE TOWN, SOUTH AFRICA (FEB. 6) UPI - Foreign Minister Roelof ''Pik'' Botha accused the Rev. Jesse Jackson of double-dealing on sanctions Tuesday and said the black civil rights leader stood no chance of stealing the limelight from the government on its recent racial reforms.

Botha also said Jackson, who arrives Wedesday on a weeklong tour, had chosen an inopportune time to visit South Africa, lending fuel to speculation the government is unlikely to free jailed black leader Nelson Mandela while the former presidential candidate is still around.

''In retrospect, it might have been better if he had come at a more opportune moment, I must be honest with you,'' Botha said at a briefing.

''I would have liked to have had him here in January. That was my original suggestion and he knows it. After all, he telephoned and complained'' that earlier visa requests had been turned down, Both said.

Jackson has not visited South Africa in a decade.

''It is a fact that we are, right at this moment, in the midst of important decisions and work, and it's not always easy to handle all the fanfare for some of our American friends. ... Well, if it's got to be done let it be done,'' Botha said.

Jackson, a vocal critic of South Africa's apartheid policies and an advocate of sanctions against Pretoria, held discussions with British Prime Minister Margaret Thatcher in London Monday before flying to Lusaka, Zambia, en route to South Africa. Jackson said he and Thatcher ''agreed to disagree.'' Jackson maintained that sanctions must remain in place against Pretoria despite last week's reform package.

''It's a pity that he made these remarks about sanctions, because he made exactly the opposite remarks to my ambassador'' in Washington, Botha fumed.

''Exactly the opposite. And I think the time has come that Jesse and I must talk straight to each other, and the time has come that I must tell you that in private talks he's one person, and the moment he sees Mr. (Archbishop Desmond) Tutu or (the Rev. Allan) Boeska, he's another peson.

''I really think the time for this kind of nonsense also should end with him. Through you, I make an appeal to him to make up his mind about where he stands in life,'' Botha said.

The foreign minister brushed away any suggestion of Jackson grabbing even a slice of the credit for Mandela's release or for any other reforms de Klerk announced last week.

De Klerk lifted a 30-year ban on the African National Congress, said Mandela would be freed soon, suspended judicial executions and lifted restrictions on more than 370 political activists.

''He can come and enjoy the aftermath, but certainly not claim any credit for having been a player on the field,'' Botha said.

#90037u1441 02/06/1990 ~United Press International

(FEB. 6) UPI - Fierce debate erupted on the second day of a major Soviet Communist Party leadership meeting in the Kremlin. President Gorbachev set the stage for the intra-leadership battling with a proposal yesterday to thrust the Party into electoral battle with other parties. A purge of some hard-liners is expected at the plenum, a full meeting of the party leadership.

Secretary of State Baker arrived in Prague today amid speculation that he will announce new aid for Czechoslovakia before traveling on to Moscow. Baker is expected to meet with Czech President Vaclav Havel... as well as church and opposition leaders. U-S officials have left open the possibility that Baker will announce new aid to Czechoslovakia.

British rescue workers have found a body believed to be the pilot of a U-S military plane that crashed in Wales today. At the same time, rescue workers are combing the wreckage of a U-S military plane that crashed hours earlier north of London, leaving one crewman dead and another missing and presumed dead. The two crashes prompted the U-S Third Air Force to suspend for the day all U-S tactical flight operations in Britain.

A French newspaper says the release of a pro-Iranian terrorist is being linked to the fate of U-S hostages in Lebanon. The French holding of a Lebanese man convicted of trying to assassinate a former Iranian prime minister has been a source of tension between Paris and Iran. President Bush reportedly asked French President Mitterrand if he planned to settle the affair, while linking it to the possible release of U-S hostages.

#90037u1442 02/06/1990 ~United Press International

WASHINGTON (FEB. 6) UPI - The Defense Department informed Congress Tuesday it has offered to sell the government of Turkey 60 ''LANTIRN'' night-navigation and targeting pods for their F-16 fighters for $205 million.

The Air Force's LANTIRN, or Low Altitude Navigation and Targeting Infrared System for Night, consists of two separate avionics pods that are mounted under the fuselage of F-16s to enable the aircraft to penetrate enemy air defenses at low altitude at night to conduct precision ground-attack missions.

''This sale is part of Turkey's force modernization program,'' the Pentagon said in a statement. ''This sale will not adversely affect either the military balance in the region or U.S. efforts to encourage a negotiated settlement of the Cyprus question.''

The eastern Mediterranean island of Cyprus has been divided between ethnic Greeks and Turkish communities since 1963. Turkish troops have occupied northern Cyprus since 1974.

Prime contractor for the equipment in the sale will be Martin Marietta Corp. in Orlando, Fla.

#90037u1443 02/06/1990 ~United Press International

WASHINGTON (FEB. 6) UPI - Three senators called Tuesday for an end to virtually all U.S. aid to El Salvador to force the military to uphold human rights and pressure both sides in the civil war to negotiate a peaceful settlement.

The proposal by Sens. Edward Kennedy, D-Mass., Barbara Mikulski, D-Md., and John Kerry, D-Mass., has little chance of approval in Congress, and if it passed, President Bush would have strong Republican support in upholding a veto.

But the proposal reflects the widespread impatience of many members of Congress with El Salvador's limited progress in enforcing democratic and human rights standards while fighting a civil war with leftist guerrillas that the administration says are armed and supported by Nicaragua and Cuba.

''We call for a total cutoff of U.S. military aid and a partial cutoff of economic aid, unless and until that country undertakes long overdue reforms and enters serious negotiations to end its brutal decade-old civil war,'' Kennedy said at a news conference.

The United States is providing $315 million in economic and military aid to El Salvador this year, and Bush has asked for $91.4 million in military

aid and $283.6 million in economic aid in the next budget.

The bill calls for both sides to agree to negotiations through the United Nations without conditions. It would permit a resumption of aid upon such conditions as the prosecution of those responsible for the killing of six Jesuit priests in November - Salvadoran soldiers are being held in an investigation - and that broad standards of human and judicial rights be in force.

''This makes clear to both sides that there is no military solution,'' Kerry said.

''Enough is enough,'' Mikulski said.

#90037u1450 02/06/1990 ~United Press International

(FEB. 6) UPI - Police in St. Louis say a 16-year-old high school sophomore is in serious condition with skull fractures after being beaten by students who got off a school bus and attacked him. Authorities say the incident began when a group of youngster pelted a school bus with snowballs yesterday. When the bus circled around and parked, a group of students ran from the bus and charged the snowball throwers. They caught one youth and beat him.

Police in New York City say an elderly woman was struck and fatally injured by a hit-and-run driver in Times Square. They say an unidentified man ran to the fallen woman and stole her purse as she lay dying in the street. Police say the woman was believed to be in her 70's. NO one went to the woman's aid until several construction workers from a nearby project came down from a high-rise, erected a barricade to keep traffic away from the woman and called police.

#90037u1493 02/06/1990 ~United Press International

CONCORD, CA (FEB. 6) UPI - The remnants of the PTL television ministry officially moved to California Tuesday, ending another chapter for the scandal-scarred empire founded by imprisoned evangelist Jim Bakker.

''Heritage Today,'' called ''The Jim and Tammy Show'' before Bakker's cataclysmic fall from grace three years ago, aired for the first time from the studios of Channel 42 in Concord with the Rev. Sam Johnson introducing the program's new hosts.

Johnson is expected to step down as president of Heritage Ministries - formerly PTL - within a few days, although he plans to continue as pastor of Heritage Church. He is under indictment on perjury charges for lying to

a federal grand jury that investigated Bakker.

Johnson did not mention his indictment in a rambling monologue that introduced Tuesday's telecast. He talked instead about his call to become a missionary in 1966 and another call from God to join PTL in 1985.

''We believed God would be pleased if we joined PTL,'' Johnson said. ''I couldn't begin to see what God had in store for us at that time or what would unfold so dramatically - but that's ancient history.''

Johnson then introduced the program's new hosts, Rich and Robin Wilkerson, of Tacoma, Wash.

''God has brought to Heritage Ministries new hosts to lead us from this day on,'' Johnson said. ''I feel the annointing of the Holy Spirit. The world doesn't understand that, our critics don't understand that, the press doesn't understand that, the media doesn't understand that.''

Robin Wilkerson said the couple will tour the nation, taking the former PTL show into churches.

''My vision for Heritage Ministries is to take this work on the road and go out to the people and preach at rallies,'' she said. ''We're going to be taking the gospel to other lands. It's our desire to see people saved.''

No reason was given for moving the program from Charlotte, N.C., although Heritage Ministries is deeply in debt to PTL, which plunged so seriously into debt after Bakker stepped down that it ended up in bankruptcy court and is now padlocked.

Johnson said Heritage Ministries gave $20,000 to former program host Ron Aldridge, who last week was laid off, so he could produce a cassette of gospel music.

''Ron and I have had lots of conversations,'' Johnson said. ''We have talked, we have shared, we have laughed and we have cried. I in particular encouraged Ron to go to a recording studio. I said, 'Let us invest in your future. Let us put up front $20,000.' We did that.''

Johnson said Aldridge, who was not on Tuesday's show, intends to travel the nation, performing in churches.

Three former PTL singers are moving with the program to California. But the move of the program signals the end of another chapter in the sordid PTL saga, which saw the ministry's founder sentenced to 45 years in prison last fall.

Bakker is serving his time at the Federal Medical Center in Rochester,

Minn. His wife, Tammy Faye, is trying to keep his ministry going in Orlando, Fla.

#90037u1495 02/06/1990 ~United Press International

WASHINGTON (FEB. 6) UPI - The government Tuesday accused the former chairman of a Colorado savings and loan, 11 members his family and two acquaintances of accumulating a major position in the thrift without making proper notification.

The Office of Thrift Supervision alleged Tom Rapp, his relatives and the others illegally acquired more than 40 percent of the common stock of First Northern Savings and Loan, of Greely, Colo., without giving 60 days notice. The agency said notice must be given whenever 25 percent or more of an institution's voting stock is acquired.

The OTS said that in July 1985 the Rapp family acquired 53,500 shares of voting stock in First Northern, and that combined with an earlier accumulation of stock, gave the family a total of 89,500 shares - or 44.75 percent.

The agency's complaint also alleged that in April 1986, Rapp "made misrepresentations about the extent of his and his family's" stock holdings in First Northern to state and federal regulators.

The OTS said it is "seeking preliminary and permanent injunctions that would require the defendants to sell their ... stock and would keep them from acquiring 10 percent or more of the voting securities of any federally insured depository institution without first giving the requisite notice to the appropriate regulator."

The agency also said the Rapp case "is the second enforcement action OTS has instituted this year for violation of the control act. In 1989, OTS completed 13 actions for violations of the law."

#90037u1504 02/06/1990 ~United Press International

GENEVA (FEB. 6) UPI - The 40-nation Disarmament Conference resumed talks Tuesday on a chemical weapons ban, negotiations said by delegates to have reached the ''home stretch.''

Austria and the Netherlands both sent their foreign ministers to the start of the forum's 1990 session to make rival bids to host a proposed verification commission to monitor the hoped-for treaty.

U.S. and Soviet officials for their part said bilateral efforts are being

accelerated to produce a joint draft treaty text to present to the full conference as soon as possible.

Soviet delegate Sergei Batzanov told reporters the treaty should be completed ''in one or two years.''

American officials said President Bush has assigned ''high priority'' to a chemical weapons convention and is pursuing his proposal for 80 percent cuts in superpower arsenals even before a treaty is completed.

U.S. Secretary of State James Baker will discuss the issue in Moscow this week, the officials said, and bilateral U.S.-Soviet negotiations are scheduled to resume in Geneva Feb. 20, parallel to the multilateral discussions.

There is a general belief that a preliminary superpower agreement could well be achieved this year, with accord on a full treaty by the end of 1991.

Chemical arms have been on the conference agenda for 20 years, but real progress has been made only in the past two years, after Soviet leader Mikhail Gorbachev accepted the principle of on-site international inspections.

''With enough political will, the home stretch of the talks should be within reach,'' Dutch Foreign Minister Hans Van der Broek said at the conference Tuesday.

Van der Broek and Austrian Foreign Minister Alois Mock both presented offers by their countries to host the inspection commission to monitor an eventual ban on development, production and stockpiling of the weapons.

Mock presented detailed documentation describing existing facilities for an international verification agency with anywhere from 300 to 600 staff.

The Dutch foreign minister, however, simply said the Netherlands ''would like the organization to be based in the Hague.''

A big problem with verification for the United States and other Western countries, now that they have secured Soviet agreement to international inspections, is that it could be too intrusive.

Western negotiators said ways have to be found to protect industrial secrets while still ensuring that weapons are not being produced.

A Soviet delegate said the new era in arms control has in fact created an unexpected problem.

''It is no longer a question of hiding what one has, but of possibly finding out what one hasn't got,'' he said.

President Bush's proposal is for early U.S.-Soviet agreement on reducing chemical arms by 80 percent initially, with complete destruction done gradually over a 10-year period, conditional on the treaty being signed and ratified by all countries with chemical weapons capability.

That would be a safeguard against non-nuclear nations producing and deploying what is known as ''the poor man's nuclear bomb.''

#90037u1507 02/06/1990 ~United Press International

MILWAUKEE (FEB. 6) UPI - A mother suspected of placing her 7-week-old son in a plastic bag and dumping him in a garbage cart was bound over for trial Tuesday and released on a $1,000 bond.

The woman, Cassandra Burdine, 20, was charged Monday with second-degree recklessly endangering safety, police said. She left the boy in the cart Sunday night after a fight with the child's father, police said.

Circuit Judge Michael Sullivan bound Burdine over for trial and set a preliminary hearing for Feb. 21. She was released after posting a $1,000 signature bond.

The baby was taken to a hospital after being recovered from the cart but appeared to be uninjured. The infant and the mother's other child were being cared for by relatives, authorities said.

Assistant District Attorney John DiMotto said Burdine was not charged with a more serious crime because she was not trying to kill the child. He noted that the plastic bag was ventilated.

Police said Burdine, upset that the father was not spending enough time with his son, called a friend of the child's father Sunday, saying that if the father ever wanted to see the child again, he should look in the garbage.

The friend then called police, who found the child.

#90037u1509 02/06/1990 ~United Press International

(FEB. 6) UPI - TODAY'S PEOPLE

BASEBALL SUIT: Kevin Costner has made his share of baseball movies but he filed suit against a company for portraying him as a baseball player in

the video version of ''Chasing Dreams,'' an obscure film he made early in his career. Costner, star of the baseball flicks ''Bull Durham'' and ''Field of Dreams,'' is seeking unspecified damages for fraud from Prism Entertainment Corp. for creating ''Chasing Dreams'' ads that showed him in a baseball uniform and said he had a major role in the film. Costner's suit says his role actually was an insignificant one and not that of a baseball player. Costner and Universal Pictures are seeking a court order to stop the use of his image in the ads and they claim they are entitled to profits from rentals and sales of the video. The movie in question opened several years ago in only 40 theaters in the Midwest.

LEONA SPEAKS: How does Leona Helmsley feel about her conviction for federal tax evasion? ''I am innocent, I am innocent, I am innocent,'' the teary-eyed Helmsley proclaims in an interview taped for broadcast Wednesday on the Fox network's ''A Current Affair.'' ''I'm not going to jail,'' the New York hotel queen says, even though she's been sentenced to four years and ordered to pay $1.2 million in back taxes. ''I've done nothing,'' said Helmsley, who is appealing her federal conviction while awaiting trial on state charges. ''I cannot believe that the system in the United States of America has stopped working. I would like to know whose money we stole - whether it was children, widows, whose. No money has been stolen.'' The interview was Helmsley's first for television since she was convicted in December.

GOBIE SPEAKS, TOO: Steve Gobie says he's talking about his sexual relationship with Rep. Barney Frank, D-Mass., because someone has to do it. Gobie, who said he was Frank's lover and that the congressman knew he was running a prostitution ring from his apartment, held a news conference in New York Tuesday to promote his story in Penthouse magazine. ''If I hadn't been so sure that this story was going to come out publicly, I would never have stepped forward into the public eye,'' Gobie, 33, said. ''This isn't something that I wanted to do. I felt forced into the situation. The story was coming out anyway and this was my story being told.'' In the Penthouse story, Gobie says Frank dreamed about being a paid male escort, expressed an interest in group sex and declined to be tested for AIDS because he did not want to be put in a moral dilemma. Frank has denied the allegations.

NEWS FROM HOME: Exiled South African journalist Donald Woods, whose friendship with martyred black activist Steve Biko was portrayed in the movie ''Cry Freedom,'' is encouraged by the recent news from his homeland. The South African government recently lifted its ban on Woods and three anti-apartheid groups and plans to release black leader Nelson Mandela soon. ''It was a weird feeling to be able to speak to my own people again '' Woods said Monday in a lecture at Johnson & Wales University in Providence, R.I. ''I sent a column off immediately. It began, 'As I was saying before I was so rudely interrupted ...''' Woods, who has been living in London since leaving South Africa in 1978, is director of the

Lincoln Trust, a foundation that provides the media with information about apartheid.

WELCOME TO WELKLAND: The folks in Strasburg, N.D., are bubbling over about plans to restore the boyhood of Lawrence Welk, the champagne music maker. Restoration of the Welk homestead, which includes a house, summer kitchen, buggy house/granary and an outhouse, is scheduled to start April 15 and officials hope to have it finished in September. Work on a barn that eventually will house a museum and visitors center should be completed by June 1991 and an old blacksmith shop is expected to be rebuilt. ''People in the area would like to preserve their German-Russian heritage and also to honor Lawrence Welk for numerous things he has done and the fact that he has never forgotten his roots, his background,'' said Sharon Eiseman, secretary of Welk Heritage Inc. Welk, 86, currently lives in Los Angeles.

#90037u1533 02/06/1990 ~United Press International

FORT WORTH, TX (FEB. 6) UPI - American Airlines Tuesday unveiled a $276 million expansion plan at Dallas-Fort Worth International Airport which would add 100 daily flights, increase its terminal capacity to 55 gates and give it complete use of two of the four terminals at the second busiest airport in the world.

The nation's largest airline, which makes D-FW its home, said the new plan would give it enough room to expand at the airport while the community resolved the long-term growth of the facility which opened in January 1974.

"This is an interim step to accommodate our immediate growth needs at the Dallas-Fort Worth hub," said Donald J. Carty, American's executive vice president. "In the long term, we would like to build a major new terminal on the west side of the airport."

Under the ten-phase plan, American would have complete use of terminals 2E and 3E on the east side. In the next two years, American would develop ten additional gates at 2E, which would increase its total capacity to 55 gates. The new gates would help add 100 daily flights, increasing its

total daily operations at D-FW to more than 520 flights.

An express people mover system would link 2E and 3E terminals. Terminal 2E would also have a 1,100-vehicle parking garage with a new customs facility on top of it.

American would build a new parking area for its commuter subsidiary, American Eagle, with room for 24 planes and a new maintenance hangar for six planes.

The new project would include a new 180,000-square-foot cargo terminal. Basic design work and early construction have begun on several phases, the airline said. The entire project is set for completion by January 1992.

"The Dallas-Fort Worth hub is the heart of our growing route system and it is vitally important that we find ways to expand our facilities here so that we can add more flights and strengthen DFW's competitive position in world aviation markets," Carty said.

GENEVA (FEB. 6) UPI - Polish President Wojiech Jaruzelski conceded Poland had ''serious deviations'' in its past human rights record but assured the U.N. Commission on Human Rights Tuesday that the country is committed to reform.

Jaruzelski addressed the current annual session of the U.N. human rights agency at the end of a three-day visit to Switzerland.

''No nation can boast of a sinless past,'' Jaruselski said, noting human rights violations in other European countries after World Wars I and II.

In his own country, Jarulzelski said ''serious deviations from the standards set by the international community occurred'' with ''unlawful repression or outright crimes.

''Nowadays, Poland has no reason to dodge the verdicts of the international public as regards the observance of human rights,'' he said. ''It will also apply in practice the standards and recommendations of the Commission on Human Rights.''

Jaruzelski's appearance before the Human Rights Commission was the first of its kind by any Eastern European leader, U.N. officials said.

Jaruzelski said the concept of human rights has recently acquired a new dimension because of scientific and technical advances, saying people had a human right to a clean environment.

Jarulzelski began his Swiss visit Sunday with meetings at the World Economic Forum symposium in the ski resort of Davos with western business, banking and economic leaders.

#90037u1564 02/06/1990 ~United Press International

MOSCOW (FEB. 6) UPI - Hardliner Yegor Ligachev led the counterattack Tuesday against Mikhail Gorbachev's plan for multiparty democracy, saying he opposed ''turning the party into an amorphous organization and a political club.''

Ligachev's speech, constantly interrupted by applause, spearheaded conservative resistance to Gorbachev's proposal to share power in a furious debate that forced extension of the Communist Party's Central Committee full leadership meeting, or plenum, by one day, Soviet radio said.

In a bitter speech, the much-criticized Ligachev rebutted charges that he ordered troops into Tbilisi to crush a demonstration last April. Ligachev said bluntly that Gorbachev was also responsible for the decision for the military crackdown on a peaceful rally in which 21 Georgians died.

Ligachev said he opposed ''with his whole soul'' introducing private property into the socialist Soviet Union and allowing Lithuania's Communist Party to break from Moscow to form its own independent party.

''I am also against turning our party into an amorphous organization, a political club,'' Ligachev said.

Foreign Ministry spokesman Gennady Gerasimov, commenting on Gorbachev's plan for political pluralism, said, ''If you can't beat them, join them.''

The vigorous debate behind close doors in the Kremlin led to the extension of the meeting beyond its scheduled end on Tuesday. The extension through Wednesday means the meeting will still be going on when Secretary of State James Baker arrives Wednesday afternoon for talks with his Soviet counterpart, Eduard Shevardnadze.

Gerasimov said Baker might also meet with Gorbachev, who was embroiled in debate Tuesday with conservatives opposing his drive to hasten democratization in the Soviet Union.

The plenum brought into sharp relief the rivalry between Gorbachev, 58, and Ligachev, 69, who commands great support among conservative communists for his resistance to free market economics and political pluralism.

Plenum participants told reporters waiting outside the Kremlin gate that Ligachev's speech was constantly interrupted by applause. A powerful speaker, Ligachev speaks a pungent, crisp Russian full of homey sayings.

In one of their public clashes two years ago, Ligachev told Gorbachev: ''You don't go into the forest without knowing how to get out again.''

Despite widespread reports of a pending purge of Politburo hardliners, a Soviet journalist with close ties to the party leadership said the housecleaning might be delayed.

''There were plans to get a half dozen (conservatives) or so, but I don't think they are going to rock the boat now because of the unstable situation in the country and in the party,'' the journalist said.

The Central Committee met as 17,000 Soviet troops patrolled Baku more than two weeks after they stormed the Azerbaijani capital to put down a nationalist insurrection against Soviet rule and to end ethnic fighting between Christian Armenians and Moslem Azerbaijanis.

The military crackdown followed weeks of virtual civil war on the Soviet Union's southern rim, where more than 100 people died in the worst ethnic violence of Gorbachev's five-year rule.

The Soviet Communist Party is also beset by internal turmoil sparked by Lithuanian communist leaders' vote Dec. 20 to break from Moscow and form the first independent republican party in Soviet history.

The Central Committee meeting that opened Monday was a resumption of a Christmas Day plenum called to deal with the defiant Lithuanians, but the party's status in the Baltic republic was overshadowed by larger questions on the future of Gorbachev's perestroika drive.

In a clear indication that Gorbachev intends to stay on the offensive against his conservative foes, the Soviet leader asked Monday for yet another plenum in several weeks to push for Central Committee approval of his new democratic charter for the party.

Though Gorbachev had been expected to remove most or all of the remaining hard-liners on the ruling Politburo, he could defer the firings until that later plenum or wait for the 28th Party Congress - which Gorbachev also asked the Central Committee on Monday to move up to early this summer from its scheduled date in the fall.

Lev Zaikov, who replaced firebrand lawmaker Boris Yeltsin as Moscow party chief in November 1987, and Vitali Vorotnikov, last holdover from the pre-Gorbachev Politburo, were among those whose positions were reported to be in jeopardy.

#90037u1583 02/06/1990 ~United Press International

WARSAW, POLAND (FEB. 6) UPI - Barbara Piasecka-Johnson, the millionaire heiress to the Johnson & Johnson pharmaceutical fortune, has resumed talks on purchasing an interest in the Gdansk shipyard after her earlier offer was rejected, officials said Tuesday.

Talks between Johnson and the shipyard, the birthplace of the Solidarity trade union, broke off in December 1989 when shipyard workers refused to accept her conditions for buying the shipyard.

Her earlier conditions included a wage rate equivalent of 50 cents per hour, a five-year moratorium on strikes and a reduction in the work force at the plant.

The shipyard is in severe financial trouble. The communist administration that governed Poland before the current Solidarity-led government came to power had planned to shut down the plant before Johnson indicated an interest in buying it in June 1988.

After the talks broke down in December, the Solidarity government established the shipyard as a joint stock company, with the government initially holding 100 percent of the shares.

A Solidarity leader at the shipyard said the joint stock plan suggested that the government would hold a majority of the shares, with the rest being offered for sale to shipyard employees, Polish citizens and foreign businesses.

It is believed that Johnson is interested in purchasing enough shares to gain control of the company.

Johnson arrived in Gdansk Monday and began talks with the management of the shipyard. Several advisers remained in Gdansk to continue talks while she was in Warsaw Tuesday.

BALTIMORE (FEB. 6) UPI - A man who spent more than 14 years in prison until officials determined that a key witness lied at his trial is suing officials for $200 million.

The suit by Guy Gordon Marsh alleges false arrest and contends his civil rights were violated and names Anne Arundel County police, prosecutors and a public defender.

Marsh contends in the suit that a now-deceased police detective coerced witnesses into testifying against him at his 1973 murder trial.

Marsh was convicted in the fatal shooting of customer Charles Erdman during a robbery at a 7-Eleven store in Glen Burnie in June 1971. He was sentenced to life plus 10 years and served more than 14 years in two state prisons.

He was released in 1987 after authorities found that the woman who placed Marsh at the crime scene was herself in the Anne Arundel County Detention Center at the time.

Linda Packech was later convicted of perjury for her testimony in Marsh's trial.

Another witness, William McFadden Jr., testified that Marsh admitted he committed the murder. Marsh eventually obtained a statement from McFadden in which the witness admitted his testimony was false.

The lawsuit, filed Monday in U.S. District Court in Baltimore, alleges that the testimony of Packech and McFadden was coerced by the late George Romine, with whom Marsh had had several run-ins and who he felt carried a grudge against him.

Anne Arundel prosecutor Ronald Naditch, one of the co-defendants in the suit, told Tuesday's Baltimore Evening Sun that he's ''disappointed'' with the legal action and said similar complaints by Marsh were rejected by state courts before the perjury was discovered.

''I sincerely don't feel that anyone affiliated with the state did anything wrong,'' Naditch said.

#90037u1636 02/06/1990 ~United Press International

NEW YORK (FEB. 6) UPI - A teary-eyed Leona Helmsley, denying she is either a hotel ''queen'' or a ''bitch,'' has given her first TV interview in five

years, and proclaimed, ''I am innocent, I am innocent, I am innocent'' of cheating on her income taxes.

''I'm not going to jail,'' vowed the 70-year-old Helmsley in the interview to be broadcast Wednesday night.

''I've done nothing. I can't believe - I cannot believe that the system in the United State of America has stopped working.''

Helmsley was sentenced Dec. 12 in federal court to four years in prison, fined $7.1 million and ordered to pay $1.2 million in back taxes for hiding renovations and furnishings for her Connecticut mansion in hotel books.

She is appealing the federal conviction but still faces trial in state court on similar charges.

Her voice breaking, and her eyes filling with tears, she said if she were sent to prison, ''I couldn't care for Harry. Harry would - Harry could not get along without me. It's the cruelest thing in the world.''

In her interview with columnist Cindy Adams taped last week for Fox Television's syndicated show, ''A Current Affair,'' Helmsley confessed, ''I'm not scared, ''I'm terrified - I'm terrified'' at the prospect of prison.

She denied that either she or her real estate tycoon husband, Harry, 80, had evaded any income taxes.

''I am innocent, I am innocent, I am innocent,'' she said, sitting ram-rod straight in the living room of her sumptuous Manhattan apartment. ''There is nothing that has really been proven.

''I would like to know whose money we stole,'' she said, ''Whether it was children, widows ... no money has been stolen.''

Harry Helmsley, whose empire is crowned by the Empire State Building, suffered a stroke and was severed from the federal trial. State prosecutors, however, are still trying to have him certified competent to stand trial.

Mrs. Helmsley, who is in charge of the couple's 21 luxury hotels, claimed in the five years covered in the case that she and her husband paid $344 million in taxes.

''I would like to see who else in the country comes near that figure,'' she said. ''Plus which during the years they're talking about we also gave $33 million to charity.''

She blamed her ''queen'' title on fanciful ad writers.

''I am not a queen. I never fancied mayself a queen,'' she said. ''This was done with tongue in cheek. It was to attract people to a new hotel which it did but also, look what else it attacted - and it isn't fair. It isn't fair.''

Later in the interview, she bitterly assailed the ''bitch'' label attached to her after her attorney told the jury during her trial she was regarded by some as ''a tough bitch.''

''A man that's successful - what would you call a man? You couldn't call him a bitch - would you call him a bastard? No,'' she said, ''you would call him a good executive.''

''I'm a woman, and I'm a woman in business and I'm an executive ... so they label me a bitch.''

#90037u1658 02/06/1990 ~United Press International

(FEB. 6) UPI - Federal clear-air legislation is in danger of becoming a political football on Capitol Hill. Senate Democratic leader George Mitchell says negotiators are making ''good progress'' on a compromise, but he admits that the legislation could run into a filibuster that Democrats may NOT have the votes to halt.

A chartered jet flying a planeload of funseekers back to Milwaukee from Las Vegas landed at Mitchell International Airport this morning with one of its three engines shut down. A spokesman for Funway Holidays Funjet says an indicator light showed a malfunction, so the pilot shut down an engine on the Lockheed L11. NONE of the about 300 people aboard was injured.

Two Maryland state senators say they want every elected position in the state to be drug free. The bi-partisan legislation proposed last night

would require political candidates in the state to submit to drug tests... reporting the information along with their financial disclosures every year.

-30- 1150

#90037u1660 02/06/1990 ~United Press International

WASHINGTON (FEB. 6) UPI - Democrats of the House Ways and Means Committee, including Chairman Dan Rostenkowski, D-Ill., criticized President Bush's 1991 budget Tuesday as a $50 billion giveaway to the rich that lacks "economic justice" for the poor.

The accusation was disputed by White House budget director Richard Darman, who testified along with Treasury Secretary Nicholas Brady during a hearing of the tax-writing panel. Darman said Bush's proposed spending plan for the fiscal year starting Oct. 1 has several initiatives to help poorer Americans.

But Rostenkowski cited a study released by the committee that concluded the poorest Americans saw their income fall and their tax burden rise over the past 14 years, while the richest five percent of Americans saw their income rise by 46 percent and their federal tax rates fall nearly ten percent.

"As a result, their after-tax share of income increased dramatically," Rostenkowski said of the wealthy. "Their increase is more than the total income of the poorest 50 million Americans."

In light of that statistic, Rostenkowski questioned why Bush keeps pushing for a capital gains tax cut that primarily would benefit the rich. He said the rate reduction would "at a minimum improve their economic welfare over the next five years by $50 billion."

"Your tax reductions and policy changes for the rest of America are trifling by comparison," Rostenkowski told Brady and Darman. "Where is the economic justice in that?" Rostenkowski, a capital gains cut opponent, said he believes that "tinkering with the tax code is the worst thing that we can do."

Bush and his aides maintain that a reduction in the tax on profits made from the sale of real estate or stocks and bonds would help keep the economy expanding by encouraging investment and creating jobs.

Rep. Byron Dorgan, D-N.D., said the seven straight years of economic growth that the administration boasts about has not been felt in much of rural America. "Where I come from, we've had eight years of recession and two years of drought," Dorgan said.

Dorgan called Bush's proposed cuts in farm, transportation and other

programs "almost a rural wrecking ball" that would be "devastating for rural America." Rep. Thomas Downey, D-N.Y., said "there is nothing for" the working poor in the budget $1.23 trillion budget proposal.

Darman protested that the president offered "a substantial and respectable list" of initiatives to help the poor, including a $500 million increase for Head Start - the largest increase ever for popular and successful pre-school program. He also said the administration was "favorably disposed" toward increasing the earned income tax credit to help the working poor.

Brady defended an administration proposal to stimulate the low national savings rate though a new account that will allow tax-free interest on long-term savings. "Our feeling is that this new savings plan ... will work," Brady said.

JERUSALEM (FEB. 6) UPI - Israelis Tuesday buried six of their compatriots killed during a weekend bus attack in Egypt and heard a government pledge to pursue peace despite calls to reduce Egypt's role in the process.

The right-wing Likud Party announced a meeting of its Central Committee on Feb. 12, which was postponed from Wednesday because of Sunday's fatal bus attack. Prime Minister Yitzhak Shamir hopes the gathering will provide a vote of confidence for his methods in pursuing the peace process.

A role for Egypt is part of the government's peace initiative launched nine months ago. But following the bus attack outside of Cairo, Trade and Industry Minister Ariel Sharon said Egypt was not a neutral broker for the Middle East peace process because it identified ''fully with the PLO.''

''This behooves us to break up this peace process triangle of the U.S., Israel and Egypt,'' said Sharon, a hard-line rival within Shamir's Likud Party.

Egypt is the only Arab nation with a peace treaty with Israel, which refuses to negotiate with the Palestine Liberation Organization.

Six of the nine Israelis killed in the bus attack were buried in Israel Tuesday, with hundreds of mourners in attendance. President Chaim Herzog received dozens of telegrams expressing sorrow over the attack.

At the funeral for Eugenia Weisbard, 73, near the coastal city of Tel Aviv Minister without Portfolio Mordechai Gur pledged that the government would continue on the path that would ''bring a peaceful and secure future to the people of Israel and to the state of Israel.''

Weisbard's former boss, Mala Hertzberg, remembered the retired botany teacher and hospital laboratory worker who came to Israel 20 years ago from Poland as a woman who believed in justice and equality.

''Even though she passed through difficult times like all of our generation, she still believed that justice will be achieve and peace,'' Hertzberg said. ''But that didn't happen and she fell victim to crazy murderers.''

At another funeral, police arrested an activist for the right-wing Kach movement when he tried to disturb the eulogy by Minister without Portfolio Moshe Nissim.

Nissim told the mourners of Tzvia Schumert, 67, in Jerusalem the government took responsibility for the fate of Israelis, pledging, ''We will with all our strength and all our ability fight against the murderous acts.''

In Cairo, Egyptian Interior Ministry sources said Egypt was doing everything possible to apprehend the killers of the Israelis, and to prevent a similar attack happening again.

An Egyptian Interior Ministry source said authorities were still questioning a Palestinian suspect from Rafah, the Israeli-Egyptian border town where the Egyptian tour bus began its ill-fated journey before two masked men ambushed it. The ministry source could not confirm reports that more Palestinians were also being detained in connection with the incident.

Before the fatal bus attack, a showdown was expected at the Likud meeting between Shamir and his hard-line party rivals, Sharon, Housing Minister David Levy and Economics Minister Yitzhak Moda'i.

Analysts, however, said the attack might have a moderating effect on the 3,200-member Central Committee to unify in the face of the tragedy and delay public arguments. The Likud and Labor parties are the major partners in Israel's coalition government.

Shamir wants only one vote from the Central Committee - a vote of backing for the way he is pursuing the Middle East peace process. Rival Sharon, who has severe reservations about the direction of the peace process, seeks debate and votes on specific topics involving Israel's May 1989 peace initiative.

#90037u1694 02/06/1990 ~United Press International
BY VERNON SCOTT

HOLLYWOOD (FEB. 6) UPI - Director Jerzy Skolimowski believes that a man can genuinely love two women at once.

That belief is reflected in Skolimowski's latest film, ''Torrents of Spring,'' a story of a love triangle that ends in tragedy.

Based on Ivan Turgenev's novel, the movie is now showing in limited release, starring Timothy Hutton as the love-smitten male. His two loves are performed by Nastassia Kinski and Valeria Golino.

Skolimowski, a Polish expatriate who makes his home in Santa Monica and who directed the hit ''Moonlighting'' starring Jeremy Irons, is a romantic who looks on ''Torrents of Spring'' as a classic 19th century love story.

''The film, like the book, is based on a true account of an episode in Turgenev's life,'' Skolimowski said recently while lunching in a Chinese restaurant near his home.

''When he was 22, Turgenev fell hopelessly in love, and then fell just as hopelessly in love with another young woman two days later. He is, of course, condemned to lose them both.''

Married for 23 years to his Polish wife, Skolimowski said he has had no such personal experiences, but he thinks it is possible for women, as well as men, to be romantically in love with two persons at the same time.

''There is hardly a more fascinating subject in the human experience than a love triangle,'' he said.

''For some reason, it is more intriguing when it involves two women and one man, as opposed to two men and a single woman. Usually in that case one of the men will abandon the situation quickly. Men do not like to compete under those circumstances.

''Anyway, it looks better on the screen to have two women and one man. A man involved intimately with two women is not as harshly criticized as the woman with two lovers. I do not say that is right or fair, but it is the case.

''It is partly true because if a woman becomes with child, no one can be sure who the father is. But if one man is involved with two women, the parenthood is obvious - at least it was in the 19th century.

''The book was written in 1872 but the story takes place in 1840, the tale of a Russian aristocrat who visits Italy and on his way home stops in

Germany where he falls in love with a young beauty, only to be seduced by another temptress within 48 hours.''

Skolimowski is convinced passionate love stories for the screen must be told in period films. He says there is very little romance today, with sex having replaced romantic love.

''The pace of period films is different,'' he explained. ''So are the attitudes and feelings of the lovers. The settings, too, are softer and more romantic.

''I've made an elegant movie with a smooth pace. There is a feeling for the filmgoers that they are watching something that is really happening before their eyes. I did not use technical tricks.

''This is the first love story I have directed, and I am so happy with the result, I may become a specialist.''

Strangely, Skolimowski believes Americans appreciate love stories more than Europeans, perhaps because Europeans are not so naive about affairs of the heart. He says they are more jaded, adding, ''They've seen it all.''

His personal tastes are reflected in his favorite films from the past - ''Barry Lyndon'' and ''Tom Jones,'' both costume epics.

''In contemporary films about romance you cannot avoid showing rather heavy stuff because it is so significant of our times,'' he continued. ''The man and woman meet and go to bed at once. There is no pause for romance.

''The strongest factor of modern love stories is the physical visuals. In a period piece you can camouflage such things very nicely.

''There is no need for nudity or indecent exposure. For decades great movies were made where graphic love-making was not used. It is sad that it is no longer the case.

''I am hoping the dangers of promiscuity today in terms of disease will change the attitudes about romance and sex in the world. Maybe we will become more romantic as a result.

''There should be time for courtship with flowers, candlelight and wine and etiquette. There were times when spouses were not forgiven for their transgressions. The 'other woman' was without honor, as was the straying husband.

''While the protagonist in 'Torrents of Spring' is not married, he commits a dishonorable act. And that is enough to destroy him.''

WASHINGTON (FEB. 6) UPI - Congressional committees gave preliminary approval Tuesday to $542 million in emergency aid to help restore Panama's economy - battered by American sanctions and an invasion - and revive the nation's democracy.

''Risking doing too little, too late, far outweighs the risk of acting too generously and too hurriedly,'' Bernard Aronson, assistant secretary of state for inter-American affairs, told the House Foreign Affairs Committee.

The House panel and the Senate Foreign Relations Committee both endorsed identical proposals, which will be scheduled for votes in both chambers. The administration said another $500 million aid bill will be presented this month.

The first phase of the plan calls for spending $42 million in emergency humanitarian aid for Panama, which U.S. forces invaded on Dec. 20 to secure vital U.S. interests in the Panama Canal and to oust Gen. Manuel

Antonio Noriega.

Another $500 million is in loans, loan gurantees, and other aid to help stimulate the economy and meet some of Panama's international debt.

Noriega ultimately surrendered to U.S. troops and now faces drug trafficking charges in Florida.

Aronson said the new government of Panama is committed to democratic reforms and reforming a banking and trade economy corrupted by the rich flow of illegal drug money. The Panamanian Defense Force that was Noriega's base of power will be reformed into a police force that will uphold human rights and take over security duties from U.S. forces, he said.

''This new democracy has much going for it, but they need our help,'' Aronson told the Foreign Affairs Committee.

Panama has a debt of $4 billion, thousands are unemployed, and the trade and investment sanctions President Reagan ordered in 1988 to pressure Noriega have devastated the economy.

The new government has suggested it needs up to $2 billion, but U.S. officials agreed that figure is unrealistic, given Washington's own budget troubles.

The $542 million program includes $22 million for public housing, including the Chorillo district that was virtually destroyed in the fighting during December's invasion; $7 million for public works jobs; $5 million to support loans for small businesses; $2 million in police training; $185 million in balance of payments aid to support exports; $20 million for the justice system; and $130 million for Panama's debts to international lending institutions.

Aronson said another $500 million will be proposed this month in credits, loans, export gurantees and other assistance for Panama.

#90037u1711 02/06/1990 ~United Press International

WASHINGTON (FEB. 6) UPI - Clarence Thomas, head of the Equal Employment Opportunity Commission and President Bush's nominee to be a U.S. appeals court judge, told his confirmation hearing Tuesday he would not apply his personal views on the law in reaching judicial decisions.

''My personal view, when there is precedent, when there is case law, is irrelevant,'' Thomas told the a generally warm but sometimes skeptical Senate Judiciary Committee.

''In the policy arena, one has options,'' Thomas said. ''In the judicial arena ... the rule of law applies.''

Thomas, nominated for a seat on the U.S. Circuit Court of Appeals for the District of Columbia, also said judges below the Supreme Court level who are ''roaming unfettered in judicial fields'' can cause constitutional problems.

Bush picked Thomas to serve on a 12-judge panel that has often been characterized as the second most important court in the land behind the Supreme Court.

Because of its location in the nation's capital, it handles some of the country's most important cases arising out of federal prosecutions and disputes over federal law.

There was no indication when the committee would vote on the nomination, which must be ratified by the entire Senate.

Thomas, who was named by President Reagan to head the EEOC in 1982, has been sharply criticized by some in the civil rights community for abandoning the agency's previous philosophy of bringing large ''pattern and practice'' cases charging employment discrimination and following what the critics call a ''claim adjustment'' approach to resolving cases.

His response to the committee suggested that while he remains personally opposed to the use of goals and timetables, as a judge he would enforce their use where there is Supreme Court precedent.

He has also been criticized for allowing a large number - the figures range from 900 to 13,000 - of age discrimination cases to lapse without bringing suit.

But Thomas, a graduate of Yale Law School and one of the highest ranking blacks to serve in the Reagan administration, defended his sometimes stormy tenure at the EEOC.

He said he accepted ''full responsibility'' for the age discrimination issue, noting that the law does not require full investigation of charges of age discrimination, but that he felt ''anyone who comes to the EEOC should be afforded'' the full resources of the commission and such investigations allowed the statute of limitations to expire.

And he said he supported legislative action to remedy the problem.

''That was the worst time, the worst event during my tenure,'' he said.

Thomas, under questions by Sen. Arlen Specter, also refused to say what changes he would recommend in civil rights laws in the wake of a series of Supreme Court rulings last narrowing a number of anti-bias laws.

But he noted that in the past he has called for tougher sanctions than currently provided in Title 7 of the 1964 Civil Rights Act and he acknowledged that one of the rulings requiring a heavier burden of proof in showing discrimination ''does make our job more difficult.''

Thomas's nomination was opposed by a number of groups, including the Women Employed Institute, which charged that Thomas had ''acquiesced'' in the refusal of some federal agencies under Reagan to submit goals and timetables to the EEOC for hiring and promoting women and minorities.

''We believe he has demonstrated a lack of respect for the law, insufficient commitment to enforcing the law firmly and consistently and insensitivity to those whom the law was designed to protect,'' said Nancy Kreiter of the Institute.

Thomas was also opposed by Alfred Blumrosen of the Rutgers Law School and one of the architects of the EEOC. Blumrosen charged that Thomas allowed the rules and guidelines of the commission to be violated in the agency's abandonment of the use of goals and timetables as a remedy for employment discrimination.

''We simply cannot have administrative agencies run this way,'' Blumrosen said. ''Administrators who disregard their agencies' regulations should not be allowed to sit in judgment on other administrative agencies from the Court of Appeals of the District of Columbia.''

#90037u1714 02/06/1990 ~United Press International

WARSAW, POLAND (FEB. 6) UPI - Solidarity Labor Minister Jacek Kuron may be acquitted in a political case that landed him in prison 25 years ago for criticizing the Communist Party, the news agency PAP said Tuesday.

Justice Minister Aleksander Bentkowski petitioned the Supreme Court to review the case of Karol Modzelewski and Kuron, who were sentenced in 1965 for ''disseminating an open letter calling for removal by force of state bodies, and including false information'' on the situation in Poland.

Kuron and Modzelewski, then members of the Communist Party, wrote an ''open letter'' to the party organization at Warsaw University warning about the difficult economic situation in the country. They warned unless there were changes, the workers would use force to demand their rights.

Kuron and Modzelewski were expelled from the party and imprisoned for 3

and 3 1/2 years respectively as a result of the letter. They went on to become leading dissidents in the workers' movement that led to the rise of Solidarity in 1980.

After Solidarity was legalized last year it won a landslide victory in the June parliamentary elections and took over the government in August. Kuron became labor minister and a member of parliament.

Bentkowski asked the court to change the verdict and acquit both defendants, arguing that the letter contained views of the authors and did not include ''false information about the state of economy.''

The justice minister said that by writing the letter, they ''aimed at mending the political and social relations in thery, something which was in the interest of the state.''

#90037u1756 02/06/1990 ~United Press International
FORT IRWIN, CA (FEB. 6) UPI - President Bush applauded the latest reformist moves of Soviet President Mikhail Gorbachev Tuesday but warned critics of his $307 billion defense budget that America still faces ''uncertainties and dangers'' in the post-Cold War era.

''It is important not to let these encouraging changes - political or military - lull us into complacency,'' Bush said at the start of a three-day trip to defend his military budget against threatened cuts by Congress.

Addressing hopes for peace at a military base where U.S. troops still train against simulated Soviet foes, Bush asserted the United States must not ''let down our guard against a worldwide threat,'' even in what he hailed as a ''new era'' of superpower cooperation.

Treated to a display of military might of tanks and troops in the Mojave Desert, Bush sought to calm talk of a ''peace dividend'' from the monumental changes evidenced by the collapse of communist regimes in Eastern Europe and Gorbachev's own move to have the Soviet Communist Party relinquish its a 70-year-old monopoly on power.

One day after the White House took pains not to prejudge the outcome of the Communist Party plenum under way in Moscow, Bush in an addition to his prepared text praised Gorbachev for moves toward political pluralism.

''As a free and democratic people, Americans always welcome measures which promote the growth of democracy,'' Bush said in the pep talk broadcast by radio to troops in the training field. ''And it is especially encouraging to see anything which might bring the day of true democracy a bit closer to the Soviet people.''

With Democrats in Congress vowing to press for deep troop cuts and the cancellation of several major weapons systems, Bush acknowledged that political events have ''changed our strategic defense posture'' but urged Congress to not be precipitous and to support the ''very reasoned and steadfast approach'' that Defense Secretary Dick Cheney has proposed to scale back military expenditures.

''The Soviet Union still maintains formidable forces. Military challenges to democracy persist in every hemisphere,'' Bush said. ''America must always be prepared to fight for freedom and security.''

Ironically, Bush's selling of his defense budget began in the state that would be hardest hit by one of the first steps in his peacetime retreat in real military spending: A rash of base closings certain to become mired in

pork barrel politics as members of Congress - some among the most vocal advocates of cuts in the Pentagon budget - scramble to save installations in their districts.

White House press secretary Marlin Fitzwater described the closings Monday as one facet of a changing military posture and said, ''For those who are interested in a peace dividend ... that's where part of it will come from.''

The same changed circumstances that last week persuaded Bush to propose deeper cuts in U.S. and Soviet forces in Europe have emboldened his critics to seek bigger immediate savings from the reduced threat of war.

Cheney has announced plans to cut overall troop strength by about 54,000 this year and 36,000 next year. Two full divisions would be deactivated for savings of $1.2 billion in fiscal 1991.

That plan has been faulted by Democrats, however, for not assuming troop cuts in Europe. Bush wants to limit U.S. and Soviet forces in central Europe to 195,000 on each side, down from an earlier proposal of 275,000 but still not as low as some Democrats believe is possible to still ensure stability.

Conventional forces, while the most expensive to maintain, are not the only part of the budget under attack.

Threatened congressional cuts in nuclear weapons programs have Bush warning that those systems - technological bargaining chips - must be modernized to keep pressure on Moscow to conclude a strategic arms reduction agreement.

To dramatize concern for his strategic program, so far unaffected by the political reverberations from Europe, Bush will highlight progress of the ''Star Wars'' antimissile program Wednesday at the Lawrence Livermore nuclear weapons laboratory near San Francisco and address nuclear forces on alert Thursday at Strategic Air Command headquarters near Omaha, Neb.

The Strategic Defense Initiative, for which Bush wants almost an additional $1 billion next year, looms as a prime target for congressional budget cuts, along with the $530 million-a-copy B-2 bomber and the redeployment of MX missiles from silos to rail garrisons.

Though Bush contends improved East-West relations have not diminished the Soviet strategic threat, U.S. intelligence analysts have evidence the Soviets have begun to cut back their production of nuclear arms in anticipation of a possible superpower arms agreement.

#90037u1763 02/06/1990 ~United Press International

PRAGUE, CZECHOSLOVAKIA (FEB. 6) UPI - A former Communist Party official who played a key role in stamping out the 1968 ''Prague Spring'' reforms apparently hanged himself in a wash room at his home, the official CTK news agency said Tuesday.

Viliam Salgovic, 70, who was a deputy interior minister at the time of the 1968 Warsaw Pact invasion, was found hanged to death Monday evening at his home in the Slovak capital of Bratislava. Authorities investigating the incident ruled that he had committed suicide, CTK reported.

At its Jan. 28 session, the Slovak Communist Party leadership announced it planned to expel Salgovic ''for adhering to the attitudes which are at variance with the present program and objectives of the party and for losing (the) confidence of rank-and-file party members,'' CTK said.

Salgovic's death was reported as the nation continued to dismantle the remnants of one-party rule with a reshuffling of deputies in the parliament of the Czech Republic, one of two regional legislatures in Czechoslovakia. As a result of the reshuffle, the communists lost their majority in the assembly.

Salgovic was deputy interior minister during the August 1968 invasion of five Warsaw Pact armies to crush the reform-minded ''Prague Spring'' of Communist Party leader Alexander Dubcek.

He was one of the leading officials in the brutal process of normalization that followed, under which all traces of reform were wiped out and hundreds of thousands of people were expelled from the party and lost their jobs.

In June 1975, Salgovic became a member of the Slovak Politburo and in April 1976 was named to the Czechoslovak Communist Party Politburo.

Salgovic asked to be relieved of his post on the Politburo and of his position on the federal and Slovak legislatures following the Nov. 17 attack by police on demonstrators in Prague.

The attack led to mass demonstrations that forced the Communist Party to give up its exclusive hold on power.

In another development, the Communist Party lost its majority in the Czech National Council Tuesday as authorities implemented a power-sharing arrangement hammered out in negotiations between the party, the opposition Civic Forum and other independent organizations.

As a result of the changes, no party or group retains a majority.

Eighty-two members of the 200-seat body are communists, 50 represent the Civic Forum, 33 are listed as independent, there are 17 members each of the Socialist and Peoples parties, and one seat was left vacant.

The Czech National Council is the supreme lawmaking body of the Czech Republic.

The assembly and the corresponding Slovak National Council, representing the Slovak Republic, were formed in October 1968 when the country was federalized three months after the Warsaw Pact invasion.

Almost immediately after it was formed, central authorities took steps to deprive the legislature of any power. In the past several weeks, 64 deputies, mostly communists, have resigned or been recalled from the Czech National Council.

The Communist Party lost its majority in the federal parliament on Jan. 29 in a similar reshuffling of deputies.

#90037u1771 02/06/1990 ~United Press International

SAN FRANCISCO (FEB. 6) UPI - The key government witness in a major drug case has asked for U.S. political asylum because he says he was a witness to the Chinese prison beatings and torture of pro-democracy students and journalists, it was disclosed in court Tuesday.

Wang Zong Xiao was placed under American protection by U.S. District Judge William Orrick.

Wang said he sought political asylum because he feared persecution or execution in China if he testified about his mistreatment and that of pro-democracy students and journalists in prison in Shanghai.

Wang already faces a possible death sentence in China for his role in a scheme to smuggle 7 pounds of heroin from Southeast Asia, through Shanghai to the United States in 1988.

He confessed to arranging for the heroin to be secreted inside condoms that were sewn inside the gutted remains of 69 8- to 10-inch-long goldfish and then mixed among crates of live goldfish destined for shipment to San Francisco for sale as ornamental pets.

Wang was brought to the United States to testify in the San Francisco trial, which began Jan. 8, of three of the accused drug smugglers arrested in San Francisco and Hong Kong in March. Charges were dropped against three others arrested in San Francisco.

It was the first case of cooperation between the United States and China in a major drug smuggling investigation.

Orrick imposed a temporary restraining order late Monday preventing the Justice Department or the Drug Enforcement Administration from turning Wang over to Chinese police officials until Wang's asylum request is resolved.

Wang said in a statement filed with the court Tuesday that while in prison in China, he was beaten with ''fists and jabbed several times by a hard instrument that delivered sharp electric shocks.''

Wang said he was warned not to reveal that pro-democracy students, reporters and workers were imprisoned at the Shanghai prison where he was held.

''There were pro-democracy students and news reporters in prison with me '' Wang said in his affidavit. ''I observed that they were beaten often and jabbed with a hard instrument that produced sharp electric shocks. The students and reporters were treated worse than prisoners held for ordinary criminal offenses.

''I was told repeatedly that I should not reveal that students, reporters and workers are imprisoned at the institution where I was held,'' he said.

Wang said, ''I was told that I should answer only questions about the heroin smuggling scheme ... .''

Wang began his testimony in the San Francisco trial Jan. 30.

He said he was instructed to change his testimony by Yuan Yougan, an officer of the Public Security Bureau in Shanghai.

He answered a few questions on the witness stand, then nervously asked through an interpreter to speak privately with the judge, according to James Larson, a lawyer for one of the three defendants.

Wang told Orrick about his fears and Orrick ordered a lawyer provided to represent Wang.

A petition for asylum was filed late Monday afternoon and was under consideration by the Immigration and Naturalization Service.

#90037u1784 02/06/1990 ~United Press International

WASHINGTON (FEB. 6) UPI - President Bush sent Congress Tuesday an optimistic assessment of the nation's economic prospects that calls for

"strong, sustained" growth in 1990 to extend the country's longest peacetime expansion.

"The economy's performance during 1989, the seventh year of economic expansion, has set the stage for healthy growth in the 1990s," Bush said in his first annual report to Congress on the nation's economy.

Bush, who signed the report at the White House Tuesday before leaving for a trip to California, said the main economic goal of his administation is to achieve "the highest possible rate of sustainable economic growth."

"I am confident that the United States can enjoy strong, sustainable economic growth and use the fruits of that growth to raise living standards, solve longstanding problems, deal with new challenges and make the most of new opportunities," Bush said in a forward to the report, which was prepared by his Council of Economic Advisers.

The focus of the administration's economic policies will be to "build on the successes" of the previous decade by creating "an environment in which the private sector can serve as the engine that powers strong, non-inflationary economic growth," Bush said.

The nation's economy rebounded in the 1980s after being battered by the previous decade's soaring inflation, rising unemployment and declining productivity. At decade's end, inflation had been contained, 20 million jobs were created and the economy added another year to its record peacetime expansion. "Despite our successes, we cannot be satisfied with simply sustaining the strong record of the 1980s," Bush said.

Michael Boskin, chairman of the president's economic advisory council, said the economic rebound of the 1980s was countered by a run up of the federal budget deficit.

"I don't want to suggest that the 1980s was only a period of success," Boskin said, adding that the deficit continues to serve as a drain on the nation's savings and must be reduced. The report details five policy principles Bush will focus on to build a stronger economy for the 1990s.

The principles include reducing the federal budget deficit; supporting a "credible, systematic monetary policy" to sustain growth while curbing inflation; avoiding unnecessary regulation; opening markets to free trade, and removing tax, legal, and regulatory barriers to "innovation, investment, work and savings."

Bush targeted a reduction of the capital gains tax as one of his highest legislative priorities this year. He reiterated his position that such a cut "would promote risk-taking and entrepreneurship" by lowering the cost of capital.

Last year's effort to push a capital gains tax cut through Congress stalled in the Senate where opponents said it favored the wealthy. Another legislative priority is to improve the Clean Air Act "in a way that preserves both a healthy environment and a sound economy," Bush said.

Despite recent signs of sluggishness, Bush said the economy will expand at a slightly faster pace this year, assuming his fiscal 1991 budget is approved and the Federal Reserve continues its support of non-inflationary growth.

"Growth is expected to pick up in the second half of the year and to continue at a strong pace as the level of output rises to the economy's full potential," Bush said.

Federal Reserve Chairman Alan Greenspan recently said the nation's 4.8 percent inflation rate last year is "unacceptable" and said the economy is in the midst of a "temporary hesitation."

Bush and Greenspan agree that a recession is not likely in the near term. Bush said he strongly supports the Fed's non-inflationary growth goals and shares "the conviction that inflation must be controlled and reduced in a predictable fashion."

"Accelerating inflation not only erodes the value of families' savings, it produces economic imbalances and policy responses that often lead to recessions," he said.

The president's economic outlook also foresees a slowing in the growth of the nation's workforce during the 1990s and an increased demand for skilled workers.

Bush warned that the United States cannot maintain its world leadership or sustain its economic growth "if our workers lack the skills of their foreign counterparts."

He also called for more "disadvantaged Americans" - the disabled and homeless - to be brought into the economic mainstream "as a matter of simple decency."

SANTA ANA, CA (FEB. 6) UPI - Ingram Micro D, a leading distributor of personal computer products, reported Tuesday fourth-quarter sales of $307 million and 1989 sales of $1 billion, both records for the privately held company.

The company, which serves as a wholesale distributor to more than 40,000 resellers in the United States, said the $1 billion level of 1989 sales had matched its goal for the year.

"It's a validation of our organization's performance, made possible by strong productive relationships with our customers and vendors," said Chip Lacy, chairman and chief executive officer.

Ingram Micro D was created through the acquisition of Micro D Inc., of Santa Ana, Calif., by Ingram Industries, of Nashville, Tenn., in January 1989. Ingram took Micro D private last March, then merged Micro D with the Ingram distributor, Ingram Computer Inc. of Buffalo, N.Y., last July.

Two rivals of Ingram Micro D - Softsel Computer Products Inc., of Inglewood, Calif., and Microamerica Inc., of Marlborough, Mass. - announced in November that they had signed a definitive merger agreement, with the deal expected to be completed by the end of March.

#90037u1834 02/06/1990 ~United Press International

WASHINGTON (FEB. 6) UPI - The Bush administration presented a package of farm policy proposals Tuesday that would give farmers more freedom to plant profit-making crops while reducing the use of subsidies to shore up farm income.

The package - more than six dozen ideas that Congress could include in the new farm policy law it must write this year - include a proposal for a disaster aid program to replace the money-losing crop insurance program and plans for using the Conservation Reserve to protect water purity.

Agriculture Secretary Clayton Yeutter described the package as ''a set of amendments'' to improve the current farm law, which was written in 1985 and expires this year. Farmers generally have been happy with the 1985 law and House Agriculture Committee leaders plan to use it as the basis for

the new bill.

Congressional reaction to the administration's proposals was mixed. Chairman Patrick Leahy, D-Vt., of the Senate Agriculture Committee said the package failed to address environmental needs. House Agriculture Chairman Kika de la Garza, D-Texas, said the saw no basic differences ''that we cannot work out.''

A spokeswoman for the American Farm Bureau Federation, the nation's largest farm organization, said it welcomed efforts to give farmers more freedom. However, she said the package ''seems to have been written exclusive of the budget process'' and, for instance, made no suggestion for target price levels. Target prices are a key in determing support payments to farmers.

The administration took an unusual step by offering a set of ideas instead of a formal bill, a tactic that helps avoid criticism of specifics and focuses attention on changing policy.

The central point in the administration package is giving farmers more flexibility in deciding which crops to grow so they can earn money in the marketplace, rather than planting crops just to maintain eligibility for government subsidies.

''We feel it's time to get back to market orientation,'' Yeutter said.

To do that, the package proposed adoption of a form of the ''normal crop acreage'' concept used in the late 1970s. That would make it easier for farmers to shift acreage among crops.

In addition, farmers would be allowed to plant oilseeds, such as soybeans, sunflowers and canola, on land normally reserved for crops covered by the farm program without jeopardizing eligibility for subsidies.

U.S. oilseed acreage has dropped by 10 million acres in the past decade despite growing world demand - a development farm groups have blamed on government rules.

''We believe that we've responded to that soybean situation in a very effective way here by, in essence, treating the oilseed crops as program crops in a whole variety of ways,'' Yeutter said, adding, ''We no longer tilt production toward one of these other crops.''

The department forecast under its proposal, soybean and wheat acreage would increase with less land devoted to feed grains such as corn.

Crop flexibility also would allow farmers to employ alternative techniques such as crop rotation or reduced levels of farm chemicals, that have

environmental benefits, Yeutter said.

Yeutter refused to estimate the cost of the administration's proposals but argued farmer income should run at ''very satisfactory'' levels ''even though the total contribution of the government will almost inevitably decline.''

The government has forecast 6 cents of every dollar in gross farm income this year will come from federal payments, which would be half the 1987 rate.

President Bush has asked Congress to terminate the federally subsidized crop insurance program. As a replacement, Yeutter proposed a permanent disaster program run by the Agriculture Department that would issue payments to farmers whenever they lost at least 40 percent of a crop. The maximum payment would be $100,000 and no payments would be made to farmers with gross income above $2 million.

The package also proposes:

-Using the Conservation Reserve to enroll buffer strips and other areas that could prevent water contamination by farm chemicals. The reserve also would be used to restore wetlands.

-Tightening eligibility for Farmers Home Administration farm loans, putting a 17-year limit on how long a farmer could receive aid, and limiting a farmer to receiving one loan restructuring.

-Basing set aside requirements on expected supply and demand for a crop, not just expected supply.

-Making it easier for homeless people to get food stamps; also tougher penalties for misuse of food stamps and expansion of systems that electronically record purchases.

#90037u1836 02/06/1990 ~United Press International

WASHINGTON (FEB. 6) UPI - The House overwhelmingly approved legislation Tuesday to impose a U.S. ban on large-scale driftnet fishing, a practice regarded by environmentalists as highly destructive to marine life.

The bill, approved on a 396-21 vote, also extends the federal government's fisheries management authority to include tuna, a highly migratory species that to date has been regulated only by international conventions.

The driftnet and tuna provisions, both opposed by the Bush administration, were adopted as part of a four-year reathorization of the 1976 Magnuson

Fishery Conservation and Management Act, which expired Sept. 30, 1989.

The legislation now goes to the Senate, where two hearings were held last year on reauthorization.

The Magnuson Act is a landmark law that established exclusive U.S. authority over fishery resources within 200 miles of the U.S. coast and created regional management councils to oversee American and foreign fishing within that zone.

The law, named for its chief sponsor, the late Sen. Warren Magnuson, D-Wash., was enacted in response to concerns that foreign fishing was depleting fishing stocks off U.S. shores.

The reauthorization bill sets a spending ceiling of $75 million for programs under the act during the current fiscal year, rising by $1 million a year through fiscal 1993.

One chief provision of the bill prohibits U.S. fishermen from using driftnets more than 1 1/2 miles long and directs the State Department to seek a worldwide ban on the practice.

The U.S. driftnet ban applies to the 200-mile U.S. Exclusive Economic Zone and international waters, with states allowed to continue regulating such fishing in their own waters.

Rep. Gerry Studds, D-Mass., the primary sponsor of the bill, called diftnets ''plastic walls of death'' responsible for indiscriminately killing fish, whales, mammals, birds, sea turtles and other marine life.

Japanese, South Korean and Taiwanese fishing fleets rely heavily on the monofilament driftnets, which float on the surface of the water and can extend up to 70 miles long.

The measure also includes tuna under the management authority of the Magnuson Act. Tuna was the only species originally excluded from the law because it is highly migratory, ranging through the jurisdictions of numerous countries and through international waters.

The bill further directs the State Department to seek international agreements to manage swordfish and billfish as tuna are currently regulated.

The Bush administration opposes the tuna provision on grounds that it would hurt U.S. fishing interests.

It objects to prohibiting large-scale driftnets in U.S. waters because it would conflict with a treaty with Japan and Canada regarding salmon

fishing in the North Pacific. The administration also asserts that inadequate scientific documentation exists to justify an international driftnet ban.

The legislation also alters the formula by which the allowable level of foreign fishing in U.S. waters is set, and establishes tougher enforcement measures.

The bill allows the government to revoke or suspend fishing and processing permits to fishermen who violate the law, and increases fines from $25,000 to $100,000.

#90037u1866 02/06/1990 ~United Press International

JERUSALEM (FEB. 6) UPI - Clashes raged in the Israeli-occupied territories Tuesday, leaving one Arab bystander dead and dozens of Palestinians wounded, and the Israeli army sealed the homes of rock-throwing suspects as part of a new crack down.

In the past, the army demolished or sealed houses only in very serious cases, such as attacks on suspected collaborators or firebombings.

But as of Tuesday, the army began sealing rooms or houses belonging to the families of Palestinians suspected of throwing stones. Security sources said the measure would be used only when a stonethrower had been positively identified and serious injury or damage caused.

The new policy is designed to deter stone-throwing, the primary method of violence directed against Israeli soldiers and civilians by Palestinians in the occupied West Bank and Gaza Strip and, according to the army, the

most difficult to control.

In the West Bank city of Nablus Tuesday, Mustafa Kulab, 45, a bus company guard, was shot when youths stoned a gas tanker. The driver and guard on the truck, both Israelis, said they opened fire. Kulab, who was sitting in chair nearby, was hit in heart and died, Palestinian sources said.

Police are investigating the incident.

U.N. relief officials and Palestinians sources said violent clashes raged the entire day in the West Bank and Gaza Strip, where at least 635 Palestinians have been killed by Israeli soldiers or civilians since the start of the uprising against Israeli occupation.

In the Rafah refugee camp of Gaza, Palestinian high school students clashed with troops. The incident sparked more unrest that continued throughout the day. A U.N. relief agency official said 19 Palestinians were treated at UNRWA clinics.

Doctors at hospitals in the Gaza Strip reported that an additional 20 Palestinians patients were treated.

An army spokesman confirmed that four Arabs were wounded.

Initiating the new crackdown policy Tuesday, the army sealed the room of a Palestinian who allegedly threw stones and pipes at a gas tanker on Jan. 30, military sources said.

A second room belonging to a suspect from the West Bank town of Kalkilya was sealed. The Palestinian allegedly injured a policeman in the forehead with a stone, military sources said. Neither suspect was identified.

Security forces also sealed the house of Yousef Suwad Adel in the West Bank village of Habla. Military sources said he has been wanted for a long time for allegedly attacking Palestinians suspected of collaborating with Israeli authorities.

The harsh punishments are permitted under the 1945 Emergency Security Regulations imposed during the British Mandate, but many civil rights groups charge the measures violate international law.

The sealings and demolitions are usually carried out before the suspect is brought to trial.

Mona Rishmawi, executive director of the West Bank-based civil rights organization Al Haq - Law in the Service of Man - called the sealings of stone-throwers' houses a further expansion of an illegal policy.

''It is a form of collective punishment,'' she said. ''They are not punishing the individual stonethrower. They are punishing a whole family. They are punishing people who had nothing to do with the act.''

The Israeli High Court of Justice has upheld repeatedly the legality of demolitions and house sealings. At least 124 houses have been sealed or partially walled up since the start of the 2-year-old uprising against Israeli occupation, Israel Radio reported.

#90037u1871 02/06/1990 ~United Press International

WASHINGTON (FEB. 6) UPI - Representatives of law enforcement, medical and religious groups Tuesday urged the Senate to outlaw the sale, importation and production of 14 assault weapons they claim are turning the nation's streets into war zones.

The Anti-Drug Assault Weapon Limitation Act was introduced last year by Sen. Dennis DeConcini, D-Ariz., but has yet to be voted on by the full Senate.

Sarah Brady, whose husband, James, was seriously injured in 1981 by a bullet meant for President Reagan, headed a group urging passage of the bill, which would ban domestic production, sale and import and export of 14 semiautomatic weapons listed.

''The brutal carnage that assault weapons have brought to the streets, neighborhoods and playgrounds of our cities and towns cannot be tolerated '' Alexandria, Va., Mayor James Moran, representing the National league of Cities, said at a news conference.

''These deadly weapons are designed for one purpose only - to unleash enormous firepower in the blink of an eye, to kill or be killed, and that is a philosophy of the battlefield, but not our backyard,'' Moran said. ''The 14 assault weapons affected by this legislation are murder machines that have no place in our communities.''

National police groups are supporting the bill.

''The police officers of this country are at war to reclaim our streets,'' said Sgt. William Pattison, executive vice president of the National Association of Police Organizations. ''The drug dealers, the youth gangs and the hate groups are armed with assault weaponry. ... Now is the time for the Senate to stand up and be counted on the side of law enforcement.''

Dr. Claude Cadoux, an emergency room physician at Georgetown University Hospital in the nation's capital, said hospitals are becoming overwhelmed by the violence, much of it drug related. For the past two years,

Washington, D.C., has led the nation's cities in the number of per capita homicides.

''By not adding to the flow of weapons, we will be taking an important stand in the war against drugs,'' Cadoux said. ''We will be taking a step to ending the death and destruction these weapons create in our own streets.''

The National Rifle Association is opposed to the measure.

''We think the answers don't lie in another law regulating firearms that criminals aren't going to obey, but lie in more jail space, less plea bargaining, more prosecutors, more judges and more mandatory sentences that are enforced for people who misuse firearms in crime,'' said Jim Baker, NRA director of federal affairs.

Last July, President Bush permanently banned the importation of 43 types of semiautomatic assault weapons. He also proposed legislation prohibiting domestic assembly of semiautomatic weapons and requiring registration of their magazines if transferred after the act's effective date.

Bush also proposed establishing enhanced criminal penalties for the use of such guns in the commission of drug trafficking and violent crimes.

(FEB. 6) UPI - The Soviet Communist Party is extending by one day its Central Committee plenum in Moscow... with the leaders furiously debating Mikhail Gorbachev's plan for a multi-party democracy. Soviet radio announced the extension today as conservative diehard Yegor Ligachev led a counter-attack against the proposed reforms.

Foreign Ministry spokesman Gennady Gerasimov reacted calmly to the emerging political pluralism, saying- in his words- ''if you can't beat them, join them.''

President Bush is delivering an upbeat assessment of the nation's fiscal state, saying the economy should continue expanding this year. In his first annual report to Congress on the nation's economy, Bush says the main economic goal of his administration is to achieve ''the highest possible rate of sustainable economic growth.'' Bush also lists a cut in the capital gains tax as one of his highest legislative priorities this year.

U-S military officials are suspending jet fighter operations for the day in Britain following two crashes involving U-S Air Force planes. The accidents came within hours of each other, leaving one crew member dead

and two others presumed dead. The first crash came last night, with a bomber going down 140 miles north of London. A second plane crashed today in Wales, about 150 miles west of London.

HOUSTON (FEB. 6) UPI - OPEC is committed to strengthening good relationships between oil producers and oil consumers during the 1990s, the cartel's secretary-general said Tuesday.

"My theme for the 1990s is an era of cooperation rather than confrontion," Dr. Subroto told reporters at a news conference. "The problem in front of OPEC is to increase supply. If we want to avoid crisis from happening in the 1990s, we require better communication and cooperation" between consumers and producers, he said.

Faced with increasing worldwide demand for oil, the Organization of Petroleum Exporting Countries needs to find financial support to expand its production capacity.

"Our organization's present production capacity is estimated to be around 27 million barrels per day, and it is generally reckoned that sustainable production runs at a level 15-20 percent below capacity ... there is a requirement to expand OPEC production rapidly," he said. Subroto estimated it would cost $60 billion to increase production by about six million barrels a day.

"We are, quite simply, talking about a level of expenditure well in excess of our financial capabilites as a group of 13 developing countries," Subroto said. "I keep it open how much will come from outside and how much will come from inside OPEC," he said.

Subroto's comments came during the opening day of the Cambridge Energy Research Associates' executives annual conference. Joseph Stanislaw, managing director of CERA, estimated that $35 billion to $50 billion will be needed to finance an expanded production capacity for OPEC.

"The 1990s will not be a decade of energy shortage but of energy surplus - the issue is where the energy is located," Stanislaw said. "The biggest issue facing OPEC and particularly the big prime movers within OPEC - Saudi Arabia, Kuwait, Iran, Iraq, Venezuela - is how to respond to the concerns over the environment and energy security," he said.

"One response will be to form new downstream joint ventures. Secondly, new foreign participation in the upstream within OPEC countries will be sought in order to fund the capacity race and to mollify concerns over the energy security question," Stanislaw said.

Subroto said OPEC also is concerned about the environment. "This issue brings us face-to-face with many of the fundamental problems affecting relations in the world economy at large, in particular, those between

industrialized countries and developing ones. We in OPEC are deeply concerned about the present poor state of the environment and naturally wish to live in a cleaner and safer world."

He called upon all countries to participate in frank discussions about their needs and expectations so that OPEC can provide a steady oil supply in return for an assured market.

Cambridge Energy is an international research and consulting firm specializing in energy markets and strategies and based in Cambridge, Mass.

#90037u1909 02/06/1990 ~United Press International

NEW YORK (FEB. 6) UPI - Staff at Kings County Hospital routinely crossed out posted federal safety guidelines for the disposal of infectious needles because the precautions were not hospital policy, a defense witness testified Tuesday,.

Nurse Juliann Booze took the stand in the month-old trial of Dr. Veronica Prego, 32, who is suing the city's Health and Hospital Corp. for $175 million, claiming she contracted AIDS from a carelessly discarded needle while at the hospital.

Booze, an infection control officer at Kings County Hospital at the time Prego was pricked with the infected needle, said she gave nurses treating infectious patients signs to post over the patient's beds alerting hospital staff to take special precautions with needles.

Under questioning from defense lawyer Stanley Friedman, Booze said she crossed off federal recommendations that infectious needles be disposed of in the patients rooms because it was not the policy at Kings County to take such measures.

Friedman said he called the witness to show that Kings County was not flaunting its own safety procedures.

''Having needle disposal units in the room was not our standard of practice,'' Friedman said, adding there was no law requiring such boxes in every room.

Prego's lawyers contend the hospital was negligent in not having the boxes in patients rooms the night Prego pricked her finger on a needle left in a pile of debris left by another doctor in the room of an AIDS patient.

They claim that hospital staff had to walk long distances with infectious needles to properly dispose needles and that might have contributed to the accident.

Prego's lawyer, Diane Wilner, said Booze's testimony showed the hospital was careless.

''They had a sign that said to put needle disposal boxes in the rooms and they weren't doing it,'' Wilner said.

Prego, an Argentine doctor, was working as an unpaid extern at the Brooklyn hospital when she pricked her finger on an infected needle in 1983. During testimony by her doctor earlier in the trial, Prego learned she had only one year to live.

On Monday, a hospital administrator testified that unpaid externs were given only ''haphazard'' training in the handling of infectious waste when they started at the hospital.

#90037u1927 02/06/1990 ~United Press International

KUALA LUMPUR, MALAYSIA (FEB. 6) UPI - Malaysia said Tuesday it was willing to pay Vietnam to take back Vietnamese boat people against their will and defy international criticism by continuing talks with Hanoi on mandatory repatriation.

''There was a hint (from Vietnam) for assistance from us and I gave them the impression we were prepared to consider this,'' Foreign Ministry Secretary-General Ahmad Kamil Jaffar said.

Kamil said the two sides discussed during a four-day meeting the forced repatriation of some 20,000 Vietnamese refugees crowded into Malaysian detention camps.

The refugees, known as boat people because they flee Vietnam in boats, are living under difficult conditions in camps in several countries in Southeast Asia, including Hong Kong.

At the Geneva conference on Indochinese refugees last June, a comprehensive plan of action was established which outlined procedures for voluntary repatriation.

Conference participants also agreed to screen out political refugees from those fleeing Vietnam because of economic hardship, but there has been tremendous international pressure against forced repatriation.

''We both recognize that this (mandatory repatriation) is a problem that should be overcome on an international basis,'' Kamil said.

Last March, Malaysia joined other nations and began a screening process.

''We have identified certain people who are considered economic migrants '' Kamil said. ''They know no country will accept them.''

The controversy surrounding the Vietnamese boat people heated up last December when Britain began forcibly repatriating boat people from Hong Kong detention camps.

Hong Kong reportedly paid $600 per head to the Vietnamese government to offset the cost of repatriating the 51 refugees returned in December. Later Hong Kong suspended the program under a storm of protest.

Kamil said many of the 13,000 boat people who landed on Malaysian shores in the period since screening was introduced 10 months ago were now considering returning home rather than ''languishing in the camps.''

''I think we can work it out to persuade them,'' he added.

HEMPSTEAD, NY (FEB. 6) UPI - The New York Jets ended a six-week search for a head coach Tuesday by selecting Bruce Coslet, the offensive coordinator of the Cincinnati Bengals and one of the more innovative coaches in pro football.

Coslet, 43, becomes the NFL's second-youngest head coach. He was the force behind the ''attack offense'' that the Bengals used to reach the Super Bowl in 1989.

He takes over a team that finished with a 4-12 record - third worst in the league - and last made the playoffs three years ago. The Jets, once regarded as a team with great possibilities, face an overhaul following their poorest season since 1980.

Dick Steinberg, who assumed the general manager's job two weeks before the end of the season, announced the hiring of Coslet at the team's training complex.

''We're looking for a strong motivator, a teacher and a disciplinarian,'' Steinberg said. ''A guy who can bring the most out of his players every time out. We feel Bruce is that guy.''

The Jets' coaching position was left in limbo during Super Bowl week when it appeared George Perles of Michigan State had the job. However, Perles chose to stay at the Big Ten school.

Steinberg said he met with 12 candidates and spent ''60 to 70 hours'' on

interviews. The field narrowed to Coslet and Mike Holmgren, offensive coordinator of the San Francisco 49ers.

Coslet spoke at length with Steinberg last Thursday at the NFL's Scouting Combine in Indiananpolis. Holmgren withdrew his name from consideration Monday for ''personal reasons.''

Coslet was the Bengals' offensive coordinator the last four years. Under his direction in 1986 and 1989 the Bengals had the NFL's No. 1 rated offense. Last season, Cincinnati had the AFC's best offense (381 yards a game) and best rushing attack (155 yards a game). The Bengals also scored 52 touchdowns, tops in the league.

Coslet's ''attack offense'' is characterized by no huddles and quick strikes. The Jets will need all the invigoration they can get, having scored just 253 points in 16 games. Only Seattle and Dallas scored fewer.

On defense, only Houston, Tampa Bay and Atlanta yielded more points (411) than the Jets.

Coslet's first order of business will be to hire a staff. Steinberg fired Coach Joe Walton and the entire staff after the season.

''I have barely been able to evaluate the team,'' said Coslet, making his first appearance at the Jets training facility. ''One of my primary reasons for being here is to get a staff formed as quickly as possible.''

Coslet said he is leaning toward being head coach and offensive coordinator this season. He says he plans to name a defensive coordinator in the next few days.

Last Friday, each NFL team protected 37 players on its roster, the rest becoming Plan B free agents. Coslet said the players left on the Jets' roster begin on an even basis.

''I'll have to see what I have when we get on the field,'' he said. ''I'd like to install the attack offense, but a good coach has got to fit his program to his players, not the other way around. We put in the attack offense five years ago, and we still screw it up on occasion.''

#90037u1958 02/06/1990 ~United Press International

(FEB. 6) UPI - The NFL's proposed spring international football league moved closer to life Tuesday when ABC Sports agreed to pay a reported $24 million for the first two years of network television rights.

ABC will televise regular-season and post-season World League of American Football games starting in the spring of 1991. The network said it would air 10 regular-season games on Sunday afternoons and a package of playoff games.

The WLAF announced it will have 12 teams in its inaugural season, playing a 10-game, round-robin schedule. Six teams will come from the United States, including one from New York. Other participants will come from England, West Germany, Italy, Spain, Canada and Mexico.

''The contract is a significant milestone in our evolution,'' said WLAF President Tex Schramm. ''The World League will be an international hit and we believe American football will be one of the leading trend-setters as the world moves to the new era of globalization in the 21st century.''

Schramm said the rosters for the first year will be made up predominately

of Americans, including some from the NFL.

''The people in Europe say they are interested in looking at football at our level,'' he said. ''There will not be a quota of international players. Players under contract with the NFL will be able to play because we're playing at an entirely different time. But there will be no association or working agreement with NFL teams.''

CBS reportedly also was interested in obtaining the network rights. Schramm said ESPN, Turner Sports, SportsChannel America, the USA Network and the Fox Network have shown a desire to air games on either Saturday or Monday nights. He said he should reach an agreement with one or two of those entities in the next few weeks.

The WLAF is given a decent chance of succeeding because it has the blessing of the NFL. The U.S. Football League and other spring leagues have failed in part because of strong opposition from the NFL.

USFL ratings on ABC slipped badly during the spring league's three years. A high of a 6.0 rating and 17 share in 1983 dropped to 4.1 and a 12 share by 1985.

ABC said the games will fill a void in its spring program schedule.

''There's no way to predict the ratings,'' said Stephen Solomon, an ABC Sports senior vice president. ''We're not overly optimistic. We think we're in a building mode. We anticipate ratings in the 3s, 4s and 5s, which would be acceptable and good counter-programming.''

Schramm said the WLAF will use instant replay and hopes to utilize radios in helmets for communication between players and coaches.

''We're going to use the technology that is available, but we're not going to gimmick up the game,'' Schramm said. ''We're going to present the football that people have grown accustomed to.''

#90037u1960 02/06/1990 ~United Press International

NEW YORK (FEB. 6) UPI - The Rev. Bruce Ritter, acclaimed founder of the nation's largest shelter program for runaway youths, said Tuesday he was taking a leave of absence amid allegations he lured several ex-residents into sexual liaisons.

The priest made his announcement the day The New York Times reported on its front page that the Catholic Church was investigating Ritter for alleged sexual misconduct with a former Covenant House youth 17 years ago.

The allegations marked the third time Ritter has been accused of luring former shelter residents into a sexual relationship - charges the priest has consistently denied.

''I am profoundly saddened by the allegations against me and the need to deny them constantly,'' Ritter said, in a statement released by Covenant House.

''I have no way of proving my innocence. My accusers cannot establish my guilt. I devoutly hope the inquiries currently under way will bring an end to this incredibly painful chapter in my life,'' Ritter said.

The priest said he would take ''several weeks off to rest and recuperate (and) deal with the personal stress caused by this controversy as well as its impact on Convenant House.'' Ritter did not specify how long his leave of absence would last.

In the past three months, Ritter's problems have reportedly led to a serious erosion of financial support for Covenant House, the nation's largest shelter program for troubled youths which Ritter founded more than 20 years ago.

The allegations also marred the reputation of the 62-year-old priest, who was cited as an ''unsung hero'' by President Reagan in his 1984 State of the Union address and who received a visit in Manhattan from President Bush last fall.

The first allegations about Ritter surfaced in December when Kevin Lee Kite, a former male prostitute and Covenant House resident, charged Ritter provided him with gifts in return for sexual favors last year.

Those accusations touched off an investigation by the Manhattan district attorney's office into misappropriation of Covenant House funds.

In January, the Village Voice published a 1986 interview with another former Covenant House resident, John Melican, then 30, who claimed he had carried on an intermittent, 13-year relationship with Ritter.

The third accusation was made by Darryl Bassile, who claimed Ritter lured him into a sexual relationship when he was a 14-year-old runaway staying at an intake center for Covenant House in Greenwich Village in 1973.

After Kite's allegations surfaced, Bassile contacted Ritter's superiors in the Franciscan order to lodge his complaint and a priest was sent to Bassile's Ithaca, N.Y., home to investigate the claims last week, the Times said.

Although the two most recent accusations against Ritter involve alleged

sexual misconduct with minors, the district attorney's office had no plans to probe the charges because the statute of limitations has expired, officials said.

Ritter has consistently denied the charges by Kite, Bassile, and Melican, while acknowledging that he knew all three in his work at Covenant House, the Times said.

#90037u1985 02/06/1990 ~United Press International

WASHINGTON (FEB. 6) UPI - Defense Secretary Dick Cheney got warnings from both Democrats and Republicans Tuesday, including House Speaker Thomas Foley and a key chairman, that his $307 billion defense budget may face additional cuts.

And Cheney and Gen. Colin Powell, chairman of the Joint Chiefs of Staff, cautioned that precipitous cuts could endanger the arms control process and threaten a return to the hollow army of the 1970s.

Cheney and Powell testified before the House Armed Services Committee, where Chairman Les Aspin, D-Wis., told Cheney, ''This budget will have to stand on its own. And when it does, it's going to come down.''

And Foley, at his daily meeting with reporters, said Democrats would put national security ahead of temporary budget consideration, ''But it is difficult to believe that the budget cannot be more reflective of the circumstances which everybody admits have taken place in the military and strategic condition of the United States.''

''I think there will be a view on our side that recommendations for heavy

spending for things like 'Star Wars' and for two new missile systems, and so on, are highly questionable in today's environment. Even questions about force levels are going to be seriously reviewed,'' said Foley.

Republican Rep. Larry Hopkins of Kentucky added, ''I agree ... that this budget is going to be cut. It's going to be cut quite simply because world conditions permit it and America's financial condition demands it.''

The budget contains a roughly $1 billion increase, to $4.6 billion, for the Strategic Defense Initiative or ''Star Wars'' missle defense program, $5.5 billion for the B-2 stealth bomber, money for both a rail-mobile 10-warhead MX missile and the truck-mounted one-warhead Midgetman, and an addition 38,000 slots cut from the Army and Air Force.

And President Bush has proposed that U.S. forces fall to 225,000 in Europe with 195,000 of that in Central Europe. The newest troop negotiating position has drawn suggestions that an even lower level be accepted.

In questions with Aspin, Powell said the Joint Chiefs of Staff might have to rethink their support of a Strategic Arms Reduction Treaty if significant changes are made in the missile programs or the B-2 bomber.

Three former chairmen of the joint chiefs of staff and other defense figures have said the nation does not need to pursue two mobile strategic missiles.

Powell, who said Moscow maintains a robust program of modernizing its nuclear missile forces, added, ''I dont see that the situation has changed to where we can abandon the programs as we have them right now.''

He said the current U.S. START position is based on all the programs progressing and said, ''If they don't come to fruition in some form or another, the chiefs would have to take another look at the emerging START treaty.''

Two committee members, liberal Ron Dellums, D-Calif., and conservative John Kasich, R-Ohio, renewed their drive Tuesday to kill off the B-2. A similar move is afoot in the Senate.

Dellums said the plane is ''intellectually indefensible, strategically destablizing and economically wasteful.''

Dellums also blasted the defense budget as ''a gross case of theft from our current needs. ... In the interest of world stability, now is the time to pause, not forge ahead.''

Cheney said that while the threat of attack from conventional forces by Warsaw Pact nations and Moscow is rapidly fading, Moscow's nuclear forces

remained formidable and ''a good deal of prudence is in order.''

''We don't want to rush out and cash in the peace dividend before anyone puts the deposit in the bank,'' he said, also promoting his proposal to close a variety of bases as necessary to respond to a shrinking U.S. military force in the aftermath of the Cold War.

The base closure topic arose with an occasional bit of parochial posturing but Aspin flatly told Cheney that the idea would go nowhere unless Cheney agreed to Aspin's proposal to renew a base closing commission to make impartical recommendations on a list of bases to close, with the list being handled on an all-or-nothing basis to take the political sting out of it.

SOUTH LYON, MI. (FEB. 6) UPI - The works of Edgar Allan Poe will not be removed from curriculum at South Lyon schools despite a parent's complaint that the author's tales of murder and insanity are too strong for youngsters.

At a meeting Monday night, the school board in the southeast Michigan district denied a parent's request to ban works by Poe and related visual materials in the classroom.

The parent, who has a child in the sixth grade at Centennial School, contends that Poe's Gothic stories are too graphic for middle school students.

In particular, the parent objected to a filmstrip used in the classroom on ''The Telltale Heart,'' the classic Poe tale about a murderer who hears the heartbeat of the victim whose body he has hidden in his house.

Assistant Superintendent Sue Matz said a school committee reviewed the

parent's complaint first and then referred the matter to the school board, which issued the denial.

The parent's only recourse now is to pursue the issue in court, she said.

SAN SALVADOR, EL SALVADOR (FEB. 6) UPI - Salvadoran refugees continued to return to their war-torn country Tuesday from camps in Honduras in what United Nations officials said was the biggest repatriation in Central American history.

President Alfredo Cristiani was to return to El Salvador later Tuesday after a six-day visit to the United States in which he requested U.N. help to put El Salvador's derailed peace process back on track.

Roberto Rodriguez, director in El Salvador of the U.N. High Commission for Refugees, said a group of 618 refugees returned to El Salvador Tuesday, as part of the repatriation of some 8,500 refugees who have been living in a camp in Honduras for close to a decade.

''The repatriation has gone very smoothly,'' Rodriguez told United Press International. He said the massive movement of people was ''without a doubt, the largest repatriation in the history of Central America.''

Rodriguez said the operation would result in the closing down of Colomoncagua refugee camp in southern Honduras just 4 miles north of that country's border with the Salvadoran province of Morazan.

''By the twentieth of February, Colomoncagua will have disappeared. It will be history,'' Rodriguez said.

He said some 8,500 Salvadorans have lived in the camp for almost a decade. The refugees were forced to flee their lands in rural areas of northern El Salvador that became battlefields for government troops and rebels of the leftist Farabundo Marti National Liberation Front, or FMLN.

The decade-old conflict has cost the lives of more than 72,000 people, most of them civilians.

The refugees have been returning in groups of about 500 every four or five days in a process that began Jan. 14 and is scheduled to end Feb. 20.

The refugees are constructing four settlements near the town of Meanguera, 70 miles east of San Salvador. The area is still considered a rebel stronghold, and last week fighting broke out within a few miles of the new settlements.

The FMLN said in a communique issued Tuesday that the Salvadoran Air Force ''strafed and rocketed the refugee settlements.'' But Rodriguez said the

military has been supportive of the repatriation and that the refugees were not targeted in the air attack.

#90037u2053 02/06/1990 ~United Press International

WASHINGTON (FEB. 6) UPI - The Treasury Department auctioned $10 billion in three-year notes Tuesday with the yield leaping to 8.43 percent at the start of its mammoth quarterly effort to borrow cash to run the government.

Apparently fueled by widespread Japanese buying, the yield was the highest since 9.12 percent on May 9, and a huge increase over November's $30 billion quarterly refunding when three-year notes yielded 7.77 percent, the Treasury Department said.

The three-year notes sold Tuesday at an average price of $99.857 with 100 equalling the face value and a single point representing $10 on each $1,000 investment. The interest rate on the notes, which mature Feb. 3, 1993, is 8.375 percent.

In addition, the Treasury Department said it will offer $10 billion in ten-year notes Wednesday, and $10 billion in 30-year bonds Thursday to cover maturing bonds and new debt.

Bond yields have been steadily climbing in recent weeks. In the critical auction Thursday of 30-year "long bonds," the rates could reach dramatically higher levels, analysts said.

Samuel Kahan, chief economist for Fuji Securities in Chicago, said the yield on three-year notes was "reasonable" and that the auction went "pretty much as expected." But Kahan noted the level of bidding was a "little higher than normal."

The securities offered in the refunding are sold primarily to large institutions, such as banks, pension funds and mutual funds, in the United States and overseas, as well as to some individual investors.

State, local and foreign governments also purchase the notes in the three-day refunding marathon, and the Treasury accepted $825 million of

tenders from Federal Reserve Banks acting as agents for foreign institutions.

Japanese investors usually buy 30 to 40 percent of new 30-year bonds, but a jump in interest rates for Japanese government bonds has prompted fears American issues will lose their appeal.

In New York, Robert Brusca, chief economist for Nikko Securities International, estimated Japanese investors, urged on by their central bank, purchased 30 percent to 40 percent of the shorter term notes Tuesday - and may steer clear of the long bonds.

"It looks great ... it feels rotten," Brusca said. "We get a sense the Japanese ... bought the safest thing they could buy, which is the three-year note. It's a dark lining to a silver cloud."

The bidding follows the January auction of $5 billion in 40-year bonds issued by the Resolution Funding Corp., the agency financing the bailout of the savings and loan industry. It proved to be a major disappointment and rattled the world's bond and stock markets.

The Treasury Department also said this week's borrowing is expected to leave it with $10 billion on March 31, the date income tax receipts traditionally begin pouring in leading up to the April 15 deadline.

Although the government's need for cash varies, the Treasury's requirements this quarter - projected to be $41.6 billion - surprised Bush administration officials and securities analysts, and may lead to additional sales of two-year and five-year notes.

SEATTLE (FEB. 6) UPI - Burlington Northern Railroad, the nation's largest railway, said Tuesday it is working on an exchange of rail technology and possible joint ventures with the Soviets, who move half the world's rail freight on their tracks.

Gerald Grinstein, president of the railroad, signed a preliminary agreement in Moscow Friday with the Soviet minister of railways, Nikolai Konarev, the company said.

''What we have is an agreement to agree,'' said Steven Crown, a lawyer for Burlington Northern, who was in Moscow for the discussions leading up to the agreement.

The Soviets and BN will now research specific areas of interest and meet again in March or April to discuss concrete proposals for joint action,

Crown said.

''There are things that the Soviets do that Burlington Northern doesn't do '' Crown said. ''And there are things that BN does that they don't. One side may find it makes economic sense to borrow from the other or combine the two.''

Fifty percent of the world's freight is carried on about 247,000 miles of Soviet rail track, 12 percent of the world's track. Burlington Northern has about 27,000 miles of track.

Among the areas of possible cooperation are the use of types of rail ties - wood versus concrete or composite materials - track maintenance schedules, means to improve the life cycle of operating systems, train weight and how that affects wear on track and railcars, Crown said.

One issue of particular interest is grain shipments, Crown said. Burlington Northern is the largest hauler of grain in the United States, moving more than 39 million tons annually.

''BN moves a good deal of grain domestically and knows how to increase efficiency loading onto cars and moving it from destination to destination usually ports,'' Crown said. ''But with the Soviets, it's usually the other way. BN moves from producer to export and so they're looking to apply the same principles, technology and management to improvement on the import side.''

WASHINGTON (FEB. 6) UPI - The Pentagon said Tuesday it was sending an Air Force C-5 transport plane carrying two UH-60 helicopters to Western Samoa to join in the search for five Peace Corps workers missing as a result of tropical storm Ofa.

The C-5 was to depart Hickam Air Force Base in Hawaii and arrive on the island chain of Western Samoa in the South Pacific on Wednesday, weather permitting, the Pentagon said.

Tropical storm Ofa struck Western Samoa Monday and five Peace Corps volunteers were reported missing as a result of the storm. Four of them are missing from the island of Savaii and one from the main island of Upolu.

The Pentagon also said that an Air Force C-141 at Guam has been diverted from its normal mission and will carry disaster relief supplies, general repair materials and plastic sheeting to Western Samoa.

The supplies were provided by the U.S. Agency for International

Development's Office of Foreign Disaster Assistance.

The Federal Emergency Management Agency's coordinating officer and three Army Corps of Engineers advisers arrived on American Samoa Monday night. American Samoa is located northeast of Western Samoa.

The Army's Western Command will provide the majority of Defense Department relief support to both Western Samoa and the U.S. territory of American Samoa, the Pentagon said.

ANCHORAGE, AK (FEB. 6) UPI - The chief engineer of the Exxon Valdez told a jury Tuesday that three tanker crewmen, including the captain, spent hours drinking in Valdez bars before their loaded tanker sailed out of port and hit Bligh Reef, causing the worst oil spill in U.S. history.

Jerzy Glowacki, testifying at the trial of former tanker skipper Joseph Hazelwood, then characterized the hard-driving engine of the grounded tanker ''as if you drive a car up against a brick wall and proceed at 50 mph without moving.''

Glowacki, who said he ordered two beers and four gins in Valdez eating and drinking establishments before sailing, said that Hazelwood had three or four drinks prior to the March 24 grounding and spill of the Exxon Valdez.

He testified that Hazelwood drank ''perhaps two, perhaps three'' vodkas at the Pipeline Club in Valdez during three hours of drinking and then ordered another drink at another bar where the trio went before returning to their tanker for the trip to Long Beach, Calif.

The tanker journey lasted all of three hours before ending 25 miles out of Valdez on the well-charted rocks of Bligh Reef in Prince William Sound.

Hazelwood, 43, of Huntington, N.Y., is on trial on charges of operating the Exxon Valdez while intoxicated, reckless endangerment, negligent discharge of oil and criminal mischief.

If convicted of the three misdemeanors and a felony, Hazelwood could go to jail for up to seven years and three months and be fined $61,000.

Hazelwood has pleaded innocent to all charges, but his lawyers - while denying Hazelwood was drunk - admitted in opening statements that the skipper had a couple of drinks.

Prosecutor Brent Cole said an alcohol-impaired captain made bad decisions while in command of the tanker, thus creating the situation that caused the wreck and spill, and then tried to drive the tanker off the reef, making matters worse.

Glowacki said radioman Joel Roberson was drinking with him and Hazelwood. Roberson also is slated to testify.

Glowacki testified that Hazelwood was drinking straight vodka, Smirnoff.

Prosecutors have said Hazelwood was drinking for nearly seven hours, from about 1:30 until 8:30 p.m., but Glowacki said he arrived at the Pipeline Club first at 4 p.m. and then was joined by the skipper, who sat down and drank for three hours before the Exxon companions strolled across town to the next bar for another drink.

Glowacki said the three sat in the ''subdued rather dark'' Pipeline Club drinking and talking shop - including a discussion of whether it might be better to delay the March 23 departure until the following morning because of icebergs reported in the shipping lanes.

However, the Exxon Valdez not only left that night at 9:12 but the time was advanced by an hour while the crewmen were in Valdez drinking so they were late boarding. The tanker was on a detour around icebergs when, a few minutes after midnight, it struck Bligh Reef and released 11 million of its 53 million gallons of crude oil into the pristine waters of the sound.

Glowacki, buried deep in the ship's engine room, said he heard a ''muffled grumbling noise'' but was unaware that the tanker was aground until the

captain called down from the bridge to find out if it would be OK to use the engines.

Once the ship went aground, Glowacki said he noticed from various engine control readings that the ''engines were working harder than they should be.''

Glowacki said the captain put the throttle in the forward position, never in reverse. Running the engines was all right, Glowacki said, because the grounding did not puncture the hull near the engine room.

Glowacki said that after the grounding a tank cap blew off and a geyser of oil shot up over the deck of the tanker - making an oily mess still in evidence to visitors to the tanker well after the grounding.

When the captain said he wanted to restart the engines, which had been shut down for 15 minutes after the grounding, Glowacki said, ''Under circumstances like this, one does not ask questions. People do things for a reason.''

Glowacki was the third prosecution witness to testify in a trial expected to last at leasrphy, the ship pilot who helped guide the Exxon Valdez out of port before he disembarked prior to the grounding, testified earlier that Hazelwood smelled of alcohol but showed no signs of intoxication or impairment. However, he said he found it unusual that the skipper was absent from the bridge.

State Superior Court Judge Karl Johnstone denied a defense request to question Murphy about another unrelated grounding in which Murphy drove a charter boat aground six weeks after the Exxon Valdez accident, declaring the incident irrelevant.

Defense lawyers said they wanted the jury to know that maritime accidents happen from time to time. But jurors did learn that Murphy has been named as a defendant in about two-thirds of the 150 civil suits filed against Exxon, Hazelwood and others involved in the grounding.

#90037u2121 02/06/1990 ~United Press International

(FEB. 6) UPI - The closed-door debate over the future of the Soviet Communist Party may still be going on when Secretary of State Baker arrives in Moscow tomorrow. Soviet radio says the Central Committee plenum that was supposed to conclude today is being extended due to the heated discussion on Mikhail Gorbachev's plan for a multi-party democracy. Baker is due in the Soviet capital tomorrow afternoon for talks with his Soviet counterpart, Eduard Shevardnadze.

Former White House aide Oliver North is asking a three-judge federal appeals court to toss out his three felony Iran-Contra convictions. The ex-Marine was the main player in the arms to Iran and secret aid to the Contras affair. He contends that publicity from his nationally broadcast testimony to Congress in the summer of 1987 improperly influenced his indictment and trial. North sat through two-and-a-half hours of legal arguments in U-S District Court in Washington today with his wife, Betsy, and lawyer Brendan Sullivan by his side.

China is imposing tough new clamps on overseas study by its two-Million college students. Government sources say that under a new policy passed last month by the State Education Committee, all college graduates must work for five years before going abroad, or face steep fines. The sources say that graduates who do NOT fulfill the five-year work period will have to pay their university the full tuition cost for each year short of the requirement. The sources say the new regulations will go into effect on Saturday.

#90037u2141 02/06/1990 ~United Press International

DETROIT (FEB. 7) UPI - Chrysler Corp. said Tuesday its venture to build minivans in Austria by early 1991 may include versions suitable for right-hand-drive markets, opening the door for possible sale in Britain or even Japan.

Chrysler Vice Chairman Gerald Greenwald said a minivan with a left-side passenger door is being developed as part of the Austrian program. Greenwald spoke following a news conference on Chrysler's joint manufacturing operation with General Motors Corp.

Those Austrian models would retain the sliding door on the right side of the minivan, like models sold here as the Dodge Caravan, Plymouth Voyager and Chrysler Town & Country. The left passenger door would most probably be of the conventional hinged design, he said.

Greenwald also said the venture with Austria's Steyr-Daimler-Puch announced last month may ultimately produce minivans with right-hand-drive.

''That would be the logical next step, and mainly for the United Kingdom '' he said, adding that exporting those models to Japan for sale ''remains

to be seen.''

Greenwald also said that minivans powered by diesel engines will be produced under its Austrian venture for European markets, where Chrysler sold about 50,000 cars and vans exported from North America.

Chrysler's bid to build minivans in Austria recognizes the growing importance of the European market, where both GM and Ford Motor Co. have been major players for years. Chrysler left that market in 1978 to concentrate on salvaging its North American vehicle business.

It also positions Chrysler for 1992, when the European Community dismantles trade barriers.

#90037u2150 02/06/1990 ~United Press International

NEW YORK (FEB. 6) UPI - The nation's stocks of crude oil and petroleum products surged last week as refinery runs moved closer to full capacity and gasoline imports nearly doubled, the American Petroleum Institute reported Tuesday.

For the week ended Feb. 2, the API weekly survey found crude oil inventories jumped 7.7 million barrels to 351.1 million barrels from 343.4 million barrels in the prior week but surged well above year-ago levels of 333.4 million barrels.

Crude oil imports increased sharply to 6.6 million barrels a day from 6.2 million barrels a day in the previous week and were substantially higher than year ago imports of 5.5 million barrels a day.

Imports of all refined products rose to 3.2 million barrels daily from 2.7 million barrels daily in the previous week and were much higher than year-ago imports of 2.6 million barrels daily.

U.S. refineries operated at 88.9 percent of capacity last week, compared with 88.8 percent a week earlier and 85.2 percent a year ago. Gasoline imports nearly doubled to 738,000 barrels daily from 385,000 barrels daily in the previous week and were well above year-ago imports of 529,000 barrels daily.

Gasoline supplies increased 4.6 million barrels to 231.4 million barrels from 226.8 million barrels in the prior week and moved closer to year-ago levels of 243.9 million barrels. Gasoline stocks had increased 16.8 million barrels in the three prior weeks.

Stocks of unleaded gasoline, which accounts for 90 percent of the domestic market, also increased to 174.1 million barrels from 171.0 million barrels

a week earlier and were significantly higher than year-ago levels of 161.4 million barrels.

Gasoline production held steady at 7.1 million barrels daily, the same level as in the previous week, but higher than year-ago output of 6.9 million barrels daily.

Inventories of distillate - used for home-heating oil and diesel fuel - rose 4.5 million barrels to 121.0 million barrels from 116.5 million barrels a week earlier and moved ahead of year-ago levels of 117.4 million barrels.

Distillate production slipped, however, to 2.9 million barrels daily from 3.1 million barrels daily in the preceding week and was less than year-ago output of 3.0 million barrels daily.

Distillate imports moved up to 723,000 barrels a day from 684,000 barrels a day in the previous week but were much higher than year-ago imports of 344,000 barrels a day.

WASHINGTON (FEB. 6) UPI - The Census Bureau said Tuesday there were nearly 1.5 million American Indians in the United States when it conducted its 1980 count and the Cherokee tribe, with 232,080 people, was the largest.

The report - presented as the agency prepares to begin the 1990 tally - said there were 1,478,523 American Indians in 1980. The U.S. population as a whole at that time was set at 226,545,805.

Among the tribes, the bureau saud that following the Cherokee, the next nine largest tribes were Navajo, 158,633; Sioux, 78,608; Chippewa, 73,602; Choctaw, 50,220; Pueblo, 42,552; Iroquois, 38,218; Apache, 35,861; Lumbee, 28,631 and Creek, 28,278.

In addition, the report said 28 percent of Indians age 15 and older lived below the poverty level in 1979, compared with 12 percent for the total U.S. population. Among the 10 tribes, the poverty rate ranged from 46 percent for the Navajo to about 20 percent for Choctaw, Iroquois, Cherokee and Creek.

The Census report also put the median age of the American Indian population at 23.5 years, compared with 30 years for the nation as a whole. Among tribes, the range of the median - as many above as below - was 27.3 years for Cherokee and just 19.3 for the Navajo.

Other demographic characteristics measured by the Census Bureau found that 56 percent of Indians age 25 and older were high school graduates compared with 66 percent of the total population.

Among the 10 largest tribes, the proportion of high school graduates was above 50 percent for all tribes except the Navajo, 40 percent, and Lumbee, 38 percent. The Creek had the highest share of high school graduates, 65 percent.

Married couples comprised 72 percent of all American Indian families in 1980, the report said, compared with 83 percent for the national population.

Among Indians 16 and older, 59 percent were in the labor force, compared with 62 percent for the total U.S. population. Roughly 60 percent of each tribe's population was in the labor force except for the Pueblo, Sioux and Navajo, with the Navajo having the lowest labor force participation rate, 48 percent.

According to the 1980 census, the median money income of Indian families was $13,680 in 1979, compared with a national median of $19,920. Among the tribes, the Creek had the highest median income, $15,290, and the Navajo the lowest, $9,900.

WASHINGTON (FEB. 6) UPI - A former Catholic priest who has launched a separate black denomination Tuesday called an announcement that he has been excommunicated from the Catholic Church ''impossible.''

The Archdiocese of Washington announced Monday that George Stallings ''has excommunicated himself'' by breaking from the church, and said his followers also would be excommunicated.

''Father Stallings has rejected a number of Church teachings,'' said Vicar General William Kane in a statement for the archdiocese. ''For example, his reported views on abortion and sexual morality are a tragic departure from the Church's vision of the value of human life, the dignity of the human person and our calling to live as the Lord's disciples. ... Father Stalling has excommunicated himself.''

Responding to the statement, Stallings said, ''That's impossible.''

''We have said we have no desire in any way to denounce our Catholicism, but that we would remain true to revealed doctrines of the Catholic Church and continue to give full expression of Catholicism out of the Afro-centric expression.

''The Roman Catholic Church cannot excommunicate me or anyone else from the Roman Catholic Church,'' Stallings said Tuesday. ''For in its true meaning, it means to be cut off from communion.''

James Hickey, archbishop of Washington, had not stopped Stallings from incorporating African rituals into the Catholic mass in Stallings' dozen years as a priest in Washington. But Stallings broke from the Church when Hickey would not agree to demands that he have total control of the liturgical content of his services.

Stallings has since called the Catholic Church a ''white racist'' institution.

On Tuesday he said, ''I know this must be a dark day for James Hickey because he has relived every moment of those four sessions that he and I held to work out a solution.''

Stallings was referring to four meetings this summer when he asked for his own, independent parish.

Stallings, 41, was suspended as a priest in July after forming the independent Imani Temple, which continued most Catholic teachings while incorporating many African-American rituals and customs. Initially, Stallings said he wanted to be embraced by the Catholic Church.

But last week, Stallings announced he was forming his own denomination - the African-American Catholic Congregation - which would have no link to Rome.

Stallings said that under the independent church's doctrine, priests will

be allowed to marry, women will be ordained as priests and abortion will be permitted - all direct contradictions to Catholic teaching.

The African-American Catholic Congregation is the first splinter group from the Catholic Church in the United States since the Polish National Church formed in 1904 in Pennsylvania.

Since the Imani Temple was formed this summer, another temple has opened in Washington, D.C., and a third in Norfolk, Va.

Stallings claims overall weekly attendance is about 2,500.

#90037u2170 02/06/1990 ~United Press International

NEW YORK (FEB. 6) UPI - The dollar was mixed Tuesday in New York trading, declining slightly against the dominant West German mark but holding its own against the Japanese yen - which had its own problems with deutsche mark strength.

The dollar strengthened in early trading as traders reduced their exposure on contracts to sell the U.S. currency, making counterbalancing purchase orders and cashing in gains made on marks in recent days.

The dollar later came under selling pressure but had stabilized by the end of the session as participants gave up trying to sell it below the 1.65 mark barrier and worked the mark against the weakening yen.

In late New York trading the dollar was changing hands at 1.6573 marks, down from 1.6593 marks the day before. Against the Japanese currency the dollar was quoted at 145.29 yen, up from 144.65 Monday.

Bracing the U.S. currency later in the day, chiefs of four Federal Reserve banks told a Congressional panel they support a resolution to cut inflation to zero in five years. Tough Fed inflation stands tend to run against cuts in short-term interest rates that undermine the dollar.

John Lynam, a foreign exchange vice president with Security Pacific International Bank, said the Fed officials' remarks on a House anti-inflation resolution were "somewhat supportive" of the dollar.

So, he said, was extension of the Soviet Communist Party plenum for further consideration of multiparty reforms advocated by President Mikhail Gorbachev, which raised doubts as to whether he was prevailing in his effort to sway the party behind his perestroika/glasnost campaign.

The German mark's fortunes, based in part on the prospect for economic growth in Eastern Europe, are riding closely with Gorbachev's.

Traders were for the most unfazed by German proposals for a monetary union of East and West Germany. West German Chancellor Helmut Kohl said Tuesday that he would immediately open talks on the proposal, which would most likely make the deutsche mark the single German currency.

"I think that confused the market a little bit," said Eric Lehtis, a senior trader for Mitsui Bank. "People aren't sure whether that's good or bad for the West German mark," he said, citing a fear of dilution.

Lynam said German monetary union moves could create more deutsche mark demand but added, "It's going to be down the road."

In New York the British pound rose to $1.7015 from $1.700. Other dollar rates: 1.4760 Swiss francs, up from 1.4725; 5.6405 French francs, up from 5.6395; and 1,234.25 Italian lire, up from 1,231.75.

In Europe the dollar was sharply lower. It closed in Frankfurt at 1.6570 German marks, off two pfennigs from Monday's price of 1.6755, after recovering earlier from a two-year low of 1.6532 marks.

It also declined in Zurich, Paris, Brussels and Milan at 1.4740 Swiss francs against 1.4840, 5.6295 French francs against 5.6970, 34.70 Belgian francs against 35.015, and 1,230.50 Italian lire compared with 1,246.25.

In London the pound moved up to $1.70 from $1.6955 Monday. It was the first time the pound had broken the $1.70 level in ten months.

Traders blamed the dollar's rout on Wall Street's opening decline and German mark bullishness on monetary unification moves.

Republic National Bank in New York closed cash gold at $421.25 an ounce, off from $422.25. The New York Commodity Exchange settled gold at $421.30 an ounce, down from $422.40. In Zurich gold fell to $421.50 an ounce from $423.50. London gold declined to $421.25 an ounce from $423.25.

Republic closed cash silver at $5.315 an ounce, off from $5.34. Comex spot silver fell to $5.306 an ounce from $5.329. Zurich silver fell to $5.30 an ounce from $5.40. London silver was unchanged at $5.37 an ounce.

#90037u2185 02/06/1990 ~United Press International

AMMAN, JORDAN (FEB. 6) UPI - King Hussein said in remarks published Tuesday that the immigration of Soviet Jews to the Israeli-occupied territories presents ''a real danger'' to the Arab world, and the PLO's parliament in exile urged Moscow to halt the flow of emigrants.

Hussein, in an interview with the Kuwaiti newspaper Al Watan, called for an urgent Arab summit in his country to discuss the issue. He also urged Arab leaders to initiate a dialogue with the Soviet Union and Eastern European countries to counter Israeli diplomacy in that region.

''This issue should be an incentive for us to meet at the highest level to discuss this danger in a frank and sincere manner, and to adopt a suitable formula for confrontation,'' said Hussein, whose remarks also were published in Jordanian dailies.

''We have to reconsider everything,'' he added.

The PLO's parliament in exile sent a letter to Soviet leader Mikhail Gorbachev Tuesday urging Moscow to halt the immigration of Soviet Jews to the Israeli-occupied West Bank and Gaza Strip.

''In the name of human rights, we appeal to you to take speedy measures to stop the immigration of Soviet Jews, which represents ... Jewish raids on our land and homeland,'' the Palestine National Council said in a five-page memorandum.

''We appeal to you to seriously implement international declarations and resolutions which require turning the pressure toward the United States to stop its military, financial and political support to Israel,'' the memorandum said.

The PNC, considered to be the legislative arm and governing body of the Palestine Liberation Organization, was the latest in a series of Arab organi- zations to express concern over increasing Soviet Jewish immigration to Israel.

An estimated 40,000 to 100,000 Soviet Jews are expected to immigrate to Israel during the next year. The influx of Soviet immigrants to Israel is the result of a loosening of emigration requirements by Moscow and a decision by Washington to restrict the number of Soviet Jews moving to the United States.

Statistics cited by Israeli officials indicate that only a small percentage of recent Soviet Jewish immigrants to Israel have decided to live in the Israeli-occupied West Bank and Gaza Strip.

But remarks by Israeli officials, including Prime Minister Yitzhak Shamir, have heightened Arab concerns that the Israeli government may decide to settle large numbers of new immigrants in the territories. The idea of settling Soviet Jews in the territories has been criticized by the United States and Arab countries as unhelpful to the peace process.

PLO chairman Yasser Arafat, in a meeting last week with Soviet officials in

Tunisia, asked for the Soviet Union to halt direct emigration of Soviet Jews to Israel. He asked instead that Soviet Jewish emigrants be forced to stop over in Europe, where they would be allowed to decide on their final destination.

PLO officials said the Soviets had agreed to stop direct emigration, but Moscow has not confirmed any such decison.

The Islamic Conference Organization, based in Saudi Arabia, also voiced concern Tuesday over the issue of immigration to the occupied territories. The group criticized Washington for its decision to put restrictions on the number of Soviet Jews allowed to immigrate to the United States.

''The mass emigration of Soviet Jews to occupied Palestine constitutes a serious threat to security and stability in the region,'' said Wahid Ghabid Sais, secretary-general of the 46-nation ICO, in a statement carried by the official Saudi Press Agency.

''The mass emigration turns the demographic structure in the region upside down at the expense of the regional peoples,'' he added.

Egypt's foreign minister, Ismat Abdel-Meguid, in Jeddah for an ICO meeting, said in a statement on his arrival that ''Egypt is following with extreme concern the emigration of Soviet Jews to Israel. This matter requires consultations and cooperation between Arab and Islamic states to halt this danger.''

Hussein, in his interview with Al Watan, said Jordan, Syria and Lebanon faced ''a real danger'' from the influx of Soviet Jews to Israel and from right-wing Israelis pushing the idea of a greater Israel that would include the occupied territories.

''The danger is a real danger,'' said Hussein. ''It requires more than summit meetings. ... We need to be frank and straightforward to discuss the matters deeply'' before the convening of a peace conference.

The Jordanian ruler charged that Israel was trying to implement a ''Jordan is Palestine'' policy. Some right-wing Israelis, responding to demands for a Palestinian state, point to Jordan's large Palestinian population and claim that Jordan is the Palestinian state.

#90037u2208 02/06/1990 ~United Press International

BEIRUT, LEBANON (FEB. 6) UPI - Christian forces vying for control of east Beirut clashed for the seventh day Tuesday, ignoring an impassioned appeal by Pope John Paul II and forcing President Elias Hrawi to ask world leaders for support to end the violence.

''I appeal to you to grant every assistance to save Lebanon, and I appeal to you to support me in any effort or measure I find myself obliged to take ... to end the suffering of the Lebanese people,'' Hrawi said in a statement.

The appeal was addressed to the leaders of the United States, the Soviet Union, France, Britain, the European Community, the United Nations and the Arab League.

Earlier in the day, Pope John Paul II made an anguished appeal to Christians to stop their ''fratricidal combat'' in Lebanon and warned that the strife could put Lebanon's ''very existence in peril.''

The pope made his appeal in a letter addressed to Maronite Christian Patriarch Nasrallah Pierre Sfeir. His message reinforced attempts by papal ambassador Pablo Puente to arrange a meeting between the warring Christian factions at the Vatican Embassy in Harisa, 11 miles northeast of Beirut.

''My sorrow is all the keener because these battles oppose brothers who share the same faith and mainly hit innocent people,'' the pope said.

Puente and local clerics have arranged at least eight short-lived cease-fires.

Hrawi, who was elected president in November 1989 as a result of a peace plan brokered by the Arab League, said his appeal was made as ''head of a legitimacy you have recognized as the whole world did.''

Sources close to Hrawi said he was seeking support that would back him if he ''found himself obliged to resort to a military action to end the war in the Christian enclave'' of east Beirut.

Hrawi said he is unable to respond to the repeated appeals ''by my people that are living under the pressure of terror and crimes practiced by those who rebelled against the legitimate authority.''

Gen. Michel Aoun, who was dismissed by Hrawi as commander of the Lebanese army, has rejected the Arab peace plan and pledged to oppose Hrawi until all Syrian troops occupying Lebanon leave the country.

Forces loyal to Aoun and militia leader Samir Geagea, who has recognized Hrawi as president, have been fighting in fierce battles that have killed at least 250 and wounded more than 1,000 others in seven days.

Geagea angered Aoun who considers east Beirut his domain. Both have been vying for the contol of the leadership of the Christian enclave. Aoun has 15,000 soldiers under his command while Geagea has 10,000 armed men.

Troops loyal to Aoun Tuesday controlled the strategic town of Dbayieh, 3 miles north of Beirut, where Geagea's Christian Lebanese Forces militia had a stronghold. Sources said Aoun's troops launched a mop-up operation against pockets of the militia in the town, forcing the remaining gunners to withdraw.

Geagea's militia in a statement accused Aoun's army of defying relentless peace efforts by the Vatican mission and local clerics. Aoun's radio station claimed the troops were on the defensive.

A week of fighting has pinned down some million Christians living in east Beirut in ill-equipped underground shelters without electricity, water and bread. Hospitals also suffered severe shortages in medical and food supplies.

The International Committee of the Red Cross was able to dispatch some medical assistance to the hospitals in the Christian enclave for the first time since the violence began.

Spokesman Roland Sidler said the ''ICRC was able to organize a joint convoy with the Lebanese Red Cross to enter areas of east Beirut and bring medical supplies, especially oxygen, to hospitals.'' The convoy crossed from the Moslem part of the capital to the Christian part.

A French plane carrying a medical team, medicine and serums, arrived in Beirut one day after France dispatched special envoy Bernard Kouchner to Beirut on a humanitarian mission.

#90037u2220 02/06/1990 ~United Press International

WASHINGTON (FEB. 6) UPI - The EPA, citing the need for long-term solutions to toxic waste problems, formally pledged Tuesday to make greater use of innovative ''treatment'' technologies - such as incineration - in cleaning up Superfund sites.

In issuing a new management blueprint for the much-criticized Superfund program, the Environmental Protection Agency also said it would take early action at all sites to detect and address ''acute'' toxic waste threats posing immediate risk to public health or the environment.

And the agency promised to conduct long-term monitoring of sites where wastes are left behind after cleanup operations are completed. It said all such dump sites will be checked at least once every five years and no site will be taken off the agency's priority cleanup list without being reviewed at least once.

The agency said a fourth priority would be to restore contaminated ground water ''where practical'' so it can be used as drinking water.

The EPA said its new Superfund policy emphasizes treatment technologies because they reduce the toxicity, volume or mobility of wastes and, thus, provide the best potential for permanent cleanups.

In addition to incineration, these methods include:

-Vitrification, in which contaminated soils are fused into a glassy waste that does not leach contaminants.

-Bioremediation, in which bacteria and other microbes are used to naturally break down toxic chemicals in wastes.

-Separation, in which filters or resins are used to separate out toxic elements from liquid wastes.

The EPA policy statement, formally known as the National Contingency Plan, comes in response to 1986 amendments to the Superfund law in which Congress ordered the agency to expand its use of treatment technologies.

The agency also endorsed that goal last year after conducting a full-scale review of the Superfund program, which has been heavily criticized by environmentalists and congressional analysts for relying too heavily on ''containment'' technologies.

Containment methods involve covering up or walling in wastes with liners to prevent leakage of wastes into groundwater.

Critics charge ''contained'' dump sites eventually spring leaks, contaminating the environment. They also contend the EPA has preferred containment techniques mainly because they are cheap, allowing the agency to spread scarce cleanup dollars around to many sites rather than doing good cleanups at a few.

In its policy statement, the EPA said its primary goal for the Superfund program would be to select cleanup remedies that protect human health and the environment over long periods of time and minimize untreated wastes.

However, the agency said cleanup operations at many sites will involve a combination of treatment and containment technology, depending on the specific characteristics of a given site.

Don Strait, an attorney with the Natural Resources Defense Council, an environmental group, questioned that flexibility in choosing cleanup remedies, saying it gave EPA cleanup managers too much leeway to go with containment methods.

Overall, Strait said the EPA's pledge to use more treatment technologies was ''an improvement'' over the agency's past policies.

The EPA policy statement also includes guidelines specifying the levels of environmental and health protection to be achieved by cleanups.

For contaminated water, it said standards set under the federal Safe Drinking Water Act would apply. For wastes that cause cancer, it said cleanups would reduce health threats so that the most exposed individual would face a cancer risk between one in 10,000 and one in a million.

#90037u2228 02/06/1990 ~United Press International

(FEB. 6) - Oil prices ended mixed on the New York Mercantile Exchange Tuesday with gasoline declining as traders expected an industry report to show a large gain in the nation's inventory.

Crude and heating oil moved up in an apparent technical correction to Monday's price plunge.

West Texas Intermediate, the benchmark U.S. crude, for March delivery climbed 12 cents to $22.51 a barrel on the Merc. On the U.S. Gulf Coast cash market, WTI gained 10 cents to $22.50 a barrel.

March delivery home heating oil gained 0.12 cent to 56.19 cents a gallon on the Merc while unleaded gasoline fell 0.52 cent to 61.88 cents a gallon.

Unleaded gasoline fell 0.45 cent to a bid of 61.20 cents a gallon on the New York Harbor cash market while home heating oil rose 0.25 cent to 57.20 cents a gallon.

''People were buying crude and selling products. That was the main feature today,'' said Peter Beutel of Elders Futures Inc. of New York.

John O'Connell, assistant vice president of Refco Inc. in New York, said, ''The market wound up just about where people thought the API numbers would be.''

The American Petroleum Institute's weekly survey was expected to show gasoline inventories grew a robust 4 million barrels last week while heating oil stocks gained only half that much, the analyst said.

Released after the Merc closed, the API survey showed gasoline supplies rose 4.6 million barrels, heating oil rose 4.5 million barrels and crude oil jumped a whopping 7.7 million barrels.

Gasoline imports nearly doubled to 738,000 barrels daily from 385,000 barrels a day in the previous week.

Gasoline stocks had grown about 17 million barrels in the three previous weeks.

On the European cash market, Britain's widely-traded North Sea Brent crude added 5 cents to $19.80 a barrel.

The United Arab Emirates' Dubai light - the key OPEC crude from the Middle East exported mainly to the Far East - also gained 5 cents to $16.70 a barrel.

The Sun Co., Radnor, Pa. reduced by 50 cents the posted price it will pay for most crudes at the wellhead to $21.50 a barrel for WTI.

WASHINGTON (FEB. 6) UPI - Sen. Mark Hatfield, R-Ore., and Rep. Matt McHugh, D-N.Y., Tuesday introduced in Congress a ''Harvest of Peace Resolution'' urging cuts in military spending to fight hunger and poverty.

''Reduced tensions between East and West and emerging efforts for peace in many parts of the Third World offer us an opportunity that Congress ought not to miss,'' McHugh said.

''The time is ripe for substantially reducing worldwide military spending and redirecting these resources to meeting basic human needs,'' he said.

The sense of Congress resolution, which would not have the force of law, was crafted by Bread for the World, the church-based grassroots anti-hunger organization.

But the Rev. Art Simon, president of Bread for the World, said the anti-hunger group would lead a three-year, multimillion dollar effort to win passage of the resolution and implementation of its main provisions, including a call to cut in half world military spending by the year 2000.

''There is no excuse for hunger, only a lack of public outrage and political will,'' said Simon.

''Democracy was a strong enough force to tear down the Berlin Wall; it can also be strong enough to dismantle the 'pork barrel barricade' in Congress

which protects our excessive defense budget,'' he said.

Hatfield, a longtime critic of spiraling military spending, said the money that has been poured into the defense budget in recent years has left the nation ''vulnerable, but not because we lack an arsenal.''

''Our vulnerability today is a nonproductive and noncompetitive economy,'' he said. ''Our vulnerability is the people who are without homes, nutrition, education and health care.''

Simon said the world spend $1 trillion last year in arms while 1 billion of its people went hungry. He said every minute the world spends nearly $2 million on the military and 15 children die to hunger and disease.

The ''Harvest of Peace Resolution'' call for ''common security'' by reducing reliance on the military and redirecting efforts to overcome poverty, hunger and to meet basic human needs.

It calls for negotiated agreements with the Soviet union for ''substantial and verifiable reductions in overall military forces'' with the goal of cutting worldwide military spending in half by the turn of the century.

It also calls on the United States to reduce its military assistance and arms sales to developing nations and calls for increasing financial support for international and domestic programs aimed at ending poverty and hunger.

''The world would be a safer place if we stopped arming ourselves and our allies to the teeth and began to address the lack of food, shelter and human rights,'' Simon said.

WASHINGTON (FEB. 6) UPI - Private exporters sold 130,000 metric tons of U.S. wheat for delivery to Egypt, a deal worth about $17.6 million, the Agriculture Department said Tuesday.

With the sale, Egypt has purchased 2.54 million tons of U.S. wheat since the marketing year opened June 1, 1989, nearly the same amount as one year earlier.

There are 36.7 bushels of wheat in a metric ton of 2,204.6 pounds, so the latest sale involved 4.77 million bushels of soft red winter wheat.

#90037u2303 02/06/1990 ~United Press International

BRUSSELS, BELGIUM (FEB. 6) UPI - Two physicians working in the central hospital of the southern Sudanese town of Malakal were abducted last week by unknown gunmen, the humanitarian organization Doctors without Frontiers said Tuesday.

Christine Van Haegenborgh, 26, from Antwerp, Belgium, and Martin Ruppert, 28, from Rotterdam, The Netherlands, were abducted Friday night on the eve of their return home, a spokeswoman for the group said. They had been working since May last year in Malakal on a food and medical program.

''According to witnesses they were abducted by an armed group which went to the north,'' she said. ''There were no indications of any violence being used.''

She said Doctors without Frontiers had four physicians working in Malakal, staying in two different places near the central hospital. The two other physicians returned home as scheduled.

Malakal is controlled by the government, the spokeswoman said, but the two abducted doctors were last seen 12 miles north of the town in an area apparently controlled by the Sudanese People's Liberation Army.

''That does not mean the SPLA is responsible for their abduction,'' she said. ''We have been in contact with the government and with SPLA which both deny any knowledge of the abduction.

''The matter is not so simple,'' she said. ''Several other smaller groups, either supporting the government or SPLA are active in the area.''

She said it was assumed the two doctors were abducted to treat wounded people. Similar cases have happened in the past, with the doctors being released after a few days.

#90037u2324 02/06/1990 ~United Press International

WASHINGTON (FEB. 6) UPI - A public interest group Tuesday called on the Food and Drug Administration to ban the sale of genetically engineered human growth hormone, citing a possible link between use of the hormone and leukemia.

The Foundation for Economic Trends said it petitioned the FDA to bar further sales of human growth hormone, known as HGH, in light of a Japanese study that found children who received it had two to three times the risk of developing leukemia than those who did not.

That study, involving only a small group of patients, was published in the British journal Lancet in May 1988. Since then, a study by a researcher

from the European Society for Pediatric Endocrinology has ''found additional evidence of increased leukemia among patients receiving HGH,'' according to the non-profit Foundation for Economic Trends.

Children who are unusually short because of pituitary gland deficiencies are sometimes given HGH to spur growth and many patients have acheived near-normal stature.

In addition to seeking a ban on sales, the foundation filed a petition asking the National Institutes of Health to immediately halt all experimental uses of HGH. Jeremy Rifkin, a spokesman for the advocacy group, said NIH is currently giving HGH to 80 boys and girls of ''small stature.''

Faye Peterson, an FDA spokeswoman, said the foundation's petition had not been reviewed, but the agency supports the conclusions of an 1989 meeting of international medical experts, which she said found, ''on the basis of current evidence, you can't conclude growth hormone therapy is responsible for the few cases of leukemia in the small group studied.''

''Like any other therapy, HGH is not risk free and it is essential for this program of growth treatment,'' Peterson said, adding, ''It would be unwise to withhold treatment from these children.''

Rifkin said the National Institute of Diabetes, Digestive and Kidney Diseases is compiling data on every U.S. patient taking the drug, but that study is not expected to be finished for at least a year.

''The FDA and the NIH are acting irresponsibly by not suspending the commerical and experimental use of HGH pending a thorough investigation of the possible ill effects on human health,'' said Rifkin, whose group has opposed a wide variety of genetic engineering projects.

''I'm sure parents would want to know if their children were twice as likely to contract leukemia as a result of HGH treatments,'' Rifkin added.

Genetically engineered human growth hormone first became available in the United States in 1985. The Human Growth Foundation estimates several thousand U.S. children suffer from growth hormone deficiency, in which the small pituitary gland at the base does not secrete enough of the hormone needed for normal growth.

HGH produced by genetic engineering was used to replace a hormone formula derived from human pituitary glands removed from cadavers at autopsy. Currently, HGH is sold by Genentech Inc. of South San Francisco, Calif., and Eli Lilly of Indianapolis, Ind.

Susan Rogers, a spokeswoman for Genentech, said, ''Our position is that

the data in the studies is inconclusive, it does not support (the foundation's) allegations. We stand by our belief that growth hormone is a relatively safe therapy.''

#90037u2326 02/06/1990 ~United Press International

PHOENIX, AZ. (FEB. 6) UPI - Joe Bugel, the former Washington Redskin assistant named Tuesday as the new head coach of the Phoenix Cardinals, left no doubt that the job was the highlight of his career.

''Winning the Super Bowl is a great feeling, but becoming coach of the Phoenix Cardinals is number uno,'' Bugel said after his appointment was announced at a news conference.

''Are we excited? You bet!'' he said. ''This is a job I truly, truly wanted.''

Bugel said he received a four-year contract.

General Manager Larry Wilson selected Bugel from among seven candidates to replace interim Coach Hank Kuhlmann, who took over in mid-season after Gene Stallings was fired. The Cardinals finished with a 5-11 record, including five straight losses under Kuhlmann.

Bugel, 49, was known as the architect of the ''Hogs'' offensive line that helped the Redskins plow their way to two Super Bowl appearances and two championships during the 1980s.

Bugel's primary responsibility with the Redskins was as offensive line coach and in nine seasons with the club he constructed a line that sent four players, tackle Joe Jacoby, guards Russ Grimm and Mark May and center Jeff Bostic, to the Pro Bowl. He had been an assistant head coach under Joe Gibbs since 1983.

Bugel said he would not guarantee a Super Bowl appearance for the Cardinals, but said the team was a ''better football team'' than the Redskins when he joined that club in 1981.

''We've got a good blend here of veterans and young players,'' he said. ''We have impact football players.''

Bugel said he would immediately begin putting together a coaching staff, a job he hoped to have completed within a week.

With the Cardinals, Bugel faces the challenge of coaching a club that has been near the bottom of the NFL in attendance in the two years it has played in Sun Devil Stadium in Tempe since moving from St. Louis. That

problem, Bugel said, was easy to solve.

''Winning, playing hard will bring fans into the stadium,'' he said.

''We will earn your respect,'' Bugel said. ''We need everybody to be part of the Big Red in the 1990s.

''The things I can guarantee is that we're going to hustle, we're going to hit, we're going to be enthusiastic.''

Before joining the Redskins, Bugel was an assistant with the Detroit Lions in 1975-76 and the Houston Oilers in 1977-80. He also served as an assistant coach at Western Kentucky, Navy, Iowa State and Ohio State.

Other candidates interviewed by Wilson for the job were San Francisco 49er offensive coordinator Mike Holmgren, New York Giants defensive coordinator Bill Belichick, Fresno State Coach Jim Sweeney, Kuhlmann, Los Angeles Rams defensive coordinator Fritz Shurmur and Cincinnati Bengal offensive coordinator Bruce Coslet.

Coslet was named coach of the New York Jets Tuesday.

Bugel said he had a ''unique relationship'' with Gibbs and said it was difficult to leave Washington.

''We said goodby last night,'' he said. ''We had a few tears.''

WASHINGTON (FEB. 6) UPI - Turning aside objections from President Bush, the House overwhelmingly passed legislation Tuesday to streamline voter registration across the country and make it easier for more Americans to cast ballots.

The measure, approved 289-132, would allow citizens to register to vote when they renew or apply for a driver's license and to register by mail and at numerous new voter registration locations.

The White House, however, has objected to how much the new procedures may cost the states and has questioned whether the potential for voter fraud will increase. The measure also faces an uncertain future in the Senate.

But House Speaker Thomas Foley, D-Wash., said despite those objections, he would be surprised if Bush vetoed the bill, which he said addressed ''the heart of American democracy.''

''If he chooses to veto it, then he also should give an explanation to the country why he believes this reform and opportunity for people to vote is not in the interests of democracy,'' said Foley.

As the measure, popularly known as the ''motor voter bill,'' moved quickly through the House, Democrats inside and outside of Congress took the opportunity to attack the Republican White House for standing in the way of a more open election process.

''We don't get a chance very often to vote for a bill that will help every single American citizen,'' said Rep. Al Swift, D-Wash., a main sponsor of

the measure. ''This bill is about eliminating government barriers that stand between our citizens and the voting booth.''

''I don't know how anybody can argue against making it easier for someone to vote,'' noted House Democratic leader Richard Gephardt of Missouri.

''This bill will give more power to everyday, American people than anything since the Voting Rights Act of 1965,'' added Democratic National Committee Chairman Ron Brown, arguing that Republicans often objected to efforts to attract voters traditionally aligned with Democrats.

Sponsors said they hoped that by reducing barriers to registration, the bill would help increase the nation's dwindling voter participation. In the 1988 election, for example, roughly half the eligible citizens voted.

''Part of the reason we don't have a turnout is we make it difficult for people to vote,'' said Gephardt. Opponents, however, said the real causes of low voter turnout were poor campaigns.

Despite Bush's objections, some Republicans argued for the bill. ''Many of us are embarrassed that the citizens of El Salvador vote at twice the participation rate'' of those in the United States, said Rep. Bill Frenzel R-Minn.

A total of 228 Democrats and 61 Republicans voted for the bill, while 108 Republicans and 24 Democrats voted against it. Passage came after the House defeated, 291-129, a Republican substitute bill sponsored by GOP leader Robert Michel of Illinois. That plan would have gutted much of the main measure by making the new procedures voluntary for the states and by adding several other provisions.

The legislation passed by the House would require 49 states to implement the new registration procedures. Only North Dakota, which does not require voters to register, would be exempt. In addition to the simplified procedures, the bill would no longer allow states to prohibit people from voting simply because they had not done so in previous elections.

Supporters of the measure argue that it contains provisions designed to address the concerns of opponents. For example, it would authorize the federal government to give the states $50 million to help defray the costs of the new procedures and would also require that states periodically verify their voter lists to reduce the potential of fraud.

But some state officials have argued that is too little. Some of the loudest objections have come from Illinois, where Republican Gov. James Thompson has argued that the changes could cost his state alone nearly $40 million.

#90037u2343 02/06/1990 ~United Press International

SAN FRANCISCO (FEB. 7) UPI - A landmark computer lawsuit between Apple Computer Inc. and Microsoft Corp. could be delayed by the surprise departure of the judge who has overseen the case for the last two years, observers said Tuesday.

U.S. District Judge William Schwarzer took a five-year leave from the court Monday to head the Federal Judicial Center in Washington, D.C. His entire caseload of more than 400 cases was transferred to Judge Vaughn Walker, who was just sworn in as a federal judge Monday.

Lawyers in the Apple-Microsoft case said it was too early to tell whether the change of judges would delay the lawsuit, but the technical nature of the case makes some interruption likely.

''We hope there's not going to be a delay but we just don't know,'' Apple attorney Chris Ottenweller said.

''Obviously there is some delay,'' said Linnet Harlan, who was an attorney for NEC Corp. when its legal fight with Intel Corp. was interrupted by a change of judges in 1988. ''Anytime you switch (judges) you have to get on the new judge's calendar. Then you've got the issue of how far you are into the case and how quickly the new judge can be brought up to speed.''

Apple sued Microsoft, of Redmond, Wash., and Hewlett-Packard Co., of Palo Alto, Calif., in March 1988, accusing them of illegally copying the ''look and feel'' of the screen display of the popular Macintosh personal computer.

Apple, of Cupertino, Calif., charged that Microsoft's Windows 2.03 software and Hewlett-Packard's Next Wave program illegally lifted such popular Macintosh features as overlapping windows and the use of icons on the screen.

The case is closely watched by the computer industry because it could set guidelines for the protection of intellectual property.

Schwarzer significantly narrowed Apple's case in July 1989 when he threw out many of Apple's claims, ruling that Microsoft had a valid contract with Apple to use many of the features.

David Bayer, a software analyst for Montgomery Securities, said Schwarzer's ruling would simplify Walker's job.

''There are very few open issues at the moment,'' he said. ''The problem is relatively well bounded.''

Schwarzer also was assigned a related lawsuit by Xerox Corp. against Apple. Xerox's lawsuit, filed in December, claims that Apple illegally stole many of the easy-to-use features of the Macintosh from software developed by Xerox in the late 1970s and early 1980s.

In another landmark computer lawsuit, between Intel Corp., of Santa Clara, Calif., and NEC Corp., of Japan, a change of judges in midstream forced lawyers to start virtually at the beginning.

Three years after the case was filed in 1984, U.S. District Judge William Ingram excused himself because of revelations that he owned $80 in Intel stock. Lawyers were forced to start over under Judge William Gray in June 1988, repeating opening arguments and arranging for Gray to take a two-day crash course in the intricacies of semiconductor microcode.

#90037u2357 02/06/1990 ~United Press International

WASHINGTON (FEB. 6) UPI - Top NASA officials Tuesday defended the agency's proposed $15.2 billion budget before a congressional committee and said cuts in money for the space station would have a ''tremendously negative'' effect on the project.

The proposed fiscal 1991 budget for the National Aeronautics and Space Administration includes an increase of $2.9 billion, or 24 percent, representing the largest jump of any major government agency.

NASA Administrator Richard Truly received a generally warm reception from the House Science, Space and Technology Committee during the 3-hour hearing, the first since President Bush proposed his $1.23 trillion budget last week.

While Truly called the proposal the ''best-balanced budget'' for NASA he had ever seen, committee members pressed Truly and his colleagues on several points, especially a $2.6 billion request for the space station Freedom - a 36 percent increase of $699 billion.

President Reagan endorsed construction of a permanently manned space station in his 1984 State of the Union Address. At that time, the project was expected to cost about $8 billion but the price has skyrocketed since then to an estimated $20 billion.

NASA hopes to begin construction of the orbital outpost in 1996 or 1997, but that schedule requires full funding from Congress. Any major cuts, officials have said, will further delay a project already running years behind schedule because of a lack of money.

Rep. Robert Roe, D-N.J., the committee chairman, and other members repeatedly questioned Truly and his aides Tuesday on the effect of cuts in the proposed space station budget.

Although Truly and others refused to specify exactly how the program would be affected, they maintained the space station plans could not proceed as scheduled without the full amount Bush requested.

''The space station program would not be the space station Freedom as we know it. The program just would not be able to survive as we know it today '' Truly said.

''A reduction ... would have a tremendously negative effect on this vital program,'' he said.

William Lenoir, associate administrator of the office of space flight, said NASA would be ''in big trouble'' if major cuts were made because the station is poised to move from research to actual construction.

''If we even blink or stop to catch our breath, we will miss our deadlines '' Lenoir said.

When asked if the space station plan would be able to proceed if the budget were cut, Lenoir said, ''We'd have to face the very real prospect that the conclusion would be in the negative.''

Other congressman pressed the NASA officials on the status of the so-called Shuttle-C, a proposed unmanned heavy-lift cargo rocket made up of two solid-fuel boosters, an external fuel tank and a wingless cargo pod featuring a pair of shuttle main engines.

Rep. Ron Packard, R-Calif., suggested the Shuttle-C could be built by private industry while Rep. Bill Nelson, D-Fla., questioned whether a new rocket system could be ready in time to help construct the space station.

Lenoir said the Shuttle-C is not necessary for space station construction but would have other uses.

#90037u2361 02/06/1990 ~United Press International

WASHINGTON (FEB. 7) UPI - World Bank President Barber Conable Tuesday announced the multilateral organization's first two loans to Poland totaling $360 million and said lending to the country could reach $2.5 billion in the next three years.

The bank's lending program will focus on supporting further policy reforms in Poland, including measures aimed at promoting a greater reliance on

market forces and the private sector, Conable told a news conference.

"These are our first loans to Poland since it joined the bank" in July 1986, Conable said. "Looking to the future, the bank is working with Poland on a lending program which could reach $2.5 billion in new commitments over a three-year period." Poland was a bank member after World War II and withdrew from the institution, as well as from the International Monetary Fund, in 1954.

The World Bank also may approve a structural economic adjustment loan for Poland by June or July for an amount still under consideration, Conable said, adding that he plans to travel to Warsaw around Feb. 20 to sign the loans that were approved.

Conable called the record of the Solidarity-led government of Prime Minister Tadeusz Mazowiecki "impressive." The government "has boldly begun to deal with the severe distortions that hamper the economy and has started to introduce the major systemic changes which Poland needs," he said.

Bank officials said that over the next 18 months the bank expects to lend Poland around $1.4 billion in addition to the $360 million approved Tuesday. The organization said a $260 million loan will support a project to improve Poland's trade with hard currency countries in the West by raising the volume, quality and value of industrial exports.

The project consists of a $245 million line of credit to the National Bank of Poland to finance export-oriented investments and $15 million in technical assistance to help financial institutions and other agencies adjust to the country's new economic and political environment. The project focuses on chemical, electro-engineering and wood-based industries as well as smaller investments in other industries.

Another World Bank loan for $100 million will support a project to assist Poland's efforts to rehabilitate, modernize and expand agricultural-processing industries, easing constraints on sales to hard currency markets.

Conable warned that "others will have to assist Poland, too. Indeed, nothing short of a broad-based international effort is warranted, given Poland's proven commitment to reform and courageous actions to date."

The World Bank president said he expects further actions from official creditors, who hold three-fourths of Poland's $39 billion debt, to help ease the country's debt service burden.

The major industrial countries are providing Poland with billions of dollars in loans to help its transition from an inefficient centrally

planned, inflation-ridden economy to a free market system.

The bank's sister institution, the International Monetary Fund, Monday approved a $723 million loan to help Poland stabilize its economy. The loan, to be disbursed over 13 months in support of Poland's balance of payments, could be followed later this year by another longer-term loan of up to $2 billion to help Poland in its economic transition.

#90037u2362 02/06/1990 ~United Press International
(FEB. 6) UPI - Mikhail Gorbachev faces strong opposition to his plan for multi-party democracy in the Soviet Union. Soviet radio says a leading conservative spoke out against the plan, sparking furious debate that forced party leaders to extend the Central Committee meeting to a third day.

Oliver North wants his Iran-Contra convictions thrown out. The fired White House aide says his indictment and trial were improperly influenced by his nationally televised testimony to Congress in 1987. North asked a federal appeals court today to toss out the convictions because of the ''unprecedented'' publicity.

President Bush sent his first annual report on the nation's economy to Congress and said he sees ''strong, sustained'' growth ahead in 1990. He said the economy's performance last year ''has set the stage for healthy growth in the 1990's,'' and said his goal is to ''build on the successes'' of the 1980's.

Advocates for a new voter registration method received a welcome boost on Capitol Hill. The House put the so-called ''motor voter bill'' on the fast track toward becoming law. However, House Speaker Tom Foley says White House opposition could derail the legislation, which Foley says represents- quote- ''the heart of American democracy.''

The Senate today approved legislation aimed at eliminating illiteracy in the United States by the year 2000. The vote was 99-0 for a campaign to fight adult illiteracy using grants to states and literacy pacts with labor and business. The cost is estimated at 50-Million dollars the first year.

-30- 1733
#90037u2380 02/06/1990 ~United Press International
PAARL, SOUTH AFRICA (FEB. 6) UPI - Jailed black leader Nelson Mandela congratulated President Frederik de Klerk Tuesday on his ''courageous and bold'' racial reforms, but said more needs to be done before the nation's black majority will agree to negotiations on power-sharing.

Mandela's response, formulated from a suburban-style house on the grounds of the minimum security prison in Paarl where he has lived for the past year, was conveyed by the Rev. Allan Boesak, who held a three-hour meeting with the black leader.

Boesak told reporters at the gates of Victor Verster Prison, set in the Cape wine-growing region, that Mandela specifically wanted the government to lift a 43-month-old state of emergency in its entirety and release all political prisoners.

But he said Mandela would accept his freedom regardless of whether the government meets all the conditions black leaders have put forward.

''What he wants is for the South African government to fulfill all of the obligations that have been set by the movement and have been constantly repeated by Mr. Mandela himself,'' Boesak said. ''When those conditions are met, Mr. Mandela will be happy to march out of here.

''He will not hold onto the chairs and the tables and kick and say, 'I won't come out,''' Boesak said. ''But he will warn them, 'If you release me and the conditions that we have put (forward) have not been met, I will be obliged to make a statement on those conditions.'''

He called de Klerk's speech ''courageous and bold and hopeful'' and said it would be ''a pity if this mood was not kept in the sense of Mr. de Klerk not moving quickly to simply fulfill the other conditions,'' Boesak said.

It remained unclear Tuesday what factors were actually involved in determining the date of Mandela's release. Boesak said the decision rested solely with the South African government, but Foreign Minister Roelof ''Pik'' Botha told reporters other unspecificed forces were at play.

Boesak's meeting with Mandela came as the government's reform negotiator expressed concern over the African National Congress's ''rumblings'' about its commitment to the armed struggle.

De Klerk lifted a 30-year ban on the ANC, suspended judicial executions, lifted restrictions on 374 activists and eased the state of emergency in a bid to lure black leaders to the negotiating table and persuade the ANC to publicly abandon its guerrilla war strategies.

Since 1961, a year after its banning, the ANC has waged a limited guerrilla war of sporadic bombings and sabotage that reached its climax in 1988 with a series of bombings in white urban areas.

''We would hope that continuing references to violence will disappear, because we don't think that is useful and positive to a negotiating

process,'' Constitutional Development Minister Gerrit Viljoen said at a briefing in Cape Town.

''We believe that we have considerable reasons for reservations about the reliability of the ANC in respect of its declared intention to prefer a peaceful and negotiated solution. Nevertheless we have taken this risk,'' Viljoen said.

Foreign Minister Botha said the government hoped to lift the state of emergency - imposed on June 12, 1986 to curb bloody anti-government riots in black townships - as soon as possible, but that it would depend on the level of political unrest in the country.

''If we move too fast and something unexpectedly happens, forcing us to reintroduce measures which we would not wish to, I assure you the perception would be created that things got out of hand in this country,'' he said.

''For that, we will pay a heavier price than just testing the waters for a while.''

While lifting some restrictions on the media, the emergency regulations continue to empower police to search without warrant and detain without charge.

#90037u2399 02/06/1990 ~United Press International

(FEB. 6) UPI - A new government study shows that efforts to stem the disease progression of the AIDS virus has benefitted members of the gay community. But the report by the National Institutes of Health indicates that the same headway is NOT being made among intravenous drug users who have little access to expensive drug therapies, such as A-Z-T.

Israel's right-wing Likud Party has postponed until next week a Central Committee meeting that had been scheduled for tomorrow. Prime Minister Yitzhak Shamir hopes to receive a vote of confidence during the proceedings, despite hard-liners' opposition to his inclusion of Egypt in the Mideast peace process.

Egypt's foreign minister says that the postponement of a meeting next week with his Israeli and U-S counterparts is NOT connected with the weekend attack on a bus carrying Israeli tourists near Cairo. The United States and Israel deny that a three-way foreign ministers' meeting was to have taken place.

A University of Illinois task force says more than 16 percent of women students at the Champaign-Urbana campus report that they have been

sexually assaulted. And the culprits in more than three-fifths of the cases have been U-of-I fraternity members. The task force urged restrictions on alcohol consumption.

Women in Portland, Oregon, have been getting some strange telephone calls from a man claiming to be a police officer. Officials say the man asks the women to perform sex acts in front of an open window... to attract suspects out of hiding for a SWAT team supposedly stationed outside. Police are investigating.

-30- 1767

#90037u2414 02/06/1990 ~United Press International

FORT IRWIN, CA. (FEB. 6) UPI - President Bush observed high-tech war games from a dusty hilltop in the Mojave Desert on Tuesday and applauded the latest reforms in the Soviet Union while insisting America ''be prepared to fight for freedom and security'' even in a post-Cold War era.

''It is important not to let us these encouraging changes - political and military - lull us into a sense of complacency,'' Bush said in a speech to combat troops at the 1,000-square-mile training center. ''Nor can we let down our guard against a worldwide threat.''

The scene of tanks, troops and armored vehicles crossing the rugged desert terrain in mock battle gave Bush a telegenic backdrop to begin a three-day campaign to defend his $307 billion fiscal 1991 military budget from threatened cuts by Congress.

With Democrats eyeing sharp troop reductions and cutbacks in major weapons systems as an enhanced ''peace dividend'' from the lessened tensions in Europe, Bush urged a less dramatic transition to ''smaller but more agile and flexible'' forces to cope with a changed world ''that may be potentially safer, but one that will almost surely have its share of uncertainties and dangers.''

Only Monday, the White House considered one of those uncertainties to be the future of Soviet President Mikhail Gorbachev. But in a notable shift from Monday, when the White House shunned comment on Gorbachev's move to surrender the party's 70-year-old monopoly on power, Bush claimed to speak for ''all Americans'' in welcoming progress toward political pluralism.

''As a free and democratic people, Americans will always welcome measures which promote the growth of democracy,'' he said. ''And it's especially encouraging to see anything which might bring the day of true democracy a bit closer for the Soviet people.''

The events in Moscow - and his positive response to them - underscored the dilemma Bush has faced in selling Congress on continued high levels of

military spending in the face of political change that has reduced the risk of war in Europe.

''The Soviet Union still does maintain formidable forces,'' Bush said. ''Military challenges to democracy persist in every hemisphere and America must always be prepared to fight for freedom and security.''

If the war-in-Europe scenario, which has guided Western defense strategy for 45 years, has faded in the minds of military planners in this time of crumbling communist rule, it was not evident here, where visiting Army units match battlefield wits against attackers using Soviet-style tactics and equipment.

''The skills learned here are not obsolete in that the training can be used in many different operations,'' said Capt. Gary Cleland. ''We don't just train to fight a Warsaw Pact nation here. We train to fight.''

Clad in a camouflage fatigue jacket, Bush watched the electronic engagement, which scores ''kills'' through a sophisticated form of Lazer Tag, for 15 minutes before informed that the Soviet-style ''red force'' had overrun the friendly ''blue force,'' which would look to fight another day.

Bush told the troops their training was needed to keep U.S. forces honed for such ''likely contingencies'' as the invasion of Panama. ''God bless our great country and thank you, colonel,'' he said in closing to the ''blue force'' commander. ''And now, back to war.''

Ironically, Bush's selling of his defense budget began in the state that would be hardest hit by one of the first steps in his peacetime retreat in real military spending: A rash of base closings certain to become mired in pork barrel politics as members of Congress - some among the most vocal advocates of cuts in the Pentagon budget - scramble to save installations in their districts.

The same changed circumstances that last week persuaded Bush to propose deeper cuts in U.S. and Soviet forces in Europe have emboldened his critics to seek bigger immediate savings from the reduced threat of war.

Cheney has announced plans to cut overall troop strength by about 54,000 this year and 36,000 next year. Two full divisions would be deactivated for savings of $1.2 billion in fiscal 1991.

That plan has been faulted by Democrats, however, for not assuming troop cuts in Europe. Bush wants to limit U.S. and Soviet forces in central Europe to 195,000 on each side, down from an earlier proposal of 275,000 but still not as low as some Democrats believe is possible to still ensure stability.

Conventional forces, while the most expensive to maintain, are not the only part of the budget under attack.

Threatened congressional cuts in nuclear weapons programs have Bush warning that those systems - technological bargaining chips - must be modernized to keep pressure on Moscow to conclude a strategic arms reduction agreement.

To dramatize concern for his strategic program, so far unaffected by the political reverberations from Europe, Bush will highlight progress of the ''Star Wars'' antimissile program Wednesday at the Lawrence Livermore nuclear weapons laboratory near San Francisco and address nuclear forces on alert Thursday at Strategic Air Command headquarters near Omaha, Neb.

#90037u2430 02/06/1990 ~United Press International

WASHINGTON (FEB. 6) UPI - Private exporters sold 130,000 metric tons of U.S. wheat for delivery to Egypt, a deal worth about $17.6 million, the Agriculture Department said Tuesday.

With the sale, Egypt has purchased 2.54 million tons of U.S. wheat since the marketing year opened June 1, nearly the same amount as one year earlier.

There are 36.7 bushels of wheat in a metric ton of 2,204.6 pounds, so the latest sale involved 4.77 million bushels of soft red winter wheat.

-30- 662

#90037u2472 02/06/1990 ~United Press International

HARTFORD, CT (FEB. 6) UPI - Hundreds of Bank of New England workers will be laid off as the ailing parent of Connecticut Bank & Trust Co. sells off assets to deal with $1.2 billion in losses, the company's new chairman said Tuesday.

H. Ridgely Bullock, acting chairman and chief executive officer of the Boston-based Bank of New England, said there would be layoffs, but said he did not know when.

Bullock said about 450 people working in the company's credit card division in Fairfield would lose their jobs because that business was sold Monday to Citicorp in New York for $828 million.

The layoffs at the credit card division were expected to take place over a three- to six-month period and some workers may be placed in other positions within the company, officers said.

''There are going to be many more layoffs from the bank,'' said Marcia Ryan, a spokeswoman for Bank of New England, which also owns banks in Rhode Island and Maine. Neither Ryan nor Bullock would say when or how many people would lose their jobs, or what areas would be affected.

Bullock also reiterated that CBT may be sold.

''The reality is that if somebody puts a high enough price on CBT, we are going to accept it,'' said Bullock. ''We're not going to give it away. We hope we can keep it.''

Fleet-Norstar Financial Group Inc. of Providence and Citicorp have announced they may seek to acquire CBT, and others are interested in taking over the bank, said Bullock.

Bullock spoke at CBT headquarters as part of a public relations campaign aimed at restoring the public's confidence in Bank of New England and CBT and addressing a ''credibility gap.''

Bank of New England's losses were estimated at $1.2 billion in the latest quarter.

''We're scarred - maybe even bloody - but that makes us stronger bankers - not weaker bankers,'' said Bullock.

''We are in a 'fix-it' mode,'' he said, adding that the company's aggressive lending policy led to trouble as the real estate market slowed down. He said the bank has put a more conservative lending policy into place.

Bullock, a director of the corporation, was named interim chairman and chief executive officer Jan. 26 after the forced departure of Walter J. Connolly Jr.

Last Wednesday, Bullock assumed the same titles at the Bank of New England N.A., the company's Boston bank and its largest subsidiary.

Bullock said the company was seeking a replacement for former CBT president Leo R. Breitman, who was named Bank of New England's president and chief operating officer.

During his stop in Hartford, Bullock tried to reassure customers that their money was safe with CBT.

''The small depositor is as well-protected here as in any bank in the country,'' said Bullock, refering to FDIC insurance on deposits of up to $100,000.

Bullock said municipalities pulling accounts out of Bank of New England has slowed but not stopped and obviously has hurt the company. He urged towns and cities who still have money in Bank of New England and CBT to keep it there.

''It's my personal belief that those investments are safe,'' said Bullock.

#90037u2488 02/06/1990 ~United Press International

PRAGUE, CZECHOSLOVAKIA (FEB. 6) UPI - Secretary of State James Baker offered U.S. support Tuesday to the victors of the quiet democratic revolution that toppled communism in Czechoslovakia, but not direct financial aid.

Baker arrived in Prague Tuesday morning for talks with President Vaclav Havel amid speculation he would announce new financial aid for Czechoslovakia before going on to Moscow Wednesday.

U.S. officials who traveled to Prague with Baker said the Czechoslovak government was not interested in direct aid or loans, but wanted to create a free market economy and begin trading with other free markets, including the United States and the European Community. following adv midnight EST

In a speech at Charles University early Wednesday morning, Baker unveiled the U.S. plan to promote self-help in the fledgling democracy, saying the United States would immediately grant Czechoslovakia a waiver of the Jackson-Vanik agreement, which limits U.S. trade with nations that restrict immigration.

The United States would also support a proposal to locate in Prague the European Development Bank, which will promote economic growth in the newly emerging democracies of Eastern Europe, Baker said.

Baker said Czechoslovakia will immediately be made eligible for commodity credit programs and added that a U.S. consluate will open in Bratislava, the capital of the Slovak Socialist Republic and second largest city in Czechoslovakia. end embargoed matter

Baker met Tuesday with Havel, the playwright opposition leader turned president, in a gilded room of a Prague palace built by Empress Marie Therese.

A senior U.S. official, describing the meeting between the two, said ''this is obviously a time of great ferment,'' as the former opposition leaders learn the business of government.

Havel ''showed a strong sense of wanting to catch up and to make Czechoslovakia an important part of new Europe,'' according to an American who attended the meeting.

After his meeting with Baker, Havel met with East German Prime Minister Hans Modrow, saying he was going to try to dissuade Modrow from a quick reunification of East and West Germany.

Havel told Baker, according to the Americans at the earlier meeting, that ''the United States has saved Europe twice. It is important that the U.S. troops remain in Europe.''

Havel has been invited by President Bush to come to Washington later this month to resume the discussions.

Havel also met Tuesday with members of popular movement Civic Forum that helped topple the communist regime and with Cardinal Frantisek Tomasek, leader of the Roman Catholic Church in Czechoslovakia.

Tomasek expressed gratitude for Washington's support during the communist era - ''a time of very limited possibilities'' - through its ambassadors' visits to the Prague archbishopric. He called Baker's visit a ''great honor'' to him and to all believers in Czechoslovakia.

As Baker met with Czechoslovak leaders, 30,000 people rallied in Wenceslas Square to demand the Kremlin withdraw its troops from Czechoslovakia by May 31. Talks on a timetable for withdrawal open in Moscow Wednesday.

Baker was to fly to Moscow Wednesday afternoon for a series of meetings with the Soviet leadership, starting with a session Wednesday night with Soviet Foreign Minister Eduard Shevardnadze.

Baker delayed his trip to Moscow by two days, officials said, to give the Soviets ''some breathing space'' after their historic Communist Party plenum that may have paved the way for dramatic changes in the single-party system in the Soviet Union.

The Moscow meetings between Baker and Shevardnadze are meant to lay the foundation for the June U.S.-Soviet summit in Washington.

One official in Baker's entourage said Baker believes this week's Moscow meetings can produce a significant breakthrough in strategic arms cuts as well as progress on conventional forces reductions in Central Europe.

One sign that the U.S. government is taking the occasion seriously is the size of the Baker delegation, which is comprised of 48 officials, not including translators, staff and security aids.

Baker was to meet Friday with Soviet President Mikhail Gorbachev and speak Saturday before a committee of the Supreme Soviet, the first time in history that a U.S. official will have directly addressed the Soviet parliament.

His schedule contains a gap on Feb. 10-11 that may have been left open for a ministerial conference in Europe between Baker and the foreign ministers of Egypt and Israel. Remaining differences between Israel and the Palestinians - represented by Egypt in early talks - have kept Baker from convening a peace conference.

Modrow arrived Tuesday in Prague for a half-day working visit on economic and technological ventures with Czechoslovakia.

East Germany is Czechoslovakia's principal trading partner after the Soviet Union, accounting for about 10 percent of both exports and imports. For East Germany, Czechoslovakia ranks after the Soviet Union and West Germany.

#90037u2493 02/06/1990 ~United Press International

PROVIDENCE, RI (FEB. 6) UPI - Attorney General James E. O'Neil and several police officers pulled a homeless and suicidal man to safety Tuesday from his perch on an Interstate 195 bridge over the Seekonk River.

O'Neil was traveling to a wake in East Providence at about 3:30 p.m. when he saw the man standing outside the rail in the middle of the George Washington Bridge, which links Providence with East Providence.

O'Neil went to the scene and the man recognized him, police said. The man explained to O'Neil that he had once sold flowers to him in downtown Providence, police said.

Police and the attorney general tried in vain to talk the man into returning to the safe side of the rail. At one point they gave him a cigarette and, when he lighted it, O'Neil grabbed him. Police pounced and pulled the man to safety.

''I just happened to be in the right place at the right time,'' O'Neil said. ''It made my day, I can tell you that.''

Police took the man to a Providence mental health center. He told them he was upset partly because he had no home.

''He mentioned in the police car, when we were taking him to the hospital, that he was concerned about the homeless, that he was homeless himself and no one seemed to care about the homeless,'' Patrolman James Grennan said.

Grennan described the man as 35 and living in the Providence-East Providence area.

#90037u2537 02/06/1990 ~United Press International

NEW YORK (FEB. 6) UPI - A jury Tuesday began deliberating the fate of reputed Mafia boss John Gotti, who is accused of ordering the shooting of a union official in an assault case that could send him to prison for life.

In more than two hours of instruction to the jurors, the judge stressed that Gotti's alleged position at the helm of the Gambino crime family, the nation's most powerful organized crime structure, does not give them license to convict Gotti if the government has not proven its assault case ''beyond a reasonable doubt.''

''With regard to La Cosa Nostra, or the Mafia ... being associated with such an entity is not a crime in itself and membership is not a substitute of proof of the elements of the charges contained in this indictment,'' Acting Justice Edward McLaughlin told the jury of seven men and five women at state Supreme Court in Manhattan.

Gotti, 49, reputed godfather of the Gambino crime family, is accused of ordering John O'Connor's shooting in retaliation for the trashing of a mob-linked restaurant built with non-union labor.

The judge also announced that four alternate jurors, who have been sequestered with the rest of the panel for the entire 12-day trial because of fears of jury tampering, will not be released immediately.

A court source said the alternates were being held as a security precaution because they have become friendly with their fellow jurors and have information that could be valuable to someone interested in tampering with the sitting panel.

The panel retired for the day at 7:20 p.m. after listening to 11 tapes of secretly recorded conversations of Gotti, his alleged underlings and members an Irish gang.

In summations Monday, Assistant District Attorney Michael Cherkasky told jurors the lawyer for Gotti was nothing more than a mob henchman who lashed out at the government when it threatened his client's ''dark power.''

Gotti's lawyer, Bruce Cutler, claimed prosecutors had whipped up a ''corrupt'' case built on Mafia hysteria. He urged the jury to restore the court's ''integrity'' by acquitting Gotti of assault and conspiracy.

The May 7, 1986, shooting of O'Connor, a business agent for Carpenters Union Local 608, was allegedly carried out at Gotti's behest by a murderous Irish gang known as the Westies.

With one more conviction, Gotti, a convicted killer and hijacker, could be branded a ''persistent felon'' and sent to prison for life. But Gotti has consistently slipped from the government's grip in recent years.

In 1985, he went to trial for assaulting a refrigerator repairman and robbing him of $325 during an argument over a parking space in Queens. The repairman learned who Gotti was, checked himself into a hospital, developed amnesia and said he could no longer remember who hit him. The judge had no choice but to dismiss the charges.

Gotti also was acquitted in 1986 of running an 18-year racketeering enterprise that included gambling, loansharking, truck hijackings, armored car robberies and three murders from 1968 to 1985.

#90037u2759 02/06/1990 ~United Press International

(FEB. 6) UPI - Soviet Communists extend party meeting... Oliver North goes back to court... Nelson Mandela says South African reforms are hopeful, but NOT enough. And the latest from Eastern Europe. U-P-I has the details, next:

Mikhail Gorbachev's plan for multi-party democracy in the Soviet Union drew sharp criticism today from hard-liner Yegor Ligachev.

In a speech to the Communist Party's Central Committee, Ligachev attacked the plan, sparking furious debate that forced extension of the committee's meeting by one day.

Ligachev said he opposes ''with his whole soul'' the introduction of private property into the socialist Soviet Union. He also says he's against allowing Lithuania's Communist Party to break from Moscow and form its own independent party.

The bitter speech was constantly interrupted by applause. It underscored the rivalry between the 58-year-old Gorbachev and the 69-year-old Ligachev who has strong support among conservative communists.

The extension of the party meeting through tomorrow means it may still be in session when Secretary of State Baker arrives for talks with his Soviet counterpart.

Secretary of State Baker is in Prague at this hour.

But despite speculation to the contrary, he has NOT offered financial aid to Czechoslovakia.

Aides with Baker say the move represents the desires of the Czech government headed by President Vaclav Havel. They report Havel is NOT interested in direct aid or loans so much as he wants to develop a free-market economy that will allow him to trade with other free markets, including the European Community.

Baker will wrap up his visit in Czechoslovakia tomorrow afternoon, heading next to Moscow where he's scheduled to meet Soviet Foreign Minister Eduard Shevardnadze.

Members of Baker's entourage say they are confident that this week's meetings in the Soviet capital can produce significant break-throughs on strategic arms cuts and conventional forces in Central Europe.

-30- 2166

#90037u2769 02/06/1990 ~United Press International

NEW YORK (FEB. 6) UPI - The New York Mets Tuesday signed relief ace John Franco, a New York native, to the largest guaranteed contract in club history, a three-year agreement worth $7.6 million.

Franco, 29, was acquired during the offseason from the Cincinnati Reds for reliever Randy Myers. The left-hander will receive a $1 million signing bonus, $1.3 million in 1990, $2.3 million in 1991 and $3 million in 1992.

Franco had filed for arbitration and was asking $2.475 million. The Mets countered with an offer of $1.7 million per year.

''We are certainly looking forward to having John here for the next three years,'' Mets Senior Vice President Al Harazin said. ''We felt good about the negotiations. John wanted to come home and he is one of the best relievers in the league. His contract had to reflect that.''

Franco can earn an additional $100,000 a year in incentive bonuses, based on number of appearances and postseason honors.

Last year, Franco went 4-8, had a 3.12 ERA and was third in the National League with 32 saves. Two years ago, he led the NL with 39 saves. In his six-year career, Franco has 148 saves and twice was selected to the NL All-Star team.

''I'm delighted. I'm going to be home for the next three years,'' Franco said. ''Hopefully I will help the Mets win the division and a championship.''

Franco, who was born in Brooklyn, also set some personal goals.

''I'm going to set out to try to save 40 games, hopefully they will put me in to do that. I want to keep my ERA down, I don't like when it gets above 2.5.''

-30- 1769

#90037u2798 02/06/1990 ~United Press International

(FEB. 6) UPI - Oliver North says his nationally broadcast testimony to Congress in 1987 had an improper influence on his Iran-Contra indictment and trial.

Today. lawyers for North asked a federal appeals court in Washington to throw out his Iran-Contra convictions because of the publicity resulting from the congressional testimony.

Lawyer Barry Simon blamed Congress for allowing the July 1987 hearings to be televised and said they affected witnesses who appeared at North's trial last year. He said the witnesses could NOT ''put out of their minds'' parts of what they saw, heard or read about North's congressional testimony.

Simon also says the Iran-Contra special prosecutor did NOT take adequate precautions to shield grand jurors from the testimony.

Lawyers for the special prosecutor said North's argument essentially is that once a person testifies under immunity at nationally broadcast proceedings, he can't be tried for any crime. That argument, they said, is absurd.

There's NO word when jailed African National Congress leader Nelson Mandela will be freed.

But there's growing speculation that it won't occur in the next week, while former Democratic presidential candidate Jesse Jackson is visiting the racially segregated country.

In the words of Foreign Minister ''Pik'' Botha- quote- '' can come and enjoy the aftermath, but certainly NOT claim any credit.''

A close friend of Mandela's said today after a three-hour visit with him in prison that Mandela's release will be solely determined by the government, even if all of Mandela's demands for freedom are NOT met.

Anti-apartheid leader Allan Boesak quoted Mandela as saying President F-W de Klerk's racial reform program was- in his words- ''courageous, bold

and hopeful.''

But he said Mandela expressed disappointment that the 43-month-old state of emergency was NOT lifted.

-30- 2068

#90037u2818 02/06/1990 ~United Press International

(FEB. 6) UPI - In what appears to be the first practical step toward German reunification, West German Chancellor Helmut Kohl says his government is ready to start immediate negotiations on the formation of a monetary union with East Germany.

Banking officals from both nations met in East Berlin today and urged a go-slow approach in developing such a system.

Meanwhile, Romania's National Salvation Front jumped ahead of 29 other political parties who will vie for power in general elections in May.

The Front- which controlled Romania on an interim basis until popular discontent forced it to accept a coalition with reform parties last week- unveiled a radical platform that guarantees political pluralism.

Other elements of the platform include a free-market economy and freedom of speech.

The official Polish news agency quotes a Solidarity official as saying the round-table one year ago that led to the legalization of his group as a political party opened the gates of reform.

In the words of the chairman of the Solidarity parliamentary caucus, Solidarity's actions- quote- ''made the process of changes that swept through Central Europe,''

That word comes as Polish President Wojiech Jaruzelski declared in Geneva, Switzerland, that his country is committed to reform that includes respecting human rights.

NOT to be overshadowed is Hungary. The Vatican announced today that it will sign an accord with Hungary that sets the stage for the establishment of full diplomatic relations between the two parties.

The action would make Hungary the second East Bloc nation to establish formal ties with the Vatican.

And Bulgaria's pro-democracy leader has rejected a possible coalition with the Communist Party, saying such a move would reduce the opposition to ''puppets.''

Today's move follows last week's elevation of two reformers to head the Communist Party.

-30- 2083

#90037u2830 02/06/1990 ~United Press International

(FEB. 6) UPI - President Bush today sent his first annual report to Congress on the nation's economy. And it was an optimistic assessment that calls for ''strong, sustained'' growth in 1990.

Bush said the economy's performance in 1989 set the stage for healthy growth in the 1990's and says his main economic goal is to achieve ''the highest possible rate of sustainable economic growth.''

The report lists five areas Bush will focus on to build a stronger economy. They include reducing the federal deficit... supporting a ''credible, systematic monetary policy'' to sustain growth... and avoiding unnecessary inflation.

The other two areas are- opening markets to free trade... and removing barriers to ''innovation, investment, work and savings.''

Bush says a cut in the capital gains tax is one of his top legislative priorities this year. He says it ''would promote risk-taking and entrepreneurship'' by lowering the cost of capital.

Opponents say the measure favors the wealthy.

The Senate took steps today to combat the problem of adult illiteracy in the United States.

The vote was 99-0 in favor of a bill aimed at eliminating adult illiteracy by the year 2000. The measure calls for federal grants to states, and literacy pacts with labor and business.

It also would provide money to adults with low levels of reading ability, and would increase the amount for teacher training.

Senator Paul Simon says the bill is ''the first comprehensive, goal-oriented, co-ordinated look at the problem.'' He says there are 23-Million functional illiterates in the country today, and four-Million of those ''can't read a word.''

The Congressional Budget Office estimates the cost of the illiteracy program at 50-Million dollars in the first year and 855-Million during the following three years.

-30- 2003
#90037u2981 02/06/1990 ~United Press International
(FEB. 6) UPI - Saying he opposes turning the Communist Party into ''an amorphous organization,'' Soviet hard-liner Yegor Ligachev today led the charge against President Gorbachev's announced reforms. The two-day plenum in Moscow is being extended by one day.

Oliver North appeared in a Washington federal court today, seeking to overturn his felony Iran-Contra convictions. North's lawyer says unprecedented publicity- including the national broadcast of his testimony to Congress in 1987- improperly influenced his client's trial.

Capitol Hill Democrats grilled Bush administration Budget Director Richard Darman, asking him to point out the ''economic justice'' in Bush's fiscal 1991 budget. The chairman of the House Ways and Means Committee termed the budget a 50-BILLION-dollar give-away to the rich.

Talks on a chemical weapons ban resumed today in Geneva at the 40-nation Disarmament Conference, and delegates say the negotations have reached the ''home stretch.'' Observers think a preliminary super-power pact on chemical weapons could be reached this year.

Israelis today buried six of the nine victims who died in the terrorist attack on their tour bus during the weekend near Cairo. One government official pledged that Israel will pursue a ''peaceful and secure future'' for all Israelis.

Sources in Lebanon say fighting continued for a seventh day over control of a Christian enclave north of Beirut. Forces loyal to General Michel Aoun launched attacks against strongholds of the Christian Lebanese Forces militia.

Clarence Thomas appeared before a Senate panel today in a confirmation hearing on his nomination to be a U-S Appeals Court judge. He is head of the Equal Employment Opportunity Commission and in that role has drawn fire from the civil rights community.

New York hotel queen Leona Helmsley says she's innocent of cheating on her income taxes. She said in an interview that she has ''done NOTHING'' and is ''NOT going to jail.'' Last December, she was sentenced to four years in prison on a federal tax fraud conviction.

-30- 2255
#90037u3278 02/06/1990 ~United Press International
(FEB. 6) UPI - President Bush is in California on the first leg of a three-day trip to defend his military budget against threatened cuts by

Congress. He spoke at the Fort Irwin military base and praised Soviet President Gorbachev's latest moves toward democratic reform. But Bush warned that the Soviets still maintain ''formidable forces,'' and said the United States must NOT become complacent and let down its guard.

In Moscow, Communist hard-liner Yegor Ligachev today rebutted charges that he ordered troops into Soviet Georgia to crush a demonstration last April. Ligachev says President Gorbachev also was responsible for the crackdown on a peaceful rally in Tbilisi in which 21 people died.

Congressional committees today gave preliminary approval to send Panama more than half-a-BILLION dollars in emergency aid. The figure represents one-quarter of the amount Panama sought to revive its dormant economy, which was battered by U-S sanctions and the December invasion to topple Manuel Noriega.

-30- 1167

#90037u3580 02/06/1990 ~United Press International

(FEB. 6) UPI - Despite dramatic changes throughout Eastern Europe and the Soviet Union, President Bush defends his 307-BILLION-dollar Pentagon budget by saying- quote- ''America must always be prepared to fight for freedom and security.'' But congressional critics from both parties today told Defense Secretary Cheney that the world climate of peace and U-S financial woes do NOT justify such massive expenditures.

Secretary of State Baker today offered the people of Czechoslovakia U-S support in their effort to democratize the formerly communist country. But Baker's package did NOT include direct financial aid. A senior American official says that during a private meeting between Czech President Havel and Baker, Havel- quote- ''showed a strong sense of wanting to catch up to make Czechoslovakia an important part of the new Europe.''

Saying assault weapons embody the ''philosophy of the battlefield,'' representatives of law enforcement, medical and religious groups urged the Senate to ban the sale, importation and production of 14 high-power weapons. Heading one group urging passage of the Anti-Drug Assault weapon Limitation Act is Sarah Brady. Her husband, James, was seriously wounded in 1981 by a bullet meant for President Reagan.

Attorneys for Oliver North are arguing that his convictions on charges stemming from the Iran-Contra scandal should be thrown out. Arguing before a Washington, D-C, appeals court today, attorney Barry Simon said the ''unprecedented, pervasive publicity'' surrounding the North case made it impossible for him to receive a fair trial.

-30- 1762

#90037u3597 02/06/1990 ~United Press International
(FEB. 6) UPI - Agriculture Secretary Yeutter plans a change in the way the nation deals with farm disasters. Yeutter asks that a ''permanent disaster assistance'' program be formed to replace the current federal crop insurance program. The crop insurance has been plagued low enrollment ever since it was created a decade ago.

The Pentagon has gone to Congress with plans to sell accessories for the F-16 fighter jet to Turkey. The equipment involves infrared systems that would improve the jets' ability to navigate and hit targets at night. The arms sale is worth 205-Million dollars, and Defense Department officials insist it will NOT affect military balance in the region.

The New York City trial of John Gotti on charges of assault and conspiracy has gone to the jury. Gotti is the alleged godfather of the Gambino crime family, but the judge in the case stressed today that those allegations do NOT give the jury license to convict if the government has NOT proved its case. The judge said membership in a Mafia organization is NOT a substitute for proof.

Former Philadelphia Mayor Frank Rizzo tells U-P-I he's considering running for a fifth time to head the city of brotherly love. In Rizzo's words- ''It's an option I'm looking at very carefully.'' Earlier today, Rizzo denied a published report that he felt he could succeed on the Republican ticket. Rizzo rose through police ranks to head the department and eventually become mayor from 1972 to 1980.

-30- 1637

#90037u3834 02/06/1990 ~United Press International
(FEB. 6) UPI - The House ignored White House objections today and overwhelmingly approved a measure aimed at easing voter registration. The so-called ''motor voter bill'' would allow Americans to register to vote when renewing or applying for a driver's license as well as by mail. Democrats lambasted Bush administration opposition... accusing the White House of standing in the way of greater voter participation.

Although the superpowers are experiencing a ''new era'' of mutual co-operation and peace, President Bush today warned critics NOT to tamper with his 307-BILLION-dollar defense budget. In his words... ''It is important NOT to let these encouraging changes- political or military- lull us into complacency.'' Bush made his comments at Fort Irwin, California, at the start of a three-day trip to defend his military budget against threatened cuts by Congress.

Former captain Joseph Hazelwood heard damaging testimony today in his Alaska trial on charges stemming from the Exxon Valdez oil spill. The tanker's chief engineer testified that he and the captain spent hours

drinking in bars before boarding the tanker, which then ran aground only three hours out of its home port of Valdez. The 43-year-old Hazelwood is accused in part of operating the tanker while intoxicated.

United Nations officials are overseeing what one describes as ''the largest repatriation in the history of Central America.'' Some 85-hundred Salvadorans are returning to their native land from a refugee camp in Honduras, where they had fled during the still-ongoing civil war in El Salvador. U-N officials expect to have the Honduran refugee camp cleared within two weeks.

-30- 1845

#90037u3855 02/06/1990 ~United Press International

(FEB. 6) UPI - A poll released today indicates the Bush administration is out of step with mainstream America when it comes to employers providing leaves of absence to employees. More than four-fifths of the people surveyed support mandated unpaid leave for parents of newborn, adopted or sick children without regard to gender. More than half of those polled say workers in such instances should get paid leave.

The founder of the nation's largest shelter for runaways faces allegations of sexual misconduct. A front-page report says the Reverend Bruce Ritter of New York is being investigated by the Catholic Church for allegedly having sex with a former resident of the shelter 17 years ago. Ritter denies the charges. But the Franciscan order has removed the priest from his duties, ordering ''a period of rest and recuperation.''

Rock star Billy Idol is listed in serious condition in a Los Angeles hospital after his motorcycle collided with a car at a Hollywood intersection this morning. A spokesman for Cedars-Sinai Medical Center says Idol suffered a broken leg and a broken wrist, but adds his injuries are NOT life-threatening. Police say Idol ran a stop sign, and they plan to file a complaint.

The head of the Skipwith Elementary School in Richmond, Virginia, stands by last week's decision to suspend an eight-year-old girl because she brought an unopened can of ''Billy Beer'' for show-and-tell. But Haley Woodfin's mother is outraged over the incident, which included notifying the police. Under school district policy, Haley must now undergo counseling and intervention.

-30- 1769

#90037u3987 02/06/1990 ~United Press International

(FEB. 6) UPI - The latest news... around the world and across the nation... from the wires of United Press International.

President Bush was in California's Mojave Desert today, where he used high-tech war games as a backdrop to argue for his 307-BILLION-dollar defense budget.

The president said that even in a post-Cold War age the United States must be prepared to ''fight for freedom and security.'' He said the changes in eastern Europe, from the democracy movement to Soviet arms-cut proposals, should NOT- quoting here- ''lull us into a sense of complacency.''

But back in Washington on Capitol Hill, Defense Secretary Cheney was being scolded by both Democrats and Republicans about the size of the defense budget.

The chairman of the House Armed Services Committee, Les Aspin, said the budget ''is going to come down.'' And House Speaker Thomas Foley said he found heavy spending on two new missile systems and ''stars wars'' research- in his words- ''highly questionable.''

After two days of a historical Communist Party plenum in Moscow, Soviet President Gorbachev is getting stiff opposition to what political observers expected to be a radical housecleaning.

Among the expected victims of the anticipated purge was Yegor Ligachev. But, instead, the hardliner took to the podium and delivered a severe rebuke of Gorbachev's policies.

Plenum participants told reporters waiting outside the Kremlin's gates that Ligachev's speech was interrupted repeatedly by applause. During his address, he defended himself from criticism that he ordered troops to fire on civilian protesters in the republic of Georgia last year.

Ligachev also accused Gorbachev of trying to decapitate the Communist Party.

More radical remarks came from the party boss of the Leningrad region who urged his comrades to come to their senses and re-implement the discipline used by Gorbachev's predecessors.

-30- 2097

#90037u3997 02/06/1990 ~United Press International

(FEB. 6) UPI - Congress today withstood Bush administration pressure and approved a measure aimed at simplifying voter registration.

By more than a 2K'ed the so-called ''motor voter bill.'' Sponsors of the bill say it will enable potential voters to qualify to cast ballots when they apply or renew their driving licenses.

But opponents of the measure, the White House included, question how much the new procedures will cost the states and wonder if it will increase the occurrence of voter fraud.

Despite Bush's disdain for the bill, House Speaker Tom Foley doubts the president will veto it, saying it addresses- quote- ''the heart of American democracy.''

Meanwhile, a handful of members in the Senate busied themselves in behind-the-scenes negotiations to reach a compromise clean air bill.

Senate Democratic leader George Mitchell says lawmakers are making progress, but concedes a filibuster remains a distinct possibility.

According to Mitchell, negotiators have reached tentative agreements on two of the four major provisions, namely control of air toxics and emissions from stationary sources. The sticking points remain emissions from mobile sources, such as cars, and acid rain.

Also today, Agricultural Secretary Yeutter proposed to replace the money-losing federal crop insurance program with a permanent disaster relief program.

The new program would pay farmers ''whenever there is a severe crop failure.''

-30- 1624

#90037u4010 02/06/1990 ~United Press International

(FEB. 6) UPI - Secretary of State Baker remains in Czechoslovakia, where he's holding talks with opposition leaders before going on to the Soviet Union.

Baker has delayed the Soviet leg of his European trip by two days in order to give the Soviets what's described as ''some breathing space'' as the Communist Party debates President Gorbachev's proposal to end the party's monopoly on political power.

In Prague Prahg, Baker met with playwright-turned-president Vaclav Havel.

The new Czechoslovakian leader made NO request for direct U-S aid or loans according to U-S officials. But he did express wishes for open trade with the United States and the European Community on the way to forming a free-market economy.

A U-N official says that within two weeks, the Honduran refugee camp that once served as home to some 85-hundred Salvadoran refugees will be history.

Roberto Rodriguez, director in El Salvador of the U-N High Commission for Refugees, says the Colomoncagua facility will close due to the repatriation of the refugees.

Rodriguez says the return- by his estimation, the largest ever in Central America- has gone smoothly.

618 refugees made the journey today back to their war-ravaged homeland. In the course of a decade-long civil war, more than 72-thousand Salvadorans have lost their lives.

Also to return today to San Salvador is President Cristiani . During a six-day U-S visit, Cristiani requested U-N help in restarting his country's stalled peace process.

-30- 1668

#90037u4041 02/06/1990 ~United Press International

(FEB. 6) UPI - The chief engineer of the Exxon Valdez oil tanker testified today in the Alaskan trial of Captain Joseph Hazelwood, who's facing charges stemming from a massive oil spill of last spring.

Jerzy Glowacki testified that three members of the crew, including Captain Hazelwood, were drinking in bars only hours before boarding the tanker to leave from its home port of Valdez, Alaska.

The engineer said Hazelwood had two or three vodkas at one club and then another drink at another club before boarding the tanker. The engineer also admitted having two beers and four gins himself before sailing.

The tanker ran aground three hours out of Valdez, resulting in the worst oil spill in U-S history.

The 43-year-old Hazelwood faces charges of operating the Exxon Valdez while intoxicated, in addition to reckless endangerment, negligent discharge of oil and criminal mischief.

Jailed African National Congress leader Nelson Mandela congratulated South African President de Klerk today on his proposed reforms to end apartheid. But Mandela made it clear that more must be done sooner if de Klerk expects the A-N-C to join in negotiations.

Mandela called de Klerk's package of reforms ''courageous and bold'' in a three-hour meeting with his public emissary the Reverend Allan Boesak. But in a meeting with reporters outside the South African prison where Mandela is held, Boesak added that the reform package fell short of Mandela's expectations.

De Klerk promised the impending release of Mandela last week, but he remains in jail.. Officials on both sides suggest that the government has NOT met Mandela's demands for release.

Boesak said today... ''When those conditions are met, Mr. Mandela will be happy to march out of here.''

-30- 1935

#90037u4135 02/06/1990 ~United Press International

(FEB. 6) UPI - --repeating to fix slugline--

The chief engineer of the Exxon Valdez oil tanker testified today in the Alaskan trial of Captain Joseph Hazelwood, who's facing charges stemming from a massive oil spill of last spring.

Jerzy Glowacki testified that three members of the crew, including Captain Hazelwood, were drinking in bars only hours before boarding the tanker to leave from its home port of Valdez, Alaska.

The engineer said Hazelwood had two or three vodkas at one club and then another drink at another club before boarding the tanker. The engineer also admitted having two beers and four gins himself before sailing.

The tanker ran aground three hours out of Valdez, resulting in the worst oil spill in U-S history.

The 43-year-old Hazelwood faces charges of operating the Exxon Valdez while intoxicated, in addition to reckless endangerment, negligent discharge of oil and criminal mischief.

Jailed African National Congress leader Nelson Mandela congratulated South African President de Klerk today on his proposed reforms to end apartheid. But Mandela made it clear that more must be done sooner if de Klerk expects the A-N-C to join in negotiations.

Mandela called de Klerk's package of reforms ''courageous and bold'' in a three-hour meeting with his public emissary the Reverend Allan Boesak. But in a meeting with reporters outside the South African prison where Mandela is held, Boesak added that the reform package fell short of Mandela's expectations.

De Klerk promised the impending release of Mandela last week, but he remains in jail.. Officials on both sides suggest that the government has NOT met Mandela's demands for release.

Boesak said today... ''When those conditions are met, Mr. Mandela will be happy to march out of here.''

-30- 1971
#90037u4156 02/06/1990 ~United Press International
(FEB. 6) UPI - President Bush went to Fort Irwin, California, today to kick off a three-day campaign to defend his fiscal 1991 budget against threatened cuts by Congress. He observed high-tech war games and noted that, despite the latest reforms in the Soviet Union, the United States cannot ''let down guard.''

The Soviet Communist Party's Central Committee will meet again tomorrow to continue the debate over President Gorbachev's plan for multi-party democracy. The one-day extension means the meeting still will be going on when Secretary of State Baker arrives in Moscow for his meeting with his Soviet counterpart.

Baker was in Prague today to meet with Czechoslovakian President Havel. Baker offered U-S support to the victors of the quiet democratic revolution that toppled communism in Czechoslovakia- but NO direct financial aid.

Senate Democratic leader George Mitchell reports ''good progress'' in behind-the-scenes negotiations on a compromise clean air bill. But the Maine lawmaker admits a filibuster is ''still a possibility'' and says he's NOT sure he could get the 60 votes needed to kill such a talkathon.

Oliver North wants his Iran-Contra conviction thrown out. North's lawyer told a federal appeals court in Washington, D-C, today that his client's indictment and trial were influenced by his nationally broadcast testimony before Congress in the summer of 1987.

A federal judge in Phoenix today declared unconstitutional an amendment to the Arizona Constitution that mandated English as the official language of all government functions in the state. The amendment had been narrowly approved by voters in November 1988.

(FEB. 6) UPI - In New York, jury deliberations began today in the trial of reputed Mafia boss John Gotti. Gotti is accused of ordering the shooting of a union official in an assault case that could send him to prison for life.

The Pentagon says it's sending two helicopters to Western Samoa to join in the search for five Peace Corps workers missing in the wake of tropical storm Ofa. The storm raked the South Pacific island chain yesterday.

New Zealand police arrested a woman after she threw a furled black flag at Britain's Queen Elizabeth today. The flag did NOT hit the monarch, who is in New Zealand to mark the 150th anniversary of the European settlement of the island nation.

The Census Bureau says there were nearly one-and-a-half-Million American Indians in the United States when it conducted its 1980 count. The agency says the Cherokee tribe... with 232-thousand-80 people... was the largest.

An Army private who deserted to East Germany 30 years ago returned home to Iowa today with a less-than-honorable discharge. Says Arnold Kephart, now 53- ''I can't explain just how happy I am to be back in the United States.''

Rhode Island Attorney General James O'Neil and several police officers pulled a homeless and suicidal man to safety today from his perch on a bridge high above a river. Says O'Neil of the rescue- ''It made my day.''

(FEB. 6) UPI - President Bush used high-tech war games in California's Mojave Desert as a backdrop today as he argued in favor of his 307-BILLION-dollar defense budget. Bush says the nation- in his words- ''must always be prepared to fight for freedom and security.'' The defense budget has come under attack from members of Congress seeking a ''peace dividend'' from improved relations with the Soviet bloc.

The Senate today voted 99-0 to pass a bill aimed at eliminating illiteracy in the United States by the year 2000. But another education bill ran into problems over a proposal to set voluntary standards for teachers. Conservative North Carolina Republican Jesse Helms says the proposal was a power grab by two large teachers' unions.

Government officials say they must further study raw data released today that indicates some rats exposed to high doses of fluoride developed bone cancer. During a two-year study, four male rats exposed to fluoride 20 times the level allowed by the E-P-A developed bone cancer. For the past 45 years, the U-S water supply has been fluoridated as a means of preventing tooth decay.

A San Francisco drug trafficking trial took an interesting turn today when the key government witness- brought from China to testify- asked U-S District Judge William Orrick for political asylum. The witness told the court he witnessed Chinese prison beatings of pro-democracy students and journalists, and feared his own persecution or execution if he returned to China. Orrick has placed the man in protective custody until his asylum request is resolved.

(FEB. 6) UPI - A nurse from Kings County Hospital in New York confirmed today that she had crossed out posted federal safety guidelines regarding the disposal of infectious needles because they were NOT specifically part of hospital policy. The hospital and the city are being sued for 175-Million dollars by Dr. Veronica Prego, who says she contracted AIDS from an improperly disposed needle.

The prospect of a re-unified Germany has German sports fans licking their chops. One of the more popular ideas gaining currency in the neighboring nations is a joint effort for the next Olympic Games in 1992. West German papers quote the head of the West German Olympic Committee saying he feels- quote- ''the creation of a single Olympic team is unavoidable.'' His East German counterpart has said that by 1996, one team will represent the two Germanys.

Years back, Key West, Florida, had a reputation as a free-wheeling island resort. How things have changed. In an attempt to quell the licentiousness of youth during the upcoming Spring Break, city officials have mailed off a sharply worded form letter to more than 200 colleges and universities east of the Mississippi River. In short, the letter warns college students seeking a good time in the sun to behave or stay home.

A business executive in Medford, Oregon, says it's the duty of every U-S citizen to support Mikhail Gorbachev in his bid to reform the Soviet political system. 53-year-old Robert Forrest has come up with a campaign called ''Send a buck to Gorbachev''... asking that everyone show support for the Soviet president by donating a dollar or two to Moscow. Campaign bumper stickers are already popping up in Medford.

EUGENE, OR (FEB. 7) BUSINESS WIRE - Valley West Bancorp and its wholly owned subsidiaries, Centennial Bank and Centennial Mortgage Co. Inc., reported record earnings for the quarter and year ended Dec. 31, 1989.

A 55 percent gain in net income was achieved in the fourth quarter of 1989 when compared to the similar quarter of the prior year. Net income of $375,058 or 23 cents per share was reported for the fourth quarter, as compared to $242,581 or 15 cents per share in the comparable quarter last year.

Record earnings were again achieved for the year ended Dec. 31, 1989. Earnings for the 12 month period were $1,250,211 or 77 cents per share.

For the comparable period last year, earnings were $1,050,353 or 66 cents per share.

''Our record earnings is the result of continued asset growth, good margins and substantial improvement in the size and quality of our loan portfolio. Total assets increased 9.5 percent to $99,701,850 during the year which was provided by a 17 percent increase in total loans, which increased to $65,731,600,'' said Richard C. Williams, president and chief executive officer.

SAN FRANCISCO (FEB. 7) BUSINESS WIRE - Two regional managers for Business Wire, the international news media relations service, have been promoted to vice president and appointed to the company's executive committee. They are Cathy Baron Tamraz, New York regional manager, and Jay A. Clark, Southern California regional manager in Los Angeles.

Tamraz joined BW in the San Francisco office in 1979 and transferred to the New York office when it opened in 1980. Following some newsroom promotions she became head of the New York region in 1987.

Clark joined the company two years ago, and before that was with the Burson-Marsteller and Hill & Knowlton public relations firms as a vice president.

Founded in 1961, Business Wire distributes full text news releases to news media and investment firms throughout the United States, Canada, Europe, and the Far East. The company has 16 domestic offices and a bureau in Tokyo.

MOUNTAIN VIEW, CA (FEB. 7) BUSINESS WIRE - Sun Microsystems Inc. and Eastman Kodak Company Wednesday announced the signing of an agreement under which Kodak's Customer Equipment Service Division (CESD) will extend Sun's delivery of hardware-related customer service in central and western regions of the United States.

Operated under the Sun U.S. Customer Service ''Strategic Partner Program

'' the agreement will double the number of field engineers available for on-site hardware maintenance calls for Sun equipment. Sun will maintain complete responsibility for customer service contracts, management of service calls, escalation of services and technical service follow-up. Kodak's extensive customer service organization will be utilized to provide Sun customers with expanded support.

The Kodak CESD organization has more than 7,500 field engineers worldwide. These include personnel responsible for servicing Kodak products used for electronic imaging and publishing, document management, and document storage and output. Recognized as a provider of quality service, CESD has been a winner of Datapro's highly regarded service awards for the last nine years.

In addition, Kodak has extensive expertise with Sun products, both as a user and as a system integrator. Kodak field engineers have received full training for service on all Sun systems, including training in UNIX, networking, maintenance and system administration.

The program was well received by Sun customers during a test period prior to its formal launch. Faster customer response and repair time are expected under the program because of expanded service engineering resources and Kodak's extensive geographic coverage in the Central and Western United States. Sun plans to announce additional strategic partnership agreements for other regions of the United States in 1990.

INDUSTRY, CA (FEB. 7) BUSINESS WIRE - Applied Solar Energy Corp. (NASDAQ:SOLR) Wednesday announced the appointment of Charles A. Ruibal, 42 and Larry Ellberger, 41, to the board of directors.

Ruibal was also named chairman of the board.

Ruibal is president of American Cyanamid Co.'s industrial and performance products division and replaces William J. Murray, who resigned from the board following his appointment as president of American Cyanamid's agricultural division.

Ellberger, vice president of Cyanamid's industrial and performance products division, fills the vacancy left by the resignation of Richard L.

Martino, American Cyanamid is Applied Solar's majority shareholder.

Applied Solar also announced that it will seek shareholder approval to amend the Articles of Incorporation to increase from 5 million to 10 million the number of common shares authorized for issue, and to create preferred stock which would be available for issuance in the future. The company also plans to refinance its debt and to continue its pursuit of a suitable partner to acquire part or all of its business.

Applied Solar has two major business units, one producing gallium arsenide and silicon solar cells which convert sunlight directly into electrical power, for the space and defense industry. The second business unit, operating under the name Advanced Optoelectronics, is responsible for the development and sale of photosensor devices and laser subassemblies. These products are used in multiple consumer, medical, defense and industrial applications.

#90038b0028 02/07/1990 ~Business Wire

TUSTIN, CA (FEB. 7) BUSINESS WIRE - Eldorado Bancorp (ASE: ELB) Wednesday reported record net income of $3.8 million, or $1.39 per share, for the fiscal year ended Dec. 31, 1989. This represents a 17 percent increase over net income of $3.3 million, or $1.23 per share, reported for 1988.

For the fourth quarter ended Dec. 31, 1989, net income increased 15 percent to $1,031,000, or 37 cents per share, over net income of $895,000, or 33 cents per share, reported for the fourth quarter of 1988.

Per-share earnings for the 1988 reporting periods have been adjusted to reflect the 10 percent stock dividend payable Feb. 23, 1990, to shareholders of record Feb. 9, 1990.

During 1989, total assets rose 10 percent to $276.6 million at Dec. 31, 1989, and shareholders' equity increased 17 percent to $23.5 million. The equity-to-asset ratio remained strong at 8.5 percent, reflecting the continued increase in capital. The return on beginning equity totaled 19 percent and the return on average assets was 1.50 percent.

J. B. Crowell, president and chief executive officer of Eldorado Bancorp and Eldorado Bank, said: "We are pleased with the record earnings performance and with the second consecutive quarter of net income exceeding $1 million. The successful assimilation of three branch offices acquired in 1988, a higher level of earning assets, strong loan growth and favorable expense control ratios all contributed to the continued earnings

improvement this year.

"Some pressure was placed on margins during the year, as the decline in cost of funds lagged behind lower prime rates.

"In 1989, the company enjoyed significant internal growth. It benefitted during the second half from its investment in an expanded staff of experienced loan officers, as the loan portfolio substantially increased, while net charge-offs declined to only $200,000. Management expects this momentum to continue and result in another record year in 1990. With the bank's strong capital position, we are in a position to consider another acquisition to enhance our growth."

Eldorado Bancorp, through its principal subsidiary, Eldorado Bank, operates through nine locations in Orange, Riverside and San Bernardino counties.

CONTACT: Eldorado Bank, Tustin, David R. Brown, (714) 830-8800 or Mickaelian Associates, South Pasadena, Fred Mickaelian Jr., (213) 268-1152.

#90038b0039 02/07/1990 ~Business Wire

SUNNYVALE, CA (FEB. 7) BUSINESS WIRE - NetFRAME Systems Inc., Wednesday disclosed the details of a program that will enable valued-added resellers (VARs) to purchase its high performance network servers directly from the company or its distribution partner, Businessland Inc.

The company also announced that Evernet Systems Inc. of Los Angeles, and Kenwood Associates Inc. of Chicago, have been authorized to sell, service and support NetFRAME systems.

Through its VAR program, NetFRAME will seek to establish relationships with two or three highly qualified VARs in each major metropolitan market across the United States.

In order to be authorized by NetFRAME, VARs must have at least 3 years of successful business history as network system integrators; an established sales, service and support organization; and the capabilities to provide customers with complete hardware/software service and application support for NetFRAME's family of ''network mainframe'' servers.

Additionally, qualified VARs who wish to buy systems directly from the company must agree to a minimum annual purchase commitment. NetFRAME will also offer qualified VARs the option to purchase systems from Businessland without committing to the minimum annual purchase. Training and technical support will be provided to VARs by NetFRAME or Businessland, in accordance with purchase arrangements.

Evernet locations in Los Angeles and Orange County, Calif. New York, Chicago and Washington, D.C. will sell, support and service the product.

NetFRAME's ''network mainframe'' systems -- a family of high reliability, high-capacity network file and application servers designed to run all industry-standard network operating systems including NetWare 386, OS/2 Lan Manager and Unix -- were introduced and have been shipping to customers since late 1989.

By taking a fresh architectural approach, NetFRAME has developed a true server platform for the PC LAN environment, by combining the high reliability, data integrity and capacity of mainframes with the simplicity flexibility and cost advantages of personal computers.

HOUSTON (FEB. 7) BUSINESS WIRE - Stewart Infomation Services Corp. earned $1.5 million, or 36 cents per share, in the fourth quarter of 1989.

This was an improvement over the $1.3 million, or 33 cents per share, earned for the same quarter in the previous year.

Net income in the fourth quarter of 1989 was increased $0.5 million because of a reversal of a provision for a title claim. The provision was made in the second quarter of 1989 but a subsequent change in circumstances related to the claim indicated that a major loss was not probable. Net income in the fourth quarter of 1988 was increased by $0.5 million for a gain on the termination of the company's pension plan.

For the year 1989, net income was $51,000, or 1 cent per share. Net income in 1988 was $3.7 million, or 91 cents per share. The decline in earnings in 1989 from 1988 was largely the result of increased provisions, after taxes, for title losses of $4.9 million, of which an increase of $3.3 million was attributable to major losses. An after-tax gain on the sale of municipal bonds increased 1989's income by $1.1 million. 1988's net income included an after-tax gain of $0.5 million on the termination of the company's pension plan.

Orders in the fourth quarter of 1989 were up 13 percent from 1988's fourth quarter. In comparison with year-earlier totals, orders were up 18 percent and 15 percent for the months of December 1989 and January 1990. The number of orders received, however, is not necessarily indicative of future revenues.

Stewart's primary business is title insurance. The company issues policies on homes and other real property in all 50 states, the District of Columbia and Canada through over 2,600 issuing locations. In issuing a policy, the title is first searched, examined and then closed. Stewart's customers include homebuyers and sellers, attorneys, builders, developers, lenders and real estate brokers.

The company also sells computer-related services and information to the real estate industry. Additionally, the company produces photogrammetric engineering products and geographic information systems for government and private entities, both domestic and foreign.

FREMONT, CA (FEB. 7) BUSINESS WIRE - Mosaic Systems Inc., a leader in multichip module solutions, has closed a strategic agreement with Sumitomo Metals Industries Ltd. of Japan.

The agreement consists of two phases, the first provides equity funding and the second a number of technology, manufacturing and marketing rights options.

In phase one, which is now completed, Mosaic received a significant infusion of new equity. In phase two, Sumitomo Metals Industries Ltd. has the option to exercise a series of licenses, including technology licensing, exclusive second sourcing and marketing rights in Japan.

''Sumitomo Metals is already major customer of Mosaic's technology,'' stated Jerry Robinson, president and chief executive officer of Mosaic Systems Inc. ''This alliance strengthens our relationship, provides us the funding to expand our market presence and sets the stage for our entrance into the Japanese market.

Sumitomo's excellent reputation in marketing and manufacturing will enhance our efforts to bring high-performance packaging solutions to the designers of next generation systems worldwide.''

Mosaic Systems Inc., founded in 1983, offers breakthrough multichip module solutions to commercial and military designers of faster, smaller, lighter and more reliable, next-generation 25+ MHz systems. Mosaic's family of PSCBs (programmable silicon circuit boards) range from 9 to 16 VLSI chip density equivalents.

Mosaic Systems is privately held. Investors include Rothschild Ventures and Sumitomo Metals. For further information contact Mosaic Systems 49040 Milmont Drive, Fremont, CA 94538. Phone: 415/657-9300. Fax: 415/657-8661

SAN JOSE, CA (FEB. 7) BUSINESS WIRE - Alex Au, president and chief executive officer of Vitelic Corp., announced Wednesday that Vitelic Corp.

has completed the purchase of 100 percent of the outstanding stock of Elcap Electronics Ltd. Elcap is one of three manufacturers of integrated circuits in Hong Kong.

Vitelic will operate Elcap's 69,410 sq. ft. IC manufacturing facility located in the Tai Po Industrial Estate in Hong Kong. The current four-inch class ten wafer fabrication facility will be upgraded to produce sub-micron five-inch wafers, with a monthly capacity of 2,000 wafers, within 14 months.

In the area of packaging and testing, Elcap's existing three million units per month assembly and test capability will be fully utilized to support Vitelic's DRAM and SRAM expansion requirements.

Founded in 1963, Elcap manufactures a variety of semiconductors, including ASICs and SRAMs as well as devices used in such consumer products as musical instruments, watches and telephones.

Vitelic was represented by Prudential Asia in connection with the acquisition of Elcap. (Prudential Asia is the Asian merchant banking and investment arm of The Prudential Insurance Co. of the United States).

The acquisiton will provide a valuable facility for Vitelic to perfect the process to be used in its 300,000 sq. ft. wafer fabrication complex now under construction in Hsin Chu, Taiwan. The Taiwan facility will be completed and operational in early 1991.

"The acquisition of Elcap and the construction of the Taiwan facility do not alter our fundamental manufacturing strategy," said Dr. Au. "Vitelic will continue to source a majority of its supply of wafers from its foundry partners worldwide.

"The smaller Hong Kong facility will complement the Taiwan facility nicely. While the Taiwan wafer fab will be used for volume production, the Hong Kong facility will be used primarily for new product development, pilot production and smaller scale manufacturing," commented Dr. Au.

According to Au: "Vitelic will tap Hong Kong's high quality human resources to strengthen its competitive edge in DRAM and SRAM design and production. This Hong Kong facility will further establish our presence for local business expansion and further position us for market opportunities in Asia and throughout the Pacific Rim."

AUSTIN, TX (FEB. 7) BUSINESS WIRE - Southern Union Co. (AMEX:SUG) announced Tuesday the consummation Tuesday of the merger of SU Acquisition Inc. into Southern Union.

The merger followed immediately the consummation by Metro Mobile CTS Inc. of its spin-off of SU Acquisition common stock to Metro Mobile stockholders. Both these steps were pursuant to the Aug. 10, 1989 merger agreement among Southern Union, Metro Mobile and SU Acquisition.

Persons who held Southern Union common stock as of the close of business on Feb. 6, 1990 no longer own Southern Union common shares, but rather such shares represent the right to recieve $13.80 per share in cash pursuant to the merger agreement. Continental Stock Transfer and Trust Co., the paying agent in connection with the merger, will be sending letters of transmittal to such holders this week.

Southern Union common stock issued to Metro Mobile stockholders as a result of such spin-off and the merger began trading Wednesday on the American Stock Exchange under the symbol SUG. Stock certificates for such shares were mailed Tuesday. Trading prices Wednesday on the American Stock Exchange for Southern Union common stock should not be directly compared with trading prices through Tuesday on the New York Stock Exchange because before the merger Southern Union had approximately 10.2 million shares of common stock outstanding, while now, after the merger, it has just under 5.3 million shares of common stock outstanding.

LAS VEGAS, NV (FEB. 7) BUSINESS WIRE - Southwest Airlines soared to another boarding record in January 1990, with 60,460 passengers traveling from Las Vegas to destinations in California, Arizona, Texas, New Mexico, and cities in seven other states. This represents a 12.4 percent increase over passenger boardings for January 1989.

The January 1990 boardings also represent an increase over the previous record month of August 1989 when approximately 58,000 passengers boarded Southwest from Las Vegas.

"Obviously, word is getting out about our low fares and on-time schedule," said Greg Golden, acting Las Vegas station manager. "The healthy business environment in Las Vegas led to the record number of passengers flying

Southwest."

Southwest Airlines operates 25 daily departures from Las Vegas and is the nation's eighth-largest carier. In 1989 Southwest Airlines reached "major airline" status as evidenced by it $1,015,000,000 in operating revenues for 1989. Southwest Airlines currently operates the youngest jet fleet in U.S. commercial aviation with an average of 5.3 years for its 94 aircraft.

LA JOLLA, CA. (FEB. 7) BUSINESS WIRE - Precision Aerotech Inc. Wednesday announced a series of major changes in its management.

Harry W. Todd has been appointed to the board of directors, filling a recent vacancy, and has been elected chairman of the board. Todd has a most distinguished 40-year aerospace career and most recently served as chairman of the board and chief executive officer of Rohr Industries Inc., retiring from that position on Dec. 31, 1989.

To further strengthen management, Richard W. Detweiler has been appointed to the position of chief executive officer and to the board of directors. Detweiler started his career in 1965 at Caterpillar Tractor Co. and held various operational and managerial positions over his 25 years of service at several of its subsidiaries, principally at Solar Turbines Inc.

In 1982 he was promoted to vice president and general manager of Solar's Turbomach, which has since become a unit of the Sundstrand Corp. Richard Detweiler received his bachelor of science degree in industrial management from Bradley University and attended Harvard Business School's advanced management program.

G. Addison Appleby, who has been chairman and chief executive officer since 1986, announced the changes and said, ''We are extremely pleased to have put in place this outstanding management team. Mr. Todd's recent retirement from Rohr provided us the opportunity to add him to our board and place the chairmanship in his hands.

''Mr. Detweiler will bring his strong management background to the position of chief executive officer.''

Appleby will continue as a member of Precision Aerotech's board.

Precision Aerotech Inc. is a leading producer of custom manufactured precision electromechanical and metal assemblies and components used in the aerospace industry.

BURLINGAME, CA (FEB. 7) BUSINESS WIRE - Ted Kruttschnitt, chairman of the board of Burlingame Bancorp and its subsidiary, Burlingame Bank & Trust Co., announced 1989 earnings of $823,000, or $1.82 per share, a 162 percent increase over 1988 earnings of $314,000, or 69 cents per share.

Net income for the fourth quarter ended Dec. 31, 1989, was $256,000, or 57 cents per share, an 84 percent increase over fourth quarter 1988 net income of $139,000, or 31 cents per share.

Total assets on Dec. 31, 1989, reached $77 million, an increase of 71 percent over Dec. 31, 1988. Loans reached $53.3 million, rising 51 percent over year-end 1988, and deposits grew to $71.4 million, up 76 percent.

Jeff Gardiner, president of Burlingame Bank, ascribed the bank's strong performance throughout 1989 to two factors: strong growth in the bank's high quality loan portfolio as well as increasing net interest margin.

Burlingame Bank & Trust is independent and locally owned, providing a high level of service to Peninsula businesses and their owners and managers, and to individuals and investors.

Burlingame Bancorp

Financial Results
Year ended Dec. 31

	1989	1988	Percent Increase

SAN DIEGO (FEB. 7) BUSINESS WIRE - Amylin Corp. Wednesday announced the appointment of Dr. Tim Rink, M.D., Sc.D., as president and chief technical officer.

Rink was previously with SmithKline Beecham as vice president of research, in SmithKline's U.K. research and development facility, according to Ted Greene, chairman and chief executive officer.

Between 1984 and 1989 Rink reshaped SmithKline's U.K. research programs, leading teams that discovered novel proton pump inhibitors for acid-related gastrointestinal disease and a number of a cardiovascular development candidates. He also built new teams focusing on novel therapies for hyperlipidamia and atherosclerosis and, more, recently, mechanism-based approaches to diseases of the central nervous system.

He served on the board of the SmithKline joint venture.

Amylin Corp. was founded in 1987 to commercialize the breakthrough discoveries by Dr. Garth Cooper and colleagues at Oxford University, relating to ''amylin,'' a new pancreatic peptide hormone. Deficiency or excess of this hormone appear to be major elements in the pathology of insulin-dependent (juvenile type 1) and non-insulin-dependent (late onset type 2) diabetes, respectively.

It is believed that this discovery represents a major breakthrough in understanding the control of glucose and fat metabolism; this advance heralds the development of superior therapies for both types of diabetes and the prospect of important diagnostic aids for the treatment and prevention of complications.

The observed effects of amylin in modifying the action of insulin indicate that amylin plays a fundamental role in ''insulin resistance.'' The concept of insulin resistance is increasingly accepted as going far beyond

type 2 diabetes, in which it is a cardinal feature.

The putative role of insulin resistance in the pathology of obesity, hypertension and atherosclerosis suggests that pharmaceutical modulation of amylin may provide novel approaches to these important medical problems.

Amylin Corp. has several active research collaborations, and has filed for numerous patents covering its inventions and discoveries in the amylin field. The company has raised $10 million of venture capital from Biovest Partners, Domain Partners, Biotechnology Investments Ltd., 3i Ventures, Sutter Hill Ventures and Hillman Ventures.

LOS ANGELES (FEB. 7) BUSINESS WIRE - Rockwell International Corp. chairman, Donald R. Beall, told stockholders Wednesday that the company is entering the new decade with a commitment to sustained growth and the enhancement of long-term shareowner value.

During remarks at the company's annual stockholder meeting here, Beall said Rockwell enters the 1990's with a ten-year history of strong performance. In this period, company earnings per share increased at a 10 percent compounded rate, while return on equity was in the 16 to 22 percent range.

''Based on our current assessment of the economy,'' Beall said, ''our outlook for fiscal 1990 is for earnings per share to be about the same as 1989, before the 40 cents per share gain from the sale of our Measurement and Flow Control Division.''

Beall continued: ''Our objective is to grow earnings per share in excess of 12 percent compounded -- with return on equity in the 16 to 20 percent range. Even though we anticipate a slowing in the economy in the early part of this period, these are achievable but challenging goals over the next five years.''

He said that the company's leadership positions in each of its addressed markets, its planned diversity and significant human, financial and technical resources are ''providing strong momentum as Rockwell enters the 90's.''

The chairman said that ''profound changes'' abroad in Eastern Europe, the Soviet Union, Western Europe and the Pacific Rim, as well as the rapid changes domestically, require that ''each of us who have a stake in Rockwell work together to anticipate these changes -- to sense market trends and the need for continuous change and improvement in everything we do.''

Beall reviewed the company's first quarter earnings, released last month, citing improved performance in the company's electronics businesses, which had a 27 percent earnings increase over last year's first quarter.

Rockwell International is a $12 billion, multi-industry company applying advanced technology to a wide range of products in its electronics, aerospace, automotive and graphics businesses.

#90038b0139 02/07/1990 ~Business Wire

KAHULUI, HI (FEB. 7) BUSINESS WIRE - Maui Land & Pineapple Co. Inc. Wednesday reported 1989 net income of $10.2 million or $5.66 per share.

For 1988, net income was $9.3 million or $5.16 per share. Revenues increased by 11 percent from $123 million in 1988 to $137 million in 1989.

For the fourth quarter of 1989, net income was $4.1 million or $2.30 per share compared to $8.3 million or $4.63 per share for the fourth quarter of 1988. Revenues for the fourth quarter of 1989 were 2 percent lower than the prior year.

Results for 1989 included the sale of seven lots in the Kapalua Place subdivision and the fourth quarter sale of the land underlying one of the condominium projects at Kapalua to the homeowners.

The fourth quarter of 1988 included the sale of land underlying three condominium projects at Kapalua.

The Company's pineapple operations posted operating losses for the fourth quarter and full year 1989 as compared to operating profits for the like period in 1988. These results were due to the continuation of competitive pressure in the marketplace from imported canned pineapple and to higher average production costs.

Ongoing operations at the Kapalua resort showed lower operating profits for the fourth quarter and year 1989 as compared to 1988 primarily because of lower condominium land lease revenues due to the sale of land to the condominium owners.

The Kaahumanu Center reported increases in operating profits for the fourth quarter and full year 1989 as compared to 1988.

LOS ANGELES (FEB. 7) BUSINESS WIRE - Occidental Petroleum Corp. announced Wednesday that it will redeem on March 15, 1990, all of its outstanding 10 percent senior notes due March 15, 1991, at a redemption price of 100 percent of the principal amount thereof.

The notes were issued in March 1986 and are outstanding in the aggregate principal amount of approximately $550 million.

The interest installment due and payable on the notes on March 15, 1990, will be paid by Occidental in the usual manner to registered holders of record at the close of business on March 1, 1990.

Payment of the redemption price will be made on or after March 15, 1990, upon delivery of the notes to Manufacturers Hanover Trust Co., as trustee, New York. Notice of the redemption and instructions for delivery of the notes are being mailed to all registered holders.

BOISE, Idaho (FEB. 7) BUSINESS WIRE - TJ International Inc. (NASDAQ:TJCO) a Boise-based manufacturer of specialty building materials, Wednesday announced record sales and 14 percent lower earnings for 1989.

Sales increased 11 percent to $351,137,000 compared with sales of $315,001,000 in 1988. Net income in 1989 decreased to $15,273,000 vs. the $17,834,000 earned in 1988. Net income per share was down 16 percent to $2.12 per share from 1988's $2.51 per share.

The company also achieved record sales and experienced lower earnings during the fourth quarter of 1989. Net income totalled $1,952,000, a 38 percent decrease from the $3,155,000 reported for the fourth quarter of 1988. Net income per share declined 39 percent in the fourth quarter from 44 cents per share to 27 cents per share. Sales were up 16 percent to $84,011,000 from 1988's fourth quarter's sales of $72,197,000.

At the meeting, the company's board of directors also approved payment of a regular quarterly dividend on TJ International common stock of 10-1/2 cents per share payable April 19, 1990, to stockholders of record as of March 23, 1990. It represents a 5 percent increase from the previous dividend rate.

#90038b0168 02/07/1990 ~Business Wire

PROVO, UT (FEB. 7) BUSINESS WIRE - Novell Inc. (NASDAQ:NOVL), developer of NetWare systems software products, Wednesday extended its commitment to the SFT NetWare v2.15 and Advanced NetWare v2.15 product lines by introducing two software enhancements for those environments, the NetWare Print Server and NetWare Backup VAP (Value Added Process).

Available now as part of the core operating system, these utilities let SFT NetWare v2.15 and Advanced NetWare v2.15 users substantially increase the number of accessible printers per server, while simplifying NetWare server backup and restore processes.

''Customers have told us that these enhanced print and backup capabilities should be standard features of our NetWare systems software products,'' said Mark Calkins, vice president of marketing, NetWare products. ''The inclusion of these enhancements is a direct response to user demand and reflects Novell's commitment to its 286-based products. These features are similar to those offered with our top-of-the-line NetWare 386 system software product.''

''It's good to see Novell is continuing to support and enhance 286-based products,'' said Kathy Strutynski, manager of microcomputer networking for the United States Naval Post Graduate School in Monterey, Calif., one of the organizations that tested these new capabilities for Novell.

ENHANCED PRINT SERVICES

The NetWare Print Server v1.1, now included with SFT NetWare and Advanced NetWare v2.15, allows enhanced printing services to be installed in one of three ways: as a VAP on an SFT or Advanced NetWare v2.15 server; as a VAP on a NetWare bridge (router); or as a dedicated process on a DOS-based workstation.

Key features include:

- More available printers -- up to 16 printers, located anywhere on the network, may be supported at one time.

- Multiple server support -- the print server may simultaneously service print queques on up to eight separate network servers. A single printer can be configured to service print jobs from mulitple network servers.

- Alert notification -- users are prompted when a print job is complete.

Specific users may also be notified when the printer requires attention, e.g., out of paper, paper jam, etc.

- Prioritization -- print queques may be prioritized to speed printing services for high priority users.

- Convenient printer location -- network printers may now be attached to virtually any DOS node on the network. Printers can be located near the workgroups that use them most.

Users continue to access network printers with familiar NetWare commands and utilities. Existing NetWare printing databases used to configure printers are fully compatible with the new version.

ENHANCED BACKUP SERVICES

Novell also announced the NetWare Backup VAP v1.0, a software enhancement that provides improved backup and restore capabilities for SFT and Advanced NetWare. The Backup VAP is an addition to existing backup services.

Novell's NetWare Backup VAP runs on the NetWare server or on a NetWare bridge (router) and backs up DOS, OS/2 and Macintosh files using a single routine, avoiding the cost and inconvenience of using separate software products and hardware devices.

A simple command line interface allows an administrator to choose from two operating modes:

- Partial backup -- the administrator selects a volume, directory, subdirectory or file to be backed up.

- Full backup -- the administrator disables additional login requests and closes files preparatory to a complete system backup.

A backup scheduling option allows network administrators to schedule backups during periods of little or no server usage.

''Novell's NetWare Backup VAP is a centralized, unattended, multiple server backup solution,'' Calkins said. ''A network administrator may conduct backups from a central location using one routine and one device, which makes managing backups easier, improves security by eliminating the need to physically access each server on the network and keeps the overall cost of managing backups to a minimum.''

Novell Inc. is the leading independent provider of open, high-performance systems software products. The company's NetWare network operating system has become a standard for personal computer-based

local area networks. Novell had revenue of $422 million for fiscal 1989; its common stock is traded on NASDAQ under the symbol NOVL.

HUNTINGTON BEACH, CA (FEB. 7) BUSINESS WIRE - Liberty National Bank President and Chief Executive Officer Philip S. Inglee has released the bank's year-end 1989 financial results which show record net earnings of $1,601,668, an increase of 42.9 percent over year-end 1988.

In addition, the bank achieved a return on equity of 1.33 percent and a return on average assets of 17.1 percent.

In making the announcement, Inglee stated, ''Strategic planning has resulted in our ability to achieve a consistent record of growth and profitability since the bank opened in 1982.''

Although the bank exceeded fourth-quarter net earnings for 1988 by 9.7 percent before adjustments, the final report shows a decline of 1.1 percent in net earnings for the fourth quarter of 1989 as compared to the fourth quarter of 1988. This is a direct result of a one-time expense of $78,000 associated with the company's capital offering.

Total assets at year-end 1989 reached $137,183,897, compared to $114,931,207 at the same time last year. Total deposits increased 19.4 percent to $126,982,767, and net loans were up 25.7 percent to $98,019,100. Shareholders' equity also improved significantly over 1988, increasing 19.1 percent to $10,201,130.

ST. LOUIS (FEB. 7) BUSINESS WIRE - Emerson Electric Co. announced Wednesday that the expiration date of the cash tender offer by Emersub XXVI Inc., a subsidiary of Emerson, for all outstanding shares of common stock of McGill Manufacturing Company Inc. at $93 per share has been extended until 12 midnight (New York City time) on Feb. 14, 1990.

The tender offer was originally scheduled to expire on Jan. 17, 1990, and was extended to Feb. 7, 1990.

The extension is due to an agreement between Emerson and the staff of the Federal Trade Commission to extend the waiting period under the Hart-Scott-Rodino Antitrust Improvements Act of 1976, to Feb. 14, 1990, to enable discussions to continue with respect to certain issues raised by the Staff regarding Emerson's proposed acquisition of McGill.
The waiting period was scheduled to expire on Feb. 7, 1990.

Emerson reported that as of Feb. 6, 1990, approximately 1.1 million shares of McGill common stock had been tendered, which, when combined with the approximately 279,000 shares not yet tendered but subject to option agreements, represent 95 percent of the McGill shares outstanding.

McGill, based in Valparaiso, Ind., manufactures bearings and electrical products primarily for industrial use.

Emerson Electric Co., based in St. Louis, manufacturers a broad range of electronic, electrical and other products for consumer, commercial, industrial and government and defense markets.

GARDEN GROVE, CA (FEB. 7) BUSINESS WIRE - Hycor Biomedical Inc. (NASDAQ:HYBD) Wednesday announced its 1989 results.

For the year ended Dec. 31, 1989, sales increased 17 percent to $9,616,000 and net income increased 61 percent to $1,134,000, or 19 cents per share. This compares with 1988 sales of $8,194,000 and net income of $703,000 or 13 cents per share.

For the quarter ended Dec. 31, 1989, sales increased 31 percent to $2,759,000, and net income rose 156 percent to $496,000, or 8 cents per share, compared with sales of $2,114,000 and a net income of $194,000, or 4 cents per share, for the same period a year ago.

Richard D. Hamill, Ph.D., president and chief executive officer of Hycor, stated that: ''We've now completed our third consecutive year of record profits and strong sales growth. New drug testing products introduced during the year, stronger international sales across the board and improved manufacturing efficiencies led to the company's excellent financial performance.''

Hycor Biomedical is a biotechnology firm specializing in the development, manufacturing and worldwide marketing of human diagnostic products.

#90038b0184 02/07/1990 ~Business Wire
PASADENA, TX (FEB. 7) BUSINESS WIRE - Insituform Gulf South Inc. (NASDAQ:IGSI) Wednesday announced that it has entered into a merger agreement with Naylor Industrial Services Inc., a closely-held company controlled by the holder of approximately 77 percent of Insituform Gulf South Inc.'s shares.

Under the terms of the agreement, which is subject to the approval of each company's shareholders, up to 1.5 million shares will be exchanged for all of the outstanding shares of Naylor Industrial Services Inc. After the completion of the merger, the control group will own approximately 83 percent of the company. The transaction will be accounted for as a pooling of interest.

Insituform Gulf South Inc. is a leader in the underground infrastructure reconstruction industry providing cleaning, inspection and pipe reconstruction services. It is the exclusive licensee of the Insituform

process in Louisiana and parts of Texas and Mississippi. This process involves the onsite manufacturing of a new jointless pipe inside an existing pipe, usually without excavating and with minimal disruption of traffic and commercial activity.

Naylor Industrial Services Inc. provides specialize industrial cleaning and environmental services including hydroblasting, air conveyance and vacuum services principally to petrochemical plants, refineries and power generation plants. It has five offices in Texas and Louisiana. Naylor Industrial Services also provides specialized hydrodemolition services and pre-operational cleaning services for newly-constructed power plants. Annual revenues for Naylor Industrial Services Inc. for its last fiscal year were approximately $19 million.

Naylor also reported the results of the company's second fiscal quarter. The company incurred a quarterly loss of $278,000, or 9 cents per share, on revenues of $2,644,000, as compared to a loss of $78,000, or 3 cents per share on revenues of $2,477,000 for the same period last year. Current year-to-date operations have resulted in a net loss of $401,000, or 13 cents per share, on revenues of $5,293,000. For the corresponding period last year, the company reported revenues of $5,402,000 and a net loss of $58,000, or 2 cents per share. If the acquisition is approved, the operating results will be restated to reflect the pooling of interest accounting treatment.

#90038b0186 02/07/1990 ~Business Wire

DES MOINES, IA (FEB. 8) BUSINESS WIRE - The presidents of the 12 district Federal Home Loan Banks on Wednesday denounced the decision of the board of directors of the Federal Home Loan Mortgage Corporation (Freddie Mac) to call the $100 million of common stock held by the banks.

Freddie Mac's board Tuesday voted to repurchase the stock at its $1,000-per-share par value, choosing not to permit the banks to benefit from the considerable appreciation the stock has realized over nearly 20 years.

''We find this decision premature and unjustifiable,'' said Thurman C. Connell, president of the Federal Home Loan Bank of Des Moines. ''It is particularly incomprehensible that Freddie Mac's directors took this action when members of the U.S. Congress had specifically asked that such a decision be delayed until a thorough analysis of the impact of a repurchase could be completed.''

Connell, speaking in his role as chairman of the Federal Home Loan Bank Presidents' Caucus, added: ''Freddie Mac owes its very existence to the Home Loan Banks, which provided $100 million in seed money for it to begin operation in 1970.''

Connell said that to date the return on investment for the Federal Home Loan Banks has been limited, despite the fact that Freddie Mac has been extremely profitable. The bank presidents believe that the repurchase shows no regard for the critical role the Federal Home Loan Banks played in establishing and sustaining Freddie Mac.

The decision reflects little understanding by the Freddie Mac board of the extreme financial burden currently placed on the Home Loan Banks, which are assisting in the refinancing of federal deposit insurance by congressional mandate.

Under the Financial Institutions Reform, Recovery, and Enforcement Act of 1989 (FIRREA), the 12 Federal Home Loan Banks must contribute more than 50 years' worth of retained earnings, plus a significant share of future earnings, to rebuild the deposit insurance system and fund a new Affordable Housing Program.

The bank presidents expressed disbelief at the irresponsibility demonstrated by Freddie Mac directors in taking this action at the present time. The bank presidents also expressed some doubt as to the legality of the repurchase decision, since Freddie Mac's board of directors may not be properly constituted.

''It is notable that Freddie Mac has managed to divorce itself from all participation in resolving the deposit insurance crisis, even though it has profited greatly from its involvement with the savings institution industry,'' Connell said on behalf of the bank presidents.

''We would also point out that this self-serving decision will reduce the banks' contribution to the Affordable Housing Program by depriving the banks of a much-needed and well-earned yield on a 20-year investment.''

Funding of the Federal Home Loan Banks' Affordable Housing Program is directly affected by the banks' earnings. The loss of income from the Freddie Mac stock will significantly reduce the amount of money the banks can make available to help low- and moderate-income families secure home financing.

In this regard, Connell said: ''We trust that Congress shares our concern with Freddie Mac's lack of support for such an important housing initiative and the housing needs of many American families that would be

able to use this program.''

Connell noted that the bank presidents are evaluating all possible options before taking specific action.

''When Leland Brendsel, the newly elected board chairman, boasts that Freddie Mac has made enormous strides in 20 years, he neglects to state that his board has chosen to ignore the interests of the very Home Loan Banks that gave birth to Freddie Mac,'' Connell said.

''The financial crisis facing this nation demands a spirit of cooperation and participation to ensure its satisfactory resolution. This action by Freddie Mac's directors bodes poorly for the ability of major financial institutions to unite behind a common cause.''

LOS ANGELES (FEB. 8) BUSINESS WIRE - Julian A. Virtue, founder of Virco Mfg. Corp. (ASE:VIR) and a leading Southern California industrialist whose career dates to the 1920s, announced on Tuesday his retirement as chairman and chief executive of the corporation.

He will be succeeded as chairman and chief executive by his son, Robert A. Virtue, 57, who currently serves as Virco's president.

Prior to founding Virco, Virtue, in 1926 along with his brother Philip was co-founder of a manufacturing corporation that made home dinette sets.

In 1949, he terminated this relationship and founded Virco Mfg. on Feb. 2, 1950, at the beginning of the post-war boom in school construction. Among the many innovations he brought to the industry were plastic laminated desk tops and adjustable-height student desks which were adaptable to the

changing enrollment needs of the schools.

Today, Virco is the nation's largest manufacturer of classroom furniture and is also a leader in the manufacture of chairs and tables for the commercial market.

Robert Virtue joined the company in 1956 and has progressed through increasingly responsible positions to become a Virco vice president, executive vice president and later president prior to his election to his present offices as chairman and chief executive.

MILPITAS, CA (FEB. 8) BUSINESS WIRE - Quantum Corp. (NASDAQ:QNTM) announced Wednesday that Hewlett Packard Company has selected two of Quantum's 3 1/2-inch ProDrive Series disk drives for use in several models of HP's Vectra PC line of IBM PC AT compatible personal computers.

The Quantum drives are currently being used in the HP Vectra ES, Vectra QS and Vectra 486 high performance 286, 386 and 486 PC systems.

The ProDrive disk drives chosen by HP provide 42 and 84 megabytes of formatted capacity and embedded AT-Bus controllers. These drives feature an average seek time of 19 milliseconds and Quantum's proprietary DisCache firmware for even faster data retrieval.

David A. Brown, Quantum president, said: ''We are extremely pleased to add a company of HP's caliber to our customer list, and we look forward to building a strong relationship with them to serve their needs in the future.''

The ProDrive 40AT and 80AT drives are part of Quantum's ProDrive Series, a broad family of high performance 3 1/2-inch disk drives with formatted capacities from 42 to 210 megabytes. All ProDrive Series drives feature average seek times of 19 milliseconds or less and provide performance enhancements such as DisCache, Quantum's proprietary disk caching technology.

Quantum Corp., established in 1980, is a leading independent manufacturer of hard disk drives for personal computers and workstations. Its products are marketed to original equipment manufacturers and distributors worldwide. WOBURN, MA (FEB. 8) BUSINESS WIRE - Alpha Industries has appointed Bordewieck Engineering Sales Co. of Norwell, Mass., as its first manufactures sales representative.

Responsible for the six New England states, Bordewieck will represent Alpha Industries' growing line of industrial sensors which use microwave energy to detect and measure, level, proximity, motion and presence.

Alpha's decision to appoint Bordewieck was based on Bordewieck 30 years of experience within the New England process control, automated manufacturing and industrial automation industries.

The Bordewieck sales organization of 12 people provides sales representation and distribution of a broad line of instrumentation and transducer products.

Heyward Williams, product line manager of Alpha Industries, stated, ''Bordewieck's reputation of applications know-how, combined with a synergistic product line of sensors and instruments and an understanding of the New England industrial marketplace will allow us to serve a broad spectrum of applications with our microwave sensors.

''With Bordewieck representing our product line, we will be able to provide intelligent solutions to level, proximity, motion and presence measurements which previously could not be addressed due to the limitations of other technologies.''

Mike Smith, who is responsible for the Alpha product line and general manager of Bordewieck, stated, ''Alpha's technology appears to be on the cutting edge of the sensor field. Their unique industrial sensor product line allows for greater customer flexibility for many applications.

''It offers us another approach to applications where other technologies do not provide our customers with the optimum solution. With out knowledge of sensor applications in the industrial marketplace, we expect to provide Alpha with a large number of application opportunities.''

Alpha Industries is a leading supplier of microwave ceramic and

semiconductor devices, microwave and millimeter wave components and multifunction subsystems that are sold to manufactures of sophisticated electronic systems.

Alpha's products generate, amplify, detect and control microwave energy. Alpha Industries introduced its industrial sensor product line in early 1988. These products are used to sense presence, level, motion, and proximity in industrial automation, traffic control, intrusion alarm and process control applications.

HAYWARD, CA (FEB. 7) BUSINESS WIRE - Scientific Technologies Inc. (NASDAQ:STIZ) announced Wednesday the introduction of a smaller-size, safety light curtain providing personnel protection for robots, assembly stations, work cells, moving equipment and other machinery.

Designed for use in locations where space is limited, the miniaturized infrared light curtain, called Minisafe, is available in six standard coverage heights from four to 24 inches with a transmitter that measures 1.25 by 1.25 inches.

''With an operating range of 30 feet the Minisafe is ideal for original equipment manufacturers desiring to add the safety and convenience of a light curtain to their automated equipment,'' said James A. Lazzara, senior vice president. ''The slender design of the miniature light curtain gives a clean, designed-in appearance to OEM equipment,'' he added.

The Minisafe uses harmless, invisible modulated infrared light beams to establish a precise, user-defined guard zone. Penetration into this protected area interrupts one or more of the light beams and sends a stop signal to moving equipment, robots and machinery.

Scientific Technologies Inc., whose other perimeter protection products include Optosafe and Optofence, is a diversified manufacturer of optical sensors, safety light curtains, fiber optics, power monitoring controls and optical data communication products.

Headquartered in Hayward, the company has manufacturing facilities in Hayward and San Diego.

SAN BRUNO, CA (FEB. 7) BUSINESS WIRE - National Insurance Group (NASDAQ:NAIG), a leading provider of computer-delivered forced order

insurance and flood hazard area identification, Tuesday announced that revenues for the fourth quarter ended Dec. 31, 1989 were $4,283,000, a decrease of 6.6 percent from revenues of $4,584,000 for the like quarter of the previous year.

Net income for the quarter decreased 55.8 percent to $467,000, or 11 cents per share, from $1,058,000, or 25 cents per share, for the like quarter of 1988.

The weighted average shares for the fourth quarter decreased to 4,269,611, compared with 4,273,824 for the previous year.

Revenues for the year ended Dec. 31, 1989, were $16,574,000, a decrease of 3.8 percent from revenues of $17,234,000 for the year ended Dec. 31, 1988. The company reported net income decreased 27.4 percent for the year to $2,780,000 compared with $3,830,000 for 1988. Net income per share was 65 cents, compared with 90 cents per share for the previous year.

The weighted average shares for the year was 4,272,764 compared with 4,269,293 for the previous year.

In the fourth quarter, revenues from the company's computerized flood hazard area identification system increased to $91,000 from $40,000 in the third quarter.

The company's board of directors has declared its quarterly dividend of 5 cents per share of common stock outstanding which will be payable to the holders of record on Feb. 19. Such dividend will be paid on March 2.

During the quarter the company's wholly owned subsidiary, Great Pacific Insurance Co., was admitted to conduct business by the state of North Dakota.

DALLAS (FEB. 7) BUSINESS WIRE - Hogan Systems Inc. (NASDAQ:HOGN) and Logica Data Architects Inc. Wednesday announced the formation of an international alliance for the purpose of implementing the Integrated Banking Applications (IBA) package in countries outside of North America.

The alliance will combine Logica's systems installation expertise with Hogan's IBA consulting capabilities.

Under terms of the multiyear agreement, the companies will grant one

another ''rights of first refusal'' in marketing and bidding professional services to any prospective client. Once a job has been won, joint teams will be formed to ensure the successful installation of the clients' IBA applications.

The agreement will capitalize on the established international reputation and presence of both companies. Currently, Logica and Hogan consultants are assisting in IBA-related implementation projects in 12 countries.

Logica Data Architects Inc., with headquarters in Waltham, Mass., is an information technology company that provides systems integration, custom software development services, application software products and professional services to major corporations and government agencies. Its markets include financial services, telecommunications, computer vendors, government and transportation.

Logica Data Architects is the North American subsidiary of Logica, a computer software, systems and consultancy company with 3,700 staff located in 12 countries.

Hogan Systems Inc., with headquarters in Dallas, is a leading provider of applications software and consulting services to the financial services industry. The company maintains major sales and support offices in Woking England; Melbourne, Australia; New York City and Dallas.

KENT, WA (FEB. 7) BUSINESS WIRE - FlowMole Corp. (NASDAQ:MOLE) announced Wednesday it has completed its planned acquisition of the assets of Utilitech Inc.'s REVALT underground utility vault operations for approximately $1.1 million, including the assumption of certain liabilities.

''REVALT is a logical expansion of the underground services FlowMole currently provides to utilities. We intend to operate REVALT as a division of FlowMole Corporation and to expand its business through our nationwide sales network while maintaining the company's principal focus on replacing underground cable and pipe,'' said John R. Potter, president.

Headquartered in Melbourne, Fla., REVALT uses proprietary technology to renovate and seal underground electric and telephone utility vaults to prevent the intrusion of subsurface water and toxic fumes. Since 1987, REVALT has sealed over 1,000 vaults for 23 utilities in the Eastern United States.

FlowMole Corp. is the leader in trenchless technology for underground utility installation. The company installs and replaces underground utility cable and pipe with minimal surface disruption using proprietary high-pressure fluidjet cutting and electromagnetic guidance techniques to accurately bore small diameter tunnels up to 400 feet in length.

FlowMole recently reported net income reached a record $2.8 million, or $.41 per share, on record revenues of $31.0 million for the first nine months of fiscal 1990 (ended Dec. 31, 1989) compared to net income of $772,000, or $.11 per share, on revenues of $24.8 million in the first nine months of fiscal 1989.

SAN JOSE, CA (FEB. 7) BUSINESS WIRE - Ramtek Corp. Wednesday announced that its net revenues for the second quarter ended Dec. 31, 1989 were $4,287,000 as compared to $3,630,000 for the comparable period in fiscal year 1989.

The company reported income (before other income (expense) and extraordinary items) of $41,000, or 1 cent per share, for the second quarter as compared to a loss of $856,000, or 21 cents per share, for the comparable period in fiscal year 1989.

The second quarter net income was $11,795,000, or $2.84 per share, which included an extraordinary gain on pre-petition settlements of $12,091,000, or $2.91 per share, associated with the company's emergence from Chapter 11. The company had a net loss of $37,000, or 1 cent per share, for the comparable period in fiscal year 1989.

For the six months ended Dec. 31, 1989, net revenues were $8,899,000 as compared to $8,540,000 for the comparable period in fiscal year 1989.

The company reported income (before other income (expense) and extraordinary items) of $419,000, or 10 cents per share, for the first six months of fiscal year 1990 as compared to a loss of $774,000, or 19 cents per share, for the comparable period in fiscal year 1989.

Net income for the first six months of fiscal year 1990 was $12,186,000 as compared to a loss of $1,404,000 for the comparable period in fiscal year 1989.

Jim Swanson, president, said the second quarter was a significant milestone for Ramtek Corp. While the company experienced 18 percent growth in product sales and service revenue over the prior year's comparable quarter, the company's objective continues to be profitability and positive cash flow.

Ramtek Corp., headquartered in San Jose, designs and manufactures high-performance imaging and graphics display systems and peripherals.

PORTLAND, OR (FEB. 7) BUSINESS WIRE - Directors of Portland General Corp. (NYSE-PGN) Wednesday approved several actions necessary to build a solid financial foundation to achieve the company's strategy for growth in energy products and services. The principal actions approved include:

- declaring a lower common stock dividend of 30 cents per quarter ($1.20 per year). The dividend was 49 cents per share in the previous quarter. - establishing a reserve of $89 million, or $1.92 per common share, for three adverse rate decisions currently on appeal by Portland General Electric Co., its electric utility subsidiary. - discontinuing its real estate operation and establishing a reserve of $12 million, or 26 cents per share.

After the reserves, Portland General reports it will show a loss of $27 million, or 58 cents per share, on revenues of $797 million for the 12 months ended December 31, 1989. This compares with 1988 earnings of $2.11 per share, on revenues of $756 million.

For the quarter ended Dec. 31, 1989, Portland General reports a loss of $1.50 per share on revenues of $223 million. This compares with earnings of 85 cents per share on revenues of $203 million for the fourth quarter of 1988.

He said the reserves will result in a substantial decrease in equity on the company's books. ''We reluctantly have concluded that we must lower the common stock dividend to a level that is sustainable based on what we can reasonably expect PGE to earn with less equity in its capital structure, as well as its need to retain earnings to replenish equity,'' said Harrison.

The actions will not affect the dividend on PGE's preferred stock issues. Dividends on Portland General's common stock and PGE's preferred stock issues are payable on April 15, 1990 to shareholders of record on March 26 1990.

Portland General directors also increased to 3.3 million shares the amount of common stock the Company is authorized to repurchase. Directors had earlier approved the repurchase of 1.3 million shares. PGE, with 567,000 retail electric customers in Oregon, is Portland General's principal subsidiary. PGE's revenues were up 4 percent in 1989 on an increase in kilowatt hour sales of 5 percent.

#90038b0628 02/07/1990 ~Business Wire

PROVO, UT (FEB. 7) BUSINESS WIRE - Novell, Inc., developer of NetWare systems software products, Wednesday extended its commitment to the SFT NetWare v2.15 and Advanced NetWare v2.15 product lines by introducing two software enhancements for those environments, the NetWare Print Server and NetWare Backup VAP (Value Added Process).

Available now as part of the core operating system, these utilities let SFT NetWare v2.15 and Advanced NetWare v2.15 users substantially increase the number of accessible printers per server, while simplifying existing NetWare server backup and restore processes.

ENHANCED PRINT SERVICES

The NetWare Print Server v1.1, now included with SFT NetWare and Advanced NetWare v2.15, allows enhanced printing services to be installed in one of three ways: as a VAP on an SFT or Advanced NetWare v2.15 server; as a VAP on a NetWare bridge (router); or as a dedicated process on a DOS-based workstation.

ENHANCED BACKUP SERVICES

Novell also announced the NetWare Backup VAP v1.0, a software enhancement that provides improved backup and restore capabilities for SFT and Advanced NetWare. The Backup VAP is an addition to existing backup services.

Novell's NetWare Backup VAP runs on the NetWare server or on a NetWare bridge (router) and backs up DOS, OS/2 and Macintosh files using a single routine, avoiding the cost and inconvenience of using separate software

products and hardware devices.

PRICING AND AVAILABILITY

As of February 1, 1990, all copies of SFT NetWare and Advanced NetWare v2.15 will ship with the new NetWare Print Services and the NetWare Backup VAP. Customers with NetWare Assurance, an upgrade subscription program that provides updates to NetWare products for one year from the subscription enrollment date, can receive these features free of charge.

Novell, Inc., is the leading independent provider of open, high-performance systems software products. The company's NetWare network operating system has become a standard for personal computer-based local area networks. Novell had revenue of $422 million for fiscal 1989; its common stock is traded on NASDAQ under the symbol NOVL.

MIAMI SPRINGS, FL (FEB. 7) BUSINESS WIRE - International Recovery Corp. (AMEX: INT) Wednesday announced increases in net income and revenue for the third quarter and nine month period, ending Dec. 31, 1989.

IRC's third quarter revenue increased by 189 percent while net income grew by 76 percent - representing advances for the 12th consecutive quarter over the prior year quarter.

In the third quarter, the Company's revenue rose to $48.5 million from $16.8 million, and the net income was $988,000, or 21 cents per share, compared with $560,000, or 15 cents per share, in the like quarter a year ago.

For the first nine months of the fiscal year, IRC reported net income of $2,572,000, or 57 cents per share, on revenue of $90.0 million, vs. net income of $1,618,000, or 45 cents per share, on revenue of $44.6 million for the like period a year earlier.

Effective Oct. 1, 1989, the Company completed the acquisition of certain fixed assets and jet fuel inventory of JCo Energy Partners Ltd.

Reorganized and significantly downsized, Houston based JCo was immediately integrated into IRC's existing aviation fueling business -- which added approximately $100 million in revenue on an annualized basis and also expanded the Company's market diversification outside its Miami fueling operation.

On Jan. 2, IRC announced the completion of its acquisition of substantially all of the assets of the Cherokee Group of Hollywood, Fla. Terms of the acquisition call for Cherokee's profits and revenue to be realized effective Oct. 1, 1989.

Cherokee provides environmental assessment, testing and remediation services as a result of leaking underground storage tank systems (UST's); and the sale, installation and service of petroleum dispensing systems.

IRC provides a broad range of environmental services, including used oil recycling, waste management and remediation to customers throughout the Southeast and Mid-Atlantic regions of the United States. IRC also markets jet aviation fuel services to commercial customers on a worldwide basis.

MOUNTAIN VIEW, CA (FEB. 7) BUSINESS WIRE - DataTrak Inc. announced Wednesday that it has signed a letter of intent to sell its electronic lockbox system product line to Supra Products Inc. of Salem, Ore., including DataTrak's patent rights.

Supra will grant back to DataTrak certain licenses to use the patents being sold in connection with other products.

DataTrak will receive $100,000 upon closing and will receive royalty payments of $10 per lockbox and $5 per entry card for all electronic lockboxes and entry cards manufactured and sold by Supra during the two years following the closing date and for three years thereafter will receive royalty payments of 5 percent on Supra's gross sales of electronic lockboxes and entry cards.

Supra will also assume approximately $450,000 in accounts payable and will guarantee royalty payments during the first two years of no less than $1,030,000.

The sale is subject to the execution of a definitive agreement, the approval of the boards of both companies before the closing and the shareholders of DataTrak after the closing, and certain other conditions.

Supra has been selling the electronic lockbox system to real estate boards under an exclusive distribution agreement with DataTrak. Supra is the leading manufacturer and distributor of lockboxes for the real estate and automobile dealer markets.

#90038b0641 02/07/1990 ~Business Wire

GUERNSEY, CHANNEL ISLANDS (FEB. 7) BUSINESS WIRE - The leading international pipe reconstruction company, Insituform Group Limited (''IGL'') (NASDAQ National Market System: IGLSF (shares) and IGLWF (warrants)), Wednesday announced that it has signed a Heads of Agreement to establish a joint venture with United Engineers Ltd. (''UEL'') of Singapore to exploit its trenchless pipeline technology in the Republic of Singapore and State of Brunei Darussalam.

Under the current terms of the proposed agreement, IGL will have a 40 percent interest, and UEL 60 percent, in the new company, to be named Insituform UE (Singapore) Pte Limited.

The proposed share capital is S$500,000 (Singapore Dollars).

Incorporated in 1912, UEL, part of the giant Overseas-Chinese Banking Corp. Group, is a well-established trading, engineering and contracting company which in recent years has diversified its business interests, one of which is the computer mapping of the country's sewer system, for the Singapore Ministry of Environment. UEL is also actively involved in water

treatment. UEL's operating revenues in 1988 were approximately S$30 million (Singapore Dollars), or about $16,125,000 (U.S.).

Michael A. Chapman, IGL's Managing Director and Chief Executive Officer, commented, ''We are delighted with this Agreement with UEL which will, when fully-implemented, actively establish the Insituform Process in the region. We expect to finalize the contractual details during February.''

Insituform Group Limited, through its wholly-owned subsidiaries, owns the worldwide rights to a system of pipeline and conduit rehabilitation known as the Insituform Process, of which more than 3,700 km have been installed in over 40 countries. By eliminating the need for disruptive excavation, the Insituform Process provides a cost-effective solution to the problem of deteriorating pipe systems. A flexible non-woven fiber tube (Insitutube), impregnated with a liquid resin, is inverted by water pressure through the damaged pipe and is forced firmly against the inside of the pipe. The resin is then cured, either by hot water or high frequency light, creating a durable new structural pipe within the old.

#90038b0649 02/07/1990 ~Business Wire

LENEXA, KN (FEB. 7) BUSINESS WIRE - Home Office Reference Laboratory Inc. (HORL) Wednesday announced 1989 net earnings of $16.5 million, or $1.23 per share on revenues of $81.3 million, compared with net earnings of $20.9 million, or $1.40 per share, on revenues of $77.2 million for 1988.

Net earnings for the fourth quarter 1989 were $4 million, or 30 cents per share, on revenues of $21.3 million, compared with net earnings of $4.3 million, or 30 cents per share, on revenues of $20.2 million the same quarter last year.

Cash flow from operations remained strong during the fourth quarter 1989 and was used to reduce short-term borrowings by $4 million. During the fourth quarter 1989 the company's working capital position increased by $4.7 million from a deficit of $2.1 million at Sept. 30, 1989 to a surplus of $2.6 million at Dec. 31, 1989.

1989 was a dramatic year of change for the insurance laboratory testing industry. These changes included increased competition, an increase in the number of applicants tested and California legislation allowing HIV antibody testing in the isurance risk selection process in lieu of more

costly T-cell testing.

HORL responded to these changes by expanding its operations, increasing the number of personnel, lowering testing prices and introducing several new products and services.

Among the new products and services offered in the fourth quarter 1989 were: the implementation of the company's new laboratory processing system, the MEGA system; the introduction of a new Prostate-Specific Antigen (PSA) test; and the previously announced acquisition of testing rights for urine HIV antibody screening.

Kenneth A. Stelzer, president and chief executive officer, said, ''These new technologies have been specifically designed to provide our clients a more cost-effective means of testing in the 1990's. At this time we are unable to determine if or when we will begin to realize any significant financial benefits associated with these decisions.

''However, we feel that these enhancements to our business are in line with our strategic objective of being the premier provider of laboratory testing services while delivering superior value to the life and health insurers of North America.''

#90038b0653 02/07/1990 ~Business Wire

MOUNTAIN VIEW, CA (FEB. 7) BUSINESS WIRE - ASK Computer Systems Wednesday unveiled its strategy to develop new information systems for the era of networked computers.

New products for worldwide distributed computing will be announced during 1990 by ASK, the leader in information systems for manufacturing companies.

ASK is developing a new class of information system that will operate seamlessly across a multivendor environment. Users on the network will be able to simultaneously access information from different types of computers and databases located at sites worldwide. For example, an order administrator in London will be able to verify stock at a manufacturing plant in Singapore while concurrently running a customer credit check on the corporate computer in Los Angeles.

This transparency is possible because the ASK system will not be restricted by the bounds of proprietary hardware or proprietary databases.

Users of ASK's advanced system will benefit from a highly intuitive user

interface. The ASK system will be the first to bring an X-window technology to manufacturing applications. The interface will offer windows and menus tailored to the specific needs of each manufacturing job function. X-windows is a standard graphical user interface.

Hardware and database independence is possible by designing the application using industry standard technology including SQL, the standard data access protocol.

ASK will offer the new system alongside its successful MANMAN, MAXCIM and SIM/400 product lines. The first modules of the advanced system will be available later this year for popular Unix environments and for Hewlett-Packard MPE-XL and Digital Equipment Corp. VAX/VMS computers. Pricing and product availability will be announced at the introduction.

ASK Computer Systems is the leading provider of enterprise-wide information systems for manufacturing companies. There are over 930 ASK employees worldwide supporting 300,000 ASK system users. Over 25,000 ASK software products operate at customer manufacturing sites worldwide.

HOLLYWOOD (FEB. 7) BUSINESS WIRE - Hitachi, one of the world's largest corporations, joined officials of the International Opera Festival at the Egyptian Theatre Wednesday in announcing Hitachi's sponsorship of the first U.S. tour of the acclaimed spectacular, ''Aida.''

Hitachi Presents ''Aida,'' a Hitachi Culture Special, will bring opera to the broader public through magnificent mega-productions staged in sports stadiums in the New York and Los Angeles areas later this year.

The spectacular $7 million production will be conducted by Maestro Giuseppe Raffa and showcase world-renowned opera stars. It will also feature a cast of 1,200, some 1,500 costumes, a 200-piece orchestra, a host of live animals, and a stage set with almost lifesize replicas of Egypt's Great Sphinx and pyramid. It will be staged in the New York area at Giant's Stadium on June 1 and 2 and in Los Angeles at the Los Angeles Memorial Coliseum on June 29 and 30. Each performance will seat an estimated 39,000 people.

Hitachi Presents ''Aida'' is the fifth Hitachi Culture Special. The first was the 1986 presentation of ''Medea'' presented by one of Japan's premiere theater groups, the Toho Company Ltd. The second was the 24-city tour debut of Kitaro, the renowned Japanese composer and synthesist in

1987.

The third was the 1988 North American tour of Tokyo's Grand Kabuki company and the most recent was the 1989 sponsorship of the Kita Noh Theater Company to New York, San Francisco and Los Angeles.

In the United States, Hitachi has also demonstrated its commitment to corporate citizenship through the Hitachi Foundation. The Foundation, established in 1985, coordinates direct corporate sponsorship of many national and local programs benefiting culture and the arts, community service, science and education.

Hitachi was founded in 1910. Today the company has annual sales of $49 billion. Its products include power systems and equipment, consumer electronics, information and communications systems, industrial machinery, automotive equipment metals, chemicals and other products. The company employs 275,000 people in 679 subsidiaries worldwide.

NEW YORK (FEB. 7) BUSINESS WIRE - U.S. plant managers expect sluggish overall demand in the first quarter of 1990, according to The Dun & Bradstreet Corporation's latest survey of plant managers nationwide. Plant managers' expectations for first-quarter gains in production and new orders also fell sharply from the two previous quarters, with D&B's New Orders Optimism Index hitting its lowest level in two years.

The Dun & Bradstreet Plant Managers Survey asks 1,500 manufacturing plant managers about their views on existing and expected conditions in their factories, including production levels, new orders, costs and prices, as well as their perception of overall demand in their industries. The managers are asked what their expectations are for the upcoming quarter and the 12 months ahead. The results are calculated into an optimism index which is the percentage of plant managers expecting increases less those expecting decreases.

Dun & Bradstreet's first-quarter indices for production and new orders fell to their lowest levels since the first quarter of 1988. The Production Optimism Index fell 11 points to 18 from 29 in the fourth quarter of 1989, while the New Orders Optimism Index slid 10 points to 19 from 29 in the previous quarter. Compared with the first quarter of 1989, the latest production and new orders indices fell four points and three

points, respectively.

First-quarter expectations for overall demand fell eight points to 20, the lowest level since D&B began its survey in the fourth quarter of 1987.

Plant managers' expectations for higher selling prices in the first quarter increased six points to 22 from 16 last quarter, but remained well below the index of 31 reported in the first quarter of 1989.
First-quarter expectations for total unit costs increased to 27 from 21 last quarter, but remained seven points below the first quarter of 1989.
Expectations for increased labor costs rose six points to 24 from 18 in the fourth quarter of 1989.

Duncan noted that increased labor costs were the primary factor in the first-quarter outlook for higher costs and prices. Over the next 12 months, however, expectations for rising costs and prices dropped sharply.
The 12 Months Ahead

MOUNTAIN VIEW, CA (FEB. 7) BUSINESS WIRE - ASK Computer Systems Wednesday announced that it has finalized two contracts for its MANMAN Information System worth a total of $7 million.

Agreements were reached with Seagate Technology of Scotts Valley, Calif. and General Signal of Stamford, Conn.

''For more than a year, ASK has kept us appraised of their plans to develop an advanced information system using relational technology,'' commented Tom Dillon, vice president, worldwide information systems at Seagate.

''We use MANMAN as our corporate-wide information system so there's tremendous security in knowing that ASK has a strategy to maintain its industry lead. We are also confident in ASK's plan to provide a growth path for current customers.''

The agreement will provide new information systems for Seagate's Singapore Oklahoma City and Minneapolis facilities.

This brings the total number of Seagate facilities operating the MANMAN Information System to 11 worldwide. Locations include six in the United States, one in Europe and four in Asia.

''General Signal already operates MANMAN at 20 domestic locations. Before upgrading several of these and starting to install MANMAN overseas, we wanted to be sure that ASK had a solid strategy for the 1990s,'' remarked Steve Gladyszewski, General Signal's director of operations systems.

''After we met with ASK to go over their long-term plans, we had no hesitation in going ahead with additional MANMAN acquisitions.''

General Signal's contract is for new installations of MANMAN in the United Kingdom, France and Germany, plus upgrades to two data centers in the United States.

ASK Computer Systems is the leader in information systems for manufacturing companies. There are over 930 ASK employees worldwide supporting 300,000 ASK system users. Over 25,000 ASK software products operate at customer manufacturing sites worldwide.

LOS ANGELES (FEB. 7) BUSINESS WIRE - Westwood One (NASDAQ:WONE) Wednesday announced that it has secured the exclusive U.S. radio broadcast rights to the historic Knebworth Concert, taking place June 30 just outside of London.

Westwood One will broadcast approximately 20 hours of Knebworth programming beginning in April, including 11 hours of direct coverage of the June 30 concert. Westwood One will sell an average of six minutes per hour of advertising time.

Norman J. Pattiz, chairman and chief executive officer of Westwood One, called the Knebworth Concert, ''The super bowl of rock & roll for 1990.''

The 11-hour, day-long, open-air concert, staged live from Knebworth Park in Hertfordshire, 30 miles north of London, will feature a lineup of British rock legends, including Paul McCartney, Pink Floyd, Phil Collins, Cliff Richard and The Shadows, Status Quo and Tears For Fears.

Also joining the bill are Eric Clapton, Elton John and Mark Knopfler, who will perform together in one set with support from musicians Ray Cooper

from Elton John's band, and John Illsley and Alan Clark of Dire Straits. Additional artists joining the bill will be announced in the coming months.

The Knebworth Concert will benefit The Nordoff-Robbins Music Therapy Centre which provides care for autistic and mentally or physically handicapped children. Nordoff-Robbins will use the funds raised at Knebworth to build new facilities, and for the benefit of the British Phonographic Industry's (BRIT) School of Performing Arts.

All of the artists appearing at Knebworth, with the exception of Tears For Fears, are recipients of the coveted Nordoff-Robbins Silver Clef Award, which is presented annually by the Nordoff-Robbins Music Therapy Centre for outstanding service to the British music industry. Tears For Fears will open the show.

Greg Batusic, Westwood One's executive vice president and director of sales, said the concert is expected to draw more than 120,000 people.

Westwood One is America's largest producer and distributor of radio programming and the parent company of the Mutual Broadcasting System and the NBC Radio Networks. Westwood One's award-winning News, Talk, Sports and Entertainment programming is heard on more than 6,000 radio stations around the world.

#90038b0664 02/07/1990 ~Business Wire

STAMFORD, CT (FEB. 7) BUSINESS WIRE - American Maize-Products Company (AZE) Wednesday reported income from continuing operations of $12,796,000, or $1.93 per share, for the year ended December 31, 1989 compared with $10,759,000, or $1.64 per share, in 1988. Income from continuing operations for the fourth quarter of 1989 was $128,000, or $.02 per share, compared to $272,000, or $.04 per share, in 1988. Full year 1989 results include a nonrecurring charge of $3,041,000, or $.46 per share, related principally to taxes provided on the redemption of the company's 7 1/2 percent Exchangeable Debentures during the third quarter.

The improved results from continuing operations from year to year were attributable to improved margins in the Company's corn processing business.

Sales from continuing operations were $504,752,000 for the year 1989 compared to $440,252,000 in 1988. Fourth quarter sales in 1989 were

$111,497,000 compared to $110,255,000 in 1988.

Operating results for Lloyd Home & Building Centers Inc. improved significantly in 1989. The Company, however, has decided to concentrate on its Corn and Tobacco businesses in the future and has therefore treated Lloyd as a discontinued operation in 1989. Net income for 1989 includes an after-tax charge of $15,636,000 related to Lloyd, including expected losses through disposition.

The net loss for the year, including discontinued operations, was $2,840,000, or $.43 per share, compared to net income of $1,426,000, or $.22 per share in 1988.

#90038b0665 02/07/1990 ~Business Wire

WORCESTER, MA (FEB. 7) BUSINESS WIRE - Norton Co. Wednesday reported 1989 net income of $105.1 million, or $5.02 per share, on sales of $1.53 billion.

This compared to net income of $95.6 million, or $4.55 per share on sales of $1.41 billion in 1988. Included in 1989 net income was a $19.3 million or 92 cents per share, tax benefit which resulted from tax loss carry-forwards. This compared with a similar benefit of $12 million, or 57 cents per share, in 1988.

Also included in the net income was $9.8 million, or 47 cents per share, of income from Eastman Christensen Co. which was classified as a discontinued operation. This compared with earnings of $8 million, or 38 cents per share, from discontinued operations in 1988.

Engineering Materials continued to benefit from relatively strong demand, and reported earnings that were 6 percent higher than the level of the prior year. Although Abrasives sales were 8 percent higher than in 1988, operating profits declined by 10 percent. The lower earnings were attributable to weak demand in certain market segments, expense investing in new business systems, and higher than anticipated manufacturing costs.

During the fourth quarter of 1989, Norton reported net income of $23.9 million, or $1.15 per share on sales of $382.1 million. This compared with net income of $18.4 million, or 87 cents per share, on sales of $351.7 million in 1988. Included in 1989 net income was a $13.9 million, or 66 cents per share, tax benefit which resulted from tax loss carry-forwards.

The quarter also benefitted from the favorable impact of a revision to the annual effective tax rate. In the fourth quarter of 1988, the company recorded tax benefit from tax loss carry-forwards of $3.1 million, or 14 cents per share.

Norton Co. is a worldwide manufacturer serving a broad range of industries. It is the world's largest manufacturer of abrasives, produces technologically advanced ceramics, plastics and chemical process products, and is a leading supplier of drilling products and services for the energy industry. Norton Co. employs 16,600 people and operates 113 plants in the United States and 25 other countries.

#90038b0666 02/07/1990 ~Business Wire

STAMFORD, CT (FEB. 7) BUSINESS WIRE - American Fructose Corp. (ASE:AFC) reported net income of $2,849,000, or 30 cents per share, for the quarter ended Dec. 31, 1989, compared to $1,552,000, or $.16 per share in 1988. Net income for the twelve months ended December 31, 1989 was $22,537,000, or $2.35 per share. This compared to net income of $11,961,000, or $1.22 per share, in 1988.

Net sales were $37,715,000 in 1989 compared to $39,536,000 in the three months ended December 31, 1988 and increased from $155,450,000 in 1988 to $187,368,000 in the twelve months ended Dec. 31, 1989.

Both sales and earnings for the year 1989 were records for the Company. The improvement over 1988 was due primarily to higher margins realized on sales of high fructose corn syrup. Higher levels of investment income also contributed to the improvement.

VANCOUVER, B.C. (FEB. 7) BUSINESS WIRE - HQ Office International Inc. (NASDAQ:HQOIU for units; HQOIA for Class A common stock; HQOIW for Class A warrants) announced Wednesday the appointment of Isaac Zukerman to the position of business machines buyer.

''The appointment of Zukerman is the culmination of a five-month search and the result of over 40 interviews,'' stated George J. Handgis, president and chief executive officer of the company.

''We are pleased to add Zukerman to our management team. He brings to the company an extensive background in both merchandising and store operations with such companies as Consumers Distributing, Willson Stationers and, most recently with HQE Technology Stores as senior merchandising manager '' Handgis added.

Zukerman obtained a bachelor of commerce degree from Concordia University with a major in management and finance.

HQ Office International will offer a wide selection of quality, brand-name office products including general office supplies, business machines, office furniture and other business-related products and services at discount prices to small- and medium-sized businesses, as well as retail consumers.

CHARLOTTESVILLE, VA (FEB. 7) BUSINESS WIRE - Comdial Corp. (NASDAQ:CMDL), a leading designer and manufacturer of advanced communications products for the business and hospitality markets, Wednesday reported its 1989 fourth quarter and year-end financial results.

Net income for the fourth quarter ended Dec. 31, 1989 was $307,000 and sales for the quarter were $20,404,000. Both figures were substantial

improvements over fourth quarter 1988, where the company lost $1,753,000 on sales of $17,951,000.

Earnings per share were 2 cents compared with a loss per share of 10 cents over the comparable period in 1988.

For the full year, the company incurred a net loss of $1,972,000 on total revenues of $81,414,000. In 1988, the company lost $989,000 on revenues of $88,610,000. The loss per share was 11 cents in 1989, compared with a loss per share of 6 cents in 1988.

William C. Mustain, president and chief executvie officer, while expressing disappointment about the results for the year, stated that he was encouraged that operating margins had been in the black for the last three quarters of 1989 and that net income had been positive for the last half of the year.

Mustain added,''In the first half of 1989, Comdial was faced with intense pricing pressure from importers who were dumping key systems in the U.S. market. We reacted quickly with our own promotional prices and accelerated our already intense rate of new product introductions.

''In addition, the last half was favorably impacted by cost containment and reduction programs initiated during 1989 and this favorable impact will carry over into 1990. We are proud that Comdial was one of the few key system suppliers able to show profitable quarters in 1989. This proves that we can compete with the Far East Importers on cost as well as price.''

NANUET, NY (FEB. 7) BUSINESS WIRE - Executive TeleCard Ltd. (NASDAQ:EXTL)(PHLX:XTL) and Fintelcom, Finland's international long distance carrier jointly announced Wednesday the signing of a contract for Finland to use ETI's new computerized international dialing equipment to automate Fintelcom's operator-assisted calling cards.

ETI's new system -- called ''CAVIAR'' -- is already installed in five countries and has 10 more systems pending for installation by March of this year. The Finnish contract is the fifth announced by ETI in the last five months and comes on the heels of an announcement last week that Italy's largest credit card, Carta Si, has signed to put its 1.5 million card holders into the ETI system.

A. Olkkonen, Fintelcom's managing director, said in announcing the

contract, ''the dramatic growth of the international communications market and the traveling executive will require even more telephone calling by easy, secure, reliable and cost effective methods in the years ahead. The CAVIAR system gives our cards the automation, computerized billing and international acceptance that we need.

''From Finland we dial out to 198 countries -- more than anyone in the world -- and making this calling card product eventually available to the 2.5 million subscribers in Finland is an important part of our program of bringing value-added services to our customers.''

Robert A Roach, chairman and chief executive officer of Executive TeleCard added: ''Our engineers know the phone business and this contract proves it. To have our equipment officially accepted and used by the Finnish telephone company is important to us because they are very particular about what they add to their network. Our CAVIAR system will increase customer usage thus driving greater returns on Fintelcom's embedded investment.''

Executive TeleCard is an affiliate of International 800 Telecom Corp. (PHLX:TLL) which has 15 years of experience bringing 800 toll-free services to large international companies. With service in over 45 countries, International 800 is the administrative arm of ETI under a special 10-year agreement between the two companies.

Roach, a 28-year veteran in telecommunications with Bell Atlantic, is chairman of both Executive TeleCard and International 800. Executive TeleCard's basic product is a computer driven credit card acceptance system that will facilitate one universally accepted card for international dialing.

SAN JUAN CAPISTRANO, CA (FEB. 7) BUSINESS WIRE - Nichols Institute (ASE:LAB) Wednesday announced that five institutional holders of common stock and warrants to purchase additional common stock of the institute have decided not to exercise their warrants and not to sell their shares in an underwritten public offering, as had previously been announced.

James W. Whitmer, chief financial officer of the company, said the investors had indicated a desire to hold their shares and retain their warrants because of existing market conditions.

In January, the institutional investors exercised their warrants to purchase approximately 315,000 shares as to which the warrants were expiring and for which they paid approximately $2,250,000 in cash in lieu of cancelling indebtedness.

At that time, the institutions indicated their intention to exercise their remaining warrants as to an additional approximately 410,000 shares for which they proposed to pay cash instead of cancelling debt and to sell the approximately 725,000 shares in an underwritten public offering. The investors requested that the company register the shares in accordance with rights granted to them in the warrants.

The warrants were issued in July 1988 in connection with a $27 million senior note financing. In addition to their holdings of common stock and warrants, the institutions continue to hold the senior notes.

Nichols Institute provides esoteric diagnostic testing to clients nationwide in the fields of endocrinology, genetics, immunology, microbiology, molecular biology, oncology, serology, special chemistries, toxicology and virology. It also has regional laboratories in California, the Pacific Northwest and the Midwest that provide clinical testing to those markets.

Substance abuse testing is also provided to clients nationwide. Nichols Institute Diagnostics manufactures kits for the performance of medical diagnostic tests that are distributed worldwide.

MURFREESBORO, TN (FEB. 7) BUSINESS WIRE - National HealthCorp L.P. (ASE:NHC), one of the nation's largest long-term health care chains, announced year-end net income of $14,447,000, up 22.5 percent from $11,798,000 in 1988.

Revenues for the year were $136,439,000, up 18.1 percent from $115,525,000 in 1988. Earnings per unit were up 21.5 percent to $2.09 from $1.72.

Cash distributions were 25 cents for the fourth quarter. The payment date is Feb. 15 to unitholders of record on Dec. 29, 1989.

Total cash distributions for 1989 were $1.

NHC President Andy Adams said highlights of 1989 included purchasing three long-term health care centers and opening a center previously under

construction.

NHC purchased an 81-bed, two-year old center in Ft. Oglethorpe, Ga. Renovation of a hospital purchased by NHC in Lawrenceburg, Tenn., will accommodate 60 long-term health care beds when completed. The third purchase was a 120-bed long-term health care center in Hudson, Fla.

In addition, NHC added 44 beds to a health care center in Laurens, S.C., and opened a 60 bed center in Palatka, Fla., which the company will manage.

After year end, NHC purchased a 104-bed health care center in Stuart, Fla. There are 473 beds under construction at seven health care centers that we expect to open in 1990.

NHC owns or mangages 72 health care centers with 8,684 beds in 10 states. Other services for the elderly include Alzheimer's units, homecare and retirement apartments.

#90038b0677 02/07/1990 ~Business Wire

MENLO PARK, CA (FEB. 7) BUSINESS WIRE - Landsing Pacific Fund (ASE:LPF), a San Francisco Bay Area-based real estate investment trust (REIT), Wednesday reported year-end financial results for its first full year of operations.

The Fund reported funds from operations (net income before depreciation, amortization and non-recurring costs) of $4,596,000, or 75 cents per share on revenues of $15,662,000, or $2.55 per share, for the year ended Dec. 31, 1989. This represents a 20 percent increase in funds from operations and a 1 percent increase in revenues over year-end 1988.

Gary Barr, president, said that the Fund's 1989 improved performance was due in part to the expected economies of scale achieved through the 1988 merger of three medium-size REITs which formed Landsing Pacific Fund.

Also, a slow but steady improvement in the markets in which the Fund's 29 properties are located contributed to the increase in revenues.

In addition to its announcement of 1989 earnings, the Fund Wednesday also reported it has purchased its joint venture partner's remaining interest in Country Hills Towne Center. This acquisition gives the Fund 100 percent fee title ownership to this shopping center located in Diamond Bar Calif.

1989 third and fourth quarter earnings were negatively impacted by $300,000, or 5 cents per share, due to the placement of the center into service and thus the full recognition of operating and interest expense prior to tenants taking occupancy.

For financial reporting purposes the Fund has accrued $900,000 as a potential loss from investments in real estate. This accrual reflects the Fund's concern over the operations of Stapleton Square in Denver. Over the past two years the property has produced negative cash flow with no sign of improving market conditions.

#90038b0678 02/07/1990 ~Business Wire

BOCA RATON, FL (FEB. 7) BUSINESS WIRE - Siemens Information Systems Inc. Wednesday introduced a high-performance personal computer board based on the powerful Intel 80486 microprocessor.

Designed for original equipment manufacturers (OEMs) and system integrators, the board provides full PC functionality in a single, AT-sized board.

The new board is based on Siemens ''slot-CPU'' concept which eliminates the motherboard by using advanced surface-mount technology to fit the processor, memory, serial and parallel ports, and disk controllers onto a single board. Video controllers are added via a ''piggyback'' board which mounts onto the slot-CPU board.

Key features of the new Siemens board include:

- 25MHz 80486 microprocessor with embedded 80387 coprocessor - 1 MB random-access memory (RAM), expandable to 32 MB - 8 KB cache memory - MS-DOS, OS/2 and UNIX-compatable

This new board extends our product line into the highest performance category, allowing us to offer OEMs and system integrators a complete range of slot-CPU boards to meet any application requirements,'' said Morgan Stuart, director of Siemens OEM/VAR Personal Computer Division.

Because each board in the slot-CPU family is designed-compatible, they are fully interchangeable in a variety of system cabinet designs. Even the smallest network workstation can be equipped with a 286 or 386 board or the powerful 486 board, thus easily upgradeable, as required.

Siemens OEM/VAR Personal Computer Division, based in Boca Raton, markets a full line of personal computers and PC boards to OEMs and VARs. It is part of the Peripheral Equipment Group of Siemens Information Systems Inc. which manufactures and markets communication and information sytems and peripherals for the U.S. market.

Siemens U.S. companies had 1989 sales of $3.5 billion, employing more than 31,000 at over 400 sales and service locations and more than 50 manufactuing sites.

SAN FRANCISCO (FEB. 7) BUSINESS WIRE - AT&E Corp. (ASE: ATW) Wednesday announced that it has entered into an agreement with SMH Swiss Corp. for Microelectronics and Watchmaking Industries Ltd., Europe's largest wristwatch manufacturer.

Under the agreement, SMH will participate with AT&E in the upcoming European evaluation of AT&E's RECEPTOR wireless personal communications system. SMH manufactures and sells wristwatches under the Omega, Longines, Tissot, Rado, Swatch, and Hamilton brand names.

Don G. Hoff, AT&E's chairman of the board and chief executive officer said "SMH, which has unique familiarity with the European market, adds an important perspective to our European evaluation. We look forward to broadening the scope of our relationship with SMH as we move toward bringing RECEPTOR services to Europe."

AT&E, through its subsidiaries, is engaged in the business of implementing a local, regional, national and international wireless personal communications system designed to provide a low-cost link between standard telephones and subscribers using RECEPTOR Messagewatches. RECEPTOR Messagewatches incorporating AT&E's proprietary technology are currently being manufactured by Hattori Seiko Co.,Ltd.

#90038b0689 02/07/1990 ~Business Wire

CAMBRIDGE, MA (FEB. 7) BUSINESS WIRE - Lotus Development Corp. Wednesday announced the immediate availability of Lotus Realtime, a high-performance realtime capability for Lotus 1-2-3 Release 3 running under the OS/2 operating system.

With Lotus Realtime, securities trading professionals can access, integrate and analyze multiple sources of realtime information directly from within their 1-2-3 spreadsheets.

Teknekron Software Systems, a leading systems integrator for the financial services industry, lauded Lotus's announcement and said they have plans to integrate Lotus Realtime into their core product offering for securities traders. In addition, Spreadsheet Solutions, a leading provider of financial analytics announced their intentions to develop Lotus Realtime applications.

Lotus Realtime is a custom software implementation developed by systems integrators and trading support professionals using the Lotus Realtime Toolkit. Lotus Realtime combines the power of 1-2-3 with direct links to any proprietary or commercially available source of realtime digital data,

such as pricing information on stocks, bonds or commodities. This replaces the need to rekey data into the spreadsheet, allowing for sub-second analysis and investment decisions.

''One of Lotus's primary goals is to allow our customers to get closer to their data, whether that data resides inside or outside the company, on a CD-ROM, mainframe or realtime digital feed,'' said David Roux, vice president of Lotus's Information Services Group. ''We see Lotus Realtime as another step toward achieving this goal.''

''The success of trading organizations depends on leveraging the best available computer technology and the torrent of data that drives the world's financial markets,'' said Brian Bell, senior manager of Market Data Products for Lotus. ''By coupling 1-2-3's superior analytics with direct access to realtime financial data, Lotus Realtime provides an optimal computing platform for gaining a competitive advantage.'' The Lotus Realtime Architecture - The Key to High Performance

A Lotus Realtime implementation consists of three components: one or more feed servers, a Lotus Realtime Engine, and Lotus 1-2-3 Release 3 running under OS/2. A customized feed server is built for each realtime data feed using the Realtime Toolkit. Lotus Realtime will support up to four feed servers running simultaneously. The feed server translates each realtime data feed into a standard format recognized by the Realtime Engine.

The Realtime Engine is a Lotus-developed program that resides on each user's workstation and controls the flow of realtime data into 1-2-3. The Realtime Engine consists of front- and back-end components. The front-end is a menu-driven, user interface within 1-2-3 that allows users to choose which realtime elements to monitor. The back-end component acts as an intelligent ''traffic cop,'' sorting the realtime elements pertinent to the spreadsheet and monitoring up to four datafeeds simultaneously.

The Realtime Engine maintains two-way communication with 1-2-3. It keeps a constantly updated ''mirror'' of all the realtime data elements in the spreadsheet. Each time the spreadsheet's calculation is complete, it receives the most recent update to the monitored elements, guaranteeing the latest information.

In addition, Lotus Realtime exploits the multitasking capabilities of OS/2 to provide true realtime analysis. By allocating analytics and each realtime feed to separate OS/2 tasks, Lotus Realtime achieves consistent delivery of data without jeopardizing analytical performance.

A Powerful, New Computing Platform for Traders

1-2-3 Release 3 is ideally suited for the aggressive analysis requirements of traders and their research staffs. It combines major enhancements in

data analysis, database functionality and graphics, with full support for networks, external data access and customization. 1-2-3 Release 3 allows users to work with up to 256 worksheets or files at a time, supporting the complex analyses and multiple activities common to the trading floor.

Using the Lotus Add-in Toolkit, a set of tools for customizing 1-2-3, developers can extend the spreadsheet by developing proprietary analytical models. With the Add-in Toolkit, developers can create complex calculations that extend beyond previous macro capabilities.

Through 1-2-3's DataLens capability, an integrated tool for linking 1-2-3 with external databases, direct connections can be built to other non-realtime sources of information and accessed from directly within 1-2-3. In a trading environment this might include client portfolios, historical pricing information or fundamental data stored in a relational database or on a compact disc.

Industry Reactions

''Sybase's high-performance relational database management system that is based on a client/server architecture is an ideal complement to Lotus Realtime,'' commented Stewart Schuster, vice president of marketing at Sybase, Inc. ''Many of our customers use Sybase in realtime applications, such as securities trading, and now users can combine realtime data with Sybase data transparently from a 1-2-3 spreadsheet.''

''We expect the combination of Lotus Realtime with the Teknekron Information Bus to become the dominant realtime analytical tool on the trading professional's desk,'' said Vivek Ranadive, president of Teknekron Software Systems. ''The Teknekron Information Bus provides a wide range of data sources and uses the fastest protocol available (i.e. reliable broadcast protocol) to access, manipulate and distribute information.''

''Lotus Realtime provides a state-of-the-art platform for developing realtime analytics,'' said Jeffrey Pulver, president of Spreadsheet Solutions. ''With it, we expect to help traders worldwide reach new levels of decision support by providing analytics never before possible.''

Availability, Distribution and Pricing

Lotus Realtime is available immediately and will be sold directly by Lotus to trading support professionals and systems integrators.

The Realtime Toolkit, priced at $25,000, includes all hea der files, programs, documentation and other files necessary to build the feed servers. The Lotus Realtime Engine ranges in price from $475 to $1,350 per copy, based on volume. Lotus 1-2-3 Release 3 is available at a suggested retail price of $595 which includes both the DOS and OS/2

versions.

System requirements for Lotus Realtime are an 80286- or 80386-based IBM or IBM-compatible personal computer with 5MB of RAM, Lotus 1-2-3 Release 3 running under OS/2 1.1 or higher. For more information call 1-800-343-5414.

#90038b0696 02/07/1990 ~Business Wire

BOCA RATON, FL (FEB. 7) BUSINESS WIRE - Siemens Information System Wednesday announced the availability of an interface that allows its high-performance non-impact printers to connect to IBM System/3X and AS/400 computers for both local and remote (SNA network) printing.

The SPUR Protocol Converter, available immediately, will be highlighted by Siemens at the Systems 3X/400 Expo, Feb. 13 and 14 in Anaheim, Calif.

The SPUR interface is designed for use with the full range of Siemens printers; however, it will generally be implemented with the 2200 Model 2 Laser Printing System and the 2050 LED Printing System. The 2200-2 Printer operates at 103 pages per minute (ppm) with 240 X 240 dots per inch (dpi) resolution.

The 2050 Printer, a 50 ppm system, is offering 240 X 240 resolution and advanced LED imaging.

''The introduction of the SPUR interface is significant because it marks our official entry into the mid-range systems world with Siemens printers '' said Michael Kurz, Director of Marketing for the Peripheral Systems Division.

''By permitting local and remote connection to AS/400 and S/3X systems, we are able to offer our proven printing technologies at the point of need for a wider variety of end users and applications.''

According to Kurz, the AS/400 and Systems/3X environment has traditionally utilized line printers. By introducing the new page printing laser and LED technologies, this market can realize faster speeds, letter quality printing, graphics applications and improved job turn-around time.

Siemens Peripheral Systems Division, headquartered in Anaheim, Calif., markets high-speed, high-performance, non-impact printing systems based on laser and LED technologies. The division has 20 sales offices nationwide.

Siemens Information Systems Inc., based in Boca Raton, Fla., manufactures and markets communication and information systems and peripherals for the United States. It is one of the Siemens group of U.S. companies which had 1989 sales of $3.5 billion, employing more than 31,000 people at over 400 sales and service locations and more than 50 manufacturing sites.

#90038b0700 02/07/1990 ~Business Wire

FAIRFIELD, NJ (FEB. 7) BUSINESS WIRE - Prime Motor Inns Inc. (NYSE:PDQ) reported second quarter earnings for the period ended Dec. 31, 1989.

Net income for the second quarter decreased 5 percent to $17.1 million from $18.0 million earned during the comparable prior year. For the six months, net income increased 1 percent to $37.9 million from $37.4 million during the prior year.

Revenues of $99.4 million and $203.3 million for the second quarter and the six-month periods reflect 1 percent and 3 percent increases over revenue of $98.3 million and $197.5 million generated during the comparable periods last year. Primary earnings per share for the second quarter decreased 6 percent to $.52 from $.55 in the prior year.

For the six months, primary earnings per share increased 1 percent to $1.14 from $1.13. Fully-diluted earnings per share for the period were 50 cents, a decrease of 6 percent from 53 cents in the prior year. For the six months, fully-diluted earnings per share increased 1 percent to $1.10 from $1.09.

Earnings from operations for the quarter were lower than expected primarily due to general conditions in the lodging industry and lower realization of development fees as a result of rising interest rates.

#90038b0702 02/07/1990 ~Business Wire

PISCATAWAY, NJ (FEB. 7) BUSINESS WIRE - Unitronix Corp. (NASDAQ:UTRX) a marketer of turnkey computer systems, Wednesday announced results for the fiscal second quarter and six months ended Dec. 31, 1989.

Revenues for the quarter ended Dec. 31, 1989 increased 12 percent to $5,051,621 as compared to $4,519,825 for the same quarter a year ago.

Distribution business revenues rose by almost 30 percent above the quarter ended Dec. 31, 1988. Income from operations was $243,413 as compared to a loss of $63,758 for the same period last year.

Unitronix reported net income of $201,988 or 9 cents per share for the Dec. 31, 1989 quarter compared to a loss of $107,896 or 4 cents per share for the three months ended Dec. 31, 1988.

Revenues for six months were $8,449,297, up slightly above $8,366,945 for the six months ended Dec. 31, 1988. The loss for the six months was $414,257 or 17 cents per share on 2,371,112 average shares outstanding as compared to a loss of $165,983 or 7 cents per share based on 2,325,222 average shares outstanding for the six month period a year earlier.

Zimmer noted, ''We are pleased with our return to profitability during the second quarter. We hope to continue the upward momentum during the third quarter.

''Market conditions appear to be firmng in both the PRAXA and distribution business segments. We are now better positioned with two additional sales offices to broaden our market opportunity.''

#90038b0703 02/07/1990 ~Business Wire

KANSAS CITY, MO (FEB. 7) BUSINESS WIRE - US Sprint Wednesday introduced validated accounting codes offering customers increased security and control over their long-distance calls.

The codes are available for switched access service customers (Dial 1, Sprint Plus, Dial 1 WATS, FONCARD and Advanced WATS Plus) of US Sprint. In the second quarter of this year, validated codes will be available for dedicated access service customers (Advanced WATS, Banded WATS, Ultra WATS and VPN).

US Sprint's unvalidated accounting codes assist customers in allocating long-distance costs by client, project or specialized accounting groups. Validated accounting codes not only group calls, but offer even greater security, control and accuracy for long-distance calls placed. All long-distance calls placed must be followed by a specific code (1-5 digits) or the calls will be blocked.

As an example, a company with its headquarters in one city and branch locations in others could have the same accounting code for a job, client or department and receive call detail information sub-totaled by accounting codes across all locations. Validated codes enable customers to track calls by employee, project, client, department or other accounting group, with greater security and control than ever before.

Customers who would benefit from vaildated accounting codes include those who do project or client work where specific accounting of long-distance services is essential. This might include construction companies, advertising agencies, consulting firms, lawyers, accountants or companies doing governmental work.

While unvalidated accounting codes are controlled exclusively by the customer and can be routinely changed, with validated codes the customer must contact US Sprint to reassign or discontinue a code to ensure security.

There is a nominal installation charge per account for validated accounting codes, with a monthly charge as low as pennies per code, depending on the number of unique codes required.

US Sprint is a unit of United Telecommunications Inc., a diversified international telecommunications company based in Kansas City.

#90038b0732 02/07/1990 ~Business Wire
RALEIGH, NC (FEB. 7) BUSINESS WIRE - The Textile/Clothing Technology Corp. Wednesday announced a major expansion of its National Apparel Technology Center in Raleigh.

The new 5500 square foot Media Technology Branch, located at 6005 Chapel Hill Rd., Raleigh, incorporates the latest technologies and capabilities of video and audio on laser discs with innovative computer/graphics designed to produce interactive and linear mechanic's training, troubleshooting and other videos for use by American apparel manufacturers.

According to Burton B. Ruby, president of (TC)2, the Media Technology Branch is manned by 13 professionals experienced in apparel manufacturing technology, technical writing, computer graphics and production of interactive and linear videos.

''We've brought all these talented people into this studio and production facility together with state-of-the-art electronic, audio/visual and computer equipment so that the National Apparel Technical Center will continue to lead the way in developing innovations that can help U.S. apparel manufacturers increase operating efficiencies, facilitate educational programs for managerial and technical personnel, help locate and solve problems and improve productvity.''

(TC)2 also announced that it is accelerating the production of interactive and linear video training software programs for apparel makers. Programs are now available for three Union Special machines: Troubleshooting for the U.S. HF-600; and Training programs for U.S. 63400 and U.S. 39500.

Training programs for operators and mechanics on the Brother DB2-B 737-413 Juki DDL 5550-6 and Pfaff 481 and 561 series are scheduled to be available in the near future.

Additional programs will cover maintenance of EFKA, Quickrotan, Mitsubishi Singer and Panasonic motor drives and controllers, plus operator programming of input panels for programmable stitchers.

The Media Technology Branch plans to produce upwards of 25 interactive and linear video training and troubleshooting programs for the American apparel industry in its first year.

The Textile/Clothing Technology Corp. is an alliance of companies and organizations in the apparel/textile industry, labor, academia and government that is dedicated to the development of advanced sewing systems and better training and education to improve the Unied States apparel industry's worldwidde competitiveness.

The National Apparel Technology Center now occupies three separate locations in Raleigh. Joseph W.A. Off is managing director of the center and Frank Hughes, who is assistant director, is also responsible for the new Media Technology Branch.

WOODLAND HILLS, CA (FEB. 7) BUSINESS WIRE - Zenith National Insurance Corp. (ZNT) reported $44.6 million of operating income before ''fresh start'' tax benefit and capital gains/losses for the 12 months ended Dec. 31, 1989, compared with $43.4 million for the 12 months ended Dec. 31, 1988, or $2.15 per share compared with $2.02 per share.

Net income for the 12 months ended Dec. 31, 1989 was $41.1 million, or $1.98 per share, compared with $46.3 million or $2.15 per share, for the same period in 1988. The 1989 results reflect a net loss after taxes associated with the Northern California earthquake and hurricane ''Hugo'' estimated to be $4.4 million, or 21 cents per share, and capital losses after tax of $5.1 million, or 24 cents per share. During 1988, capital gains after taxes were $.8 million, or 4 cents per share.

For the fourth quarter of 1989, operating income before ''fresh start'' tax benefit and capital losses was $9.9 million, or 48 cents per share, compared with $10.0 million, or 47 cents per share in the fourth quarter of 1988.

Net income was $5.3 million, or 26 cents per share, compared with $9.2 million, or 43 cents per share, during the fourth quarter of 1988. The 1989 fourth quarter results reflect a net loss after taxes associated with the Northern California earthquake estimated to be $2 million, or 10 cents per share. Also, there was a capital loss after taxes of $5.1 million or 25 cents per share compared to $1 million, or 5 cents per share, in the fourth quarter of 1988.

HADDONFIELD, NJ (FEB. 7) BUSINESS WIRE - United Medical Corp. (ASE: UM) announced Wednesday that the previously announced acquisition by its Cardio Data Systems division of Clinical Data Inc.'s clinical Holter monitoring business has been consummated.

The purchase price for the acquisition was $4.5 million, which was paid in cash at closing. In addition, United Medical's division, which will act as collection agent for certain Medicaid/Medicare receivables which were not acquired in the acquisition, made an advance payment on such collections of $250,000.

The business unit being acquired by Cardio Data Systems includes ambulatory ECG (Holter) and blood pressure monitoring services provided to hospitals, physicians, and other health care providers in connection with the diagnosis or treatment of cardiac patients or suspected cardiac patients.

With this acquisition, Cardio Data Systems is clearly the nation's leading provider of Holter monitoring services, which is the analysis of 24-hour electrocardiograms. Cardio Data Systems is also the largest provider of Holter monitoring research services to major pharmaceutical companies in connection with new drug applications.

In addition to Holter monitoring, United Medical Corp. provides these services and products through its divisions: physical examinations (Life extension Institute); electronic-new drug application submissions to the Food and Drug Administration for pharmaceutical companies (Research Data Corp.); pacemaker testing (Pacemaker Evaluation Service); and the manufacture and sale of motorized treadmills (Trotter Treadmills).

#90038b0742 02/07/1990 ~Business Wire

AKRON, OH (FEB. 7) BUSINESS WIRE - Ohio Edison Co. Wednesday reported that earnings on common stock in 1989 were $332.9 million, or $2.18 per share, compared with $186.2 million, or $1.22 per share in 1988.

Earnings results for 1988 included a one-time $127.6 million, or 84 cents per share, non-cash write-off of certain nuclear plant construction costs. Net income was $361 million in 1989, compared with $218.9 million in 1988.

The Akron-based company said earnings in the fourth quarter were $74.6 million, or 49 cents per share, compared with a fourth quarter 1988 loss applicable to common stock of $38.4 million, or 25 cents per share, which reflected the write-off. Net income was $81.5 million in the fourth quarter of 1989, compared with a net loss of $31.3 million, in the fourth quarter of 1988.

For the year, retail electric sales exceeded 1988's record results. Sales to commercial customers were up 2.9 percent as service and retail business activity increased. Industrial and residential sales were down slightly, 0.8 percent and 0.1 percent respectively. Industrial sales mirrored the effects on area steel companies and auto-related suppliers of lower auto sales in the last half of 1989. Electric sales to residential customers remained strong despite a return to more moderate temperatures, which reduced heating and air-conditioning use from a year earlier. In 1989 the company added more than 10,000 new customers.

Total kilowatt-hour sales were down 10.7 percent in 1989, due mainly to a 28.2 percent decrease in sales to other utilities. The drop in sales resulted primarily from a reduction in generating capacity available for off-system sales. Available capacity was lower during the year because of scheduled generating unit maintenance and refueling of nuclear generating units in which the company shares ownership. Although down, these sales still produced more than $228 million of revenue.

The company established a new system peak load record on July 24 when customer demand hit 5,152 megawatts. This marks the fourth consecutive year customers set a new system peak load record. During that period, the peak load increased 21 percent. Edison also set a new winter peak load record on Dec. 21 when customer demand reached 4,962 megawatts. The previous winter season peak record of 4,532 megawatts was set on Feb. 8, 1989.

#90038b0745 02/07/1990 ~Business Wire
BOSTON (FEB. 7) BUSINESS WIRE - Clinical Data Inc. (NASDAQ:CLDA) announced Wednesday that it has secured stockholder approval and has closed the divestiture by Clinical Data of certain of the assets of its Diagnostic Services Division, which have been sold to Cardio Data Systems, a division of UM Holding Co., a United Medical Corp. (AMEX:UM).

In addition to the cash purchase price of $4.50 million, Clinical Data shall retain certain nontransferable receivables of the Division and allow United Medical to collect these on its behalf. The additional value to the company of these receivables, net of a collection fee, is estimated at $250,000.

The business unit acquired by United Medical includes Ambulatory ECG (Holter) and Blood Pressure Monitoring services and Pulmonary Function Testing performed for clinical purposes in doctors offices and hospitals.

Clinical Data, through its Drug Research Services Division will continue to provide Ambulatory ECG (Holter) and Blood Pressure monitoring services to pharmaceutical companies and medical research institutes. The Drug Research Services Division works with 15 international drug companies, performs studies in the United States, Canada and eight European countries and has over 350 investigators worldwide.

Clinical Data Inc. is a multinational medical company offering services and products for pharmaceutical research, hospital markets and the physician's office. The company has developed ambulatory monitoring technology used in cardiovascular drug research.

The company's Dutch subsidiary, Vital Scientific, N.V., designs and manufactures blood chemistry instrumentation which is marketed worldwide. EnviroMed Inc., collects, tracks, and disposes of hazardous waste from small generators.

#90038b0757 02/07/1990 ~Business Wire
PALO ALTO, CA (FEB. 7) BUSINESS WIRE - Hewlett-Packard Co. and Oki Electric Industry Co. Ltd. of Japan Wednesday announced they have reached final agreement to build and jointly operate a printed- circuit-board

manufacturing facility in Puerto Rico.

The joint venture has begun securing construction and operating permits from the Puerto Rican government.

A tentative agreement had been reached in September 1989. Together, the companies will invest $40 million to construct a 115,000-square-foot plant at HP's site in Aguadilla. HP's Puerto Rico operation will use the boards in its computer products. Oki's portion of the jointly manufactured PC boards will be sold on the open market.

Construction is expected to be completed in 1991. The plant ultimately is expected to employ 200 people. The 50-50 joint venture initially will be managed by John J. Fischer of HP and Toshiki Yokokawa from Oki. A permanent management team will be appointed later.

Fischer previously was the general manager of HP's Printed Circuit Division in Santa Clara, Calif. Yokokawa is the general manager of Oki's Electronic Component Division and general manager of the strategic-planning office of the company's Electronic Devices Group, located in Tokyo.

Hewlett-Packard Co. is an international manufacturer of measurement and computation products and systems recognized for excellence in quality and support. The company's products and services are used in industry, business, engineering, science, medicine and education in approximately 100 countries. HP has 95,000 employees and had revenue of $11.9 billion in its 1989 fiscal year. Oki Electric Industry Co. is a leading international manufacturer of telecommunications and information-processing systems and electronic devices. The company focuses on digital switching and transmission technologies for use in integrated- services digital networks (ISDNs), submicron and VLSI devices, and artificial-intelligence systems.

Oki, founded more than 100 years ago, has 20,000 employees and had revenue of $4.2 billion in its 1988 fiscal year.

NEW ORLEANS (FEB. 7) BUSINESS WIRE - Freeport-McMoRan Energy Partners Ltd. (NYSE:FMP), an 80-percent-owned affiliate of Freeport-McMoRan Inc. (NYSE: FTX), announced Wednesday that its proved oil and natural gas reserves at Dec. 31, 1989, totaled 68.5 million barrels of oil and 749 billion cubic feet of natural gas, or 1,160 billion cubic feet of natural gas equivalents (bcfe), using a conversion rate of one barrel of oil for each six thousand cubic feet of natural gas.

Year-end 1989 proved reserves represent an increase of 16 bcfe over year-end 1988 proved reserves, after considering production and asset sales during 1989.

James R. Moffett, chairman and chief executive officer of McMoRan Oil & Gas Co., said: ''The addition of 218 bcfe to FMP's reserves during 1989 resulted principally from discoveries and extensions of 114 bcfe and revisions to previous estimates of 102 bcfe.

''These reserve additions more than replaced 1989 production of 109 bcfe and sales of producing properties during 1989 of 93 bcfe.

''Under Securities and Exchange Commission guidelines for calculating reserve values, FMP's future net cash flows from year-end 1989 proved reserves are estimated to be $2.6 billion, with a present value discounted at 10 percent per annum of $1.3 billion, representing an increase of approximately $87 million over the present value of reserves at year-end 1988.''

Moffett added: ''FMP's capital expenditure budget for 1990 is approximately $188 million, of which $56 million will be allocated for exploration. Our 1990 capital expenditure budget represents an increase of approximately 42 percent over our 1989 capital expenditures of $133 million and nearly double our 1988 capital expenditures of $98 million.''

FMP, which had approximately 112.7 million partnership units outstanding at Dec. 31, 1989, explores for, develops, and produces oil and natural gas offshore and onshore in the United States. McMoRan Oil & Gas Co., a wholly owned subsidiary of Freeport-McMoRan Inc., is FMP's managing general partner.

FMP and Freeport-McMoRan Inc. have announced that FMP will be converted from a master limited partnership to a publicly traded corporation listed on the New York Stock Exchange. This restructuring is expected to occur by the end of the first quarter of 1990.

CHICAGO (FEB. 7) BUSINESS WIRE - Livingston Financial Group, a Chicago-based bank management company, Wednesday reported significantly higher earnings for two of its banks in the southwestern United States.

Formed in February 1988, Livingston Financial Group acquires and turns around distressed banks and thrift institutions.

For fiscal 1989, net earnings at the First National Bank of North County, San Diego, were $1,145,000, compared to a loss of $944,200 in 1988. Assets grew to $67,690,000, from $56,459,000 a year ago.

Acquisition of the San Diego bank by Livingston received final regulatory approval in November 1989, at which time the group infused $3 million in return for 52.55 percent of the bank.

Earnings at First State Bank of Taos, N.M., purchased by Livingston Financial Group in 1988, increased to $520,000 in 1989 from $105,000 in 1988.

Assets rose to $48,304,000 from $41,822,000. Homer J. Livingston Jr., Livingston Financial Group chairman, said, ''The dramatic performance of our San Diego and Taos banks validates our belief in the tremendous investment potential of distressed financial institutions.''

Livingston, who was chairman and chief executive officer of ABN/LaSalle, N.A., Chicago, heads a team of bank management experts whose investment strategy is to form limited partnerships to acquire problem banks and thrifts.

In addition to its banks in San Diego and Taos, N.M., Livingston Financial Group also owns the National Bank of Albuquerque, N.M., which it acquired as a distressed bank in December 1988. In 1989, the bank reported a loss of $1.3 million after substantial extraordinary charges. It projects dramatically improved performance in 1990.

''We are pleased with the progress of our banks,'' said Livingston. ''The turnaround of our San Diego and Taos banks is well ahead of schedule, and we are confident that National Bank of Albuquerque is well on the road to recovery,'' he said.

All three banks had lost money prior to their acquisition by the Livingston Group.

CHANTILLY, VA (FEB. 7) BUSINESS WIRE - VERDIX Corp. (NASDAQ: VRDX) Wednesday announced the availability of the Verdix Ada Development System (VADS) for DECstation and DECsystem processors under the Ultrix operating system, providing Digital customers with the most powerful UNIX based Ada development environment in the market today.

The VADS product on Digital's RISC family of workstations represents a powerful mating of technologies. ''Digital and Verdix engineers worked together to tailor VADS to the Digital RISC machines.

The compiler is truly matched to the Digital technology, taking advantage of the speed of the RISC systems. The VADS development tools are matched to the Ultrix operating system, providing end-users with a powerful productivity tool for Ada software development'' says Steve Bowden, Verdix western area general manager.

Initial product availability will target development of workstation based applications. Verdix is also developing products for embedded systems development from the DEC RISC-based systems, including cross compilers for the Motorola 680x0 family. Availibility of the cross compilers is planned for mid 1990.

The VADS software development environment includes a validated, Ada compiler, an interactive symbolic debugging facility, source code management and recompilation tools, and program generation tools. VADS is used to develop Ada language software to be run on mainframe computers, workstations and embedded microprocessors for real time control applications.

Verdix will begin accepting orders for the RISC-based products immediately. Product deliveries will be made in limited quantities during February, with full availability beginning in March. Pricing begins at $7,500.

VERDIX Corp. is headquartered in Chantilly, with major software development facilities in Aloha, Ore. It specializes in products to meet government and industry needs for Ada lauguage development systems and secure computer networks. Verdix is traded on the NASDAQ, symbol VRDX.

WASHINGTON (FEB. 7) BUSINESS WIRE - The Software Action Group for Europe (SAGE), supported by nearly 400 European and U.S. computer hardware and software companies, has applauded a U.S. government statement to the European Commission on copyright protection for software.

The U.S. statement rejects broad claims that U.S. copyright law permits the "reverse engineering" of computer programs to develop competing programs. The European Commission had asked for information on U.S. law in deliberations on a proposed EC directive that will shape copyright protection of software throughout the 12 EC countries.

Supporters of a reverse engineering exception to copyright protection for software include large Japanese hardware manufacturers that have not had comparable successes in software. The reverse engineering at issue involves taking apart or "decompiling" software to exploit, for commercial purposes, the source code written by another firm.

In a diplomatic note to the European Commission, dated Jan. 24, 1990, and recently made public, U.S. Ambassador to the EC Thomas Niles wrote: "Under U.S. law, unauthorized reproduction or translation of substantial parts of a program's code into source code would result in prima facie violation of the copyright owner's rights."

"The statement issued by Ambassador Niles refutes assertions that U.S. law permits software copying through 'reverse engineering,"' said Douglas E. Phillips, president of the Business Software Alliance (BSA). "An exception to copyright permitting such 'reverse engineering' in Europe would be unprecedented and would give large Japanese hardware companies a free ride on the backs of U.S. and European software developers," he added.

BSA, which represents the six leading software publishers Aldus, Ashton-Tate, Autodesk, Lotus Development, Microsoft, and WordPerfect, reported that 190 U.S. companies had already signed statements in support of the Software Action Group for Europe (SAGE), which represents a like number of European companies.

Copies of the statements were delivered today to the U.S. Trade Representative. (A list of those companies which submitted statements is available upon request.)

The U.S. note to the European Commission makes clear that the U.S. Copyright Act contains no provisions "explicitly dealing with 'reverse engineering' or decompilation of computer programs. Under U.S. law, copying or reproducing computer programs without the permission of the program owner is not permitted unless excused by the provisions of our fair use doctrine or as back-up copying under Section 117."

#90038b0769 02/07/1990 ~Business Wire

ATLANTA (FEB. 7) BUSINESS WIRE - Gilbert H. Deitch, partner in the law firm of Bauer, Deitch & Raines P.C., filed a suit Jan. 29, in the Superior Court of Fulton County, against Apple Computer Inc., Hitachi Sales Corp. of America and John Doe (an unknown affiliated entity, at this time, of Hitachi).

Deitch is seeking an undisclosed amount of money for his client who, on Jan. 31, 1988, sustained serious personal injuries as a result of an explosion of his Apple IIc monitor.

At the time of the incident, Deitch's client was operating the ''Hello'' program on his Apple IIc computer. While working on this standard program the screen suddenly went blank. Referring to the Apple IIc Owner's Manual, he turned the computer off as instructed, waited the recommended ten seconds, then switched it back on.

It was at this time a high-pitched, whining noise was heard and immediately, without any warning, the monitor's glass screen imploded and/or exploded. The force was so violent that glass blasted into the air striking his client in the face, throwing him backwards, knocking him unconscious.

Suffering serious scarring, lacerations and a concussion to the head, Deitch's client is also suffering post-trauma psychological disorders. He stated, ''Our client is an intelligent, quiet young man, who was an active member of the Future Business Leaders of America when he was in high school. His focus in life was computers.

All three defendants in this case, Apple Computer, Hitachi and ''John Doe '' are sited on various counts: Breach of Warranty, violation of the Federal Warranty Act, Strict Liability and Negligence. Rich's, where the plaintiff's parents purchased the computer, is presently not a named defendant to this proceeding due to the recent filing of bankruptcy.

Deitch, who has a 20-year career of representing clients in product liability and other personal injury cases, also provides legal representation concerning controversial women's issues. Bauer, Deitch & Raines, of which Deitch is a founding partner, is an Atlanta-based firm, providing general counsel to a broad range of clients.

#90038b0775 02/07/1990 ~Business Wire

EDEN, NC (FEB. 7) BIZWIRE - Fieldcrest Cannon Inc. (NYSE: FLD) Wednesday announced sales and earnings for the fourth quarter and year 1989.

Net income for the fourth quarter of 1989 was $8.2 million, or 80 cents per share compared to $5.1 million, or 50 cents per share in the like quarter of last year.

Fourth quarter sales were $377 million, an increase of 3 percent from sales of $368 million last year. Sales from bed and bath division products increased 8 percent for the quarter while carpet and rug division sales were off 11 percent.

Bed and bath division operating results improved significantly, compared to the fourth quarter of 1988, because of higher sales, better mill activity, lower manufacturing costs, and an improved product mix.

The carpet and rug division incurred a loss in the fourth quarter about equal to the loss experienced in the last quarter of 1988. Lower carpet sales have affected the division's performance throughout the year.

Net income for 1989 was $23.4 million, or $2.28 per share compared to $11.3 million, or $1.10 per share in 1988. Total sales for 1989 were up 2 percent to $1.4 billion.

Fieldcrest Cannon is one of the largest suppliers to Federated Department Stores Inc. and Allied Department Stores Corp. On Jan. 15, Federated and Allied filed for protection from creditors under Chapter 11 of the Federal Bankruptcy Code. As a result, bad debt reserves were increased in the fourth quarter by $2.5 million pre-tax, to provide for possible losses on accounts receivable from the stores in the Federated and Allied group.

During the fourth quarter, the company sold certain assets not required for on-going operations, which increased pre-tax income by $2.1 million.

Fieldcrest Cannon Inc. manufactures and markets bed and bath products under the Fieldcrest, St. Marys, Royal Family, Monticello and private brand labels. Carpet and rug division products include high quality woven and tufted carpets and rugs marketed under the Karastan, Bigelow, Sanford, Cannon and private brand labels.

Fieldcrest Cannon Inc. common stock is traded on the New York Stock Exchange under the symbol FLD.

TUSTIN, CA. (FEB. 7) BUSINESS WIRE - Trimedyne Inc. (NASDAQ:TMED) announced Wednesday that it received approval from the U.S. Food and Drug Administration (FDA) to market the GYN-Laserprobe laser catheter.

The GYN-Probe offers an alternative to surgery in the treatment of menorrhagia (excessive menstrual bleeding), potentially saving up to $1 billion annually in health care costs.

It is estimated that 200,000 of the approximately 700,000 hysterectomies performed each year in the United States are due to this condition.

The GYN-Probe was developed for Trimedyne by noted gynecologist Royice B. Everett, M.D. of Okalahoma City, Okla. and is used with Trimedyne's Optilase 1000 Nd:YAG laser system.

In commenting on the approval, Howard K. Cooper, president and chief executive officer of Trimedyne said, ''Approval of the GYN-Probe for the treatment of menorrhagia offers women an opportunity to reduce the risk and trauma associated with a surgical hysterectomy, as well as shortening an otherwise long hospital stay, substantially reducing costs and reducing recuperative time.''

Cooper continued, ''This approval is part of our ongoing program to expand the medical applications of our catheters and lasers. The Optilase 1000 YAG laser is now approved for use in eight different fields of medicine,

including gynecology.''

Trimedyne is the leading manufacturer of proprietary lasers and laser catheters for removing blockages from blood vessels as an alternative or adjunct to bypass surgery and balloon angioplasty.

HOUSTON (FEB. 7) BUSINESS WIRE - American General Corp. (NYSE: AGC) Wednesday announced the selection of Nashville as headquarters city for its largest business segment - home service life insurance.

Currently home office operations in this business segment are divided between American General Life and Accident Insurance Co. in Nashville and Gulf Life Insurance Co. in Jacksonville.

This consolidation is scheduled to take 12 to 15 months to complete. It is expected to result in an overall staff reduction of several hundred home office employees, and when completed, to improve annual pretax operating earnings in this business segment by approximately $40 million. Operating earnings in the home service life insurance business segment was $310 million in 1989.

In a related action, American General named James R. Tuerff, 49, currently president and chief executive officer of Gulf Life, to the additional post of president and chief executive officer of American General Life and Accident. Tuerff succeeds Carroll D. Shanks, 62, who was named vice chairman of both companies.

American General is an insurance and financial services organization with assets of $32 billion and shareholders' equity of $4.1 billion. Headquartered in Houston, the company has subsidiaries that operate in all 50 states and Canada.

The company groups its operating subsidiaries into three business segments: Insurance-Home Service; Insurance-Special Markets; and Finance/Real Estate. American General common stock is listed on the New York, Pacific, London, and Swiss Stock Exchanges.

YONKERS, NY (FEB. 7) BUSINESS WIRE - Codenoll Technology Corp. and LANEX Corp. of Beltsville, Md., Wednesday announced that they have entered into a strategic alliance to develop additional technology and products for Fiber Distributed Data Interface (FDDI) computer networks.

Under the terms of the agreement, LANEX is providing certain LAN technology products it has developed, and in conjunction with Codenoll's FDDI products, new FDDI technologies will be developed.

Codenoll Technology Corp., founded in 1980, is a leader in fiber optic networking with thousands of Ethernet installations worldwide under the CodeNet trademark. The company last year introduced a broad range of 100 Mops FDDI products to network personal computers, including a unique low cost line and an FDDI concentrator that greatly reduces the cost per network connection.

LANEX Corp. produces and markets a sophisticated line of LAN component products under the LANEXPRESS banner. LANEX products include local, remote, and backbone bridges as well as Ethernet over broadband products. LANEX has been providing LAN products to government and industry for over 10 years.

LONDON (FEB. 7) BUSINESS WIRE - Barclays de Zoete Wedd Ltd., on behalf of ADT, announces that at 3:00 p.m. (London time), on Tuesday, Feb. 6, 1990, the first closing date of the offer, acceptances, valid in all respects, had been received in respect of 33,498,712 ordinary shares of 10p each in Britannia ("Britannia Shares"), ("approximately 42.7 percent of Britannia's issued ordinary share capital).

At Jan. 9, 1990 (the day ADT's offer for Britannia was announced) ADT and its subsidiaries owned 535,000 Britannia shares (approximately 0.7 percent of Britannia's issued ordinary share capital.)

Since the announcement of the offer, ADT and its subsidiaries have purchased 7,310,261 Britannia shares (approximately 9.3 percent of

Britannia's issued ordinary share capital). The total number of Britannia shares held by ADT and its subsidiaries amounts to 7,845,261 (approximately ten percent of Britannia's issued ordinary share capital).

ADT has received irrevocable undertakings to accept the offer from directors of Britannia (and a company connected with the chairman of Britannia) in respect of an aggregate of 2,003,577 Britannia shares (approximately 2.6 percent of Britannia issued ordinary share capital), all of which have been validly assented to the offer and are included in the total of valid acceptances shown above.

ADT therefore owns or has received valid acceptances in respect of a total of 41,343,973 Britannia shares (approximately 52.7 percent of Britannia's issued ordinary share capital). Accordingly the offer has been declared unconditional as to acceptances.

Upon allotment and the publication, expected on Thursday, Feb. 8, 1990 of the Rule 520 notice in relation to the ADT common shares to be issued pursuant to the offer, all other conditions will have been satisfied or waived and the offer will therefore be unconditional in all respects. It remains open for acceptance until further notice and 14 days notice will be given before the offer is closed.

PINE BROOK, NJ (FEB. 7) BUSINESS WIRE - Pure Tech International, Inc. (NASDAQ Symbols: PURT, PURTU, PURTW) Wednesday announced that all of the Company's Board of Directors were re-elected at the Annual Meeting of Shareholders held on Tuesday, February 6, 1990.

The Directors who were re-elected are Yitz Grossman, Werner Haase, Peter Cohen and Stanley Levy. The Board will serve until the next Annual Meeting of Shareholders in 1991 and until the successors have been duly elected and qualified.

An opposing slate of Directors, nominated by former Chairman of the Board Frank Tammera, Sr., was defeated.

David Katz, President and Chief Executive Officer of Pure Tech International, said, ''We are extremely pleased with the re-election of all of PURE TECH's Board of Directors, which will enable us to continue to pursue our corporate goals.''

Katz added, ''As we enter the 1990's, plastics recycling continues to be an important issue and we expect that the industry will continue to grow. We are confident that we are positioning the Company to take advantage of this growth.'

Pure Tech International Inc. is engaged in the development of recycling technologies for post-consumer plastic bottles.

#90038b0816 02/07/1990 ~Business Wire

VANCOUVER, BRITISH COLUMBIA (FEB. 7) BUSINESS WIRE - Cimtek Integrated Manufacturing Technologies Inc. and Video Lease a London, Ontario based company, have entered into an agreement whereby Cimtek will acquire all of the business, operating assets and real estate of Video Lease.

In operation for eight years, Video Lease is the owner and operator of three 24-hour video rental superstores in London, Ontario. Video Lease also operates 15 display rack-video rental outlets at variety stores in Lodnon, Ontario and has established a Video Lease franchise operation which currently has one franchise operating in St. Thomas, Ontario.

The video rental industry in Canada is currently estimated to be in the order of $1 billion annually, having doubled over the four years since 1985. Video Lease's three stores currently generate a before depreciation and tax profit of approximately $450,000 and are estimated to have 30-40 percent of the London, Ontario market.

Net assets of Video Lease as of Dec. 31, 1989 are estimated at $2.9 million, principally composed of video movies. As part of the acquisition the company will acquire the land and buildings of Video Lease's site on Horton Street in London. The land and buildings appraised recently at $1.1 million has an equity value of approximately $570,000. From its London based, Video Lease proposes to expand its own operations in addition to actively franchising its superstore concept throughout Canada and the north eastern U.S.A. No change in Video Lease's management is expected as a consequence of this acquisition.

As consideration, the company has agreed to issue 800,000 common shares (performance shares.) The performance shares will be subject to an earnout formula whereby the principals of Video Lease will earn a release of escrow of one share for each $1.80 in cash flow generated by Video

Lease. Performance shares not released within 10 years will be cancelled. This agreement is subject to the approval by the company's directors and applicable regulatory authorities.

In operation for eight years, Video Lease is the owner and operator of three 24-hour video rental superstores in London, Ontario. Video Lease also operates 15 display rack-video rental outlets at variety stores in London, Ontario and has established a Video Lease Franchise operation which currently has one franchise operating in St. Thomas, Ontario.

The company advises that it is now actively involved in negotiations to acquire other video superstore locations in Canada as a strategy to expand its superstore network rapidly with proved locations.

#90038b0819 02/07/1990 ~Business Wire

VANCOUVER, BRITISH COLUMBIA (FEB. 7) BUSINESS WIRE - Cimtek Automation announced a record monthly sales value of $459,000 for period January 1 -- January 24, 1990.

According to James Egan, Cimtek's president, the total is expected to exceed $500,000 by month's end.

''This sales level is a significant breakthrough for Cimtek,'' said Egan, ''not only in terms of revenues, but because it demonstrates that we are achieving our goal of broadening our client base.''

Egan pointed out that although business with Ford Motor Company remains strong, almost 50 percent of January's billings have come from other clients such as Bridge Technologies and Murate/Erie.

Cimtek Automation is one of five companies in the final bidding for a contract valued at $1 million (U.S.), with Ingersoll-Rand Power Tools Division (USA).

Cimtek Automation has also announced that it has been extended a $540,000 general operating line of credit from Canadian Imperial Bank of Commerce (CIBC), Toronto, Ontario Canada.

Cimtek Automation is a wholly owned subsidiary of Cimtek Integrated Manufacturing Technologies Inc. It is engaged in the development, production and integration of computer software and systems technology

application. Cimtek Automation offers business a single vendor ''system solution'' in a contract package which typically includes approriate systems hardware, software programming and skilled trades services.

Dated this 30th day of January 1990

On behalf of the board of directors Cimtek Integrated Manufacturing Technologies Inc.

CLEARWATER, FL (FEB. 7) BUSINESS WIRE - Robert S. Wiggins, chairman and chief executive officer of Technology Research Corp. (TRC), (NASDAQ: TRCI) Wednesday announced operating results for the third fiscal quarter ended Dec. 31, 1989.

He stated that revenues for the current quarter were $1,758,467, an increase of 3.6 percent as compared to $1,696,982 for the like quarter last year and a net loss of $68,935 was incurred compared to a net loss of $83,694 for the like period last year.

Revenue for the current nine month period was $5,731,708 vs. $6,022,327 in the like period last year and net income was $14,295 as compared to $54,146 in the comparable period.

Wiggins further stated that performance in the quarter and nine month period continued to be affected by the delay in shipment of military products produced by the Company for a Department of Defense contractor. In early November 1989, this contractor sought protection under Federal bankruptcy law.

The Company has received purchase orders for future shipment from other military contractors covering the remaining product produced for the bankrupt contractor.

The Company has entered into a joint marketing agreement with Windmere Corp., its current licensee, to market certain products to original equipment manufacturers within the European Economic Community.

In addition, the Company has successfully completed a public stock offering of an aggregate of 2,626,600 shares of common stock and received

aggregate proceeds of approximately $1,750,000 before expenses associated with the offering, which will be used primarily to reduce short term bank debt, accounts payable and for other working capital purposes.

In February 1988, W.H.S. Sales Inc. filed a complaint against the Company asserting a violation of an exclusive marketing agreement. The Company denied the allegations and asserted a counter claim against W.H.S. for breach of a purchase aagreement.

In January, the Company and W.H.S. Sales Inc. orally agreed in principle to settle the litigation through a mutual release of all claims and counter claims.

Technology Research Corp., a Florida based corporation, is engaged in the design, development, manufacture, and marketing of electronic control and measurement devices related to the distribution of electrical power.

HOUSTON (FEB. 7) BUSINESS WIRE - The Department of Transportation Wednesday announced consumer complaint rates for major airlines, showing that in December Continental Airlines had its lowest rate in at least seven years.

Continental's low rate of 1.62 complaints per 100,000 passengers is an indication that the carrier's efforts to improve customer service are continuing to take hold.

Continental's December complaint rate is 96.5 percent less than the rate the carrier encountered in mid-1987 when it faced difficulty in merging several airlines, and it is one-half the rate of December 1988.

''Any perception that Continental remains an airline with poor service is certainly behind the times,'' a spokesman said. ''The reality of Continental today is that on average there are only one and a half complaints per day, even though we're operating more than 1300 flights per day and serving nearly 100,000 customers per day.

''It is also noteworthy that we make a strenuous effort to resolve complaints in the consumer's favor on those infrequent occasions when they do arise.''

Continental said that the keys to achieving customer satisfaction are to continue to develop its workforce and to improve the reliability of its

operations. Thus far, 65 percent of Continental employees have attended the two-day ''Success through People'' workshop the company offers in conjunction with SAS, the Scandinavian airline.

Additionally, Continental reported that it is exceeding its company goals for three major performance criteria, which are the percentage of scheduled flight mileage completed, on-time departures and on-time arrivals. In the last two years, the airline has improved its on-time departure rate by as much as 27 percent.

#90038b0837 02/07/1990 ~Business Wire

ROCHESTER, NY (FEB. 7) BUSINESS WIRE - Eastman Kodak Company has announced an innovative program to recycle its popular single use cameras including the Fling 35, Stretch 35, and Weekend 35.

The company will remanufacture some of the camera components as part of this environmental action program. When combined with fresh film these units will meet all of Kodak's specifications for new cameras.

The program is forecast to reduce solid waste and is expected to provide long term resource conservation.

The program will begin in the U.S. in 1990 and will be extended to Europe and other areas of the world in 1991.

Peter M. Palermo, Kodak vice president and general manager of the Consumer Imaging, Division announced the new program: "We are committed to finding acceptable ways to reduce the amount of waste either incinerated or going into landfills. This program, coupled with our plan to recycle 35mm plastic film canisters, brings that goal much closer. In addition, this program demonstrates sound business sense because it will be beneficial for both photofinishers and Kodak to have single use camera units returned.

''The Kodak pilot program to recycle 35mm film plastic canisters was announced in November 1989. The new program involving our single use cameras is a logical extension of the pilot program,'' Palermo concluded.

Further details regarding the singe use camera reuse plan will be issued directly to photofinishers.

#90038b0860 02/07/1990 ~Business Wire
CLEVELAND, OH (FEB. 7) BUSINESS WIRE - Leaseway Transportation Corp. today reported further on the status of its restructuring efforts.

As announced on January 31, 1990, the Company has successfully concluded an amendment to its $257 million senior debt facility. Under the terms of the amendment, the revolving credit facility portion of the senior credit facility was extended until June 29, 1990, the bank group waived through June 29, 1990 compliance with certain financial covenants and the Company agreed to make monthly principal and interest payments on both the term loan and the extended revolving credit loan. The Company made the required $6.3 million principal and interest payment to the banks on January 31, 1990. The Company hopes to replace its senior bank facility or negotiate a longer term solution with its current banks before the waivers and extension expire on June 29, 1990.

Also, as previously announced, the Company did not make the February 1st interest payment on its 13.25 percent Subordinated Debentures. Leaseway has through March 2, 1990 to cure the non-payment on the February 1st interest payment, but hopes to reach a longer term solution with Debentureholders before that time.

During the past 18 months, the Company has taken a number of significant actions to improve cash flow, including (i) divesting certain non-core assets, including its Bulk Materials Group and Distribution Center Services division; (ii) minimizing capital expenditures in response to reduced demand for the Company's services due to economic conditions; and (iii) reducing general and administrative expenses. The Company has also sought to divest certain of the Company's other businesses, but those offers received were at prices which the Company believed were significantly below the values of the operations. Given the current economic climate, especially the climate affecting the Company's significant customers in the automotive industry, the Company is not actively seeking to sell the Company or any of its core businesses at this time.

The Company has also explored entering into business arrangements with certain leasing companies in order to, among other things, obtain credit support for the Company's senior lenders. Several of the leasing companies contacted said they were not interested at this time, and discussions with another, which were preliminary in nature, have recently reached an impasse.

The Company has also explored obtaining financial support from several of its significant customers in the form of equipment value guarantees,

direct financing of portions of the Company's fleet and purchases by the customer of dedicated revenue equipment. These discussions are preliminary, and there can be no assurance that the discussions will result in any agreements.

Leaseway Transportation is a group of companies providing high-quality, cost-effective transportation and physical distribution services to manufacturers, distributors and retailers.

#90038b0869 02/07/1990 ~Business Wire

CLEVELAND (FEB. 7) BUSINESS WIRE - Oglebay Norton's net income for 1989 amounted to $5,007,000, or $1.94 per share, on sales and revenues of $172,088,000 compared to net income before accounting changes of $4,939,000, or $1.81 per share, on sales and revenues of $188,587,000 for 1988.

The effect of the accounting changes of $8,573,000, or $3.14 per share in 1988 was the cumulative effect of the changes in accounting for income taxes resulting from adopting FASB No. 96, ''Accounting for Income Tax,'' on Jan. 1, 1988.

Fourth quarter 1989 net income amounted to $2,090,000, or 81 cents per share, on sales and revenues of $45,879,000 compared to net income of

$3,332,000, or $1.32 per share on sales and revenues of $49,526,000 for the like period in 1988. The comparative unaudited results for the fourth quarter and the year ended Dec. 31, 1989 and 1988, are set forth on the attachment hereto.

Vessel transportation services and iron ore earnings were adversely affected in the fourth quarter by severe weather conditions, resulting in disappointing profits. Our vessel fleet experienced significant delays, reducing what is normally our best operating quarter to only a slight profit. These delays due to high winds and frigid temperatures were double historical levels during November and December.

Although iron ore production remained at near-capacity levels in the fourth quarter, cold weather caused increases in energy and production costs at Eveleth Mines. These cost increases, combined with undelivered tonnages, reduced the profitability of iron ore operations. Iron ore pellet sales in 1988 included spot sales from the purchase of certain tons on the open market.

The company's coal and industrial minerals segment performed well at near-1988 levels, while sales of the manufacturing segment decreased as demand for certain of its products declined. Increases in interest and dividend income offset increases in administrative, selling and interest expenses. Included in 1988 was a one-time cost of $2,022,000, or 59 cents per share, which resulted from converting the company's 13 percent Title XI Sinking Fund Bonds to 9.65 percent Sinking Fund Bonds. The company's effective income tax rate declined to an effective 25 percent due to certain refunds received in 1989.

Demand for vessel services in the first half of 1990 appears to match the favorable levels experienced in 1989 and, barring an economic downturn, we anticipate improvement in our industrial minerals and manufacturing segments.

#90038b0875 02/07/1990 ~Business Wire

STAMFORD, CT. (FEB. 7) BUSINESS WIRE - Re Capital Corp., (the ''company'') reported results for 1989. Net income for the year ended Dec. 31, 1989, amounted to $8,073,000 compared with $6,140,000 for the year ended Dec. 31, 1988, or an increase of 31.5 percent.

Primary and fully diluted earnings per share are $1.18 and $1.14 respectively for the year ended Dec. 31, 1989. For the year ended Dec. 31 1988, primary and fully diluted earnings per share were 85 cents.

The 1989 statutory combined underwriting and expense ratio was 99.3 percent compared with 98.4 percent for 1988. The fourth quarter 1989 combined ratio was 100.4 percent compared with 99.6 percent in the fourth quarter of 1988.

Net income for the quarter ended Dec. 31, 1989, was $2,121,000 compared with $1,941,000 for the fourth quarter of 1988. Primary and fully diluted net income per share is 31 cents for the quarter ended Dec. 31, 1989 compared with 28 cents and for the fourth quarter of 1988.

Earnings per share in the quarter ended Dec. 31, 1989, were reduced by 10 cents as a result of providing additional reserves for the California earthquake and the Phillips Petroleum plant explosion.

These catastrophes, when combined with third quarter reserve increases for Hurricane Hugo, reduced earnings for the year ended Dec. 31, 1989, by 17 cents per share.

Net premium writings for the 1989 fourth quarter and full year were $27,425,000 and $92,263,000 compared to $21,347,000 and $84,167,000 for the same periods of 1988 which represent increases of 28 percent and 10 percent, respectively.

In Dec. 1989, the company amended certain reinsurance contracts with one of its customers, retroactive to Jan. 1, 1989, which resulted in recording approximately $4.4 million of written and earned premiums applicable to the nine months ended Sept. 30, 1989 in the fourth quarter. Excluding the

effects of these transactions, the increase in written premiums in the fourth quarter of 1989 over amounts written in the fourth quarter of 1988 would have been 8 percent.

The company's net investment income increased from $2,092,000 in the fourth quarter of 1988 to $3,147,000 in the fourth quarter of 1989. Net investment income for the year ending Dec. 31, 1989 was $10,214,000, compared with $7,623,000 for the same period of 1988.

Net investment income included pre-tax capital gains of $315,000 and $117,000 for the quarter and year ended Dec. 31, 1989 respectively compared with pre-tax capital losses of $1,000 and $146,000 for the same periods of 1988. Average invested assets increased significantly during each period from cash flow from operations.

Total assets at Dec. 31, 1989, are $230,772,000, an increase of $47,855,000, or 26 percent from $182,917,000 at Dec. 31, 1988. Reserves for claims and claim expenses at Dec. 31, 1989 amounted to $101,958,000.

The reserves for claims and claim expenses established by management were reviewed by an independednt acturarial consulting firm. Statutory surplus at Dec. 31, 1989 was $75,332,000.

Shareholders' equity at Dec. 31, 1989 amounted to $91,430,000, or $14.08 a share. As of Dec. 31, 1989, a total of 1,158,425 shares of the company's common stock was repurchased at an average price of $10 under the company's previously announced stock repurchase programs.

LITTLE ROCK, AR (FEB. 7) BUSINESS WIRE - Ron Strother, chairman and chief executive officer of First Commercial Mortgage Co., a subsidiary of First Commercial Bank, N.A., (NASDAQ/NMS:FCLR), announced Wednesday that FCMC has reached a definitive agreement for acquisition of $54 million of mortgage loan servicing rights from First Savings of Arkansas, successor to First Federal Savings and Loan Association.

Transfer is expected to be completed within the next few days, with final settlement of the transaction expected to be completed by Feb. 15. The total consideration involved in the transaction was not disclosed.

The transaction involved the transfer of mortgage servicing rights on some 2,000 Federal National Mortgage Association loans. This addition brings FCMC's total mortgage servicing portfolio to over $1.3 billion, and

extends FCMC's lead as the largest Arkansas based mortgage banking company.

In five of the last six years, FCMC together with First Commercial Bank, N.A., has also originated more in mortgage loan volume than any other Pulaski County mortgage lender.

Much of this volume has consisted of residential loans which, combined with acquisition of servicing volume originated by other organizations, have fueled a very meaningful increase in FCMC's servicing portfolio and income during the past several years.

Strother stated, ''First Commercial Mortgage Co. continues to be actively in the market for acquisition of good quality residential mortgage loan servicing to complement our self-originated volume.''

GROUP LED BY BRIAN D FITZGERALD OWNS 2,500,000 SHARES (24.80%) OF SECURITY CAPITAL CORP OF NEW YORK, NY.

ANNOUNCEMENT:

512,500 shares of preferred stock purchased by Fitzgerald is convertible into 2,050,000 common shares upon the filing of an amendment to the articles of incorporation changing the par value of the common stock from $1 to $.01 per share.

Fitzgerald anticipates the acquisition of 450,000 additional shares for $172,026 once the recapitalization plan for SPC has been approved by its shareholders in March or April of 1990.

If Security acquires common stock of Benjamin Franklin Savings Association, Fitzgerald will be able to acquire an additional 1,985,000 shares as per the stock purchase agreement, which would then give Fitzgerald 44.5 percent of Security's common.

FGS Inc. has been added as a filer, and Gebauer and Sokol have withdrawn from the filing group.

LATEST TRANSACTION:

On Jan. 26, 1990 Fitzgerald purchased 512,500 shares (convertible into 2,050,000 common shares) of preferred stock for $783,677.

#90038c0047 02/07/1990 ~Comtex
WASHINGTON (FEB. 7) COMTEX - A Senate panel heard testimony today on the merits of two bills designed to protect consumers from paying excessive costs for long-distance telephone calls placed outside the home.

The Federal Communications Commission has received over 4,000 complaints regarding the actions of Alternate Operator Services (AOS). Most of these complaints concern high long distance charges and consumers not being able to reach the long distance carrier of choice.

AOS companies provide long distance service from call "aggregators", such as hotels, pay telephones, hospitals, airports, rest stops and other public pay phone locations. When a long distance call is placed from these phones, often unknown to the consumer, the call is handled by an AOS provider assigned to that phone -- which most likely is not the long distance carrier of the consumer's choice.

As a result, when the customer receives his monthly bill, he may discover the cost of his call can be up to two to three times the rate charged by his monthly carrier.

Senator John Breaux (D-LA) and Sen. Alan Dixon (D-IL) are sponsoring similar bills to adopt rules and tariffs covering AOS providers designed to

accomplish the objective of fully informing the general public about competitive operator services and permitting a caller a choice in carriers, while also leaving the FCC with the flexibility necessary to address issues that are complex and ever changing.

However, Dixon's bill adds language of the definition of an aggregator and tougher language with respect to "call splashing" and "call blocking" problems. Call splashing occurs when an operator service provider does not have the capacity to complete a call. The call is transferred at some point to another long distance provider. The result is the customer receives two bills for the one call -- one from the carrier the call was placed with, and a second from the carrier who completed the call. Call blocking occurs when consumers attempt to dial special codes to reach their own long distance carrier and are denied access.

"The legislation I have proposed creates a disincentive for the owners of the telephones to continue their blocking policies," Dixon testified before the Subcommitte on Communicatons of the Senate Committee on Commerce, Science and Transportation.

"The aggregators who continue blocking will not be allowed to receive commissions from their preselected provider," Dixon added. In addition, the AOS providers who knowingly service these aggregators will not be allowed to charge a 'captive' consumer a rate in excess of the lowest tariff available from any other long distance providers for the same call."

Jeffrey Hanft, Chairman of The American Public Communications Council, was generally supportive of the Breaux bill. The APCC is a committee of the North American Telecommunications Association which represents some 100 competitive providers of pay telephone equipment and services.

Hanft proposed amendments be added to the bill requiring the FCC to require reasonable compensation for competitive payphone providers who make equipment available for public use and route revenue producing traffic to carriers. In addition, he said the responsibility for taking measures to prevent fraud protection in connection with access code calls should be clarified.

Several providers said the away from home access problem would be solved by the introduction of 800 number access by AT&T. However, Gerald Hines, Director of AT&T's Card and Operators Services business, disagreed.

"Development of AT&T 800 number access at this time would be extraordinarily expensive, costing an estimated $50 million in operator interface development and up to $250 million in annual operational expenses," Hines said. "It would also provide inferior service to consumers since AT&T's operator systems are designed in such a way that all such calls would have to be handled on a manual basis. The problem is

blocking, not AT&T's response to it."

PARIS (FEB. 7) - France's M2 money supply fell 0.5 percent in December over the previous month's level after falling 0.2 percent in November, according to provisional figures published by the Bank of France Wednesday.

For the whole of 1989, the M2 money supply - banknotes, term deposits and savings - rose 4.3 percent, well within the target level of a four to six per cent rise. M2 had risen four percent in 1988.

The Bank of France also said Wednesday that bank lending rose 1.6 percent in November over the previous month's level, against a 0.9 percent rise in October.

#90038d0570 02/07/1990 ~French/German News Agency

LONDON (FEB. 7) - The platinum market should be firmer in 1990, as a small surplus of total supplies over industrial demand is expected to be absorbed by higher investment demand, analysts at Shearson Lehman Hutton predicted Wednesday.

In their "Annual Review of the World Platinum Industry 1990", they forecast that platinum prices would average 535 dollars per ounce this year, against 509.88 dollars in 1989.

The Western world surplus of supplies over industrial demand is forecast at 160,000 ounces this year, against 199,000 ounces in 1989. It should be easily absorbed by investment demand, mainly from Japan, which is forecast to exceed its 1989 level of 250,000 ounces.

Investment demand in 1989 was 63 percent down from 1988 (675,000 ounces) as a result of lower demand from Japan, Shearson said.

Total supplies are forecast to rise by seven per cent to 3.6 million ounces in 1990, from 3.35 million ounces last year. In 1989, an increase in mine production resulted mainly from expansion in South Africa.

Industrial fabrication demand will rise by nearly nine per cent to 3.4 million ounces from 3.1 million in 1989. The rapid expansion in offtake for emission control catalysts seen in 1989 is expected to continue this year.

Jewellery demand, mainly from Japan, is also expected to remain strong, although it is expected to be overtaken by emission control catalysts as the major end-user of platinum.

Brussels (FEB. 7) - The European Community (E.C.) and Argentina have negotiated a comprehensive economic cooperation accord which for the first time contains a clause setting democracy as a condition, Brussels said Wednesday.

A spokesman for the E.C. Commission said the accord, set to last for five years, was made conditional on Argentina's commitment to democracy and the observation of human rights.

It is the first time that the E.C. has negotiated an agreement with such a clause, the spokesman noted.

But future associate member status accords with East European countries are also to contain clauses setting political and economic reforms as conditions, he said.

The agreement means a formal end to differences between the E.C. and Buenos Aires concerning the British-Argentinian dispute over the Falkland Islands and resumes contractual relations which were broken over in 1980.

The E.C. only went ahead with the negotiations with Buenos Aires after the formal declaration by Britain and Argentina in Madrid last October to end their hostilities, the spokesman said.

The agreement will probably be signed in June. It calls for both sides to provide most-favoured nation status, and foresees industrial, research and technological cooperation.

BONN (FEB. 7) - West German agricultural exports to Eastern European countries more than doubled last year over the 1988 level to 1.69 billion Deutsche marks (994 million dollars), the agriculture ministry said Wednesday.

Grain exports totalled 672 million Deutsche marks, followed by meat at 272 million DM and milk products and sugar.

The main eastern bloc importers of West German agricultural products are Poland and the Soviet Union, which buy mainly grains.

West Germany also imports meat, fruit and vegetables from Eastern Europe, mainly Poland.

#90038d1030 02/07/1990 ~French/German News Agency
AMSTERDAM (FEB. 7) - Chase Manhattan Bank, the second largest bank in the United States, on Wednesday opened a 100 per cent owned Dutch subsidiary, Chase Bank NV.

The new subsidiary, which replaces Chase Manhattan's representative office in Amsterdam, will act as an intermediary for the U.S. bank in the business and industrial sectors in light of the unified European market of 1992, senior Chase Manhattan official Willard C. Butcher said.

Chase Manhattan had retained only one representative office in the Netherlands after selling its stake in Dutch bank Nederlandse Crediet Bank to Credit Lyonnais Bank Nederland in December 1987.

#90038d1080 02/07/1990 ~French/German News Agency
BEIJING (FEB. 7) - After struggling for years to find decent accomodation foreign companies in Beijing are entering the 1990s in the midst of a real-estate glut.

But the oversupply of office space and housing for expatriate staff is not expected to make it cheaper to set up shop in the Chinese capital, industry sources say.

Rather, it is a case of quality catching up with traditionally steep rents.

Market analysts have been expecting a glut since 1984, when state-owned Chinese enterprises struck out on their own, or teamed up with eager foreign investors, to stake their claims in a real-estate gold rush.

"The glut was going to happen even before June 4," the date last year when China snuffed out democracy protests in Tiananmen Square, an industry source said.

No official figures are available, but one source said supply for office space, based on square-meter demand, could outstrip demand by as much as 100 per cent by mid-1991 as the Chinese economy slumps.

By then, the 1,000-odd foreign companies that have offices in Beijing will need only 160,000 square meters (1.7 million square feet) of office space, the source said.

The 100 per cent oversupply forecast presumes that all projects due to open by mid-1991 shall in fact be finished, as a slowdown in construction work

has been seen at many sites.

The glut also extends to the hotel industry, which has been hard-hit by a plunge in tourist revenues after the June 4 massacre.

Last year there were 14,605 rooms at 19 deluxe-class hotels in Beijing. The figure is set to jump to 19,952 rooms at 33 hotels this year, and 24,369 rooms at 42 hotels in 1991, according to published figures.

The situation is a far cry from the early 1980s when, wooed by senior leader Deng Xiaoping's open policy, foreign companies rushed into China - only to find they had to settle for hotel rooms as office space.

Problems eased in the mid-1980s when the first purpose-built office towers - such as the CITIC building, Noble Tower and the commercial annex to the Lido Holiday Inn Hotel - were opened.

#90038d1170 02/07/1990 ~French/German News Agency

ESCHBORN, West Germany (FEB. 7) - West German natural gas imports rose 10 per cent in 1989 over the previous year's level to 48.28 billion cubic metres, the federal economy office said Wednesday.

The cost of the imports from the Soviet Union, the Netherlands, Norway and Denmark increased 3.5 percent to 5.53 billion Deutsche marks (3.29 billion dollars).

The average price per 1,000 cubic metres fell in 1989 bu 6.2 percent to 114.51 Deutsche marks.

#90038d1320 02/07/1990 ~French/German News Agency

ANKARA (FEB. 7) - Turkey on Wednesday welcomed the European Economic Community's (EEC) decision to leave the door open for eventual Turkish admission to the group.

The EEC foreign ministers had "adopted the essential elements concerning Turkey's admission to the EEC," foreign ministry spokesman Murat Sungar said in Ankara's first reaction to the decision.

The ministers' decision Monday to postpone consideration of Turkey's admission until after 1992 but to increase cooperation with Turkey showed that the EEC "judged Turkey worthy to enter" the grouping, Mr. Sungar added.

The ministers had asked the European Commission, the EEC executive, to draw

up proposals on customs union, financial cooperation, and increased industrial, technical and cultural cooperation.

"Relations between the two sides will obviously develop thanks to the implementation of these proposals," Mr. Sungar said, calling for detailed suggestions to be put forward as soon as possible.

But he said Ankara still wanted to be given before 1993 a date to open talks on admission to the EEC and a timetable for the negotiations.

#90038d1500 02/07/1990 ~French/German News Agency

Lagos (FEB. 7) - Nigeria's economic fortunes brightened by the close of last year when it recorded a balance of payments surplus of 1.286 billion dollars.

The country's foreign exchange earnings in 1989, according to Central Bank statistics published Wednesday, totalled 6.395 billion dollars, while it paid out only 5.109 billion dollars, thus recording a surplus of 1.286 billion dollars.

However the cheer in the performance was muted by the fact that the 6.395 billion dollars which the country earned during the period fell short of the government's budgetary projections for 1989 by about 284 million dollars.

This was in spite of the various measures such as the 245 million dollars export stimulation loan which the government introduced during the year to boost the nation's foreign exchange earnings.

A breakdown of the foreign receipts showed that oil contributed the bulk, 4.919 billion dollars.

This was 700 million dollars higher than the budget projection of 4.219 billion dollars earnings from oil for the year.

#90038d1810 02/07/1990 ~French/German News Agency

BEIJING (FEB. 7) - China exported a record 203,000 tons of tea in 1989, reasserting its status as one of the world's top three tea exporters, a newspaper reported Wednesday.

Exports last year were 5,000 tons up on 1988 and earned 400 million dollars, Shi Yunqing, general manager of the China Tea Import-Export Corporation, was quotd as saying by the China Daily.

More than 80 countries bought Chinese tea, including the United States where China grabbed the biggest share of the tea market, he said.

China has been the world's third-largest tea exporter for years, after India and Sri Lanka.

Half of China's 1989 exports were black tea, 40 percent were green tea, and 10 percent other varieties, said Wang Yufeng, an economist with the state-owned tea corporation.

Two-thirds of the oolong tea bought by Japan came from China, he added. Oolong is a dark tea grown in southeastern China.

#90038d1820 02/07/1990 ~French/German News Agency

Hamburg (FEB. 7) - West German imports from the Near and Middle East were up by 33.5 percent in the first nine months of 1989 compared to same period the previous year, the Near and Middle East Association announced here Wednesday.

Initial figures from the trade organisation showed that West Germany's import volume from the Arab nations had risen by 59.9 percent to 3.01 billion marks (or 1.82 billion dollars) compared to 1.95 billion marks for the first three quarters of 1988.

West German exports to the Arab states went up 25.1 percent to 8.18 billion marks from 6.54 billion marks.

Imports to West Germany from the whole Middle East region rose to 7.96 billion marks (from 5.96 billion marks). Turkey accounted for the largest share of 3.4 billion marks (from 2.65 billion marks).

Total West German imports to the Near and Middle East region rose by 9.4 per cent to 14.25 billion marks (from 13.03 billion marks).

Imports from Iraq to West Germany slumped by 58.1 percent to 134 million marks (from 320 million marks) as a result of the poor economic state in the country in the aftermath of the Gulf War.

#90038d2080 02/07/1990 ~French/German News Agency

THE HAGUE (FEB. 7) - The Netherlands is to strengthen its rules on mergers and takeovers in a bid to control corporate raiders, a commission of specialists in such matters said here Wednesday.

The new rules will include tender offers, which were not provided for under

the existing Dutch regulations introduced in 1975.

A tender offer differs from a takeover offer in that the prospective buyer does not make public the offer price, leaving shareholders to bargain individually to sell their stock.

The new rules, which the country's Economic and Social Council is expected to adopt on February 16, will limit tender offers to acquiring a maximum of 30 per cent of a company, including any existing holding before the offer was made.

In the case of takeovers, the merger code requires buyers to buy all available shares in the target company available on the market, offering the same price to all shareholders.

The stricter rules should make the Amsterdam bourse more attractive to investors, as share prices are good value compared to those in London, Tokyo or Frankfurt because of low turnover.

The new rules were drawn up by the specialist commission of the Economic and Social Council, which controls mergers and takeovers on the Amsterdam bourse. Its only sanction is to make public the names of offenders.

PRAGUE (FEB. 7) - Czechoslovak authorities said Wednesday that a Soviet Army captain had been murdered in the north of the country and asked the public to come forward with information that might help investigators solve the crime.

Capt. Vladimir Batichev, 29, who was stationed in Ceska Lipa, 70 kilometres (45 miles) north of here, was found dead in a nearby wood on December 21, according to the official news agency CTK.

Soviet military investigators have failed to turn up any clues and the motive remains unknown, police said.

It is the first time since Soviet troops invaded the country in 1968 that Czechoslovak authorities have publicly announced such a crime.

PARIS (FEB. 7) - French automobile group Peugeot said Wednesday it increased its consolidated sales last year by 10.5 per cent to 152.95 billion francs (27 billion dollars).

Group sales in its automobile division of 146.453 billion francs represented an increase of 10.9 per cent compared with 1988.

But those of the Peugeot mark itself were "limited" to a 7.8 per cent increase at 88.516 billion francs in 1989, due to a lengthy strike at two of its plants in eastern France toward the end of last year, the company said in a statement.

Citroen sales were up 15.9 per cent at 57.88 billion francs.

Overall, export sales were fractionally up, reaching 54.2 per cent of the total compared with 54 per cent in 1988.

Group export sales reached 62.51 billion francs, up 12.6 per cent on the 55.53 billion figure for 1988, which made Peugeot the leading French exporter, the company said.

FRANKFURT (FEB. 7) - The West German central Bundesbank injected 18.4 billion Deutsche marks into the banking system on Wednesday by means of a 28-day repurchase arrangement at rates ranging from 7.70 percent to 7.95 per cent, a bank spokesman said.

An earlier repurchase arrangement totalling 17 billion marks, at rates ranging between 7.7 percent and 8.1 percent, expired on Wednesday.

The volume and rates of the replacement arrangement were in line with market expectations.

On Tuesday the banks made requests to the Bundesbank for finance totalling 42.4 billion marks. A quarter of this sum was accepted at the lowest rate of 7.70 percent.

Last week the bank injected liquidity at rates ranging from 7.7 percent to 8.2 percent by means of two repurchase arrangements.

LONDON (FEB. 7) - Britain braced for more hurricane-force gales Wednesday following winds of more than 100 kilometres (60 miles) per hour which battered the south and west coasts overnight.

Torrential rain and another more violent storm forecast for Wednesday evening sparked fears of extensive damage in areas already hit by last month's storms. Police called a red alert after flooding in South Wales, where rail lines were closed.

A London Weather Centre spokesman said: "There is going to be a lot of damage to trees and buildings which were damaged in the earlier storm and have not been repaired yet."

Cross-channel hovercraft services also stopped, although ferries were sailing.

A storm swept across western Europe on January 26, whipping up winds of 180 kilometres (112 miles) an hour and leaving at least 93 people dead, 45 of them in Britain.

The Weather Centre spokesman said the storm to come was "likely to be of comparable strength to the last bad storm we had. With it is going to be some heavy rain mixed in which will keep the flooding going for several days".

Last weekend another storm killed 29 people in France and West Germany.

KAMPALA (FEB. 7) - Pilots of the state-owned Uganda Airlines Corporation went on strike Tuesday demanding a pay increase of nearly 600 percent, the airline's managing director Chris Mboijana said Wednesday.

The pilots, the highest paid of whom earn 300 U.S. dollars a month, are demanding pay hikes to give 1,750 dollars to senior pilots and 500 dollars to the lowest paid.

The strike has disrupted flight schedules from Entebbe to Dar es Salaam, Nairobi, Sharjah and Dubai, the airline said.

Jakarta (FEB. 7) - Indonesia may lease Soviet ''Aeroflot'' aircraft to fill in its national flag carrier Garuda overseas flights during the upcoming Moslem Haj pilgrimage season, Communications Minister Azwar Anas said Wednesday.

More than 50,000 Indonesian Moslems are expected to make the Haj pilgrimage to Mecca this year, according to officials.

Azwar said the choice went to Aeroflot because it is one of the few foreign airlines which still has available aircraft. Most of the world's airlines are reaching their capacity limits due to rising demand for flight seats, mainly for tourism purposes.

Garuda president Mohamad Soeparno said the firm would follow the government policy, including the decision to hire Aeroflot planes.

However, he said he did not know how many Aeroflot airplanes will be hired to assist the upcoming Haj pilgrimage season.

Soeparno said the Aeroflot aircraft is competitively cheaper to hire.

Indonesia banned Aeroflot airplanes from entering the country in 1983 because of alleged involvement of the Soviet airline's officials in espionage in Jakarta.

#90038d9380 02/07/1990 ~French/German News Agency

MAPUTO (FEB. 7) - Mozambique's economy has made slow but steady improvements since the launching of an economic recovery programme in 1987 but overall performance is still well below pre-independence levels, a government report has said.

Recovery in many sectors is still severely affected by the RENAMO (Mozambique National Resistance) rebellion, according to the report released Tuesday by Prime Minister Mario Machingo.

And labour productivity in Mozambique is still six times lower than the indices for 1974, the year before the country's independence.

In 1975 Mozambique's three main ports of Maputo, Beira and Nacala handled 20 million tons of traffic, while the rail system moved 18 million tons.

These figures dropped to six million and three million tons by 1989. But the number of workers involved dropped by only 8,000 to 31,000.

In 197374 Mozambique was producing 280,000 tons of sugar per year, with 38,000 people working in the sugar sector. By 1989, with two sugar mills crippled by RENAMO guerilla attacks, and others suffering from technical problems, production had fallen to 25,000 tons with a work force of 15,000. Production per worker thus dropped from 7.4 tons per year in 197374 to 1.7 tons in 1989.

The coal mines at Moatize, in the northwestern province of Tete, produced 535,000 tons in 1981 with 2,705 workers. But in 1989, 1,500 workers produced just 63,000 tons of coal. This reduction is in part due to guerilla sabotage of the railway that used to take the coal from Moatize to Beira port.

#90038d9720 02/07/1990 ~French/German News Agency

TAIPEI, Feb 7 (AFP) - Taiwan businessmen might have funded up to one billion U.S. dollars in investment projects in China over the years, Vice Economic Minister Wang Chien-shuan said Wednesday.

But Mr. Wang told the China Times Express that no exact number of Taiwan-invested firms in the mainland was available, saying it could range from 2,500 to more than 10,000 depending on the size of the investment.

The Nationist government here bans local businessmen from investing in the mainland, allowing only indirect trade across the Taiwan Strait, which hit a record 3.4 billion dollars last year, up from 2.7 billion dollars in 1988.

But despite the investment ban, hundreds of local manufacturers have managed to open plants in China through third parties, taking advantage of the cheap labor and raw materials and incentives offered by mainland authorites.

Economic officials said earlier this week measures would soon be worked out to control such investment.

Taipei would forbid investments involving national defense items and restricted high-technology exports, those jeopardizing competitiveness of similar products in Taiwan and industries whose research and development projects are financed by authorities here.

Leading Taiwan industrialist, plastics tycoon Wang Yung-ching, who made at least two secret trips to the mainland in the past three months, recently

urged Taipei to permit local investors to seek opportunities in China to revive their declining operations.

The island's worsening investment climate - rising land prices, a labor shortage, labor disputes and stronger environmental protection - has threatened the survival of many Taiwan manufacturers.

#90038d9820 02/07/1990 ~French/German News Agency

Hamburg (FEB. 7) - Mobil Oil of West Germany said Tuesday its surplus in 1989 reached 190 million marks (114 million dollars), more than double the 92 million marks of the year before.

Amid higher oil prices worldwide, Mobil said its sales turnover surged to 6.9 billion marks last year, compared to 5.5 billion marks in 1988, despite lower turnover in terms of volume.

The company said its turnover in petroleum products slipped to 9.6 million tons, compared to 10.8 million tons in 1988, with the mild winter of 1989 being a major factor. Natural gas volume was 4.7 billion cubic metres, up from 4.5 billion cubic metres.

#90038d9970 02/07/1990 ~French/German News Agency

JAKARTA (FEB. 7) - Bank Indonesia governor Adrianus Mooy said Wednesday a new government rule requiring banks to allocate 20 percent of loans to small businesses had been carefully considered and hopefully could be implemented.

"I believe that all banks will certainly be able to reach the 20 per cent figure, what is important is that there are efforts to work toward it," the central bank governor said after meeting President Suharto.

The new rule, to take effect in January 1991, requires all lending banks - except foreign and joint-venture banks which are already obliged to direct 50 percent of their lending to exporting companies - to devote at least 20 per cent of their total loans to small businesses.

The central bank defines small businesses as those with total assets of 500 million rupiahs (333,000 dollars) or less.

Critics have said the new regulations will impose a heavy burden on small banks and may even lead to their closure because of the high risk of default on such loans.

Mr. Mooy admitted some banks may have to "work harder" to reach the 20 per

cent level but said the target was not excessive.

He said there was no reason to make foreign banks here subject to the 20 per cent requirement as this would "weigh them down further ... and for now would put too much pressure on them."

The 20 percent provision was part of a package announced last week which saw the central bank cut its subsidised loans by half, redirecting the remainder to cooperatives and rural development.

Finance Minister Joahnnes Sumarlin said at the time that the new measures were intended to put Indonesia's banking system on a fully commercial basis and curb the inflationary pressures caused by the subsidised loan system.

Since the government deregulated the banking sector in October, 1988, funds raised by banks have grown from 36.9 trillion rupiahs to 51.8 trillion rupiahs (20.5 billion dollars to 28.7 billion dollars), while the number of banks has risen from 108 to 147.

#90038e0009 02/07/1990 ~Latin America New Agency

MEDELLIN, Colombia (FEB. 7) EFE - The patriarch of Colombia's most notorious cocaine-trafficking family says that when U.S. President George Bush comes to Colombia for this month's anti-drug summit, the traffickers should also be present to give their side of the story.

"Otherwise, the summit makes no sense," EFE was told by Fabio Ochoa, the father of Jorge Luis, Juan David and Fabio Ochoa Jr, all of them fugitive bosses of the Medellin cocaine cartel and high on Washington's most wanted list.

The Medellin cartel, based in the northwestern city of the same name, smuggles 80 per cent of the cocaine consumed in the United States.

Ochoa said he wants to see traffickers "who are firmly set on the path of dialogue and accord" represented when the presidents of Colombia, Peru and Bolivia join Bush for the summit February 15.

The head of the Ochoa clan, a wealthy horse breeder and cattle rancher, showed EFE a letter which he said he was going to send to the embassies of the Latin American countries taking part in the summit.

In the letter, Ochoa claims that "All the anti-drug measures that have been taken (by Colombian President Virgilio Barco) have been whispered in his ear by Bush, with the sole intention of humiliating all Colombians and making us look like criminals."

"The Colombian people endorse the drug traffickers' view that there can be no solution without dialogue," a position that only Bush and Barco could possibly find grounds for objecting to, he said.

As far as Ochoa is concerned, that is hardly a coincidence.

"Barco (who lived for 17 years in the United States) is a gringo himself, and is married to one, and his children are gringos and he keeps his money in the United States," Ochoa added.

Following a string of murders of judges and top politicians last summer, Barco declared a crack-down on the billionaire cocaine cartels, extraditing suspected traffickers to the United States and seizing millions of dollars worth of their property.

Gangs of hitmen linked to the drug barons responded with a wave of shooting and bombings that killed more than 200 people.

With one exception, the top Medellin bosses, including cartel head Pablo Escobar and the three Ochoa brothers, have escaped the dragnet.

Ochoa, said Escobar, who has a half-million dollar price on his head, was "the only one who can give the word that the business will be liquidated, the only one who can put an end to this situation" and should be allowed to sit down with the heads of state.

The patriarch acknowledged that he was personally acquainted with Escobar "because we share a common love for horses", adding "he has made it clear he wants peace and I know his word is good."

Last month, a letter signed by "The Extraditables," as the fugitive drug barons call themselves, offered to close down their drug operations and end their attacks in exchange for unspecified "constitutional guarantees" -- which most observers take to mean an end to the extraditions.

Ochoa denied reports that Escobar has or was about to have a leg amputated for gangrene that set in from an untreated wound he received while making a narrow escape from a recent police raid.

"I know that he's fine, in perfect health. He was never wounded or ill, like some people have been saying. I haven't seen him for some time but I can assure you he's all right and is still in Colombia," he said.

#90038p0001 02/07/1990 ~PR Newswire

ENGLEWOOD, COL (FEB. 7) PR NEWSWIRE - Marquest Medical Products Inc. (NASDAQ: MMPI) today announced that it has changed its hedging strategy relative to its Swiss Franc debt that matures in March 1994.

The company was hedged against the decline of the Dollar and it exercised its hedging options today on curency contracts that produced a cash profit of $700,000 to the company. These contracts had an approaching expiration date of March 3, 1990, which forced the company's action today. Due to the high level of cost associated with replacing these options with a current meaningful hedge, the company has decided to go without option protection for the present on its Swiss debt.

Marquest Medical Products is a leading innovator and manufacturer of specialty respiratory and anesthesia disposable products, a $500 million market growing at 15 percent a year. The company is a technological leader with proprietary healthcare products that are time saving and cost effective. Marquest is also an alternate care provider through its subsidiary, Marquest Health Services Inc., which provides home healthcare services and sells retail pharmaceuticals and sundries to the general public.

#90038p0002 02/07/1990 ~PR Newswire

VALLEY, NE (FEB. 7) PR NEWSWIRE - Valmont Industries Inc. (NASDAQ: VALM) today announced record sales and earnings for the year 1989. Subject to final audit, earnings for 1989 were $20.6 million, $1.78 per share, an increase of 35 percent over 1988's earnings of $15.3 million, $1.38 per share (per share amounts are adjusted to reflect the November, 1989 2-for-1 stock split). Sales for 1989 were $789.8 million, up 19 percent from the previous year's sales of $662.7 million.

Earnings for the fourth quarter of 1989 were $6.3 million, 54 cents per share, compared to 1989 earnings of $5 million, or 44 cents per share. Fourth quarter sales were $214.3 million versus 1988's comparable sales of $187.6 million.

Sales and operating profits for the operations that remain a part of the Industrial Products segment increased as the result of better margins and productivity improvements in the steel pole and reinforcing bar fabrication businesses. Total sales for the segment were lower in 1989 than 1988 because of the sale of the steel service centers in late 1988 and early 1989.

The Irrigation Products segment had a very successful year with substantial increases in both sales and operating profits benefiting from a sound U.S. agricultural economy and market development programs in the International arena.

ValCom Inc., a 74 percent owned, publicly traded microcomputer reselling subsidiary, last week reported 1989 revenues of $359 million, or 53 percent ahead of 1988 and earnings of $6.3 million, up 26 percent from 1988. While others in this industry have reported reduced sales and earnings, ValCom continued its solid, consistent performance through tight expense control, effective balance sheet management and controlled expansion of its channel of distribution.

William F. Welsh II, President and CEO of Valmont said, "We are very pleased with our 1989 performance and the contributions made by each of our businesses. We exceeded our financial objectives of 15 percent growth in earnings per share and 20 percent return on beginning equity."

"We entered 1990 with a high level of business activity and excellent backlogs," Welsh continued, "however, the growth of our existing businesses will not likely continue at the rates we have experienced over the last three years. Because of the cyclicality and seasonality of a number of our businesses, comparable quarterly improvements in earnings may be a challenge to achieve in 1990. We do expect to meet our financial

objectives in 1990 and continue to look at related diversification opportunities and aggressive global expansion to increase our rate of growth."

Valmont Industries manufactures components for the electrical construction industry; is a leading producer of mechanized irrigation systems for worldwide agricultural markets; and owns 74 percent of ValCom, a major distributor of microcomputer products and services.

#90038p0029 02/07/1990 ~PR Newswire

AUBURN, NY (FEB. 7) PR NEWSWIRE - Cayuga Savings Bank (NASDAQ: CAYB) today reported lower earnings for the year ended Dec. 31, 1989. Also, the board of directors at its Jan. 24 meeting approved payment of a $.125 per common share dividend, according to Robert J. Steigerwald, president and CEO.

The net income for the year ended Dec. 31, 1989, was $1,161,000, or $.74 per common share, as compared with net income of $1,951,000, or $1.92 per share, for the previous year. Cayuga reported a net loss for the quarter ended Dec. 31, 1989, of $236,000, or $.37 per common share, compared to net income of $361,000, or $.26 per common share for the comparable period in 1988.

Commenting on the results, Steigerwald said, "The lower earnings are a result primarily of a provision for possible loss of $659,000 recorded in the fourth quarter to recognize an increase in certain risks associated with the bank's mobile home loan portfolio arising out of non-performance of its servicer. Although we believe these are prospects for full recovery through negotiations with the servicer, the possibility of continued non-performance warrants the establishment of this provision. Future recoveries will then be recorded as earnings when received. We believe that this provision in conjunction with the increase of our allowance for loan losses has strengthened our balance sheet and stands us in good stead for improved future earnings performance."

Steigerwald further stated, "During the year we have improved our interest rate sensitivity position, developed a stronger liquidity base, increased our capital position and have reorganized our internal structure -- all of which will contribute to a stronger and more stable earnings trend as we enter the '90s. Another area we are studying is our net equity spread and alternative methods to improve it."

Holders of the bank's common stock as of the record date of Feb. 2, 1990, will be paid the declared dividend of $.125 on Feb. 28.

The formation of Iroquois Bancorp, Inc. as the holding company for Cayuga Savings Bank has received preliminary regulatory approvals. It is presently anticipated that the formation of the holding company, which will be accomplished by an exchange of Cayuga shares for Iroquois shares, will be completed on or about March 1, 1990, at which time the Iroquois stock will begin trading on NASDAQ in place of Cayuga stock.

Cayuga Savings is located in Cayuga County in the Finger Lakes region of central New York state, between the cities of Rochester and Syracuse.

VANCOUVER, WA (FEB. 7) PR NEWSWIRE - Red Lion Inns Limited Partnership (AMEX: RED) today announced record results for the fiscal year ended Dec. 31, 1989.

For the year ended Dec. 31, 1989, the Partnership generated cash flow available for distribution and incentive fees (after refurbishing reserves) of $9.3 million or $2.10 per unit. This represents a 29 percent increase over the prior year's per unit cash flow of $1.63 and exceeds the 1989 cash distribution of $9.2 million or $2.0875 per unit.

Net income for 1989 was $4.2 million or 94 cents per unit on revenues of $91.3 million compared to a net loss of $1.4 million or 29 cents per unit on revenues of $86.4 million in 1988. The increase in net income is largely due to improved operations and lower incentive management fees.

For fourth quarter 1989, the partnership generated cash flow available for distribution and incentive fees (after refurbishing reserves) of $1.8 million or 41 cents per unit compared to $1.3 million or 28 cents per unit for the like period in 1988. Fourth quarter 1989 net income was $1.0 million or 22 cents per unit on revenues of $22.6 million compared to net loss of $.6 million or 12 cents per unit on revenues of $21.5 million for the like period in 1988.

On Feb. 15, 1990, the partnership will pay a fourth quarter 1989 cash distribution of $.525 per unit to unitholders of record on Jan. 31, 1990. Total cash distributions declared for 1989 were $2.0875 per unit.

Red Lion Inns Limited Partnership is the owner of 10 Red Lion hotels acquired in 1987. The 10 hotels are managed by Red Lion as part of its chain of over 50 hotels in the western United States.

HOUSTON (FEB. 7) PR NEWSWIRE - Compaq Computer Corporation (NYSE: CPQ) today announced the appointment of James W. Glanville to its board of directors, increasing the total membership of the board to six.

Glanville, 66, has been a general partner at Lazard Freres & Co., a New York-based investment banking firm since 1978.

"Jim's business experience will be an invaluable asset to Compaq's board of directors and we look forward to his contributions as we enter the 1990's," said Rod Canion, president and chief executive officer.

From June 1986 to June 1989, Glanville was vice president for business affairs and treasurer at Rice University, Houston. He also served as visiting professor of investment banking at The Jones School. He is a senior advisor to the Sterling Group, Inc., Houston.

He was a partner and managing director of Lehman Brothers, Inc., New York, from 1959 to 1978.

Glanville has extensive experience in the petroleum industry with Texaco and Humble Oil & Refining Company (now Exxon Company, U.S.A.) where he served in a variety of engineering positions. He is the author of numerous technical papers in the fields of hydrocarbon behavior, reservoir engineering and the economics of the petroleum industry.

Glanville graduated from Rice University with a bachelor's degree in chemical engineering. He received a master's and a professional degree in chemical engineering from the California Institute of Technology, Pasadena Calif.

In addition to Glanville, Compaq board members are Benjamin M. Rosen, chairman, Sevin Rosen Management Company and chairman, Compaq Computer Corporation; Joseph R. Canion, president and chief executive officer, Compaq Computer Corporation; Robert T. Enloe III, president, Lomas & Nettleton Financial Corporation; Kenneth L. Lay, president and chief executive officer, Enron Corporation; and George E.R. Kinnear II, executive vice president, University of New Hampshire.

Compaq Computer Corporation is a world leader in the manufacture of PC systems, and desktop, portable and laptop personal computers. COMPAQ products are sold in 61 countries through a network of more than 3,000 authorized COMPAQ computer dealers.

RICHMOND, VA (FEB. 6) PR NEWSWIRE - Heilig-Meyers Company (NYSE: HMY), the Richmond-based home furnishings retailer, today announced that it had completed the purchase from Reliable Stores, Inc. of certain assets related to 34 stores and four warehouses in Tennessee, Kentucky, West Virginia, and Virginia.

The transaction included the purchase of three parcels of real estate and the sub-lease of or assumption of the lease obligation on the remaining locations.

William C. DeRusha, Chairman and Chief Executive Officer, stated that these stores provide a good fit with the Company's existing operations and enable the Company to increase its penetration of the market areas involved. He added that he was pleased that the acquisition was accomplished quickly with minimum disruption of the operation of the new stores.

Heilig-Meyers Company, a Virginia corporation, presently operates 315 in 12 states.

DANIA, FL (FEB. 7) PR NEWSWIRE - Sound Advice, Inc. (NASDAQ-NMS: SUND), a full service specialty retailer of high quality, upscale entertainment and consumer electronics products, today announced record sales for the second quarter ended Dec. 31, 1989 of approximately $26.8 million, an increase of 11.7 percent over the comparable prior period.

Net income for the quarter ended Dec. 31, 1989 was $1,266,000, an increase of 4.6 percent over the comparable prior period. Earnings per share decreased by $.05 per share to $.35 per share due to an increase of 600,000 common shares outstanding, which were issued in June 1989 in connection with a secondary stock offering.

For the six months ended Dec. 31, 1989, sales were $46,809,000, net income was $1,406,000 and earnings were $.38 per share.

All 17 of the company's retail stores operate under the name "Sound Advice" and are located in growing Florida markets. Immediate plans are to continue to expand within existing markets in order to reduce the relative burden of overhead.

The company has approximately 3.7 million shares outstanding, and has been actively traded publicly since June 1986.

NEW YORK (FEB. 7) PR NEWSWIRE - Citibank announced today that William R. Rhodes will assume the position of senior executive - international, responsible for Citibank's cross border portfolio and debt negotiating responsibilities, as well as its contacts with the many worldwide and Washington constituencies that touch on the company's international business. Rhodes will report to Citibank's Chairman, John S. Reed.

Rhodes previously was group executive and chairman of the restructuring committee, responsible for establishing and implementing the institution's sovereign debt restructuring policies worldwide.

Rhodes also has been chairman of the industry-wide bank advisory committees for Argentina, Brazil, Peru and Uruguay, and principal co-chairman of the committee for Mexico.

Replacing Rhodes as Chairman of the restructuring committee at Citibank is Robert A. McCormack, a vice president, who has been a member of the restructuring committee since June 1987. McCormack will report to Rhodes.

George J. Clark, who had previously served as the company's contact with the international community, retired on Feb. 1 after 26 years of service with Citicorp.

This post is of particular importance, given the central role of international activities in Citibank's business and its continued responsibilities for debt negotiations with a number of important borrowers.

ANAHEIM, CA (FEB. 7) PR NEWSWIRE - Compex Inc., a leading manufacturer of local area network (LAN) interface cards for IBM PC/XT/AT and PS/2 series and compatible PCs and the fourth largest OEM of Novell NetWare, today announced that its two newest high-performance LAN boards will be on display at Networld, booth No. 2001.

The Compex ENET-TP/16, a 16-bit Ethernet controller, and the ANET-16-4, a 16-bit Arcnet controller, are PC-LAN interface boards designed to increase maximum I/O throughput performance in IBM AT and compatible PCs.

"The ENET-TP/16 and ANET-16-4 offer a variety of important new features and benefits to IBM AT and compatible system users in network environments " said Dwaine Robison, president and co-founder of Compex. "The new boards represent our commitment to providing users with the latest PC-LAN technology along with flexibility," added Robison.

The ENET-TP/16 is compatible with the forthcoming 10 Base T standard and utilizes low-cost twisted pair cabling for easy, economical network installation and hook-up with common telephone wiring. The interface incorporates a unique memory mapping feature called "CompADD." "CompADD" provides up to 64k of onboard RAM while using only 8k of memory in the host system, thus freeing I/O memory space for additional network

interface controllers or other peripherals.

The ENET-TP/16 transmits data at up to 10M-bit/sec, and workstations may be located up to 300 feet from the wiring hub. Included with the ENET-TP/16 interface card is a Novell-certified NetWare driver.

The other new product being featured is the Compex ANET-16-4 adapter, offering advanced token-passing technology at a low cost. The ANET-16-4 is a four-port 16-bit Arcnet interface card providing both expandability as well as flexibility to small LAN users, and can be extended to eight, 12 or 16 active ports by daisy chaining with the ANET-4/4, a four-port extender card.

The ANET-16-4 transmits data at up to 2.5Mbs and has a 2K data buffer built-in which allows zero-wait state access by the host computer and workstations. Workstations can be located up to 2,000 feet from any of the four active ports or up to 100 feet from a passive hub.

Both boards feature a remote boot ROM option allowing for a "diskless" workstation environment, are compatible with all industry communications standards, come bundled with device drivers certified by Novell (providing data throughput of up to 1,050 K bytes per second) and carry a two-year limited warranty.

The ENET-TP/16 with 16K of on-board RAM has a list price of $495.00 and the ENET-TP/16 Plus with 64K of on-board RAM has a list price of $550.00. The ANET-16-4 has a list price of $395.00 or $590.00 including the ANET-4/4.

Compex Inc., headquartered in Anaheim, is a leading manufacturer of PC-LAN interface cards and the fourth largest OEM of Novell NetWare. The company's products have been installed in more than 150,000 large and small network systems around the world. Compex products are available through local distributors worldwide.

#90038p0060 02/07/1990 ~PR Newswire

LOS ANGELES (FEB. 7) PR NEWSWIRE - United Television Inc. (NASDAQ: UTVI) today announced record net income for the year ended Dec. 31, 1989, of $62,602,000, or $5.72 per share. Approximately $61,000,000 of the year's net income is attributable to a net gain on the sale of 57 percent of the company's former Warner Communications Inc. interests. In 1988, the company recorded a net loss of $676,000, or $.06 per share.

The company also announced that it will record a further net gain of approximately $35,000,000 in the 1990 first quarter in connection with the disposition of the balance of its WCI interests pursuant to the January 1990 merger of WCI and Time Warner Inc.

Net revenue for 1989 totaled $106,864,000, reflecting a 6 percent increase from $101,206,000 in 1988. However, increased operating expenses, primarily programming costs, reduced earnings from the company's television stations. Operating income declined 61 percent for the year to $3,539,000 from $9,020,000 last year.

Interest and other income, net in the year increased to $3,542,000 from last year's $376,000, reflecting the temporary placement, mostly in U.S. government securities, of a portion of the WCI stock sale proceeds.

The company recorded fourth quarter net income of $2,674,000, or $.25 per share, compared to net income in last year's fourth quarter of $84,000, or $.01 per share. The increase in net income reflects lower interest expense, resulting from the third quarter redemption of the company's 14-1/2 percent Subordinated Debentures, and a substantial increase in interest income.

Fourth quarter revenues were $31,292,000, a 12 percent increase from last year's $27,830,000. However, due to increases in operating expenses, primarily programming costs, operating income decreased 71 percent to $1,245,000 from $4,289,000.

#90038p0061 02/07/1990 ~PR Newswire

LOS ANGELES (FEB. 7) PR NEWSWIRE - First Capital Holdings Corp. (NYSE: FCH) today announced record net income for the year ended Dec. 31, 1989.

Net income was $69.5 million or $1.49 per fully diluted share for 1989 compared with $52.7 million or $1.41 per fully diluted share for 1988. Revenues were $972.9 million for 1989 compared with $726.3 million for 1988. Premiums received were $2.7 billion compared with $2.0 billion for the prior year.

For the quarter ended Dec. 31, 1989, net income was $17.4 million or $.37 per fully diluted share on 46,786,000 shares versus $16.4 million or $.40 per fully diluted share on 41,256,000 shares for the fourth quarter of 1988. Revenues were $262.4 million compared with $201.5 million for the fourth quarter of 1988. Premiums received were $444 million as compared to $471 million for the quarters ended Dec. 31, 1989 and 1988,

respectively.

Gerry R. Ginsberg, president and chief operating officer commented, "We are gratified by our sales, operating and investment performance for 1989. We are hopeful that the market will reflect the company's substantial achievements."

Shareholders' equity grew to $382 million or $8.20 per common share from $326 million at Dec. 31, 1988. Total assets increased to $9.5 billion at Dec. 31, 1989 from $7.2 billion at Dec. 31, 1988.

First Capital Holdings Corp. is a Los Angeles-based financial services holding company whose principal subsidiaries are First Capital Life Insurance Co., headquartered in San Diego, Fidelity Bankers Life Insurance Co., based in Richmond, Va., and World-Wide Reassurances Company Ltd., an international life reinsurer based in Windsor, England.

#90038p0062 02/07/1990 ~PR Newswire

LOS ANGELES (FEB. 7) PR NEWSWIRE - Times Mirror (NYSE: TMC) today announced that revenues for 1989 reached a record $3.52 billion, compared with $3.33 billion in the prior year.

Net income for the full year was $298.0 million, or $2.30 per share, compared with $331.9 million, or $2.58 per share, last year. Excluding net gains of 5 cents per share in 1989 and 31 cents per share in 1988, earnings for 1989 would have been $2.25 per share, down 1 percent from $2.27 per share in 1988. The 1989 gains came from the sales of timberlands, partly offset by a fourth-quarter loss provision on the expected sale of newspaper press equipment. Gains in 1988 resulted from the sales of timberlands and other assets.

Net income for fourth-quarter 1989 was $74.1 million, or 57 cents per share, down from $96.8 million, or 76 cents per share, in 1988. Fourth-quarter 1989 results included the previously mentioned loss provision on the sale of press equipment of 6 cents per share, while the comparable 1988 earnings included a gain of 1 cent per share from asset sales. Excluding the asset sales, fourth-quarter earnings per share would have been 63 cents in 1989, compared with 75 cents in 1988, a decline of 16 percent.

The 1989 fourth quarter included six fewer days of newspaper operations than did the fourth quarter of 1988. The 1989 first quarter included five more days of newspaper operations (including an extra Sunday) than did the first quarter of 1988. The results of newspaper operations in both

quarters were thus affected by the calendar differences; results for the full year reflect only operational factors.

"1989 was a year of mixed results," said Robert F. Erburu, chairman and chief executive officer. "Most of our Eastern newspapers, our consumer magazines and our Broadcast Television group experienced difficult operating conditions. Yet the Los Angeles Times, Times Mirror Cable Television and our professional publishing companies produced impressive results."

#90038p0064 02/07/1990 ~PR Newswire

LOS ANGELES (FEB. 7) PR NEWSWIRE - The board of directors of Angeles Corp. (AMEX: ANG) has authorized the company to give its current Senior Subordinated Debenture holders the opportunity to exchange their bonds for Angeles Corp. Units, a new security that includes both equity and debt components. The exchange, entirely voluntary on the part of the bondholders, would be completed on or about March 2. There are currently $32.5 million of these Senior Debentures outstanding, of which Angeles owns $4.4 million.

In information soon to be mailed to senior debenture holders of record, Angeles Corp. "offers to exchange its Units, consisting of common stock and subordinated indebtedness, for any of its 12-1/2 percent Senior Subordinated Debentures due Dec. 1, 1995." Terms of the exchange offer provide that 44 new Angeles Units will be issued in exchange for each $1,000 Senior Subordinated Debenture surrendered by the bondholders.

Each Unit consists of one half a share of Angeles common stock, plus a total of $1.00 in cash payments during the first four years after issuance and a fiftieth of a new 12-1/2 percent Subordinated Debenture maturing in 2005. Thus each Senior Debenture surrendered will receive, in aggregate, 22 shares of Angeles common stock, $44 in cash paid over four years, and $880 face amount of the new 12-1/2 percent debentures. The market value of the Units can be determined only when trading begins.

It is expected that these Units will trade on the American Stock Exchange (AMEX) along with identical Angeles Corp. Units that are being approved for AMEX listing in connection with Angeles Corp.'s purchase of assets of certain affiliated companies in transactions scheduled for completion also on March 2.

Because any Senior Subordinated Debentures not exchanged will continue to be tradeable on the American Stock Exchange, the certificates for the

Senior Subordinated Debentures being exchanged must be surrendered to State Street Bank and Trust Co., the exchange agent for the transaction, by March 2, 1990, when the exchange offer expires.

Senior Subordinated Debenture holders who surrender their certificates will receive similar income from the debt component of their Angeles Corp. Units and they will become eqity participants as owners of Angeles' common stock.

ATLANTA (FEB. 7) PR NEWSWIRE - Georgia-Pacific (NYSE: GP) today announced the election of W.E. "Ed" Babin as group vice president - containerboard and packaging, effective Feb. 12, 1990. The appointment was approved by the company's board at its Jan. 29, 1990, meeting.

As group vice president of containerboard and packaging, Babin will be responsible for Georgia-Pacific's entire containerboard system, including linerboard mills, packaging plants and sales.

Babin joins Georgia-Pacific from Inland Container Corp. in Indianapolis, Ind., where he served since 1981 as group vice president - containerboard.

"We are fortunate to have a man like Ed, with more than three decades of experience in the pulp and paper industry, join Georgia-Pacific," said A.D. "Pete" Correll, executive vice president - pulp and paper. "Ed has a proven track record of success and is recognized throughout the industry for his superb operating abilities."

Babin attended the Marion Military Institute in Alabama and then received his bachelor's degree in industrial management from the University of Alabama in 1957. He later attended graduate school at the University of Alabama and also attended the Harvard Graduate School of Business' Advanced Management Program.

A trustee of the Marion Military Institute, Babin also is a member of the Technical Association of the Pulp and Paper Industry.

BLOOMFIELD HILLS, MI (FEB. 7) PR NEWSWIRE - The Oxford Investment Group, Inc. announced today the acquisition of the assets of the Detroit Plastic Molding Corporation (DPM) by Automotive Plastic Technologies, Inc., a newly formed Oxford affiliate.

"While this has been a difficult acquisition to complete, we have confidence in the future potential of the underlying business," said Thomas Gaffney, chairman of Oxford. Gaffney has been named chairman and chief executive officer of Automotive Plastic Technologies, Inc. Donald Holton is chief operating officer and president of APT.

DPM has long been recognized as a leader in injection molding. The corporation develops innovative applications for plastic in both the automotive and non-automotive industries.

"We are hopeful that APT will become the core of an expanded plastics manufacturing business," said Selwyn Isakow, president and chief executive officer of Oxford Investment Group.

Oxford will provide capital resources and management direction to the company. DPM has over $100 million in revenues and 1,200 employees, with plants in Michigan, Tennessee and Ontario, Canada.

CINCINNATI (FEB. 7) PR NEWSWIRE - The Procter & Gamble Company (NYSE: PG) and the Eczacibasi Group today announced the formation of a joint venture to manufacture and market disposable diapers and disposable feminine hygiene products in Turkey.

Terms of the agreement were not disclosed.

The joint venture business will be conducted through Sanipak, one of the companies in the Eczacibasi Group. Sanipak makes and sells the leading disposable diaper and sanitary napkin brands in Turkey.

The Eczacibasi Group, a privately held company headquartered in Istanbul, is one of the major companies in Turkey. It is Turkey's largest producer of pharmaceuticals, as well as being engaged in the building materials and financial services businesses.

Procter & Gamble already makes and sells laundry and cleaning products and shampoos in Turkey. The Sanipak venture adds importantly to its activities there. The Turkish disposable paper products market, though presently smaller than in other European countries, is growing rapidly.

Procter & Gamble had worldwide sales of $21.4 billion in fiscal 1988-89. The company markets a wide range of laundry and cleaning products, personal care products including pharmaceuticals, food and beverage products, and a variety of products for business and industry. Procter & Gamble markets products in more than 140 countries.

WICHITA, KS (FEB. 7) PR NEWSWIRE - Brite Voice Systems, Inc. (NASDAQ: BVSI), today reported a 589 percent increase in net income and a 149 percent increase in revenues for the fourth quarter of 1989 as compared to 1988. The company, which manufactures and sells audiotex and interactive voice response systems, posted revenues of $3,590,000 for the last three months of 1989. Revenues for the fourth quarter of 1988 were $1,442,000. Operating income for the same reporting period was $918,000 and $112,000 for 1989 and 1988, respectively. Net income was $827,000 or $0.18 per share for 1989 compared to $120,000 or $0.03 per share a year ago. The company has now posted quarterly profits in each of the last 14 consecutive quarters.

For the year ended Dec. 31, 1989, Brite Voice recorded $15,631,000 in revenues, which is an increase of 157.6 percent over the same period in 1988. This marks the best yearly results posted by the five-year-old company. Operating income increased 188.5 percent to $3,932,000 when compared to 1988. Net income for the last 12 months was up 151 percent to $2,804,000 or $0.74 per share. During 1988 this figure was $1,117,000 and $0.32 per share.

"We are very pleased with our performance during 1989, which reflected earnings equal to or greater than analysts' estimates," stated Stan Brannan, Brite's president and CEO. "During the first half of 1990, we will face a considerable challenge in improving upon our performance for the prior year due to the large Gateway shipments which occurred in the first half of 1989; however, we are excited about 1990 and believe we have a plan in place that should produce an excellent year of growth and success for Brite. Our new products are generating exceptional interest, and we are evaluating a number of opportunities that could have a significant impact on our results.

"Our lawsuit with 900 Services, Inc., continues to have an adverse effect on our stock price, and I am sorry we are constrained by a legal process that offers no immediate answers," continued Brannan. "Our position with respect to the lawsuit has not changed. We believe we have performed under the contract and deserve to be paid. Brite has built a reputation for reliability and integrity in the industry, and it is unfortunate that this situation has resulted in the amount of negative publicity that it has."

ATLANTA (FEB. 7) PR NEWSWIRE - Georgia Gulf Corp. (NYSE: GGC) has announced that its board of directors has set April 19 as the date for a stockholders' meeting to vote on its previously disclosed proposal for a

plan of recapitalization. The board established Feb. 18 as the record date for stockholders entitled to vote at the meeting.

The company also announced that it has commenced a public offering of $200 million of senior subordinated notes, the net proceeds of which, as previously announced, will be used to fund cash payments to be made to stockholders pursuant to the plan of recapitalization. The notes are being offered only by means of a preliminary prospectus.

The company also stated that the board has extended the distribution date for the company's preferred share purchase rights to Feb. 17. By terms of the rights, the distribution otherwise would have occurred on Feb. 10 as a result of NL Industries' announcement on Jan. 31 of its intent to commence a tender offer for Georgia Gulf's common shares. The company noted that, subject to limitation under the rights plan, the board has the authority to specify from time to time a later distribution date for rights.

Georgia Gulf, headquartered in Atlanta and listed on the NYSE (GGC), is a major manufacturer of several highly integrated lines of commodity chemicals and polymers including aromatic, natural gas and electrochemical products, as well as thermoplastic and thermosetting resins.

SOUTH SAN FRANCISCO, CA (FEB. 7) PR NEWSWIRE - Lewis Galoob Toys Inc. (NYSE: GAL) today reported a 185 percent increase in net income available to common shareholders, to a record $18.9 million from $6.6 million a year ago. Earnings per share advanced to an all-time high of $1.95, from 72

cents per share in the prior year. Sales climbed 62 percent to $227,700,000, from $140,100,000 in 1988.

Fourth quarter sales in 1989 were $58,000,000. Net income for the quarter was $4,500,000 or 46 cents per share, compared to $3,300,000, or 35 cents per share in the fourth quarter of 1988, on sales of $45,600,000.

Galoob attributed its success to a strategy of creating lower-priced, diversified lines for more consistent, year-round sales. The successful line extensions to Micro Machines and Bouncin' Babies, as well as new introductions such as Lost 'n Founds and Bouncin' Kids, have resulted in eight consecutive record quarters.

For the last two years, Micro Machines and Bouncin' Babies were among the fastest-selling toys during the holiday seasons, according to toy industry magazine "Toy and Hobby World." Galoob's Lost 'n Founds, the first-ever crying plush toy, was the number one promotional plush introduced in 1989.

"The past decade was extremely successful for Lewis Galoob Toys," said David Galoob, chairman, president and chief executive officer. "We grew from a small $6 million toy company in 1981 to a global presence with over $227 million in sales in 1989. Our new product introductions at the recent European and Hong Kong toy shows were very well received," he added.

The company will formally unveil its 1990 product line at the American International Toy Fair, Feb. 12-21, in New York City.

"We are confident that we are well positioned to continue the momentum of the last decade into the 90s," commented Galoob. "The company finished 1989 with a strong capital structure, which provides maximum financial flexibility."

Lewis Galoob Toys designs, develops, markets and distributes a variety of quality toy products sold worldwide. Founded in 1957, the company is one of the largest independent, publicly held toy companies in the United States.

CAMBRIDGE, MA (FEB. 7) PR NEWSWIRE - Enzytech announced today that it has received a Phase I Small Business Innovation Research Grant from the National Institutes of Health to develop a long-acting, controlled release system for delivering insulin to diabetics. The system has the potential

to mimic the natural release of insulin in the body more closely than currently available systems as well as eliminate the need for daily insulin injections.

"The system we are developing with the support of this grant has significant promise to increase the safety and convenience of administration among the approximately 2 million diabetics in the U.S. who require multiple daily injections," said Mark B. Skaletsky, president and CEO of Enzytech. "The research combines Enzytech's major strengths in biopolymer systems and enzymology. In addition, the core techniques we are developing to regulate protein release have potential applications in a wide range of biopharmaceuticals."

"The Enzytech 'feedback-controlled' release system is designed to dispense insulin at a rate that varies with the level of sugar in the bloodstream," said Larry R. Brown, Sc.D., the company's principal investigator on the grant. "The system incorporates insulin in dried form into a polymer matrix together with an immobilized enzyme.

"A reaction between the enzyme and sugar in the bloodstream alters the acidity of the microenvironment in the system," Dr. Brown continued. "This change causes the insulin to dissolve and diffuse out of the matrix. The polymer matrix is small and implantable, and because the system releases insulin by diffusion, it does not rely on an external power source."

Preliminary in vivo studies have demonstrated that the system releases insulin in response to changes in blood sugar levels. The grant will fund additional studies to characterize and refine the system further. Enzytech has exclusive worldwide rights to the feedback-controlled delivery technology under an agreement with Children's Hospital (Boston).

Enzytech is a biotechnology company developing and commercializing delivery systems for therapeutic proteins and value-added nutritional food ingredients.

#90038p0090 02/07/1990 ~PR Newswire

TORONTO (FEB. 7) PR NEWSWIRE - At a breakfast meeting before Toronto's investment community, Robert M. Smith, president and chief executive officer, said that American Barrick Resources Corporation (NYSE: ABX) has combined aggressive mining with conservative financial policies to produce record production, earnings and growth in each of the last three years.

Barrick produced 467,837 ounces of gold in 1989, up from 341,000 a year ago. For 1990, the company has set a production target of 565,000 ounces of gold.

A large part of this production increase will come from the Goldstrike Mine in Nevada, where the company has successfully completed the first of a four-year major development program, called the Betze Development Plan. Goldstrike is targeted to produce 330,000 ounces of gold this year, increasing to more than 900,000 ounces in 1992.

The autoclave unit has been installed at Goldstrike to oxidize the Mine's high grade sulphide ore in order to significantly improve gold recoveries. It is operating at two-thirds of its 1,500 ton per day design capacity and is expected to be at capacity in March, which will be ahead of schedule.

Barrick's comprehensive hedging program protects the company from falling gold prices and at the same time lets the company share in the benefits of a rising gold price. Approximately 95 percent of 1990 production has been hedged at an average minimum price of $421 per ounce. Because the company has used primarily put options for this hedging, Barrick has retained 75 percent of the upside potential in gold price increases to $507 per ounce and 36 percent over $507 per ounce.

The company's balance sheet at the end of 1989 clearly shows the wisdom of the company's financial policies. At year end total assets were $1 billion, cash and short-term deposits $305 million and shareholders' equity $526 million.

Total reserves at American Barrick were 20.7 million ounces of gold at Dec. 31, 1989, up from 18.5 million ounces at the end of 1988.

American Barrick Resources Corporation has interests in six producing mines located in Nevada, Utah, Ontario and Quebec. The company's shares are traded on the Toronto, Montreal and New York Stock Exchanges, the Paris Bourse, and the Swiss Stock Exchange (ABR).

EPSOM, ENGLAND (FEB. 7) PR NEWSWIRE - LEP Group plc (ADRs - NASDAQ-NMS: LEPGY), currently the owner of 60 percent of the outstanding common stock of Profit Systems, Inc. (NASDAQ-NMS: PFTS), announced yesterday that it had entered into agreements with Harvey E. Pittluck, chairman of the board of Profit Systems, and James E. Lineberger, a director of Profit Systems,

which formalize previously announced agreements in principle between LEP and Pittluck and Lineberger. Pursuant to these agreements, LEP will make a proposal for a merger between Profit Systems and an affiliate of LEP which will provide for the payment of $12 in cash for each share of Profit Systems' common stock. The proposal will also provide that, if the merger is not consummated on or prior to April 30, 1990, the consideration per share would be increased by $0.25 for each calendar quarter thereafter, prorated for periods less than a full quarter.

The agreements provide that, whether or not the merger proposal is approved by Profit Systems' board of directors, Pittluck and Lineberger will, subject to certain conditions, sell to LEP or its affiliate the 422,100 shares of Profit Systems' common stock owned by Pittluck and by certain trusts of which he is a trustee, and the 125,000 shares owned by Lineberger, for the same consideration that would have been payable to them had a merger been consummated (subject to certain exceptions with respect to the $0.25 increments referred to above). The shares owned by Pittluck and Lineberger represent approximately 10.5 percent of Profit Systems' outstanding shares.

The merger proposal will be subject to various conditions, including approval of the merger by Profit Systems' board of directors, the negotiation and execution of a merger agreement between Profit Systems and LEP or its affiliate, and compliance with other requirements.

Pittluck has also agreed that, upon the approval by Profit Systems of the merger proposal, he will resign as chairman of the board of directors and as an officer of Profit Systems. Concurrently, Pittluck would be paid $1,500,000 in settlement of all obligations to him under his employment agreement with Profit Systems and his consulting agreement with an affiliate of LEP, which agreements would be terminated.

LEP, through an affiliate, presently owns 3,157,916 shares of Profit Systems' common stock, constituting approximately 60.25 percent of Profit Systems' outstanding shares. The purchase price for the remaining 39.75 percent of the outstanding shares, including the shares owned by Pittluck and Lineberger, would be approximately $25,000,000.

Profit Systems, through its subsidiaries, is engaged in the business of forwarding and transporting freight by means of air and surface carriers and the provision of incidental services, both within the United States and to cities throughout the world.

LEP is a diversified service company based in Epsom, England, with annual revenues of approximately $1.7 billion. Through subsidiaries, LEP is principally engaged in international freight forwarding, specialized physical distribution in Europe, distribution and production of scientific and engineering products principally in the United Kingdom and furnishing

of electronic security services in the United States.

PARK RIDGE, IL (FEB. 7) PR NEWSWIRE - The Brand Companies, Inc. (NASDAQ/NMS: BRAN) today reported revenues of $89.7 million for the three months ended Dec. 31, 1989 compared with revenues of $53.1 million for the corresponding period in 1988. Revenues for the 12 months of 1989 were $287.1 million, compared with $163.8 million for the twelve months of 1988.

Net income for the quarter ended Dec. 31, 1989 was $3.6 million, or $.38 per share, compared with $1.9 million, or $.21 per share, for the corresponding period in 1988. Net income for the twelve months of 1989 totaled $10.7 million, or $1.15 per share, compared with $4.5 million, or $.76 per share, for the corresponding period in 1988.

Brand's backlog at Dec. 31, 1989 amounted to $66 million, of which $46 million is related to asbestos abatement. Not included in the above backlog is Brand management's estimate of approximately $84 million of on-hand time and material work.

"Revenue continued at the high levels achieved in the third quarter, with strength in both asbestos abatement and technical services", stated Gene Barnett, chairman of the board. He also indicated that "ongoing efforts to improve estimating, productivity and project controls should continue to increase both gross profit margins and the net income of the company."

Brand and its subsidiaries are specialty contractors concentrating in such areas as asbestos abatement, technical services, manufacturing of high performance materials and new construction.

BOONTON TOWNSHIP, N.J. (FEB. 7) PR NEWSWIRE - Digital Optronics Corporation (NASDAQ: DOCC) announced record sales and net income for its fiscal first quarter ended Dec. 31, 1989.

Net sales for the quarter were $5,210,245 versus $1,909,002 a year earlier. Net income amounted to $418,922, or $.06 per share, compared with a net loss of $509,328, or $.08 per share, for the same period of the prior year.

Terence C. Byrne, Jr. president and CEO, attributed increase in net sales and earnings primarily to combining the businesses of Digital Electronics and its wholly owned subsidiary, Byrne Industries, Inc. Digital is involved in the research and development of coherent laser radar and measurement technology. Byrne manufactures and markets a diversified group of high-tech products including military weapons systems and munitions, defense electronics, and artificial vision sensor systems as well as components used in military, commercial, industrial and aerospace applications.

The company signed an agreement in November of 1989 with Numax Electronics Inc., to manufacture and assemble electronic warfare and communications equipment for the Department of Defense and foreign military agencies.

Numax is a wholly owned subsidiary of Tadiran Electronics Industries, Inc. which in turn is a wholly owned subsidiary of Tadiran, Ltd., Israel's largest military communications company. Byrne Industries will perform as Numax's subcontractor on approximately $17 million in defense contracts.

"In just over six months", Byrne observed, "we have combined a development company with a manufacturing company, which contributed to the record first quarter results. We also expect a profitable full year with very strong revenue growth."

#90038p0098 02/07/1990 ~PR Newswire

PITTSBURGH (FEB. 7) PR NEWSWIRE - Wean Inc. (NYSE: WID) reported a profit of $4,340,000 for the year 1989 on sales of $123,313,000, the company said today.

The results included a tax loss carryforward benefit of $935,000 and a one-time gain in the third quarter of $1,300,000 related to the refund of an insurance deposit. These results compare to a loss of $13,312,000 on sales of $76,530,000 in 1988.

The results for the quarter ended Dec. 31, 1989, reflected a profit of $1,139,000 on sales of $29,910,000. A tax loss carryforward benefit of $134,000 was included in these results. These figures compare to a loss of $4,335,000 on sales of $28,903,000 for the same quarter of 1988.

The backlog of orders at Dec. 31, 1989, amounted to $105,000,000 compared to $71,000,000 at Sept. 30, 1989, and $88,000,000 at Dec. 31, 1988.

R.J. Wean III, president and chief executive officer, said, "The improved performance for 1989 is primarily due to increased demand for the company's products which resulted in a higher sales volume and better utilization of its facilities. The company has entered 1990 with a backlog of orders that, together with the continued high level of new business activity, should provide the opportunity for positive results in the current year."

#90038p0103 02/07/1990 ~PR Newswire

RICHARDSON, TX (FEB. 7) PR NEWSWIRE - Convex Computer Corporation (NYSE:

CNX) today announced record revenues and profits for the year ended Dec. 31, 1989. The company reported revenue of $158.6 million, an increase of 50 percent from 1988 revenue of $105.6 million. Net income before extraordinary credit for the year just completed was the highest in the company's history at $11.4 million, or 60 cents per share, an increase of 100 percent over 1988 profit of $5.7 million, or 32 cents per share. Net income for the year was $11.7 million, or 62 cents per share, vs. the year earlier figure of $6.1 million. This represents five consecutive years of uninterrupted growth.

The company also reported record results for the fourth quarter ended Dec. 31, 1989. Revenues increased to $46.7 million, up 52 percent when compared to the fourth quarter of 1988 and up 13 percent from the prior quarter. Net income before extraordinary credit was $3.7 million, or 19 cents per share, up 68 percent from the year earlier profit of $2.2 million. Net income for the quarter was $4.0 million, or 21 cents per share after extraordinary credit. The fourth quarter's performance marked the company's 21st consecutive quarter of increased revenue. Shipments of Convex C2 systems reached a record 36 systems, half of which were multi-processor systems. The average selling price remained above $1 million for the second consecutive quarter. Total shipments for the quarter were 42 systems, bringing the installed base to more than 600 systems with nearly 375 customers.

Revenues for the quarter reached new record levels both domestically and internationally, with international sales particularly strong for the third consecutive quarter, comprising 56 percent of total revenues. The order rate from customers who have previously purchased systems remained very strong at nearly 50 percent of the total shipments. Operating performance improved with revenue per employee at $187 thousand and operating margins of 12 percent; both of these figures are among the highest in the company's history.

Results for the quarter reflected two additional sales resulting from the joint sales and marketing relationship with Control Data Corp. In addition two other important system installations highlighted the diversity of uses by Convex customers. The Woods hole Oceanographic Institution in Falmouth, Mass., acquired a C220 system to aid study of the ocean floor and wave propagation. The Mount Sinai Medical Center in New York City installed a Convex supercomputer for use in large simulations studying the fundamental causes of diseases such as cancer, lupus, and cystic fibrosis.

Convex Computer Corporation, a leading supplier of supercomputers worldwide, was founded in 1982 to design, manufacture, market, and service high performance systems. The company markets its products primarily to scientific, engineering and technical users throughout the world for a wide variety of applications in such areas as geophysical research, computational chemistry, computer-aided engineering, image processing,

aerospace simulations and molecular biology. The systems are sold and serviced through direct sales and an extensive distribution network.

WASHINGTON (FEB. 7) PR NEWSWIRE - Hispasat has ordered the launch of two Spanish telecommunications satellites, Hispasat 1A and 1B from Arianespace in 1992.

In the presence of Jose Barrionuevo, the Spanish Minister for Transport, Communications and Tourism; Jose Luis Martin-Palacin, the president of Hispasat SA; and Frederic d'Allest, the president of Arianespace, today signed the launch contract in Madrid for the first two Spanish telecommunications and broadcasting satellites Hispasat 1A and 1B.

In mid- and end-1992, Hispasat 1A and 1B will be placed in geostationary transfer orbit by an Ariane 4 launched from the Kourou space center in French Guiana. The launch weight of each satellite will be 2,075 kg; they

are built under the prime contractorship of Matra Marconi, under the terms of an international cooperation agreement involving the Satcom consortium (Matra Marconi Espace, Fokker, and British Aerospace), and the Spanish space industry, which will produce more than 30 percent of the complete system.

The multi-mission Hispasat 1A and 1B satellites will provide direct TV broadcasting for Spain and western Europe. These will be the first European satellites to broadcast a television station over a large part of North and South America.

After signing the 76th and 77th contracts since the creation of Arianespace, the company's order books now stand at 34 satellites awaiting launch, with a total value of about 13.9 thousand million Francs, or 278 thousand million pesetas, or 2.36 thousand million U.S. dollars.

Hispasat SA, a new satellite operator, is the 26th Arianespace customer. Since 1980, the company has thus earned the trust of more than 80 percent of satellite user agencies worldwide.

Arianespace is the industrial and commercial company that is responsible for the production of the Ariane launch vehicles. Arianespace also markets and sells Ariane launch services and handles the launches that take place from the Guiana Space Center in French Guiana. Arianespace Inc., a wholly owned subsidiary of Arianespace, is responsible for marketing launch services in the United States; also a liaison office in Tokyo facilitates contacts in Japan and in the Pacific region.

NEW YORK (FEB. 7) PR NEWSWIRE - A&S Investments, Ltd., a British Virgin Islands investment holding company, today filed a Schedule 13D with the Securities and Exchange Commission reporting that Robert A. Clarke, president of A&S and a director of DRX, Inc. (NASDAQ: DTRH), has given notice to the board of directors of DRX of his intention to propose a new slate of directors for the company due to serious disagreement over the management of DRX and its assets.

DRX is engaged in the acquisition, exploration and development of gold and other precious metal mining projects, which are located in California, Arizona, Nevada and the Micronesian Islands.

Clarke said he will be seeking the removal of certain DRX board members,

including Howard Butcher IV, first vice president of Butcher & Co., Philadelphia.

A&S has previously reported a holding of 1,292,475 shares of common stock (including 450,000 shares underlying exercisable warrants) of DRX, Inc. It was further noted that entities associated with Clarke, including A&S Investments, control common stock, options and warrants totaling approximately 2.8 million DRX shares, or 17 percent of the outstanding common stock. A&S does not control the shares, options or warrants owned by the associated entities.

As stated in the Schedule 13D, AMC, a Bermuda company controlled by Clarke is engaged in a dispute with FennoScandia Bank Limited, a U.K. banking corporation.

On Dec. 5, 1989, FennoScandia purportedly foreclosed upon 4,722,085 shares of DRX which it held as collateral for its loan to AMC. AMC subsequently commenced litigation against FennoScandia in the High Court of London.

In a further development, it was reported on Jan. 23, 1990 that a DRX shareholder filed a complaint in Federal Court, Southern District of New York, against FennoScandia Bank Ltd. alleging improper actions by FennoScandia in connection with a loan extended to DRX to finance the acquisition and retention of control stock of DRX. The action seeks damages of $40 million for DRX from FennoScandia.

Robert A. Clarke, the DRX director who until recently was also the company's chairman, president, chief executive officer, had requested that DRX's board of directors commence action against FennoScandia in this matter, but the board of directors failed to take action.

COLUMBIA, MD (FEB. 7) PR NEWSWIRE - The board of directors of RAC Mortgage Investment Corporation (NYSE: RMR) today announced earnings for the fourth quarter of $2.61 million, or $0.18 per share. This represents a 17 percent increase compared to $2.23 million, or $0.16 per share, for the same period in 1988. Net earnings for the year were $124,000, or $0.01 per share, compared to $10.17 million, or $1.02 per share, for the year ended Dec. 31, 1988.

Dividends declared during 1989 were $0.53 per share compared to $1.34 during 1988. The company's level of dividends is determined by its estimate of taxable income for the year.

RAC Mortgage's earnings for 1989 were negatively impacted by the inverted yield curve, a valuation adjustment and losses on the company's hedge position.

Due to the high level of short-term interest rates relative to long- term interest rates throughout the first quarter, a $5.62 million ($0.39 per share) valuation adjustment was recorded on the company's investment in certain mortgage residual interests. In February and April, the company hedged its investment portfolio in relation to the level of short-term interest rates. The hedge position was effected through the sale of Eurodollar futures contracts indexed to short-term interest rates. Losses on the hedge instruments were incurred as short-term interest rates declined in the second quarter. The hedge position was then restructured with the purchase of put and call options.

Earnings improved during the last three months of 1989 as short-term interest rates declined and the company's mortgage loan purchase program experienced strong performance resulting in part from the declining interest rate environment. Earnings for the fourth quarter were reduced by hedge-related costs on short-term borrowings of $1.1 million, or $0.08 per share.

RAC Mortgage recently closed its remaining hedge position. Hedge- related costs on short-term borrowings of $2.2 million, or $0.15 per share, will be charged against earnings during the first half of 1990.

RAC Mortgage is a publicly held real estate investment trust which invests in mortgage loans, mortgage securities, mortgage residual interests and mortgage derivative securities. The company is managed by Ryland Acceptance Corporation, an indirect subsidiary of the Ryland Group, Inc. (NYSE: RYL).

ST. LOUIS (FEB. 7) PR NEWSWIRE - Anheuser-Busch Companies, Inc. (NYSE: BUD), announced today that sales by its brewing subsidiary grew by 2.2 million barrels during 1989, widening the company's lead over its nearest competitor by 700,000 barrels and increasing its market share by one share point to 42.1 percent.

Overall, Anheuser-Busch Companies achieved record sales and earnings during the year, Busch said.

Gross sales totalled $10.28 billion in 1989, an increase of 6.0 percent

over gross sales of $9.71 billion in 1988.

The 1989 results include $802.3 million in federal and state excise taxes, compared with $781.0 million in excise taxes paid during 1988.

Net income for 1989 increased to $767.2 million, 7.2 percent higher than the $715.9 million reported in 1988.

Earnings per share of common stock for 1989 were $2.68, an increase of 9.4 percent over 1988 earnings of $2.45 per share.

The company reported the following financial results for the fourth quarter of 1989:

Gross sales of $2.49 billion, a 5.3 percent increase over the $2.37 billion gross sales achieved during the fourth quarter of 1988.

Net income of $128.1 million, a 2 percent increase over net income of $125.5 million reported during the fourth quarter a year ago.

Earnings of $.45 per share, an increase of 2.3 percent compared with earnings of $.44 per share reported during the fourth quarter of 1988.

MINNEAPOLIS (FEB. 7) PR NEWSWIRE - First Team Sports, Inc. (NASDAQ: FTSP) announced today that it has entered into a four-year license agreement with Wayne Gretzky and his wife, Janet Jones Gretzky. Under the license agreement, the Gretzkys have agreed to promote and endorse the company's line of Ultra-Wheels roller skate products.

David Soderquist, the company's president, said, "We are extremely pleased to have Wayne Gretzky and Janet Jones Gretzky join the Ultra- Wheels team. The Gretzkys are well recognized as being individuals of high profile but more importantly of a lifestyle and character that we at Ultra-Wheels are proud to be associated with. Their mutual interest in fitness, recreation and outdoor activities, conducted as a family place them very high on our list of potential endorsers of our products." Soderquist also noted that Wayne Gretzky was recently named "Athlete of the Decade" by the Associated Press and United Press International.

First Team Sports, Inc., manufactures and distributes high quality in-line roller skates under the trademark ULTRA-WHEELS and SKATE ATTACK and related accessory products. The company's products are manufactured and

assembled to its specifications in the United States and Taiwan. Its products are marketed by independent sales representatives and marketing organizations in North America and parts of Europe and Japan.

#90038p0116 02/07/1990 ~PR Newswire

MESA, AR (FEB. 7) PR NEWSWIRE - McDonnell Douglas Helicopter Co. today announced steps it will take to strengthen its financial position and to lessen the impact of reductions in defense spending.

The steps include elimination or delay of non-critical or discretionary spending, including a proposed plant expansion and a 10 percent reduction in work force.

The company produces Apache attack helicopters for the U.S. Army at a rate of 10 aircraft a month, a rate that will be reduced to six per month in June 1990. Final Apache deliveries to the Army are scheduled for mid-1993.

"Our expanding opportunities for international sales of Apache helicopters continue to be high," said company president William P. Brown. "In the meantime, we must reduce our work force to meet the reality of our delivery schedule with the U.S. Army."

Adding to the need for reductions in spending is a recently announced $137 million write-off on helicopter programs attributed to re-estimated material costs incurred over the life of several government contracts.

The reduction of approximately 400 employees at the company's Mesa facility and 400 at its California Manufacturing Center in Culver City will take place Feb. 21. Those affected would work their last day on Friday, Feb. 23. The company employs 5,900 in Mesa and 1,650 at Culver City.

Outplacement services, including an employment fair, will be offered to displaced employees. Employers from Arizona and Southern California will participate.

The company said in 1989 that it would expand its light helicopter facilities beginning in January 1990 to accommodate production of its new fast-selling MDX and MD 520N/530N helicopters. That plan has been put on hold.

"We will need the facility when full MDX production begins in 1993," Brown said. "Until that time, existing facilities will be used for these programs."

Other elements of the operating budget, including employee travel, participation in industry trade shows, replacement of non-critical equipment and other discretionary spending will be reduced.

HOUSTON (FEB. 7) PR NEWSWIRE - DI Industries, Inc., (AMEX: DRL) announced today that it has filed a registration statement with the Securities and Exchange Commission with respect to the proposed public offering of 2,050,000 shares of its common stock. Of the shares being offered, two million shares will be sold by the company and 50,000 will be sold by a selling shareholder. The number of shares to be offered gives effect to an anticipated one share for four share reverse split of the common stock which is more fully described below. Oppenheimer & Co., Inc. will manage the proposed offering. The net proceeds to the company from the sale of the shares will be added to working capital to be used for general corporate purposes, expected to include enlargement of its active rig fleet by unstacking and refurbishing of inactive rigs, possible future acquisitions, retirement of debt and purchase of an equipment yard.

The company also announced today that it intends to file a proxy statement within the next few days relating to a special meeting of shareholders to be held in early March for the purpose of approving a proposal to amend the company's charter to effect a one for four reverse stock split of the company's common stock. The proposed reverse stock split would take

effect upon the date of signing of the underwriting agreement with respect to the above-mentioned common stock offering.

The company also released today its results of operations for the three months ended Dec. 31, 1989 and for the nine months ended Dec. 31, 1989. Consolidated revenues increased 51 percent to $9,243,000 for the current quarter as compared to $6,123,000 a year ago. The company recorded a loss of ($77,000) for the current quarter as compared to a loss of ($571,000) for the same quarter a year ago (87 percent decrease). Cash flow for the current quarter was a positive $575,000 as compared to a positive cash flow of $63,000 a year ago (up 813 percent). The company reported a loss per share of $(.01) for the current quarter and a loss per share of $(.05) for the nine months ended Dec. 31, 1989, as compared to losses per share of $(.03) and $(.08) for the three months and nine months ended Dec. 31, 1988, respectively.

DI Industries, Inc., headquartered in Houston, is engaged primarily in the business of providing onshore contract drilling and well workover services to firms in the oil and gas industry.

A registration statement with respect to the above-mentioned securities has been filed with the Securities and Exchange Commission but has not yet become effective. Such securities may not be sold nor may offers to buy be accepted prior to the time the registration statement becomes effective. This announcement shall not constitute an offer to sell or the solicitation of an offer to buy, nor shall there be any sale of such securities in any state in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such state.

MIAMI (FEB. 7) PR NEWSWIRE - Eastern Airlines flew 1.52 billion revenue passenger miles in January at a 57.4 percent load factor, the company announced today.

Capacity for the month was 2.65 billion available seat miles and the airline boarded 1.83 million passengers.

The results are not comparable with year-earlier figures because of the reduced level of operations caused by a strike last March and the subsequent restructuring of operations.

Eastern currently schedules about 800 daily flights to 85 domestic and foreign cities, compared with 1,050 departures to 100 cities before the

strike.

#90038p0122 02/07/1990 ~PR Newswire

MEMPHIS, TN (FEB. 7) PR NEWSWIRE - The Promus Companies Incorporated was spun off today on a share for share basis to the stockholders of Holiday Corporation (NYSE: HIA). Trading in the common stock of Promus on the New York Stock Exchange is expected to begin tomorrow on a when-issued basis under the ticker symbol PRI.

Separately, The Promus Companies announced record 1989 operating income at both its gaming and hotel divisions.

The spinoff occurred immediately prior to the closing of the previously announced acquisition by Bass PLC of Holiday Corporation's Holiday Inn hotel division by means of a merger between Holiday Corporation and an indirect wholly owned subsidiary of Bass.

Promus becomes the public parent company of Harrah's casino/hotels and the Embassy Suites, Hampton Inns and Homewood Suites hotel brands. The new company will be managed by Holiday's former senior management team. As a result of the transactions, Holiday stockholders of record at the close of business on Feb. 6, 1990, will receive one share of Promus stock and an approximate quarter-share of Bass PLC ADSs for each Holiday share owned.

Following the spinoff, the Promus board of directors declared a cash dividend of $30 per share to be paid to Promus stockholders of record at the time of spinoff, conditioned upon receipt of acceptable financing. As previously announced, assuming such conditions are satisfied, it is expected that checks for the special dividend will be mailed along with new Promus stock certificates on or about February 22, 1990.

As previously announced, Promus has received verbal assurances for the bank financing which will fund the special cash dividend and provide a working capital and capital expenditure facility for Promus.

As part of the transactions, Holiday Inns, Inc. accepted for payment all of its 10-1/2 percent Notes due 1994, 11 percent Subordinated Debentures due 1999, 15 percent Notes due 1992, 9-3/8 percent Notes due 1993 and 8-3/8 percent Notes due 1996 which were validly tendered and not withdrawn prior to the expiration of Holiday's tender offers for such securities. The tender offers expired at midnight, New York City time, on Tuesday, February 6, 1990. The company anticipates that consent payments will be mailed today and tender payments will be mailed on or about Feb. 9. Approximately $60 million aggregate principal amount of such debt has been

assumed by Promus. The components of Promus bank debt are expected to include a $400 million letter of credit which supports currently outstanding bonds and $610 million in floating rate bank debt, including a $200 million revolving working capital and capital expenditure facility.

Promus also reported record 1989 operating earnings at both its gaming and hotel divisions.

Operating income before property transactions for 1989 rose 10.8 percent to $187.5 million. Income from continuing operations in 1989 rose nearly 20 percent to $154.6 million from 1988's $129.4 million, in each case on a pre-tax basis.

Promus said that its Harrah's gaming group reported record operating earnings for the full year ended December 29, 1989. Gaming operating income was up 10.2 percent for 1989, led by record results at Las Vegas and Atlantic City. Increased volume at each of the Promus casinos combined with effective cost management led to the increase.

OAK BROOK, IL (FEB. 7) PR NEWSWIRE - Chemical Waste Management Inc. (NYSE: CHW) today reported record 1989 net income, earnings per share and revenue.

In the year ended Dec. 31, 1989 the company's net income increased 23.4 percent to $144,243,000, compared with $116,895,000 in 1988; earnings per share gained 22.4 percent to $.71, compared with $.58 in the prior year, and revenue rose 27.4 percent to $891,940,000, compared with $700,197,000 a year earlier.

In the fourth quarter, Chemical Waste Management earned $40,452,000, a gain of 15.3 percent, compared with net income of $35,070,000 in the same period of 1988. Earnings per share in the period rose 17.6 percent to $.20, up from the $.17 in 1988. Revenue of $237,425,000 in 1989's fourth quarter climbed 9.0 percent over the $217,843,000 for the same period one year ago.

"Strong performance in Chemical Waste Management's base business, as well as outstanding contributions from our Environmental Remedial Action division (ENRAC), made 1989 an exceptional year for the company," said Dean L. Buntrock, chairman of the board of Chemical Waste Management.

"Increased customer demand benefited all of our hazardous waste management services and made possible the substantial gains achieved by Chemical

Waste management during 1989," stated Jerry E. Dempsey, president and chief executive officer. "The company also benefited from the increasingly stringent environmental regulations which impact the customers we serve," he said.

"In 1990, Chemical Waste Management expects further gains as a result of the increased incinerator capacity now coming on line to help meet growing customer demand," Dempsey said. "In addition, the growth of site remediation efforts will offer significant opportunities for our ENRAC division in the year ahead," he noted.

The company's recently formed subsidiary, Chem-Nuclear Environmental Services Inc., will provide federal government facilities with site remediation services for hazardous and mixed (radioactive and hazardous) wastes. "During 1990, we expect to put in place expanded resources, and offer comprehensive remediation services to this very large market," Dempsey said.

#90038p0126 02/07/1990 ~PR Newswire

DALLAS (FEB. 7) PR NEWSWIRE - Grace Energy Corporation (NYSE: GEG) today reported 1989 fourth quarter net income of $5.7 million, or 23 cents per share, an increase of 52 percent over fourth quarter 1988 pro forma net income of $3.8 million, or 15 cents per share, primarily due to improvements in its energy services businesses and coal mining operations. Revenues for the 1989 quarter were $112.2 million, up 21 percent from revenues of $92.5 million for the 1988 period.

Grace Energy's pro forma net income for the full year rose 19 percent to $23.6 million, or 96 cents per share, up from $19.9 million, or 81 cents per share, for 1988, due primarily to improved results from its oil, gas and coal businesses. Full-year revenues were $392.7 million, up 10 percent compared to $358.0 million in 1988.

The company's initial public offering took place in August 1989; pro forma amounts reflect the company's operations as if that offering had been completed on Jan. 1, 1988, and exclude the effect on 1988 results of a cumulative accounting adjustment for income taxes.

A Grace Energy spokesman said, "Fourth quarter results were encouraging, and we are optimistic about the fundamentals of our business. We believe that oil and gas prices will increase, and that announced increases in the drilling budgets of several major oil companies should help our energy services businesses. This bodes well for anticipated increases in 1990 cash flow. We will, however, have a difficult time matching 1989 earnings

in 1990 since, as previously announced, losses attributable to Grace Energy's onshore drilling business will no longer be partially absorbed by the minority ownership but will be borne entirely by Grace Energy."

Energy services operating income (income before depreciation, depletion, amortization and taxes) for the 1989 quarter was $4.8 million, up $3.5 million due to higher onshore drilling activity and the performance of offshore drilling rigs added to Grace Offshore's fleet in late 1988 and in 1989. For the full year, operating income was $9.7 million, down 12.5 percent versus the previous year, because of a deterioration in operating income at Homco, partially offset by higher operating profits at Grace Offshore and reduced operating losses at Grace Drilling.

For the fourth quarter, ended Dec. 31, 1989, operating income from Grace Energy's oil and gas business rose to $13.3 million, 6 percent higher than for the 1988 period. For the full year 1989, operating income was $60.2 million, up $4.8 million or 9 percent due to $1.1 million higher pretax income on gas contract settlements, increased gas sales and higher oil prices.

Grace Energy Corporation, headquartered in Dallas (and an 83.4 percent-owned subsidiary of W. R. Grace & Co.), is a diversified energy holding company whose subsidiaries are engaged in supplying services and equipment to the petroleum industry; in the exploration for and development of oil and natural gas; and in coal mining.

MT. PROSPECT, IL (FEB. 7) PR NEWSWIRE - Zenith Data Systems' MinisPort notebook computer will be available this month through Montgomery Ward's larger "Electric Avenue" home electronics departments, under an agreement announced today by the two companies. Terms of the agreement were not disclosed.

"Montgomery Ward represents a major step forward in reaching the growing home-office market with our more mainstream products," said ZDS Vice President of Sales Robert Poznanovich.

"We're delighted that Montgomery Ward will participate in our new distribution strategy. This strategy includes select products through a few, key national merchandisers to reach the home-office market and providing our full line of products through about 500 'medallion' computer resellers who will focus on the business market," he said.

Montgomery Ward will offer the 5.9-pound MinisPort Model 2, which runs for

more than four hours on a rechargeable battery and features a 1.4-megabyte silicon drive in addition to its 2-inch floppy drive. A backlit liquid crystal screen ensures good readability in all lighting conditions. The system operates with an 80C88 processor running at 8 megahertz and includes 640 kilobytes of random access memory.

Montgomery Ward's Vice President of Electric Avenue John Bevan said, "We believe there will be wide appeal for the MinisPort, which is part of the industry's best-selling line of portable computers. This notebook computer offers tremendous flexibility and performance for students, commuters and virtually anyone on the go. It fills an important segment within our complete offering of personal computers."

Montgomery Ward operates more than 300 Electric Avenue specialty stores in 39 states.

ZDS, a Groupe Bull company, is a leading manufacturer and marketer of portable and desktop microcomputers and monitors for single- and multi-user applications. With headquarters in Mount Prospect, Ill., and principal final assembly operations in St. Joseph, Mich., ZDS has manufacturing and sales facilities in more than 20 countries.

ANN ARBOR, MI (FEB. 7) PR NEWSWIRE - The board of directors of Interface Systems, Inc. (NASDAQ-NMS: INTF) has authorized the company to repurchase shares of its own common stock, announced Carl L. Bixby, the company's CEO and board chairman, today.

According to Bixby, Interface Systems will repurchase up to 100,000 shares of its common stock in open market transactions. "Our stock is undervalued," he said, "and we believe a repurchase program is in the best interest of the company and our shareholders."

At the end of trading on Tuesday, Feb. 6, Interface Systems' common stock sold for $4.625 per share on the NASDAQ-NMS exchange.

Interface Systems is a diversified manufacturer of high-technology products. The company and its subsidiaries manufacture industrial-grade computers and computer terminals, called industrial workstations; plug-compatible printers for users of IBM mainframe and midrange computer systems; remote high-speed PC-to-mainframe data communications systems; and custom-printed circuit boards.

Interface Systems recently reported increased revenues and reduced earnings for the first quarter of fiscal 1990, which ended on Dec. 31, 1989, for the company.

Revenues for the quarter were $8,703,349, up 51.6 percent from last year's first-quarter revenues of $5,739,424. Net earnings dropped 23.7 percent to $411,214, or $0.10 per share, from $539,297, or $0.13 per share, for the same period last fiscal year.

For fiscal 1989, Interface Systems reported revenues of $32,274,927, up 27.6 percent from $25,302,896 in fiscal 1988. Net earnings for fiscal 1989 were $2,884,140, or $0.67 per share, compared to $3,204,235, or $0.74 per share, in fiscal 1988.

#90038p0130 02/07/1990 ~PR Newswire

SAN FRANCISCO (FEB. 7) PR NEWSWIRE - Sage Software, Inc. (NASDAQ-NMS: SGSI) today announced a major enhancement to PLink86+, the industry standard overlay linker.

PLink/LTO completely automates the task of generating optimal overlay structures for even the most complex programs. PLink/LTO, with "Link-Time Optimization," adds two additional development tools to the best selling PLink86+ overlay linker: Overlay Architect and Overlay Optimizer. These tools can optimize programs for fast execution speed and minimal memory usage.

Saves Memory. The Overlay Architect automates the task of designing overlay structures that compress a program into the smallest possible amount of memory. It works by analyzing the structure of an application directly from its object code. Because Overlay Architect analyzes object code instead of source code, it is language independent. It works with any language compiler that follows Microsoft's object module and procedure calling conventions. It includes special support, however, for many of the advanced programming techniques used by C programmers, including indirect calls (calls through function pointers), interrupt handlers and multitasking. It is capable of handling over 16,000 modules and over 16,000 code symbols.

Automatic Performance Tuning. The Overlay Optimizer is an execution profiler designed specifically for fine tuning the performance of overlaid applications. It uses the PLink MAP file and the debug output of a sample run of the program to be optimized. The user specifies the size to which the program can be allowed to grow (an increase of only a few percent in size often permits a tremendous execution speed enhancement). Overlay

Optimizer then creates a link response file reflecting the performance-tuned overlay structure. Overlay Optimizer is also language independent.

Sage Software acquired PLink86+ in August of 1989. PLink/LTO is the first major enhancement to the product announced by Sage. According to Doug Root, vice president of marketing: "PLink/LTO is a major leap forward in improving the ease of use and power of PLink86+. This announcement also demonstrates Sage's commitment to support over 19,000 PLink users all over the world and to keep PLink the number one choice of professional developers."

Special Offer for PLink86+ Users. The single-user license for PLink/LTO is priced at $695 with Sage's customary attractive "Per User" Licensing available. Users of PLink86+ can upgrade to PLink/LTO for $200. "Since we acquired PLink86+ from Phoenix Technologies, we don't have a complete list of all PLink users," Root stated. "Because of this, we are allowing anyone who sends us a PLink disk or the copyright page from a PLink User's Manual, or a screen dump showing the PLink copyright message (no matter which version of PLink they have) to upgrade to PLink/LTO for only $200."

For more information, call Sage Software at 800-547-4000, or 503- 645-4576 (fax).

NOTE: PLink/LTO, Link-Time Optimization, Overlay Architect and Overlay Optimizer are all trade marks.

CONTACT: Doug Root, vice president marketing, 800-547-4000; or Lin Pearce executive vice president, 301-230-3200, both of Sage Software

DETROIT (FEB. 7) PR NEWSWIRE - Ford Motor Company (NYSE: F) has announced the appointment of two new plant managers in its Transmission & Chassis Division.

James R. Schafer has been appointed manager of the company's Batavia (Ohio) Transmission Plant, succeeding Alex P. Ver. Stanley Knight has been named manager of the Indianapolis Plant, replacing James M. Poe.

Schafer has been the Batavia plant's manufacturing manager since 1989, going there from a similar post at the Sharonville (Ohio) Transmission Plant. Schafer joined the company in 1960. He is a longtime resident of the Cincinnati area, having come to Sharonville in 1973. Schafer holds a bachelor's degree in business administration from Bowling Green State University.

Knight was formerly assistant manager of the Cleveland Engine Plants. He joined the company in 1972 at the Fairfax (Ohio) Transmission Plant. In 1980, he was named production manager at the Indianapolis Plant before being assigned to Cleveland in 1986. Knight earned a B.S. in industrial management from the University of Dayton and an M.S. in industrial administration from Purdue University.

Poe and Ver have been appointed component program managers for two new products currently under development. In their new positions, Poe and Ver will be responsible for product and manufacturing engineering of the products, finance and interface with plants and other company operations.

Poe joined the company in 1961 at the Sterling (Sterling Heights, Mich.) Plant. He was named manager of Ford's Indianapolis Plant in 1984, a position he held until his present assignment. He holds a B.S. in mechanical engineering from the University of Michigan and an M.B.A. from Michigan State University.

Ver joined Ford in 1972 in the company's Paint & Vinyl Operations. In 1986 he joined Transmission & Chassis Division as manager of the quality office until he was named manager at Batavia in 1987. Ver earned a B.S. in chemical engineering from the Illinois Institute of Technology and a master's degree in manufacturing management from Ohio State University.

YORKTOWN HEIGHTS, N.Y. (FEB. 7) PR NEWSWIRE - A computer model for studying the brain has unexpectedly produced -- on its own -- electrical waves like those actually found in the brain itself. The unique, supercomputer-based model generated this surprising result in tests conducted recently by its developers, IBM scientist Roger Traub, M.D., and Columbia University researchers Richard Miles, Ph.D., and Robert K.S. Wong Ph.D.

The computer model was designed to imitate 10,000 cells in the brain's hippocampus, an area that's essential for the information of new memories and the origin of many epileptic episodes. Using the model, the scientists can simulate how the hippocampus works and study, in a controlled environment, some of the medical benefits that the increased understanding of epilepsy could bring. This study may also suggest new ways for designing tomorrow's computers.

The study is being run on an IBM 3090 supercomputer at the Thomas J. Watson Research Center here. The computer model is the first one of its kind to be based in detail on how scientists believe brain cells work in

mammals.

"This constitutes a new human endeavor," says Traub, who is trained both in mathematics and in neurology. "When I was starting out," he says, "we only used the model to confirm things we saw in the lab. Now we are beginning to do experiments on it as if were an organism in its own right."

Perhaps the most startling aspect of the waves -- technically known as population oscillations -- is that no one understands precisely how they are generated either by the supercomputer model or by the brain.

The fact that the waves spontaneously arose in the supercomputer model, however, gives the scientists potent evidence that their model is accurate in its simulation of brain activity. The next step is to use the model to discover the waves' cause and function.

The research began 10 years ago as an attempt to understand epilepsy. The study has already yielded valuable and unexpected insights into the disease.

For example, the study provided a surprising answer to the long- standing puzzle over what starts an "interictal spike." (An interictal spike is an abnormal burst of activity in a group of neurons. It indicates a propensity for that group of neurons to initiate a seizure.) Traub's computer model revealed that an impulse from a single neuron (brain cell) may under certain conditions start a chain reaction that can quickly excite an entire population of brain cells into the synchronized firing that constitutes an interictal spike.

In the future, Traub and his collaborators believe, the model could provide insight into certain aspects of how the brain works and help solve some of the mysteries of how people think, learn and remember.

GLASTONBURY, CT (FEB. 7) PR NEWSWIRE - DataImage, Inc. (NASDAQ: DATA) of Glastonbury, announced today an agreement with LanVision, Inc., of Cincinnati, Ohio, to establish a value added reseller (VAR) relationship whereby LanVision will market DataImage's integrated systems for image processing in the Mid-West and primarily to the healthcare industry. LanVision has purchased from DataImage a standalone demonstration system with its complementary developmental and software applications to assist it in its marketing efforts. LanVision has also purchased form DataImage the full use of its Function Library, consisting of more than 500

utilities custom designed to integrate and drive the image-processing systems sold by DataImage. In a separate transaction, DataImage will purchase a 5 percent equity ownership in LanVision.

Robert Brasher, president of DataImage, said that "We are excited about the prospects of working with the LanVision professionals, who have specialized experience marketing document management systems to the healthcare industry. This new powerful affiliation with LanVision, which is headquartered in the Mid-West, represents a meaningful development in DataImage's sales and marketing efforts. With in excess of 25 image-processing installations in the Northeast from one sales office in Connecticut, we feel confident that our association with LanVision in Ohio will allow for a quicker entry into the Mid-West markets than we had previously planned."

Brian Patsy, president of LanVision, expressed his "enthusiasm for the strategic alliance between DataImage and LanVision, which is in answer to the expanding need for image-processing the Mid-West and especially in the healthcare industry. LanVision will now have access to the technological expertise of a successful image-processing integrator such as DataImage, which will, in turn, have the marketing advantage of LanVision's specialty and know-how in the healthcare and medical records markets. The synergistic marketing opportunities for both companies are expansive."

As a systems integrator of hardware and software components, DataImage, Inc. designs, assembles, installs and maintains image processing systems. The company's image-processing system captures, indexes, manages, files, retrieves, and re-files text, data, and images (non-computerized information). Since July 1987, DataImage has sold more than 25 systems to corporate customers including Fortune 500 companies, financial institutions, insurance companies and a regional brokerage house.

NEW YORK (FEB. 7) PR NEWSWIRE - The American Stock Exchange announced that Southern Union Company of Austin, Texas, began trading 5,285,000 common shares today. Southern Union Company is an energy company that distributes and markets natural gas as a public utility in Texas, Arizona and Oklahoma.

Trading under ticker symbol SUG, the common stock opened on 1,400 shares at 19.

As a result of a special dividend and subsequent merger as previously announced by Southern Union Company and Metro Mobile CTS, Inc., Southern

Union Company common stock was issued, effective yesterday, to Metro Mobile shareholders of record on Jan. 22, 1990. An Amex-listed company, Metro Mobile of New York City, is the nation's third largest owner and operator of cellular telephone systems not affiliated with a landline telephone company.

Each Metro Mobile shareholder will receive one share of common stock of "new" Southern Union Company for each four Class A and/or B common shares of Metro Mobile common stock.

Southern Union Company primarily operates through its Southern Union Gas Company division, which distributes and markets natural gas as a public utility in Austin, El Paso, Galveston and Port Arthur, Texas; most of northern Arizona; and parts of the Oklahoma panhandle.

OAK BROOK, IL (FEB. 7) PR NEWSWIRE - Joseph J. Ross, 44, was elected chairman of Federal Signal Corp. (NYSE: FSS) by its board of directors, it was announced today.

Ross has been president, chief executive officer and a director of Federal Signal for the past two years. Previously, he also served as the company's chief operating officer. The office of chairman had been vacant since the death of the previous chairman in 1987.

Thomas N. McGowen Jr., chairman of the executive committee of Federal Signal's board of directors, commented that Ross was elected chairman in

recognition of his leadership over the past three years, during which the company's record performance included sales growth to $414 million from $285 million and an increase in net earnings to $23 million from $11.8 million. Also under Ross' direction, the company has declared two 10 percent stock dividends and a 3-for-2 stock split, as well as yearly increases in the cash dividend. McGowen added that the board of directors looks forward to additional Federal Signal growth and profitability under Ross' leadership.

Ross was named president of Federal in 1986. He joined the company in 1983, serving in various capacities including vice president, general counsel and secretary.

Before joining Federal Signal, Ross served as general counsel for Sunbeam Corp. Ross graduated from St. Mary's College in Winona, Minn., received his law degree from DePaul University in Chicago and attended the Stanford Executive Program sponsored by the university's Graduate School of Business.

Federal Signal Corp., listed on the New York Stock Exchange, is a manufacturer and worldwide supplier of public safety, signaling and communications equipment, emergency and street sweeping vehicles, parking control equipment, signs and electronic message displays, carbide cutting tools, precision punches and related die components.

NEW YORK (FEB. 7) PR NEWSWIRE - Siemens announced today the signing on Feb. 1, 1990, of a stock purchase agreement with Los Angeles-based ARCO for the acquisition of ARCO Solar, Inc., an ARCO subsidiary. This follows a memorandum of understanding concluded on July 25, 1989.

The transaction is expected to close on Feb. 28, 1990. At the time of closing, the company will be known as Siemens Solar Industries and will maintain its headquarters in Camarillo, Calif.

The company was founded in 1977. It is a leading manufacturer of photovoltaic products serving customers in more than 100 countries.

Siemens Solar Industries will be part of Siemens group of U.S. companies. Siemens U.S. operations employ more than 30,000 people at 50 manufacturing and more than 450 sales and service locations nationwide. Sales for Siemens U.S. operations last year were $3.1 billion.

SYRACUSE, N.Y. (FEB. 7) PR NEWSWIRE - Anaren Microwave Inc. (NASDAQ: ANEN) has received orders in the past week from a foreign contractor and an agency of the U.S. Air Force totaling in excess of $7 million for digital electronic support measures (ESM) receiver systems. Designed as the key sensor for naval shipboard self-defense systems, an ESM detects, locates and identifies enemy radar signals so evasive maneuvers or protective countermeasures may be employed.

Racal Defence Electronics (Radar) Ltd. of England placed an order for 10 ESM systems plus spares and ancillary equipment worth $6.45 million. The units will be installed on fast patrol boats and frigates, principally of NATO allied countries, with deliveries scheduled through October 1991. Racal is Anaren's largest foreign customer.

A single unit purchased last week by the Air Force at a contract price of approximately $575,000 will be used for operational test and evaluation.

Upon completion of these orders Anaren will have delivered 77 ESM systems worldwide. The two orders bring Anaren's total backlog at January 31, 1990, to just over $24 million, compared to a backlog of $12.4 million at June 30, 1989, the end of the company's last fiscal year.

Anaren, headquartered in Syracuse, N.Y., designs and manufactures microwave systems and subsystems for use in the electronic defense of ships, aircraft and tactical land vehicles. The stock of the company is traded on the NASDAQ National Over-the-Counter market under the symbol ANEN.

OAKLAND, NJ (FEB. 7) PR NEWSWIRE - Diagnostic/Retrieval Systems, Inc. (AMEX: DRS.A, DRS.B) today reported lower revenues and earnings for the third quarter ended Dec. 31, 1989.

Net earnings for the quarter were $291,000, or $.05 per share, compared with net earnings of $860,000, or $.15 per share, for the same period a year earlier. Revenues declined to $12,117,000, a 29 percent decrease from revenues of $17,052,000, for the same three-month period last year.

For the first nine months of fiscal 1990, the company recorded a net loss of $(5,781,000), or $(1.03) per share, compared with net earnings of $3,091,000, or $.55 per share, for the same period in the previous year. Revenues for the nine-month period were $38,026,000, down 25 percent from revenues of $50,903,000, for the first three quarters of fiscal 1989.

Backlog at Dec. 31, 1989 as approximately $59 million, 19 percent less than backlog of approximately $73 million at the same time last year.

The decrease in revenues was due primarily to slower-than- anticipated shipments of signal processing and recording systems, in addition to U.S. Government procurement delays associated with the Advanced Video Processor (AVP) program.

The decline in earnings was attributable to both lower revenues and lower operating margins associated with the company's current business mix of predominantly development-type contracts during the quarter.

According to Leonard Newman, chairman and chief executive officer, "Results for the third quarter were affected by continued margin pressure associated with technical difficulties and delays on the AVP program."

The AVP program was awarded to DRS in 1987. For this program, the company is producing state-of-the-art display workstations for installation on U.S. Navy ships.

Newman added, "Although the company continues to experience delays in the

receipt of certain production contracts, the outlook for the remainder of the fiscal year is expected to improve with the increased shipments of signal processing and recording products."

Diagnostic/Retrieval Systems, Inc. designs and manufactures special-purpose computer and display systems, as well as recording, trainer and optical systems for military and industrial applications.

TROY, MI (FEB. 7) PR NEWSWIRE - Kelly Services, Inc. (NASDAQ: KELYA, KELYB), the nation's largest temporary help firm, today announced record sales and earnings for 1989. This marks the sixth consecutive year that the company has reported record annual sales and earnings.

Terence E. Adderley, Kelly Services President and CEO, announced that sales for the year ended Dec. 31, 1989, reached a record $1.38 billion, an increase of 9 percent over the $1.27 billion reported in 1988.

Net earnings of $70.8 million were also a record and 17 percent higher than the $60.3 million reported for 1988. Earnings per share, after adjusting for the 5-for-4 stock split announced in May of 1989, amounted to $2.36 per share versus $2.01 per share in 1988.

The company's fourth quarter of 1989 was the 27th consecutive period in which sales and earnings exceeded those of the corresponding quarter of the previous year.

Record sales for the fourth quarter were $352 million, an increase of 9 percent over the $322 million reported for the corresponding period in 1988. Net earnings of $16.5 million were also a fourth-quarter record and 14 percent higher than the $14.5 million reported for 1988. Earnings per share for the quarter amounted to 55 cents in 1989 versus 48 cents a year earlier.

"We expect that the use of temporary help will continue to grow at an above-average rate well into the 1990s," Adderley said. "The dramatic increase in sales and earnings which we experienced in the 1980s has positioned us well for the 1990s."

Kelly Services, the Troy-based international temporary help company with more than 950 offices worldwide, provides temporary employees in the areas of office, marketing, light industrial, and technical through its Kelly Temporary Services Division and home care to the elderly through Kelly Assisted Living(R). In its 42nd Annual Report on American Industry, Forbes magazine recently selected Kelly Services as the Best Business Services and Supply Company for the 1990s. Kelly was one of 20 American companies chosen by Forbes as best prepared for the 1990s.

Comparative sales and earnings for the fourth quarters and years of 1989 and 1988 were:

CAMBRIDGE, MA (FEB. 7) PR NEWSWIRE - T Cell Sciences, Inc., (NASDAQ: TCEL), announced today that it received in excess of $3.0 million dollars as a result of the exercise of approximately 90 percent of the total outstanding publicly traded warrants and the similar warrants underlying the separately issued underwriters' warrants. The warrants were exercised in response to the company's notification to holders of its intention to redeem all publicly held warrants not exercised prior to the close of business at 5 p.m. New York City time on Feb. 5, 1990.

"These funds enhance our financial strength and will enable us to expand our therapeutic product development efforts in soluble and T cell receptor technology," said James D. Grant, chairman and chief executive Officer of T Cell Sciences. "These efforts have already yielded potentially important drugs for the treatment of heart disease and rheumatoid arthritis, as well as an FDA-approved diagnostic product and 17 research products now marketed to the scientific community."

All unexercised warrants will be redeemed by the company at a price of $.10 per warrant.

Utilizing proprietary T cell receptor and soluble receptor technology, T Cell Sciences, Inc. is developing pharmaceutical products to treat heart disease and autoimmune diseases as well as products for diagnosing and monitoring immune system disorders and cancer. Located in Cambridge, Mass., the company currently markets products to the scientific community and an FDA-approved test kit to the diagnostic market.

MT. HOLLY, N.J. (FEB. 7) PR NEWSWIRE - Franklin Computer Corp. (NASDAQ-NMS: FDOS) today announced a loss of $973,000 or $.15 per share for the third quarter ended Dec. 31, 1989, compared with earnings of $3,726,000 or $.58 per share for the same quarter one year ago.

Sales for the quarter were flat at $23,492,000 as compared to sales of $23,629,000 in the same quarter in 1988.

For the nine months ended Dec. 31, 1989, the company reported a loss of $839,000 or $.13 per share compared with earnings of $7,754,000 or $1.20 per share one year ago. Sales of $55,781,000 in the period were slightly higher than the sales level of $54,058,000 for the nine months one year ago.

Morton E. David, Franklin's president, said, "Franklin is in a difficult period. Sales of electronic reference products did not meet expectations and competition was especially fierce during the Christmas selling season. We continue to see softness in electronics and conservatism in the inventory levels maintained by retailers. We expect these difficult conditions to continue at least for the next six months."

David added: "Franklin has taken steps to reduce costs by relocating personnel and consolidating facilities. We expect increasing sales and improved gross margins to favorably impact results later in 1990."

CONTACT: Morton E. David, president, or Gregory J. Winsky, vice president, 609-261-4800, both of Franklin Computer

#90038p0164 02/07/1990 ~PR Newswire

BALTIMORE (FEB. 7) PR NEWSWIRE - USF&G Corporation (NYSE: FG) today reported consolidated net income for the fourth quarter of 1989 of $104.5 million, or $1.20 per share, compared with net income of $53.4 million, or 60 cents per share, for the same period in 1988.

For the full year 1989, net income totaled $119.1 million, or $1.24 per share, compared with $247 million, or $2.85 per share, for the 1988 period. The decline in net income for the year was primarily related to catastrophes and the downward pressure on rates during the soft market experienced in 1989.

Operating income, which excludes realized capital gains and losses, for the fourth quarter of 1989 was $52.8 million, or 58 cents per share, compared with $79.5 million, or 92 cents per share, for the 1988 period. For the year, operating income was $146.6 million, or $1.57 per share, vs. $305.7 million, or $3.57 per share.

Revenues for the 1989 fourth quarter were $1.3 billion and for the 12 months ended Dec. 31, 1989, totaled $4.7 billion. Consolidated net investment income reached $239.4 million for the 1989 fourth quarter and $898.3 million for the 12 months, an increase of 15.9 percent and 15.5 percent, respectively.

As of Dec. 31, 1989, assets were $13.6 billion, and shareholders' equity totaled $2 billion, or $21.60 per share.

In his quarterly message to shareholders, Jack Moseley, chairman of the board, president and chief executive officer of USF&G Corporation, reviewed the operating results of 1989. The text of his message follows:

I would like to take the opportunity in this shareholders' message to review 1989 with you. At the beginning of the year, we knew we were well into the downside of the property/casualty cycle. While we expected a difficult year, financial results were worse than we had anticipated because of multiple natural disasters. On the other hand, there are many factors over which we have considerable influence that will lead to improved financial results. It is these factors on which we have concentrated our efforts in order to ensure that 1989 results are the exception, not the rule.

Baltimore-based USF&G Corporation is composed of subsidiaries engaged in writing property/casualty and life insurance and in the sale of financial services. The corporation's principal subsidiary is United States Fidelity and Guaranty Company.

NEW YORK (FEB. 7) PR NEWSWIRE - The Global Utility Fund today issued the following February monthly update:

Investment adviser commentary:

-- After one month of operation, 63 percent of the fund's assets are invested in utility securities and 37 percent is held in cash.

-- Unanticipated increases in interest rates around the world carried equity markets lower in January. Major world stock markets declined 5 percent on average, with the U.S. market down 7 percent. U.S. utility stocks declined approximately 10 percent. We regard this weakness as a buying opportunity for the fund.

-- Our thesis is intact: utilities should do relatively well in our expected environment of moderate economic growth, lower inflation and lower interest rates. Overseas, the scheduled unification of Europe in 1992 presents promising long-term investment opportunities for the fund. Privatization of utilities in Europe and the Far East is also expected to provide the fund with access to investment candidates with the potential for attractive long-term total return.

The Global Utility Fund, Inc. is a diversified closed-end management investment company whose investment objective is to provide total return, without incurring undue risk, by investing primarily in income- producing equity and debt securities of domestic and foreign companies in the utility industries. The fund's investment manager is Wellington Management Company. On Dec. 29, 1989, the fund issued 13.4 million shares of common stock in connection with its initial public offering. On Jan. 25 1990, the fund's underwriters exercised their option to purchase 2.01 million additional shares of the fund's common stock.

NEW YORK (FEB. 7) PR NEWSWIRE - A final liquidation sale covering all merchandise, fixtures and equipment in 67 remaining Foxmoor junior apparel stores officially gets under way today when advertising breaks in the stores' local markets.

The stores are located in Pennsylvania, Ohio, Maryland, Michigan, Minnesota, Indiana, Illinois, Wisconsin, Iowa, Missouri, Tennessee and Kentucky. The inventory, which is valued at approximately $12 million at retail, was consolidated in the 67 units from 282 stores that were closed last month after the Dylex Ltd. division filed for Chapter 11 protection under the federal bankruptcy code. The sale is expected to be concluded before the end of this month.

Under the program developed by liquidation consultants Buxbaum, Ginsberg & Associates, Encino, Ca., a maximum price of $14.99 has been set for all apparel. The merchandise originally retailed for $20 to $60. All outerwear, now priced under $50, originally sold for up to $220.

An initial test of the program, which deviates from traditional retail

liquidation practices of progressive discounts, contributed to 100 percent-plus gains in daily sales last weekend without the benefit of media advertising, according to Buxbaum-Ginsberg chairman David Buxbaum. Nearly $1 million in sales were posted during the first four days, he reported.

"Sales have exceeded expectations," said Harvey Needles, executive v.p.-director of store operations at Foxmoor. Other factors contributing to the increases were the influx of merchandise from the 282 stores and the installation of "going-out-of-business" signs at all locations, Needles added.

Foxmoor, which operated 604 stores last year, recently sold 207 locations to Edison Bros. Remaining leases are being sold by Keen Realty, Great Neck, N.Y. Parent company Dylex operates 15 specialty retail chains in the U.S. and Canada, including the Wet Seal and NBO Menswear chains in this country. Previously owned by Melville Corp., Foxmoor had been in business for over 20 years.

CHAPEL HILL, NC (FEB. 7) PR NEWSWIRE - The following is a letter to the stockholders of Kenan Transport Company (NASDAQ: KTCO):

To Our Stockholders:

Revenue for the fourth quarter of 1989 was $12,103,000 compared to $12,129,000 in the fourth quarter of 1988. Net income was $743,000, a decrease of $137,000 and 16 percent. Earnings per share were $.32 compared to $.37.

Revenue for the year was $46,271,000, a $1,314,000 and 3 percent decrease from 1988. Income before the effect of a change in accounting principle was $2,510,000, a decrease of $412,000 and 14 percent. Earnings per share before the effect of the accounting change were $1.07 compared to $1.24. The accounting change was recorded in 1988 to reflect the cumulative effect of a change in accounting for income taxes in accordance with the Financial Accounting Standards Board's Statement of Accounting for Income Taxes.

Revenue for the fourth quarter was comparable with the fourth quarter of 1988, as we were successful in replacing the revenue lost beginning in the third quarter due to the effect of changes in traffic patterns of

chemicals transported for a major customer. Growth in our petroleum transportation revenue resulting from new customers and higher volumes with existing customers made the revenue replacement possible. Operating costs were impacted by the rapid increase in diesel fuel prices during the quarter. Fuel prices were 38 percent higher than the fourth quarter of 1988. Freight rate increases to offset the higher costs for fuel became effective after year-end. The operating ratio was 89.8 percent, again placing your Company among the most efficient in the trucking industry.

WINSTON-SALEM, NC (FEB. 7) PR NEWSWIRE - Manufactured Homes, Inc. (AMEX: MNH) announced today that the company has entered into an agreement with The Prudential Insurance Company of America (Prudential) for the restructuring of its $47.4 million debt. The restructuring requires that company to immediately pay $2 million on the $8.4 million revolving credit note. Prudential has given the company a 90-day option to obtain an acceptable third party who will purchase for $3 million cash the remaining debt of approximately $45.4 million. The third party will cancel all debt in excess of $3 million which will mean a cancellation of $42.4 million in debt to the company. If the company gets a third party which is not acceptable to Prudential, 90-day extension periods will be granted but in no case will the extension run beyond Nov. 1, 1990. In addition to the $5 million cash received by Prudential, they will also receive Class B common stock equal to a 25 percent fully diluted equity interest in the company after the restructuring is complete.

Prudential has agreed that during the period Jan. 1 to May 1, 1990 there will be no interest charge on any of the debt and that all payments are suspended until May 1, 1990. If the company does not obtain an acceptable third party during the option period, the total debt is accelerated and becomes immediately due and payable.

The impact of a such a restructure would reduce the company's debt by $42.4 million and eliminate annual interest payments of $4.1 million.

#90038p0181 02/07/1990 ~PR Newswire

JACKSON, MI (FEB. 7) PR NEWSWIRE - Consumers Power Company's residential electric rates continue to be lower than 80 percent of the nation's utilities, according to two new independent surveys.

Of 187 utilities surveyed nationwide by the National Association of Regulatory Utility Commissioners (NARUC) for winter 1988-89 electric bills 155, or 83 percent, charged rates higher than Consumers Power for a typical residential customer using 500 kilowatt-hours per month. At an average cost of $32.17, Consumers Power's typical monthly bill was 20 percent lower than the NARUC survey's national average and 18 percent lower than the Midwest average.

A second independent survey, conducted by the Edison Electric Institute (EEI), shows that 171 of 211 utilities throughout the country, or 81 percent, charge more for 500 kilowatt-hour monthly residential electric service than Consumers Power. Based on July 1989 rates and fuel costs, Consumers Power's typical residential electric bill was $32.05, more than 23 percent below the EEI study's national average.

"Consumers Power is in the lower one-fifth of all utility residential rates nationally and continues to be the lowest-cost major supplier of electricity in Michigan," said Frederick W. Buckman, the utility's president and chief operating officer. "These two studies demonstrate our commitment to maintaining competitive rates and keeping costs as low as possible," Buckman said.

According to the NARUC survey, Consumers Power's typical residential customer's average cost of power per kilowatt-hour last winter was 6.4 cents, compared with a nationwide average of 8.07 cents. The Midwest average was 7.8 cents. The survey compares the largest service territories of major investor-owned electric utilities in 49 states and the District of Columbia. NARUC is a nonprofit organization whose members include regulatory bodies of the 50 states, the District of Columbia, Puerto Rico and the Virgin Islands.

The EEI survey indicates Consumers Power's typical residential customer pays $9.84 less than the national average and $9.90 less than the east north central average. EEI is the national association of investor-owned electric utilities.

Consumers Power Company, the principal subsidiary of CMS Energy Corporation (NYSE: CMS), is Michigan's largest utility, serving almost 6 million of the state's 9 million residents in 67 of the 68 Lower Peninsula counties.

#90038p0186 02/07/1990 ~PR Newswire

EDEN, NC (FEB. 7) PR NEWSWIRE - Fieldcrest Cannon Inc. (NYSE: FLD) today

announced sales and earnings for the fourth quarter and year 1989.

Net income for the fourth quarter of 1989 was $8.2 million or 80 cents per share compared to $5.1 million or 50 cents per share in the same quarter of last year. Fourth quarter sales were $377 million, an increase of 3 percent from sales of $368 million last year. Sales from bed and bath division products increased 8 percent for the quarter while carpet and rug division sales were off 11 percent.

Bed and bath division operating results improved significantly, compared to the fourth quarter of 1988, because of higher sales, better mill activity, lower manufacturing costs, and an improved product mix. The carpet and rug division incurred a loss in the fourth quarter about equal to the loss experienced in the last quarter of 1988. Lower carpet sales have affected the division's performance throughout the year.

Net income for 1989 was $23.4 million or $2.28 per share compared to $11.3 million or $1.10 per share in 1988. Total sales for 1989 were up 2 percent to $1.4 billion.

Fieldcrest Cannon is one of the largest suppliers to Federated Department Stores Inc. and Allied Department Stores Corp. On Jan. 15, Federated and Allied filed for protection from creditors under Chapter 11 of the Federal Bankruptcy Code. As a result, bad debt reserves were increased in the fourth quarter by $2.5 million pre-tax, to provide for possible losses on accounts receivable from the stores in the Federated and Allied group.

During the fourth quarter, the company sold certain assets not required for on-going operations, which increased pre-tax income by $2.1 million.

Fieldcrest Cannon Inc. manufactures and markets bed and bath products under the Fieldcrest, St. Marys, Royal Family, Monticello, and private brand labels. Carpet and rug division products include high quality woven and tufted carpets and rugs marketed under the Karastan, Bigelow, Sanford, Cannon and private brand labels.

#90038p0188 02/07/1990 ~PR Newswire

BRYN MAWR, PA (FEB. 7) PR NEWSWIRE - Philadelphia Suburban Corp. (NYSE: PSC) today reported earnings for the fourth quarter of $2.1 million, or $.28 per share, compared to $3 million, or $.41 per share for the same period in 1988.

For the year, earnings were $7.8 million, or $1.05 per share, compared to $8.5 million or $1.17 per share in 1988.

Revenues for the fourth quarter of 1989 and the year totaled $34.6 million and $133.5 million, respectively, compared to $35 million and $125.9 million, respectively, in the fourth quarter and year in 1988.

Philadelphia Suburban Water Co. experienced increased costs during the fourth quarter of 1989 compared to the same period in 1988. PSC's non-regulated business units did not match the results of operations achieved in the fourth quarter of 1988. As a result of these factors, earnings in the fourth quarter of 1989 were lower than those reported in the 1988 period, but were in line with expectations.

Earnings in the company's water utility subsidiary for the year 1989 were affected by relatively cool, wet weather during the spring and summer which caused reduced water use. This was offset by income received by the water utility which related to claims for damages. The non-regulated companies had reduced income for the full year 1989.

John W. Boyer Jr., president and chairman of Philadelphia Suburban Corp., said, "While 1989 was a disappointing year, the outlook for 1990 is improved, considering the recent 9 percent increase in water rates awarded as a result of the request made by the company's water utility subsidiary in April of 1989." On Jan. 29, 1990, PSC announced an increase in its

quarterly dividend to an annual rate of $1 per share compared to $.94 paid previously. Boyer added, "The new dividend rate reflects PSC's confidence in it's outlook for the future."

Philadelphia Suburban Corp. is a diversified company. PSC's largest subsidiary is Philadelphia Suburban Water Co., which serves 234,000 customers in portions of Delaware, Chester and Montgomery counties, north and west of Philadelphia. PSC's non-regulated subsidiaries offer information, telemarketing and engineering services to a broad base of customers with an emphasis on the utility and public sector markets.

ORLANDO, FL (FEB. 7) PR NEWSWIRE - Universal Studios Florida, which will open its spectacular motion picture and television production backlot and entertainment attraction in May 1990, has announced it will launch the sale of Limited Edition Commemorative Studio Passes at the 1990 Florida State Fair, Feb. 7-18, in Tampa.

Florida State Fair participants will get a sneak preview of Universal Studios Florida, plus an opportunity to order Limited Edition Commemorative Studio Passes in the Special Events Center adjacent to Universal's model replica display.

"Our state-of-the-art production facilities and one-of-a-kind entertainment attractions themed around some of the most popular movies ever produced, will make Universal Studios Florida the most sought-after travel experience in the U.S.," said Randy Garfield, executive vice president of marketing for Universal Studios Florida. "Launching the sale of our Limited Edition Commemorative Studio Passes in advance of our May opening, allows visitors to include Universal Studios Florida as a feature element of their vacation plans," added Garfield.

Universal Studios Florida has created four unique themed Limited Edition Commemorative Studio Passes - each one based on a different Universal Studios Florida attraction - Ghostbusters, E.T. the Extra-Terrestial, King Kong and Jaws.

The adult one-day Limited Edition Commemorative Studio Pass to Universal Studios Florida is $30.74 each (including tax). Children's (3-11) Studio Passes are $24.38 each (including tax). Children under three are admitted free.

The Limited Edition Commemorative Studio Pass will go on sale again in April, exclusively through Southeast Bank, the official bank of Universal Studios Florida.

Feb. 7-18 fairgoers can order Commemorative Studio Passes by check, Visa or Mastercard, while supplies last.

From Orlando, fairgoers can take Interstate 4, west and use exits 4, 5, or 6A (Buffalo Avenue, U.S. Highway 301 and Orient Road) in Tampa. For fair information call 800-345-3247. For additional information on Universal Studios Florida call 407-363-8000, or write, 1000 Universal Studios Plaza, Orlando, Fla. 32819.

Universal Studios Florida - a 444-acre, $600 million project - is a joint venture between MCA Inc. and the The Rank Organisation. Productions already completed at the studio complex include "Parenthood," a feature length motion picture comedy produced by Ron Howard and starring Steve Martin. Steven Spielberg, producer of the most popular motion pictures in history, serves as the creative consultant to Universal Studios Florida which will open to the public in May 1990 in Orlando.

DENVER (FEB. 7) PR NEWSWIRE - Manville Corp. (NYSE: MVL), through its Technical Center, and Colorado School of Mines (CSM) have received funding for the first phase of a five-year, $1.7 million Department of Energy program to develop high performance, high-temperature fibers with enhanced insulating and physical properties.

Approximately 20 million cubic feet of high-temperature insulating fibers are sold annually in the United States. These fibers are used in high-temperature furnaces used by manufacturers of brick, cement, glass, ceramics, petrochemicals, iron, steel and other metals. Improved insulating properties could lead to significant energy savings through improved temperature-resistant fibers which would not have to be replaced as often, resulting in cost savings.

To facilitate management of the project, CSM will serve as a subcontractor to the Manville Technical Center (MTC), Manville's corporate research, development and engineering group. Both MTC and CSM will carry out the first phase of the project which includes the development of an existing technology database on high temperature fibers, the determination of thermal properties of fibers, and an estimate of potentially achievable energy savings from the development of new high- temperature fibers.

In the second and third phases, MTC and the CSM Metallurgical and Materials Engineering Department and Colorado Center for Advanced Ceramics will develop and characterize new high-temperature fibers. Manville will make pilot scale batches of fibers developed for thermal property test purposes. CSM engineers will conduct energy savings calculations on the improved fibers and the CSM Department of Mineral Economics will perform an economic analysis to substantiate their usefulness. During phase

three, MTC will manufacture plant-size batches for field testing under actual working conditions.

Dr. Phillip Martin will act as project manager and principal investigator for Manville while Dr. Gerald DePoorter, associate professor of metallurgy will act in a similar capacity for CSM.

To hasten technology transfer, Manville and CSM will offer information meetings throughout the course of the five-year project. The purpose of these meetings is to keep industry and other users of refractory fibers abreast of research developments.

Manville, founded in 1858, is an international manufacturing and natural resources company with two principal operating subsidiaries, Manville Sales Corp., headquartered in Denver, and Manville Forest Products Corp., headquartered in West Monroe, La. The company's primary businesses include paper and wood products, packaging, fiber glass and industrial insulation products, roofing systems and filtration and minerals. Manville is headquartered in Denver.

BOULDER, CO (FEB. 7) PR NEWSWIRE - Synergen Inc. (NASDAQ: SYGN) and Syntex (U.S.A.) Inc., a subsidiary of Syntex Corp. (NYSE: SYN), today announced the formation of a joint venture to develop new protein-based drugs for the treatment of neurological diseases.

The drugs to be developed by the venture comprise a class of proteins, called neurotrophic factors, that promote the survival, function and regeneration of cells of the nervous system.

Synergen is contributing basic Fibroblast Growth Factor (bFGF) for the treatment of neurological diseases, Ciliary Neurotrophic Factor (CNTF), and a compound for the treatment of Parkinson's disease. Syntex is contributing Nerve Growth Factor (NGF) technology developed by Syntex Research. These proteins and other neurotrophic factors to be investigated by the venture are targeted as therapies for Alzheimer's disease, Parkinson's disease, peripheral neuropathies and other serious neurological conditions.

The venture will be managed jointly by Syntex and Synergen, and each company will participate actively in preclinical and clinical development. Syntex will provide initial funding of $15 million for the development program and will have the option to continue the program by providing an

additional $35 million for the clinical development of products. If development costs exceed $50 million, additional costs will be shared by Syntex and Synergen. Revenue from any products which result from the joint venture will also be shared. Further details were not disclosed.

In the United States and Canada, Syntex will control the marketing efforts and Synergen will have the right to participate in product promotion and detailing. Synergen will have exclusive marketing rights in Latin America, except for Mexico. In the rest of the world, Syntex will have exclusive marketing rights.

Synergen will have the exclusive rights to manufacture proteins used in the products.

In connection with the transaction, Synergen has granted to Syntex warrants to purchase 750,000 shares of Synergen's common stock at an agreed-upon price. The warrants may be exercised only if Syntex exercises its option to fund the additional $35 million in development costs for the venture.

Synergen is a biotechnology company developing products to treat inflammatory diseases, vascular disorders and neurological conditions using recombinant DNA technology and the latest advances in molecular and cellular biology.

Syntex is an international health care company which discovers, develops, manufactures and markets human and animal pharmaceutical products and medical diagnostic systems.

BOULDER, COL (FEB. 7) PR NEWSWIRE - Synergen Inc. (NASDAQ: SYGN) announced today that it has reacquired proprietary rights to SLPI, its elastase inhibitor, from CIBA-GEIGY Ltd. (Basel, Switzerland).

Under terms of the repurchase agreement, Synergen made a cash payment to CIBA-GEIGY and has agreed to make additional payments from future sales and royalties of products containing SLPI. The amount of the initial payment is not material to Synergen.

In exchange, Synergen regained worldwide rights to the program, use of preclinical and formulation information developed by CIBA-GEIGY, and sufficient quantities of the pure protein to complete ongoing toxicologic studies and to begin clinical trials for the treatment of emphysema. Synergen anticipates initiating its clinical trials early in 1991.

SLPI is a human protein that inhibits elastase, the enzyme believed to be responsible for the destruction of lung tissue in emphysema. SLPI therefore has the potential to halt the progress of this disease and to prevent its onset in individuals susceptible to it for genetic or environmental reasons.

SLPI is one of several protease inhibitors developed by Synergen for Synergen Development Partners Ltd., a research and development partnership sponsored by Synergen. The R&D partnership's rights in SLPI are not affected by the CIBA-GEIGY transaction.

Synergen is a biotechnology company developing products to treat inflammatory diseases, vascular disorders and neurological conditions using recombinant DNA technology and the latest advances in molecular and cellular biology.

CANOGA PARK, CA (FEB. 6) PR NEWSWIRE - American Plastics and Chemicals Inc. (NASDAQ: APAC) announced today that it had signed an agreement to purchase approximately 2,500 acres in eastern Ohio with proven reserves of oil, gas, coal, and limestone.

There is currently only limited production of oil and gas and no mining of coal or limestone. The purchase price of $1.55 million will be paid in

cash, stock, and subordinated notes, and is expected to close by the end of April. The proven coal reserves on the site consist of more than 20 million tons of Pittsburgh seam coal.

In making the announcement, H. Grant Heaton, chairman of APAC, added that "APAC intends to develop a pollution-free chemical plant on the site utilizing APAC's propriety technology to convert coal, including the high-sulfer coal in this deposit, and limestone into calcium carbide and fuel gases utilizing the High Temperature Thermal Furnace."

APAC (formally Petro Oil and Gas Inc.) intends to produce several plastics and specialty chemicals utilizing this technology through joint ventures here and abroad. One such joint venture, between APAC and Perkins Power Inc. of Sheridan, Wyo., has contracted with Badger Design & Constructors Inc. (a Raytheon Company) to construct a $160 million Chemical Plant on a 20 million ton coal deposit near Sheridan.

IRVINE, CA (FEB. 7) PR NEWSWIRE - Fluor Daniel Inc. announced today that it has been awarded a contract by Brickell Gateway Ltd. of Miami, Fla. Phase one of the project is valued at $150 million with the total project value estimated at $300 million.

The commercial unit of Fluor Daniel's Industrial Sector is providing general contracting and construction management services for phase one of the Brickell Gateway project. The development will feature Brickell Avenue's tallest office building at 51 stories, and its first specialty retail fashion mall, with an adjoining 350-room luxury hotel and 100-condominium residences.

Pre-construction is under way and groundbreaking is scheduled for mid-1990. The complex will be one of the largest multi-use projects in the United States.

Fluor Daniel will be responsible for all tenant improvements and contract maintenance for the complex. Design for the project is being performed by HOK, an architectural firm based in St. Louis, Mo.

The office tower will span 600,000 square feet, with an additional 300,000 square feet of retail space and 444,000 square feet of hotel/ residential. The project also includes a 2,600-car garage with both valet and self parking.

Fluor Daniel Inc., Fluor Corporation's (NYSE: FLR) principal subsidiary, is an international engineering, construction, maintenance and technical services company with more than 50 offices around the world.

FARMINGTON, NM (FEB. 7) PR NEWSWIRE - Mesa Airlines Inc. (NASDAQ: MESA) today released its financial summary and operating statistics for the first quarter (October through December 1989).

Earnings per share increased 200 percent to 20 cents as compared to 7 cents a year ago. Yield per passenger seat mile was up 4 cents while cost was up 1 cent per available seat mile. Revenue increased 62 percent from 4.8 million to 7.7 million.

"Thanks to the outstanding effort of everyone at Mesa as well as the continuing support from the communities we serve, Mesa posted its best quarterly operating results in the company's history," said Larry Risley, president and chairman. "Other initiatives such as improved yield management and consistent cost control programs have had excellent results. We are also pleased with our Phoenix operation which has contributed significantly to our growth and is now operating profitably. We look forward to continuing expansion in the Phoenix market."

MESA AIRLINES INC.

DETROIT (FEB. 7) PR NEWSWIRE - The ultra-luxury Cadillac Allante sports

coupe and convertible continues to increase in popularity, and for the first time since its introduction in 1987, has outsold the major competitor in this exclusive market segment. In January 1990, Cadillac Allante deliveries totaled 314 -- up nearly 39 percent from the same month last year.

"The continuous improvement we have made in Allante advanced technology, performance, quality and value to the owner has resulted in a 1990 model year increase of more than 45 percent in Allante sales, and we are right on track for a 4,000-unit year for Allante," noted Peter R. Gerosa, Cadillac general sales and service manager. "The Allante has proven itself to be a most worthy competitor to the best vehicles in this demanding market niche."

"The Allante is doing its job beautifully for Cadillac ... our youngest and most affluent owners are driving Allantes, and in most cases, these are new Cadillac owners who would not have considered us if the Allante were not offered," Gerosa said.

The 1989 Allante is the world's first front-wheel-drive luxury car to be equipped with a Traction Control system. The fully automatic system is designed to help control wheelspin and provide improved performance and safety on slippery road surfaces. The Allante Traction Control system was also named one of the only 10 "Best of Best" greatest achievements in science, technology and new products for the year by the editors of Popular Science magazine.

WASHINGTON (FEB. 7) PR NEWSWIRE - The first public demonstration in the United States of a bidirectional interface to Netview was demonstrated Feb. 5 by Newbridge Networks (NASDAQ-NMS: NNCXF) here at ComNets '90.

The Netview interface was implemented as a set of software products:

-- 5602 MainStreet NV Integrator, which runs in a PS/2 with Netview/PC Ver 1.2.

-- 4602 MainStreet, the main network management system on a Sun-based NetworkStation.

At the same time, other software on the same platforms created partitions, the equivalent of Virtual Backbone Networks. The 4616 VBN Partition Manager shared the PS/2 platform; 4611 VBN Partition Server co-resident with the 4602 software.

Phone lines connected the booth to a remote IBM mainframe running Netview, supporting the live demonstration and a standard Netview control console in the booth.

"The contrast between the character oriented standard console and the graphical user interface of the MainStreet software represents a large step forward in umbrella management systems," said Newbridge President Peter Madsen. "This public showing is the culmination of a two-year effort to revolutionize the way that both public and private networks will be managed in the future."

In the first public showing since its November announcements, the Newbridge demonstration provided a number of industry "firsts" for the network management arena:

-- The first demonstration of a fully bidirectional connection to Netview from a T-1 network.

-- The first demonstration of a fully partitioned Virtual Backbone T-1 network.

-- The first demonstration of Presentation Manager in a Netview environment.

The 4602 MainStreet is the second Newbridge network management system to have a Netview interface. Last year a PC-based MainStreet combination was demonstrated at an exhibit in the U.K.

Newbridge Networks has offices and manufacturing facilities in the United States, Canada, Hong Kong, and the United Kingdom. The company designs, manufactures, sells, and services a broad range of digital communications equipment focused on wide-area voice and data networks, and local area networking.

Newbridge Networks Corporation is a public company whose common shares are listed for trading on the Toronto Stock Exchange (NNC) in Canada and quoted for trading on the NASDAQ National Market System (NNCXF) in the United States.

#90038p0234 02/07/1990 ~PR Newswire

HOUSTON (FEB. 7) PR NEWSWIRE - American General Corp. (NYSE: AGC) today reported net income for 1989 of $464.1 million, up from $441.8 million in 1988; and announced a 5 percent increase in the common quarterly dividend

which equates to an indicated annual rate of $1.58 per share. Net income per share for 1989 was $3.76 compared to $3.44 for 1988, based on average shares outstanding of 122.9 million in 1989 and 134.1 million in 1988.

In commenting on 1989 results, Harold S. Hook, chairman and chief executive officer said, "Major progress was made during 1989 in simplifying the corporate structure through two divestitures totaling over $900 million. This simplification also strengthened our marketing position by increasing the focus on company-managed distribution systems. The strong earnings performance in 1989 reflects the successful management of major change, which we believe has enhanced American General's earnings potential."

The American General Board of Directors today approved a 5 percent increase in the quarterly dividend on common stock from $.375 per share to $.395 per share, which brings the indicated annual rate to $1.58 per share. The increase is payable March 1, 1990 to holders of record on Feb. 15, 1990 and is the 15th consecutive annual dividend increase. American General has paid quarterly dividends continuously for 61 years with never a decrease in effective rate.

American General is an insurance and financial services organization with headquarters in Houston and subsidiaries that operate in all 50 states and Canada. American General's common stock is listed on the New York, Pacific, London and Swiss stock exchanges.

#90038p0236 02/07/1990 ~PR Newswire

CONSHOHOCKEN, PA. (FEB. 7) PR NEWSWIRE - At its regular meeting today, the board of directors of Quaker Chemical Corp. (NASDAQ: QCHM) adopted a Rights Agreement.

Peter A. Benoliel, chairman and chief executive officer of the company, commented that, "The Rights Agreement will protect our shareholders against being deprived of their right to share in the full measure of the company's long-term potential." The Rights Agreement is not designed to thwart a takeover but rather compel the would-be acquirer, if the company is to be acquired, to negotiate with the company's board of directors. The Rights Agreement will protect the company's shareholders in the event of an unsolicited offer to acquire the company, the acquisition by a person of a controlling percentage of the outstanding shares of the company's common stock without offering fair and equal treatment to all shareholders, and other unfair and coercive takeover tactics. The Rights Agreement will enable the board of directors, when faced with an

unfriendly offer, to take action that will ensure that all shareholders receive fair value for their shares.

The company will distribute, as a dividend, one right per each share of the company's common stock outstanding as of the close of business on Feb. 20, 1990. Each right will entitle the holder thereof to purchase, upon the occurrence of certain events, 1/100 of a share of a newly authorized Series A Preferred Stock.

The rights will be exercisable only if a person or group acquires 20 percent or more of the company's common stock, announces a tender offer which would result in ownership by a person or group of 20 percent or more of the company's common stock, or if the board of directors declare a person to be an adverse person and that person has obtained a specified percentage of the company's common stock, as determined by the board of directors, such amount not to be less than 10 percent of the outstanding shares of the company's common stock. If a person or group acquires 20 percent or more of the outstanding shares of the company's common stock, without first obtaining board of directors approval as required by the terms of the Rights Agreement, each right will then entitle its holder (other than such persons or members of any such group) to purchase, at the rights' then current exercise price, a number of shares of the company's common stock having a market value twice the rights' exercise price.

The rights will be distributed to each shareholder of record as of Feb. 20 1990. Unless earlier redeemed or exchanged, the rights will expire on Feb. 20, 2000. A more detailed explanation of the operative provisions of the Rights Agreement will be mailed to the company's shareholders shortly.

#90038p0238 02/07/1990 ~PR Newswire

VEVAY, SWITZERLAND (FEB. 7) PR NEWSWIRE - Nestle S.A., the leading international food group, today announced the establishment of a sponsored American Depositary Receipt program with Morgan Guaranty. One hundred American Depositary Receipts (ADRs) will represent one registered share (ratio: 100 to 1) and will trade over-the-counter on the pink sheets. The ADR program will be activated in New York on Tuesday, Feb. 13.

Commenting on the launch, the company said, "Establishing a sponsored ADR program is the next step in our program to improve our access to international capital markets by broadening our shareholder base. We are committed to the U.S. market and the sponsored ADR based on registered shares, of which 2.3 million are outstanding at present, affords a wider range of American investors access to a more liquid security."

The world's largest food company, Nestle recently reported consolidated sales of SF48.1 billion ($32.1 billion)(A) in 1989. In the United States, Nestle operates principally through its U.S. subsidiaries Nestle Enterprises, Carnation and Alcon. Nestle derived approximately 22 percent of total consolidated sales from the United States in 1989.

The CUSIP number for the sponsored ADR will be 641069406 and EUROCLEAR will be the sole custodian of the underlying shares. Bear Stearns, First Boston, Goldman Sachs, Merrill Lynch, Prudential-Bache, Salomon Brothers, Shearson Lehman Hutton and Swiss-American Securities are market makers for the sponsored ADR. The company's registered shares currently trade on all Swiss stock exchanges as well as on the Paris and London stock exchanges.

(A) Translated at SF1.50, the Swiss Franc/Dollar exchange rate prevailing on Feb. 2, 1990.

#90038p0241 02/07/1990 ~PR Newswire

WASHINGTON (FEB. 7) PR NEWSWIRE - Newbridge Networks (NASDAQ-NMS: NNCXF) announced today the 1615 MainStreet NETmanager Customer Service Unit (CSU) for management of intelligent T-1 and FT-1 networks.

The 1615 MainStreet is ideally suited for management of other vendors' equipment through the 4600 MainStreet family of Network Managers.

"The 1615 MainStreet emphasizes our commitment to providing multivendor compatibility," commented Newbridge President Peter Madsen. "No single vendor is capable of providing all the equipment to run most networks. With this in mind, Newbridge has developed products with a strong emphasis on total control and management of integrated networks."

Supervisory ports on foreign networking nodes can interface to the nearest Newbridge multiplexer through the 1615 MainStreet. For each foreign node an icon is created on the screen of a MainStreet Network Management System allowing the node's alarms to change the color of the icon, open a trouble ticket, and log the alarm automatically as well as provision equipment functions.

The unit conducts performance data collection and storage so that network evaluation can take place before alarm conditions occur. Fault isolation and diagnosis of problems are achieved by performing network and DTE loopbacks at both the DSO and T-1 levels. Network components can also be tested along the transmission path. Per circuit trunk conditioning can be programmed on a per interface signalling basis.

Access to the MainStreet network from the foreign node is established over the Control Packet Switching System (CPSS). The internal CPSS provides error-free transport and assured routing of commands and responses. CPSS allows the Newbridge network management workstation to communicate to all network locations, including the 1615 MainStreet.

The 1615 is only 1-3/4 inches high and 10 inches deep and is either desk or rack mountable. The 1615 is available now and is listed at $3,000.

Newbridge Networks is an international company which specializes in the design, manufacture and marketing of voice and data communications equipment for global networks. Offices and manufacturing facilities are located in the United States, Canada and the United Kingdom.

Newbridge Networks Corporation is a public company whose common shares are listed for trading on the Toronto Stock Exchange (NNC) in Canada and quoted for trading on the NASDAQ National Market System (NNCXF) in the United States.

LA JOLLA, CA (FEB. 7) PR NEWSWIRE - IDEC Pharmaceuticals Corporation, which is developing antibody and peptide immunotherapies to fight severe and life-threatening diseases, has named Nabil Hanna, Ph.D., age 46, as Vice President, Research and Pre-Clinical Development.

"Dr. Hanna is a preeminent immunologist and accomplished scientific investigator with extensive academic and industrial experience," notes Dr. William H. Rastetter, company President and Chief Executive Officer. "He was most recently Director of the Department of Immunology at a SmithKline Beecham Company, and has a wealth of experience focusing on the treatment of diseases involving the human immune system.

"At IDEC, Dr. Hanna's responsibilities include directing pre-clinical research and development programs on immunotherapies for the treatment of cancers (initially melanomas, and gastrointestinal and colorectal cancers) autoimmune diseases, and AIDS/ARC. At the same time," Dr. Rastetter adds "he will provide research and development support for our product candidates in human clinical testing. These activities will complement and extend IDEC's ongoing Phase III clinical studies of anti-idiotype antibodies against B-cell lymphoma, and Phase I clinical studies of antibodies against malignant melanoma."

Dr. Hanna served for seven years at Smith Kline & French Labs, a

SmithKline Beecham company, with responsibility for the immunology, cytokine biology, and inflammation and arthritis research programs. He was previously a research scientist at the NCI-Frederick Cancer Research Center, focusing on the role of natural host defenses and immune system proteins in cancer metastases therapy. Hanna also was a lecturer in the Department of Immunology at the Hebrew University Medical School in Israel where he received his B.S. in microbiology and biochemistry, his M.S. in microbiology, and his Ph.D. in immunology.

IDEC Pharmaceuticals Corporation is a leader in the development of immunotherapies based upon antibody and peptide-derived products. The company is moving rapidly toward the commercialization of a treatment for B-cell lymphoma, and is aggressively developing several other promising products. Its primary focus is on the development of antibodies and peptides for therapeutic regulation of key immune system functions. The company's lead product, an anti-idiotype antibody directed against malignant B-cells, shows strong potential in the immunotherapy of lymphatic cancers.

Privately-held IDEC is based in Mountain View and La Jolla, California.

#90038p0247 02/07/1990 ~PR Newswire

BALTIMORE (FEB. 7) PR NEWSWIRE - Worldwide Value Fund, Inc. (NYSE: VLU) reported today that its net asset value (NAV) at the end of 1989 stood at $20.18 per share against $19.53 per share a year ago. At the end of the September 1989 quarter NAV was $21.99 per share.

VLU's total return (NAV appreciation and dividends) was 12.7 percent for the year and was down 5.6 percent for the quarter ended Dec. 31, 1989. The final quarter of last year was impacted by the sharp decline of the United States stockmarket in October and by the weak performance of small company securities in this country and in the United Kingdom. The improvement in VLU's net asset value during most of 1989 reflects appreciation in the value of many of the Fund's securities as well as the favorable stockmarket conditions in this country and abroad through the third quarter.

The value-oriented global equity fund registered net investment income of $214,000, or $.07 per share, for 1989 against $95,000, or $.03 per share, a year earlier. In the most recent three months, VLU incurred a net investment loss of $71,000 compared with an income of $9,000 a year earlier.

At the end of last year, approximately 41 percent of VLU's portfolio was represented by investments in the United States followed by 15.6 percent in the U.K. The balance was invested mainly in European countries. In total, equity investments comprised 96.2 percent of the Fund's net assets, with the balance in cash and cash equivalents.

"Difficult economic conditions in this country and unsettling conditions abroad present a challenging investment climate for Worldwide in the months ahead," according to Charles J. Swindells, chairman of the board of the Fund who made today's announcement. "Nevertheless, since VLU's portfolio is comprised of securities which sell below what we consider to be their real value, we fully expect that over an extended period of time VLU will register a strong performance," Swindells said.

Worldwide Value Fund, Inc. was formed in 1986. It is managed by Lombard Odier International Portfolio Management, Ltd. of London and Legg Mason Fund Adviser, Inc. of Baltimore.

DEERFIELD, IL (FEB. 7) PR NEWSWIRE - Xtramedics, Inc (NASDAQ: XMED) today announced the appointment of Dennis Treu as president and chief operating officer of the company. Treu has been vice president of the company since July 1988, and a director since July 1989. Treu replaces John F. Perry, who resigned as president and a director of the company to pursue other business interests.

Treu has extensive experience in the development and marketing of health care products. Prior to joining Xtramedics, he was director of U.S. sales operations and new business development of the Merieux Institute, a large developer and manufacturer of vaccines, which is majority owned by Rhone Poulenc, for four and one-half years. Previously he was with Searle Pharmaceutical Co. Illinois for ten years, in various sales and marketing positions.

Bruce N. Barron, vice chairman and chief executive officer of Xtramedics, said, "We are pleased to announce the promotion of Mr. Treu, whose expertise in the marketing of health care products, in addition to his enthusiasm and dedication to Fresh and Fit(TM) Padettes, will serve the company well in the future. We wish Mr. Perry well in his new endeavors and appreciate his commitment to assist in the transition."

Xtramedics markets Fresh and Fit Padettes, which fill a need between internally worn tampons and externally worn sanitary napkins, pads and

panty liners. The Padette, which is made of sanitary, absorbent material and is about the size of one's little finger, is the first major innovative entry in the feminine protection market in over 50 years.

PITTSBURGH (FEB. 7) PR NEWSWIRE - Negotiators for the United Steelworkers of America (USW) today announced that they have reached a tentative four-year agreement with Allegheny Ludlum Steel Corp. (NYSE: ALS).

USW co-chairmen Lou Thomas, District 4 director of New York state and William J. Foley, District 1 director of the New England states, called the package: "a package that reflects our members' needs for the 1990s and meets all our original bargaining goals in the specialty steel industry. But we want the membership to see it first."

Contract information meetings for the members are scheduled prior to ratification by the six local unions involved. Balloting will take place on Monday, Feb. 12, at the following locations: Local 2242, Wallingford, Conn. (245 members); Local 1138, West Leechburg, Pa. (1,200 members); Local 1196, Brackenridge/Natrona, Pa. (1,800 members); Local 2984 (O&T), Brackenridge, Pa. (60 members); Local 8535, New Castle, Ind. (145 members); and Local 2857, Lockport, N.Y. (50 members). Some 3,475 members are involved.

The proposed agreement includes yearly increases in wages, benefits and provides an early agreement bonus, plus a series of annual bonuses.

CONTACT: USW Communications Department, 412-562-2440.

#90038p0253 02/07/1990 ~PR Newswire

HOUSTON (FEB. 7) PR NEWSWIRE - Stewart Infomation Services Corp. (NASDAQ: SISC) earned $1.5 million, or 36 cents per share, in the fourth quarter of 1989. This was an improvement over the $1.3 million, or 33 cents per share, earned for the like quarter in the previous year.

Net income in the fourth quarter of 1989 was increased $0.5 million because of a reversal of a provision for a title claim. The provision was made in the second quarter of 1989 but a subsequent change in circumstances related to the claim indicated that a major loss was not probable. Net income in the fourth quarter of 1988 was increased by $0.5 million for a gain on the termination of the company's pension plan.

For the year 1989, net income was $51,000, or 1 cent per share. Net income in 1988 was $3.7 million, or 91 cents per share. The decline in earnings in 1989 from 1988 was largely the result of increased provisions, after taxes, for title losses of $4.9 million, of which an increase of $3.3 million was attributable to major losses. An after-tax gain on the sale of municipal bonds increased 1989's income by $1.1 million. 1988's net income included an after-tax gain of $0.5 million on the termination of the company's pension plan.

Orders in the fourth quarter of 1989 were up 13 percent from 1988's fourth quarter. In comparison with year-earlier totals, orders were up 18 percent and 15 percent for the months of December 1989 and January 1990. The number of orders received, however, is not necessarily indicative of future revenues.

Stewart's primary business is title insurance. The company issues policies on homes and other real property in all 50 states, the District of Columbia and Canada through over 2,600 issuing locations. In issuing a policy, the title is first searched, examined and then closed. Stewart's customers include homebuyers and sellers, attorneys, builders, developers, lenders and real estate brokers. The company also sells computer-related services and information to the real estate industry. Additionally, the company produces photogrammetric engineering products and geographic information systems for government and private entities, both domestic and foreign.

#90038p0254 02/07/1990 ~PR Newswire

HERSHEY, PA (FEB. 7) PR NEWSWIRE - Hershey Foods Corp. (NYSE: HSY) today announced record consolidated net sales and earnings from continuing operations for the year 1989.

Net sales from continuing operations were $2,420,988,000 compared with $2,168,048,000 in 1988. Income from continuing operations and net income were $171,054,000, or $1.90 per share, in 1989. This compares with income from continuing operations of $144,506,000, or $1.60 per share, in 1988. After giving effect to discontinued operations, net income for 1988 was $213,949,000, or $2.37 per share.

Net sales in the fourth quarter were $680,895,000 compared with $672,250,000 in the fourth quarter of 1988. Net income for the fourth quarter was $54,090,000, or $.60 per share, compared with $46,232,000, or $.51 per share, for the fourth quarter of 1988.

Net income for the year 1988 includes the gain on disposal and results of

discontinued operations for Friendly Ice Cream Corp. until its sale on September 2, 1988. Weighted average shares outstanding were 90,186,336 for all periods.

"We are pleased with our strong fourth quarter income results particularly when compared with an exceptionally good fourth quarter in 1988," said Richard A. Zimmerman, chairman and chief executive officer. "As expected, Hershey Chocolate U.S.A.'s 1989 fourth quarter sales growth rate was lower than 1988's fourth quarter growth rate due to timing differences on Easter shipments. Despite this seasonal phenomenon, our largest division achieved a sales volume increase and posted excellent operating income growth as did Hershey Pasta Group and Hershey International. Hershey Canada Inc. experienced sales difficulties during the quarter, accompanied by a decline in operating income. In addition, a higher effective income tax rate in the fourth quarter of 1989 was only partially offset by lower net interest expense.

The board of directors of Hershey Foods Corp. also today declared regular quarterly dividends of $.195 on the common stock and $.175 on the Class B common stock. Both dividends are payable on March 15, 1990, to stockholders of record Feb. 26. It is the 241st consecutive regular dividend on the corporation's common stock and the 22nd consecutive regular dividend on the Class B common stock.

CONTACT: Natalie Bailey, 717-534-7631, or James A. Edris (financial), 717-534-7552, both of Hershey Foods.

SHELTON, CT (FEB. 7) PR NEWSWIRE - The Forschner Group, Inc. (NASDAQ: FSNR), today announced record fourth quarter and full year sales and earnings for the period and year ending Dec. 31.

For the quarter, sales were up 26 percent to $13.1 million compared to $10.4 million in 1988; net income was up 122 percent to $1 million compared to $450,000, and earnings per share were $.25 compared to $.11.

For the year, sales increased 16 percent to $43.8 million; net income was up 120 percent to $3.1 million from $1.4 million; and earnings per share were $.75 against $.34 in 1988.

James W. Kennedy, president and chief executive officer of Forschner, said: "We are pleased by the breadth of the sales performance. All three sales divisions ran strongly ahead of a year ago, with the momentum in sales building during the year. We are particularly pleased by the wide publicity and high levels of acceptance for our first proprietary new product -- the Swiss Army Brand Watch which was introduced in the fourth

quarter."

Sales increases in the company's three divisions during 1989 were: Swiss Army Brands, which includes the Swiss Army Knife and the watch, up 15 percent to $23 million; cutlery, up 10 percent to $11 million; and Special Markets, which markets specialty advertising and promotional products, leading with a 30 percent gain, to $10 million.

Forschner is the exclusive U.S. marketer of Victorinox Original Swiss Army Knives and Victorinox cutlery, other high-quality, Swiss-made products bearing the Swiss Army Brands label, and other imported cutlery for professional and consumer use.

#90038p0256 02/07/1990 ~PR Newswire

DAYTON, OH (FEB. 7) PR NEWSWIRE - KRUG International Corp. (NASDAQ: KRUG) today announced fiscal 1990 results for the third quarter and nine-month period ended December 31, 1989. Revenues from continuing operations for the third quarter were $23.6 million, up 13.4 percent from $20.8 million recorded for the third quarter last year. For the nine months, revenues were $66.8 million, up 6.2 percent from $62.9 million recorded in the corresponding period last year.

For the third quarter, earnings from continuing operations were $372,000 or $.09 per share. This compared to earnings from continuing operations of $614,000 or $.15 per share for the third quarter last year which included an after tax gain of approximately $300,000 on the sale of property in the United Kingdom. Net earnings for the quarter were $372,000 or $.09 per share compared to a loss of $887,000 or $.22 per share last year.

For the nine months, the Corporation recorded earnings from continuing operations of $996,000 or $.24 per share. This compared to earnings from continuing operations of $1.8 million or $.41 per share for the corresponding period last year. The $.41 per share for the nine-month period last year included an amount received from the UK taxing authority related to an intercompany dividend which contributed approximately $.14 per share as well as the gain on the sale of property previously discussed.

For the nine months, net earnings were $996,000 or $.24 per share. Net earnings for the last year's nine-month period included a substantial first quarter gain from the sale of two of the Corporation's subsidiaries in the United Kingdom. Net earnings for last year's nine-month period were $6.1 million or $1.44 per share.

Commenting on the Corporation's third quarter and nine-month results, Maurice F. Krug, Chairman and Chief Executive Officer of KRUG International Corp., stated, "Despite the adverse impact of unusually high interest rates in the UK on that country's retail marketplace, revenues from our Commercial/Consumer operations before the effect of currency translations were up 9.6 percent for the quarter and 8.3 percent year-to-date over last year. Aerospace revenues were up 28.8 percent for the quarter compared to the same quarter last year which brought revenues for the year- to-date to 16.4 percent more than last year-to-date."

Through its two separate business groups -- Aerospace and Commercial/Consumer -- KRUG International Corp. provides government, industry and consumers with a wide variety of products and programs.

The Aerospace Group is engaged in biotechnological research; and designs, fabricates and maintains automated test equipment, simulation and training systems and information management systems. The Commercial/Consumer Group manufactures housewares and garden products and distributes leisure marine equipment.

KRUG International common shares are traded on the NASDAQ National Market System, symbol KRUG; Wall Street Journal OTC National Market issue, symbol KRUG.

WARREN, OH (FEB. 7) PR NEWSWIRE - Warren Consolidated Industries, Inc. (WCI) announced today the completion of a $180 million financial package for its continuous slab caster complex now under construction at its steel plant in Warren, Ohio.

Congress Financial Corporation, (Agent) and Security Pacific Business Credit Inc. arranged $150 million of the financing, with Sanwa Business Credit Corporation supplying a $30 million term loan. The package includes extension of the revolving credit facility and a new term loan to finance the caster construction.

WCI President and Chief Executive Officer, James V. Stack said, "We are extremely pleased with the package put together by Congress Financial. The caster project has been satisfactorily progressing since last August with engineering now reaching completion while excavating and construction of foundations for the caster buildings have been underway since early December. The new ladle metallurgical facility for refining steel will start up in December, 1990 while the continuous caster wil begin producing slabs in August, 1991." WCI will be able to cast over 140 grades of steel with the capability of performing developmental work to expand that number. The caster is expected to be the only slab caster in the U.S. capable of manufacturing such a high number of grades. The twin strand continuous caster is being engineered and constructed by Mannesmann Demag Corporation

of Pittsburgh, Pa.

Warren Consolidated Industries, Inc. produces quality engineered flat rolled steels and contractor products for the automotive, applicance, metalworking, steel service center and construction industries.

SAVANNAH, GA (FEB. 7) PR NEWSWIRE - Tubular Steel Inc. of St. Louis, Mo. announced today that it will build a $10 million plant facility in Savannah, Ga.

The announcement was made in the offices of the Savannah Economic Development Authority by Tom Erwin, vice president operations for Tubular Steel and Dick Knowlton, president and CEO of the Savannah Economic Development Authority.

The facility will be built on a 20-acre site on property purchased from the Savannah Economic Development Authority in Phase II of the authority's industrial park. The park is located near the junction of I-95 and Highway 80. When completed the facility will include a 58,000-square-foot warehouse building and saw cutting center.

Groundbreaking is scheduled for early April with a completion date in October. When the plant is in full operation it is expected to employ approximately 25 people.

"The Savannah plant is part of a long-term commitment to the growing southeastern marketplace," stated Erwin. "The facility will have an in-depth inventory and the latest in material processing equipment."

"We are pleased to have Tubular Steel choose Savannah," said Knowlton. "And it is always good news when new jobs are created for our community."

Tubular Steel, based in St. Louis, Mo., has a total of eight warehouses and sales offices located in St. Louis, Chicago, Houston and Philadephia. The company inventories 45,000 tons of carbon, alloy and stainless steel pipe tubing and serves manufacturers, fabricators, and petrochemical processors throughout the United States.

#90038p0273 02/07/1990 ~PR Newswire

SAN FRANCISCO (FEB. 7) PR NEWSWIRE - A final agreement has been signed by Chevron U.S.A. Inc. and the East Bay Municipal Utility District (EBMUD) to build a reclamation project that will conserve 5 million gallons of drinking water daily -- about two-thirds the amount now used each day by the City of Richmond.

A $17-million advanced treatment plant will be built by EBMUD and $2.6 million of pipeline improvements and associated facilities will be installed by Chevron to reclaim wastewater that can be used for cooling at the company's Richmond Refinery.

The project began four years ago with a jointly financed $350,000 pilot project to determine whether reclaimed wastewater would serve as a feasible alternative to EBMUD's high-quality drinking water for industrial cooling. The tests demonstrated that scale, corrosive agents and biological organisms could be removed sufficiently to operate the plant.

The joint effort is a commitment by Chevron to help EBMUD in its efforts to make the most efficient use of its Sierra water supply.

To help fund the project, EBMUD is pursuing low-interest state loans. Additional financing will come from a special fund for water development comprised of fees paid by developers and others for new service connections to the utility district.

Construction will begin next January on the treatment plant in North Richmond. Chevron and EBMUD worked closely with Richmond, North Richmond and Contra Costa County on the project, and an advisory committee from the community has been created to consult with Chevron and EBMUD during the construction.

Under agreements reached with community leaders, EBMUD will focus recruitment for new jobs created by the project in the North Richmond area. Contractors will be required to make an effort to hire North Richmond area residents for the project.

To minimize neighborhood impacts, the size of the land needed for the treatment plant was trimmed from 15 acres to 7 acres, and EBMUD will spend $222,000 to build an access road and provide utilities to support future development in the area. An additional $54,000 will be provided for the Contra Costa County Redevelopment Agency to be used in the project area. Portable offices used during the construction will be donated to the county for use in the community.

Chevron will begin the pipeline improvements and other refinery facilities in 1992 so that the project can go on line in early 1993.

By reusing reclaimed water, more high-quality drinking water can be conserved for EBMUD consumers, especially in drought periods. EBMUD has a series of reclamation programs underway, but the Chevron project is by far the largest.

The refinery now uses 11 million gallons of water a day, and the new project will cut that by nearly half.

HERNDON, VA. (FEB. 7) PR NEWSWIRE - Newbridge Networks (NASDAQ-NMS: NNCXF) announced today a program to certify other vendor's equipment for compatibility with Newbridge equipment.

Testing is already underway with PBXs and other communication equipment. Newbridge will issue announcements as specific vendor products are approved.

"The idea of this program is to move a step closer toward real multi-vendor compatibility," said Newbridge President Peter Madsen. "Newbridge products reflect a strong emphasis on total control and management of integrated communications networks. Networks today are

becoming extremely complex structures that are required to provide voice, data and video with packet and circuit facilities in an integrated system " Madsen went on to state. "Comprehensive network-wide management and control is the key to maintaining network availability and operating integrity."

Newbridge has adopted a new view of the network and created a way to manage it. It is based on a fundamental premise: operators build their networks to set and manage connections from end-to-end.

While other T-1 multiplexers use a distributed control architecture, which limits the number of nodes in a network, Newbridge uses Center- Weighted Control which can support upwards of 10,000 nodes in a single logical network.

Center-Weighted Control is also a better architecture for managing multi-vendor networks, the company said. It answers the problems faced by most companies and users, that there is no single vendor capable of providing all the equipment to run most networks.

In "distributed control" in order for multiplexers to work together, the nodes all "speak" with their neighbors, exchanging control messages via an internal "store and forward" system. Any node that cannot originate and understand those control messages cannot participate in the T-1 network circuit switching, thus, multi-vendor integration of other backbone devices is almost impossible.

With Newbridge that is not the case. Because the nodes need not "talk" to each other under Center-Weighted Control, they need not all be alike. The central processor can learn to communicate with many different devices, using software bridges. These devices are part of the 5600 MainStreet series.

Newbridge currently offers a generic interface for controlling a wide range of networking devices: The 2610 MainStreet CPSS PAD and 5632 MainStreet Custom Node allow the 4602 MainStreet Network Station to monitor and control any device that has a supervisory port that supports an ANSI terminal and a printer port that dumps alarms to an ASCII printer.

Newbridge Networks is an international company which specializes in the design, manufacture and marketing of voice and data communications equipment for global networks. Offices and manufacturing facilities are located in the United States, Canada and the United Kingdom.

Newbridge Networks corporation is a public company whose common shares are listed for trading on the Toronto Stock Exchange (NNC) in Canada and quoted for trading on the NASDAQ National Market System (NNCXF) in the United States.

DALLAS (FEB. 7) PR NEWSWIRE - EMS Systems, Ltd. (NASDAQ: EMSIF), headquartered in Dallas, announced today that its board of directors approved, effective Dec. 29, 1989, the issuance of 11,110,400 shares of common stock of EMS to Freiburghaus & Partners SA, a Geneva, Switzerland, investment firm which is holding such shares for various clients.

The common stock was issued in exchange for the conversion of 20,000 shares of preferred Series A convertible shares of EMS Technology Corp., a wholly owned subsidiary of EMS, and for the retirement and cancellation of $644,267 of unsecured notes, accrued interest and miscellaneous payables of EMS.

Dividends on the preferred shares and principal and interest on the unsecured notes were in arrears. The conversion rate for the preferred shares represents 400 shares of common stock for each preferred share.

Board approval of the conversion of preferred shares and cancellation of indebtedness for common stock permits the retirement of $644,267 of total indebtedness, including accrued interest, and conversion of $2 million of $100 par value preferred shares plus $133,333 dividends.

Board approval also contained a provision that some of the 11,110,400 shares to be issued will be withheld pending an amendment to EMS' Articles of Association to increase EMS' authorized capital, which amendment will

be submitted to the shareholders of EMS at their next annual meeting to be held no later than June 30, 1990. To date, 8,846,641 shares of the 11,110,400 shares have been issued and delivered.

Paul Pandian, president of EMS, said that these transactions would improve the balance sheet of EMS and that EMS is now poised to embark on an agressive marketing campaign to increase its sales of communications and computer products.

HARRISBURG, PA (FEB. 7) PR NEWSWIRE - Gov. Robert P. Casey today proposed $9.9 million in state assistance for the Temple University Hospital to assure continued operation of its trauma unit and other vital services, as well as to strengthen the hospital's overall fiscal integrity.

"Temple Hospital serves the poor and especially needy families in North Philadelphia," Casey said.

"Temple is unique in that it is the largest provider in Pennsylvania of care to the poor, with almost 70 percent of its patients covered by Medicare or Medicaid. Many other patients have no insurance at all and are often unable to pay for their care.

"It is crucial that the people who depend on Temple know that we are doing everything we can to keep the hospital a vital part of the community, and the assistance we propose today assures that will be the case.

"I know that the university and its board will make every effort to assure that Temple's finances are prudently managed for the benefit of its many clients as well as the taxpayers who support its services."

Casey also instructed the state Department of Public Welfare to offer Temple Hospital assistance that will result in additional revenues, including:

-- Providing the hospital with direct access to state computers, which will allow hospital personnel to determine eligibility for Medical Assistance on-site.

-- Expanding eligibility levels under the Healthy Beginnings program. The governor announced the expansion this week during his budget presentation to the Legislature.

-- Helping the hospital improve its billing procedures to receive maximum eligible reimbursement on cases that have an extraordinarily high costs, such as for children born addicted to drugs.

CALGARY, ALBERTA (FEB. 7) PR NEWSWIRE - ANG's (Toronto, Montreal, Vancouver: ANG) net income increased 58 percent in 1989 to $26,889,000, when compared with $17,025,000 in 1988, before extraordinary items.

These results include the continuing strong performance, on a year-over-year basis, from the operations of the natural gas processing facilities and in the nitroparaffin chemical business.

The chemical business realized improvements due largely to the previously announced decisions to curtail, and ultimately abandon, commercial operations at its erythromycin facility located at Long Beach, Calif. The facility was shut down late in the first quarter of 1989, and has been prepared for disposition. All expenditures since that time have been included in net earnings as an extraordinary item.

Also, during 1989, the company decided to write down its investment in International Permeation Inc., the cost of which is included as an extraordinary item. This decision was necessitated by the continuing economic uncertainty surrounding the markets for its products.

WALTHAM, MA (FEB. 7) PR NEWSWIRE - Thermo Process Systems Inc. (AMEX: TPI) today announced that its board of directors and the board of Thermo Electron Corporation have approved an agreement under which Thermo Electron will acquire from Thermo Process Systems (TPS) the exclusive right to market and sell TPS soil-remediation services in Massachusetts.

The franchise agreement calls for Thermo Electron to pay to TPS a $2 million fee for the exclusive marketing rights, to purchase from TPS soil-remediation units and related products at a fixed price, and to pay other fees covering equipment operation and maintenance. Once Thermo Electron reaches a certain return on its investment, TPS will receive a share of the profits.

"This agreement allows us to accelerate the expansion of our soil-remediation business beyond the Southeastern states," said Walter Bornhorst, chairman and chief executive officer of TPS. "Limited landfill space in Massachusetts has created a large market for the cleanup of

contaminated soil. We have also begun to investigate similar franchise arrangements in countries other than the U.S."

Thermo Process Systems designs, manufactures, and sells advanced custom-engineered thermal processing systems for the incineration of hazardous wastes and the automated heat treating of metal parts. The company also provides services for the on-site remediation of hazardous wastes and petroleum-laden soils, in addition to a comprehensive range of metallurgical processes. Thermo Process Systems is a public subsidiary of Thermo Electron Corporation (NYSE: TMO).

CLEARWATER, FL. (FEB. 7) PR NEWSWIRE - C.H. Heist Corporation (NASDAQ: CHHC) passed the mid-year mark with a strong second quarter. Sales for the quarter, which ended Dec. 24, 1989, increased 26 percent from $12,850,444 last year to $16,195,590 this year. Net earnings jumped from $352,501 the previous year to $550,182 for this quarter, a rise of 56.1 percent. Earnings per share are $.36 versus last year's earning of $.29.

Six-month results show a sales increase of 24.6 percent, a total of $34,643,654 as opposed to last year's half-year sales of $27,798,261. Net earnings for the current twenty-six week period also increased, from $1,128,379 last year to $1,731,659 this year, up 53.5 percent. Year-to-date earnings per share are $1.12, over last year's $.73.

C.H. Heist, president and chairman, drew attention to the fact that "sales increases have been achieved in every facet of Heist operation, establishing a positive trend for fiscal '90." Looking at the year's progress, Heist cited the broad-based range of increased sales, stressing the effectiveness of the firm's diversification program.

In specific examples, Heist noted that "our industrial maintenance operations benefited particularly from substantial increases in painting services, which had been relatively flat. In the U.S., sales are up 29.7 percent for the second quarter and up 15.4 percent for six months; Canadian painting services are up 26.6 percent for the year.

In analyzing other activity, Heist pointed out "a strong showing by our temporary help subsidiaries. Ablest, in the U.S., increased six-month sales by 17.7 percent; Alert, Canadian counterpart of Ablest, nearly doubled the previous year's sales."

Pipe and Boiler Insulation, Inc., completing the North Carolina firm's first six months as a Heist affiliate, showed sales of $2,088,411. Heist

revealed that property was being acquired to construct a new PBI warehouse facility, one which should offer increased productivity and profitability.

The firm's balance sheet remains strong. Year-to-date, long-term debt has been reduced by 50.2 percent, to $1,520,000; cash flow allowed capital expenditures of $2,707,448. Working capital decreased by $734,544, resulting in a current ratio of 3.4-to-1 and a quick ratio of 2.9-to-1.

#90038p0308 02/07/1990 ~PR Newswire

WILSON, NC (FEB. 7) PR NEWSWIRE - Standard Commercial Corporation (NYSE: STW) today reported that net earnings for its third quarter ended December 31, 1989 improved over the comparable prior year period. Sales for the 1989 quarter were $254.1 million compared to $285.4 million for the same quarter of 1988. Net income for the quarter was $1.3 million or $0.16 per share, compared to $787,000 or $0.10 per share in the same period last year.

Sales for the nine months of $653.1 million were down slightly from $663.6 million in the comparable 1988 period. Total sales for the 1989 period consisted of tobacco -- 54.0 percent, wool -- 44.5 percent and other -- 1.5 percent, compared with 46.3 percent, 52.3 percent and 1.4 percent, respectively, in 1988. In 1989 a net loss for the nine months of $5.0 million or $0.60 per share was recorded in comparison with 1988 net income of $1.5 million or $0.18 per share.

Tobacco sales for the December 1989 quarter and nine months totaled $150.2 million and $353.0 million, respectively, up 5 percent and 15 percent over the comparable periods in 1988. The favorable effect of higher volumes on operating income in the 1989 third quarter and nine months was negated somewhat by margins being less than the comparable 1988 figures primarily because of differences in the sales mix. Prospects for continued strong tobacco sales in the foreseeable future appear good.

Wool sales for the quarter and nine months ended December 31, 1989 were $101.8 million and $290.7 million, respectively, down 27 percent and 16 percent from the same periods in 1988. The world wool market remains extremely depressed, with the Australian Wool Corporation continuing to take in on average over 55 percent of all offerings on the auction floors. Although some slight improvement in demand can be detected in the market there will continue to be a large surplus of wool and sources of supply will likely exceed demand for a considerable time. Further stock provisions were required in the December quarter following substantial provisions in the previous quarter; however, the level of operating losses in the most recent quarter was considerably less than in the September

quarter.

Other business activities showed an operating loss for the third quarter of both years but remained profitable through nine months.

Because of the seasonal nature of the Company's businesses, results for interim periods are not necessarily indicative of results for the full year.

STANDARD COMMERCIAL is one of the world's largest leaf tobacco dealers and among the top international wool trading companies. It operates in virtually every tobacco and wool producing nation and sells worldwide to tobacco mannufacturers and various wool users. Standard also operates companies engaged in the landscape nursery and building supply businesses.

FARMINGTON HILLS, MI. (FEB. 7) PR NEWSWIRE - Announcement was made today by Melvin Davis, general manager of the Centennial Body Division of Douglas & Lomason Company (NASDAQ-NMS: DOUG), that David Parker has been appointed national sales manager of the division.

Parker had been western sales manager and was headquartered at the Kansas City location of the company. He will now be at the offices of the division in Columbus, Ga., and will supervise all sales activity and sales promotion for that location. Ken Frey, formerly sales manager, has been

assigned to other activities.

Centennial manufactures truck bodies and trailers for delivery of foods and beverages. Its operations, combined with those of the Atlas Body Division (specializing in the manufacture of refrigerated units) and the Kansas City Service Center (used vehicles and refurbishing services), offer the most complete line of delivery vehicles and systems in the industry.

Douglas & Lomason Company, headquartered in Farmington Hills, is also a major supplier to the automotive industry of original equipment seating, hardware and decorative metal trim. Other divisions of the company make conveyors, pulleys and packaging equipment and a commercial grade trisodium phosphate.

MINNEAPOLIS (FEB. 7) PR NEWSWIRE - GE Capital Fleet Services has announced that it has entered into an agreement with American Express to expand its fuel procurement services. The new program, FuelPlus(TM), enables fleet drivers to use American Express Money Orders to purchase fuel.

Under the terms of this agreement, fleet drivers across the United States will be able to purchase fuel at more retail outlets than with fuel credit cards and at cash prices. An added feature will include greater opportunity for expense reporting and control than is available on most fuel card systems.

A test of the new money orders began on Dec. 15 with four GE Capital clients representing approximately 500 drivers on both the east and west coasts.

Loren Rodvold, director of Marketing Services for GE Capital Fleet Services said, "We consider it a real coup to be working with American Express. One company, American Express, is the absolute leader in negotiable instruments while the other, GE Capital Fleet Services, is a leader in vehicle management."

With 450,000 vehicles under lease, management or administrative services programs, GE Capital Fleet Services, headquartered in Minneapolis, is a leading provider of fleet management services to business, utilities and governments in both the United States and Canada.

GE Capital, headquartered in Stamford, Conn., is one of the nation's

largest financial services companies with $55 billion in assets.

ATLANTA (FEB. 7) PR NEWSWIRE - The board of directors of American Business Products Inc. (NYSE: ABP) today raised the quarterly dividend rate for the 33rd consecutive year and approved a stock repurchase plan.

The dividend was increased from the last quarterly payment of 20 cents per share of common stock to 22 cents per share. The new rate, which marks the 33rd consecutive year of increased dividends, will be paid March 15 to shareholders of record March 1. The company has paid cash dividends to shareholders every year since 1941.

The ABP directors also authorized the company to repurchase up to 750,000 shares of its common stock, Thomas R. Carmody, president and chief executive officer, announced. Purchases in varying amounts will be made over an indefinite period of time as appropriate, depending on market conditions and other factors, Carmody said.

"This step indicates the confidence of our directors in ABP's future growth," Carmody said. "Together with the increased dividend, the stock repurchase plan is another means of increasing share value. Over the long term we would expect this to result in a higher return on equity as well as higher earnings per share and ultimate appreciation in share price. At the current level of the share price, we feel ABP stock represents an attractive investment for the company."

ABP achieved record sales and earnings in 1989. Sales advanced to $387 million for the 51st year in a row of record sales with net income of $13.6 million or $1.90 per share compared with $1.82 per share for 1988 as adjusted for the June 30, 1989 stock split.

Atlanta-based American Business Products Inc. is a leading supplier of forms for computers and electronic equipment, envelopes, book printing, and other business supplies with 46 production facilities in the continental U.S. and Hawaii. Major operating companies are Curtis 1000 Inc., Vanier Graphics Corp., BookCrafters USA Inc. and American Fiber-Velope Mfg. Co.

JACKSONVILLE, FL (FEB. 7) PR NEWSWIRE - First Union National Bank of Florida and Florida National Bank customers in Florida can now use the 24-Hour Banking machines of either bank without incurring the $1 foreign automatic teller machine (ATM) surcharge. The waiving of the surcharge became effective with the legal acquisition of Florida National Bank by First Union on Jan. 29, 1990.

This means that First Union and Florida National customers can use the combined two banks' nearly 500 24-Hour Banking machines around the state for withdrawals, transfers and inquiries at no cost. Normal account withdrawal fees will continue to apply when the account is below the minimum balance requirement.

Customers of First Union and Florida National can also continue to use ATMs participating in the PLUS, HONOR, RELAY and CIRRUS networks.

First Union National Bank of Florida, headquartered in Jacksonville, Fla., has assets of $17.1 billion and 393 offices in 33 counties. It is a subsidiary of the Charlotte, N.C.-based First Union Corporation (NYSE: FTU). Following its acquisition of Florida National Banks of Florida, Inc. (NASDAQ: FNBF) on Jan. 29, 1990, First Union Corporation now has assets of approximately $38 billion and operates banking and financial services offices in 36 states and two foreign countries.

NEW YORK (FEB. 7) PR NEWSWIRE - Thomas J. A. McClain has been elected vice president-field services, Atlantic division, at Pan American World Airways, Thomas G. Plaskett, chairman and chief executive officer of Pan Am, announced today.

In his new position, McClain is responsible for directing the activities of all Pan Am field services in the Atlantic division, including Europe, the Middle East and Africa. Based in Frankfurt, McClain will report to Anthony Mule, senior vice president field services and services planning at Pan Am.

McClain's ties to the travel industry date back to 1963 when he began working for Swissair in Zurich. Since then, McClain has held a wide range of managerial and executive positions with TWA, including vice president passenger services planning and vice president-inflight services; Chemical Bank, where he served as vice president of marketing and long range planning; and Marriott Corporation where he held the position of vice president-inflight services.

In 1983, McClain founded McClain Airlines, based in Phoenix, Ariz., which operated until 1987.

McClain, 52, received his undergraduate degree in government administration from Stanford and holds an M.B.A. from Harvard Business School. He is an Air Force veteran.

He will reside in Frankfurt, Pan Am's Atlantic division headquarters, with his wife Brenda and two small children. Two older children are attending college in the United States.

HOUSTON (FEB. 7) PR NEWSWIRE - Oceaneering International, Inc. (NASDAQ: OCER), today announced its financial results for the third quarter of its 1990 fiscal year which ended on Dec. 31, 1989. On revenues of $41,925,000 Oceaneering reported net income for the quarter of $2,997,000, or $0.14 per common share. These figures compare favorably with a net income of $952,000, or $0.04 per common share, on revenues of $34,739,000 for the third quarter of the previous year.

During the first nine months of fiscal 1990, Oceaneering earned net income of $9,492,000 on revenues of $154,626,000. This compares to a net income of $2,436,000 on revenues of $103,913,000 in the comparable period of fiscal 1989.

Oceaneering, together with its affiliate companies, is one of the world's largest underwater services companies. Oceaneering supplies a comprehensive range of integrated technical services to a wide array of industries. Principal services are directed to the offshore oil and gas industry and include drilling support; subsea construction; production systems; facilities maintenance and repair; survey and positioning; engineering; and specialized inspection, both offshore and onshore.

ST. LOUIS (FEB. 7) PR NEWSWIRE - Edward J. Stiften has today been elected staff vice president and corporate controller by the board of directors of General Dynamics Corporation (NYSE: GD). He will be responsible for consolidation accounting, external reporting and financial analysis. Stiften will also be responsible for corporate-wide accounting policies.

Since joining General Dynamics in 1979, Stiften has held a variety of increasingly responsible positions within accounting and finance. His most recent assignment was corporate director - financial planning. Stiften will report to James J. Cunnane, corporate vice president and chief financial officer.

Before coming to General Dynamics, Stiften served as controller of the Coca-Cola Bottling Company of St. Louis and prior to that spent four years in public accounting.

A native of St. Louis, Stiften received a bachelor's degree in accounting from the University of Missouri-St. Louis and he is a certified public accountant. He lives with his wife, Brenda, and their son in Desoto, Mo.

NEW YORK, (FEB. 7) PR NEWSWIRE - The board of directors of Profit Systems Inc. (NASDAQ: PFTS), a Delaware corporation, announced today that it has received from Lep Group plc., its majority shareholder, a proposal that Profit Systems, Lep Group and a wholly owned subsidiary of Lep Group enter into negotiations for the merger of Profit Systems with such subsidiary.

Under the Lep Group proposal, the consideration payable for each share of Profit System's common stock surrendered in the merger transaction would be equal to the sum, payable in cash, of (i) $12 and (ii) if the merger transaction shall not have been consummated prior to or on April 30, $0.25 for each calendar quarter commencing on May 1 and ending Sept. 28, during which the merger transaction shall remain unconsummated, with such amount to be prorated (based on actual number of days) for periods less than a calendar quarter.

The board of directors of Profit Systems has appointed a committee of independent directors to consider and advise the full board with respect to the Lep Group proposal and has retained Legg Mason Wood Walker Inc. as a financial advisor to render assistance in such consideration. The board of directors intends to enter into discussions with representatives of Lep Group and its subsidiary in the near future.

Profit Systems, through its subsidiaries, is engaged in the business of forwarding and transporting freight by means of air and surface carriers and the provision of incidental services, both within the United States and to cities throughout the world. Profit Systems' common stock is traded in the NASDAQ market system under the symbol "PFTS".

WILMINGTON, DE (FEB. 7) PR NEWSWIRE - Matlack Systems Inc. (AMEX: MLK) today announced it has filed a registration statement on Form S-1 with the Securities and Exchange Commission to register 427,826 shares of its $1 par value common stock, representing approximately 7.5 percent of the company's outstanding common stock.

The shares were issued as partial consideration for the purchase of eight truck terminals valued at approximately $7 million, which were previously leased by the company from a subsidiary of Rollins Truck Leasing Corp.

The remainder of the consideration consisted of the assumption of approximately $3.3 million in mortgages on certain of the terminals. The closing of the purchase of the terminals took place on Jan. 8, 1990. None of the proceeds will accrue to Matlack Systems Inc. when the shares are sold.

Matlack Systems Inc.'s major operation consists of Matlack Inc., one of the largest carriers of bulk commodities by truck in North America. Matlack operates approximately 1,400 tractors and 2,900 trailers out of 85 terminals located in 35 states and three terminals in Canada.

CRYSTAL LAKE, IL (FEB. 7) PR NEWSWIRE - Sun Electric Corp. (NYSE: SE) today announced sales and earnings for its fourth quarter and year ended Dec. 31, 1989.

Net sales for the fourth quarter ended Dec. 31, 1989, were $46,657,000 compared to $45,364,000 for the quarter ended Dec. 31, 1988. For the quarter ended Dec. 31, 1989, the company reported a net loss of $2,409,000 or $.31 per share compared to a net loss of $5,154,000 or $.74 per share for the quarter ended Dec. 31, 1988, which included charges of $2,805,000 for the restructuring of certain unprofitable foreign operations, the closedown of certain manufacturing operations and expenses associated with efforts to protect shareholders' rights.

For the year ended Dec. 31, 1989, the company reported sales of $184,416,000 compared to sales of $190,032,000 for 1988. For the year ended Dec. 31, 1989, the company reported a net loss of $8,092,000 or $1.05 per share compared to a net loss of $4,223,000 or $.61 per share for the comparable 1988 period.

The net loss for 1989 includes charges of $1,083,000 for the expenses associated with the settlement of a proxy contest and related legal and investment banking fees; $2,632,000 for the cost of a restructuring program in the U.S.; and a gain of $448,000 from the sale of the assets of the company's joint venture in Japan.

Said Gerald A. Kien, chairman, president and chief executive officer, "Financial results for 1989, although negatively impacted by a number of substantial one-time charges, were still well below expectations. In the company's European and other international operations, 1989 results were ahead of 1988. Results in the United States, however, were less than 1988 due primarily to lower sales of engine testers and diagnostic equipment.

"Several actions were taken in 1989 aimed at improving future results including the completion of the restructuring of our Japanese joint venture and the implementation of a major cost reduction restructuring program in the United States. The company also completed a top priority project resulting in the design and development of its new MGA-9000 emissions analyzer for use in vehicle emissions testing programs in 1990 and beyond. The company is optimistic about the opportunities represented by these emissions testing programs, not only in the United States, but in Europe and other markets throughout the world."

Sun Electric Corp. is primarily engaged in the design, manufacture and marketing of diagnostic, test and service equipment for the motor vehicle service industry and motor vehicle manufacturers in more than 100 countries. The company also markets service station management systems for the retail petroleum industry.

#90038p0344 02/07/1990 ~PR Newswire

ANN ARBOR, MI (FEB. 7) PR NEWSWIRE - Gelman Sciences (AMEX: GSC) filed a memorandum in Washtenaw County Circuit Court, with Judge Patrick J. Conlin alleging that in 1980 the DNR illegally trespassed on Gelman Sciences property and seized materials in violation of the law.

The memorandum states the DNR violated Gelman Sciences' rights by entering company property without a search warrant. The state claims that on the second instance in which the DNR illegally trespassed on Gelman Sciences property, the DNR sought permission from H&H Company, a property owner near Gelman Sciences, under the mistaken belief that H&H and not Gelman Sciences was the property owner. Permission to enter the property had never been sought from anyone before the DNR first engaged in its illegal activity.

Gelman Sciences also pointed out that in the state's environmental lawsuit against the company, the state alleged that Gelman Sciences pumped water on its neighbor's property in 1981. The DNR was not aware that Gelman Sciences had purchased the property in question five years before the state alleges Gelman Sciences pumped the water.

Gelman Sciences attorneys have requested the court to not allow into evidence any testimony or documents derived from the DNR's illegal activity. Gelman Sciences also expects to ask the court to find the state's allegation about pumping water to be untrue.

Charles Gelman, company chairman and chief executive officer, stated that

he is confident the company will prevail, however, at great cost. Thus far it has cost the company over $5 million to defend itself against the state. Mr. Gelman said, "This legal entanglement is taking time, energy and money away from the real issue at hand, our ability to clean up."

#90038p0347 02/07/1990 ~PR Newswire

LOS ANGELES (FEB. 7) PR NEWSWIRE - Rykoff-Sexton Inc. (NYSE: RYK) said today it anticipates earnings for the third fiscal quarter ended Jan. 27, 1990, will be below projections, primarily due to lower than anticipated sales increases, delays in the full implementation of cost containment measures and certain non-recurring items.

Roger W. Coleman, president and chief executive officer, said earnings per share will be approximately $.05 for the third fiscal quarter, compared with $.38 earned for the comparable prior year period. He stated that management anticipates a continued impact on the fourth quarter results and that it will take approximately six months to fully complete the necessary cost containment adjustments.

Coleman said Rykoff-Sexton is continuing to experience higher labor, rental, insurance and interest expenses, at a time when the rate of sales growth has slowed. In addition, during the third quarter, Rykoff-Sexton incurred a $2 million pre-tax charge related to additional bad debt provisions and employee health care benefits.

Coleman said that despite the slowing of revenue growth, the company will report higher revenues for the third quarter, along with increased gross profit margins, as compared with the corresponding prior year period.

Rykoff-Sexton also announced it has withdrawn its previously filed registration statement relating to the offering of Liquid Yield Option Notes.

Rykoff-Sexton Inc., consisting of S.E. Rykoff & Co. and John Sexton & Co., is a leading manufacturer and distributor of food and related products for restaurants, institutions and membership warehouse stores nationwide. Manufacturing, processing and packaging operations are based in Los Angeles; Indianapolis; Englewood, N.J.; and Des Moines, Iowa. The company's 35 distribution centers are located throughout the United States.

#90038p0349 02/07/1990 ~PR Newswire

CARLSBAD, CA (FEB. 7) PR NEWSWIRE - Specialized Systems Inc. (NASDAQ: SSII) (SSI) today announced that in connection with proxy materials to be distributed to the company's shareholders for the company's special shareholders meeting scheduled for Feb. 12, 1990, the staff of the Securities and Exchange Commission's Division of Corporate Finance asked the company to amend its Forms 10-Q for the periods ended March 31, 1989; June 30, 1989; and Sept. 30, 1989. A chief purpose of these requested amendments was for the company to report as a separate entity from Kentana Development Inc. with which it signed an Agreement for Exchange of Stock effective March 7, 1989. In its original filings, the company reported on a consolidated basis with Kentana since the transaction by which Kentana had acquired the company was approved by the board of directors and the companies were in reality being operated on a consolidated basis. The SEC staff, in connection with its review of the company's proxy materials, took the position that the financials should have been reported on an unconsolidated basis. The company's accountants disagreed with the SEC staff but the management of the company decided to comply with the SEC's request in order to facilitate review of the company's proxy materials and expedite the special shareholders meeting to ratify the Agreement for Exchange of Stock and complete the reorganization with Kentana.

Management of the company further believes that in view of the SEC's position, the SEC staff is of the belief that the original Forms 10-Q for the above time periods are unreliable. As a consequence of the restatement of the company's financials on an unconsolidated basis, the company has, assuming the SEC staff's position is correct, fallen below the minimum net worth requirements for inclusion on NASDAQ. As a result, the company will appear before a committee of the NASD Board of Directors

in Dallas next week. The SEC has been reviewing the company's filings since the company's original filing of preliminary proxy materials on Dec. 7, 1989.

Assuming the company's shareholders ratify the Agreement for Exchange of Stock at the company's special meeting of shareholders on Monday, Feb. 12, 1990, in Encinitas, Calif., the company will immediately file a Form 8-K with the SEC presenting the financial condition of Kentana Development Inc. and the company on a consolidated basis which management of the company believes will cause the company to comply with the minimum NASDAQ net worth standards.

OYSTER BAY, NY (FEB. 7) PR NEWSWIRE - Acclaim Entertainment, Inc. today confirmed that a truckload of its "IronSword" games and "Double Player" remote controllers for the Nintendo Entertainment System, with an estimated retail value in excess of $1 million, was forced off the road by five men near the Nassau/Queens county border in New York this morning.

The driver was abducted by four of the men who were later captured by police, while the fifth man escaped with the truckload of Acclaim products. As of this release, the hijacked truck and driver are still at large.

"Though this is a bizarre incident, it is indicative of the popularity and value of video games and the Nintendo system," said Robert Holmes, president of Acclaim. "We are just glad that the driver is safe and certainly hope something of this nature does not happen again."

Acclaim executives said that the shipment was fully insured and had no additional comments on the case. The case is being handled by Nassau County's fourth police precinct.

Acclaim Entertainment, Inc. is a leading publisher, marketer and distributor of home entertainment products. These include Nintendo Entertainment System software, Nintendo Game Boy compact video system software, wireless remote controllers and hand-held electronic video games.

MIAMI (FEB. 7) PR NEWSWIRE - Revenue of Ryder System, Inc. (NYSE: R) for both the fiscal year and the fourth quarter ended Dec. 31, 1989 were about equal to year-earlier levels, it was reported today by Chairman, President and Chief Executive Officer M. Anthony Burns. Net earnings declined for both periods.

For the year, revenue was $5.1 billion, compared with revenue of $5.0 billion in 1988. Net earnings in 1989 were $46.0 million, compared with 1988 net earnings of $197.2 million. Earnings per common share were $0.50 in 1989, compared with $2.40 in 1988.

Results for 1989 included a special third quarter aftertax charge of $57 million, or $0.75 per share. In 1988 results included extraordinary and unusual items which in total increased net earnings by $10.2 million, or $0.13 a share. Also, in the fourth quarter of 1989 the company recorded a gain on the sale of its Insurance Management Services Division, but the gain was largely offset by increases in reserves including the commitment to repurchase several issues of high-coupon, long-term debt at a premium.

Assets at 1989 year end totaled $5.9 billion, compared with $6.0 billion a year earlier. The decline reflects the sale in 1989 of the company's Insurance Management Services Division and several other businesses.

In the fourth quarter, revenue totaled $1.3 billion, the same as in the corresponding quarter of 1988. Net earnings for the three months ended Dec. 31, 1989 were $14.9 million, compared with net earnings of $47.9 million a year earlier. Earnings per common share for the fourth quarter were $0.17 in 1989 and $0.58 in the same period of 1988.

ATLANTA (JAN. 7) PR NEWSWIRE - First American Bank of Georgia, N.A. announced today the execution of a letter of intent to acquire the deposits and facilities of the 22 Fulton Federal Savings Bank branches located in the metropolitan Atlanta area.

In the proposed transaction, First American will assume the deposits relating to Fulton Federal's Atlanta branches (approximately $917 million

at Dec. 31, 1989) and will purchase certain related assets and assume certain related lease obligations. First American will pay Fulton Federal a premium for the deposits assumed equal to approximately $50 million, depending on the level of deposits at closing. The transaction is subject to approval by the appropriate regulatory authorities.

In his announcement, Guy W. Freeman, chairman and chief executive officer of First American Bank of Georgia, stated: "The acquisition of Fulton's attractive and well-located branches represents a significant step toward our goal of expanding our retail banking presence in the metropolitan area. It will extend First American Bank of Georgia's presence to the counties of Bartow, Fayette, and Henry."

Upon completion of the acquistion, First American Bank will have total assets of nearly $3 billion and 74 banking offices in eight counties surrounding Atlanta, making it the fifth largest branch system in the metropolitan area. The acquisition will increase First American's share of total deposits in the eight-county area to over 8 percent and improve First American's market share rank from seventh to fourth.

With a history dating back to 1911, First American Bank is an established member of the Atlanta financial market. "We will be working hard to make this transition as smooth as possible for Fulton Federal's customers and employees," stated Freeman. "The acquisition will result in increased convenience for customers of both institutions by expanding our service area and providing additional offices," he noted.

Founded in 1927 in Atlanta, Fulton Federal has a high-quality customer base with long-standing customer relationships based on quality service, convenience, and innovative products. Following First American's acquisition of Fulton Federal's Atlanta branches, Fulton intends to continue its existence as a smaller FDIC-insured institution with its remaining 15 branches which, at Dec. 31, 1989, had an aggregate of $540 million in deposits.

First American Bank of Georgia, N.A. is headquartered in Atlanta, one of the fastest growing and most economically stable regions in the nation.

NEW YORK (FEB. 7) PR NEWSWIRE - Delta (NYSE: DAL), Northwest, and Trans World Airlines (NYSE: TWA) announced today that they have completed their transaction to form a new company that will own and market a global,

neutral computer reservations system (CRS).

Delta, Northwest and TWA had announced on September 28, 1989, that they had reached a preliminary agreement to form the CRS joint venture.

As previously announced, Delta will own 40 percent, Northwest 33-1/3 percent and TWA 26-2/3 percent of the new CRS company, generally reflecting the relative sizes of the partners in the airline industry. As the parties also stated at that time, TWA and Northwest will contribute their PARS CRS to the new joint venture, and Delta will contribute its DATAS II CRS and will pay $48 million to TWA for a 6-2/3 percent interest.

Cal Rader, chief executive officer of the new CRS company and former vice president - marketing automation at Delta Air Lines, and Efrain Zabala, chief operating officer of the new CRS company and former president - PARS Travel Information Systems, will host a news conference Thursday, February 8, 1990, at 10:30 a.m., at the Grand Hyatt Hotel, Park Avenue at Grand Central in New York City to elaborate on the details of today's announcement and to make a major announcement about the new company.

Rader and Zabala will be available to respond to questions immediately following the news conference. Members of the news media are invited to attend.

CONTACT: Northwest Airlines Inc. public relations, 612-726-2331, Trans World Airlines Inc. public relations, 914-242-3035, or Delta Air Lines public relations, 404-765-2533

DES PLAINES, IL (FEB. 7) PR NEWSWIRE - Joel D. Spungin, chairman of the board, announced today that Jeffrey K. Hewson, 46, will be joining United Stationers Inc. (NASDAQ-NMS: USTR) as executive vice president effective March 1, 1990. He will be responsible for marketing and sales for United Stationers Inc. and its subsidiaries. He will be reporting directly to Mel Hecktman, vice chairman.

Hewson is currently president of ACCO USA and Swingline Inc. Prior to that, he was president of ACCO Europe and ACCO Canadian.

"Jeff brings 25 years experience in office products manufacturing, marketing and distribution worldwide. We anticipate Jeff's innovative marketing style and leadership quality will significantly enhance our management team," said Spungin.

Hewson resides in Lake Forest, Ill., with his wife, Susan, and their daughter, Sophie.

United Stationers Inc. is the nation's largest wholesaler of office products to resellers. Through its computer-based physical distribution system, it makes more than 25,000 items available substantially within 24 hours through distribution points in 56 major hub cities.

ST. PAUL, MN (FEB. 7) PR NEWSWIRE - St. Jude Medical Inc. (NASDAQ: STJM) announced today the appointment of Eric Sivertson to the position of president, St. Jude Medical International Division. His responsibilities will include operations outside the United States and Canada.

Sivertson joined St. Jude Medical in 1985 as the director of marketing. He also served as the director of international sales prior to his appointment as vice president of sales and marketing in March 1988.

Lawrence A. Lehmkuhl, St. Jude Medical's president and chief executive officer, said "Eric possesses the knowledge and ability to help St. Jude Medical focus on our international relationships which today represent approximately half of our business. The need for St. Jude Medical to get closer to our international customer represents a significant challenge which Eric will address in his new position."

St. Jude Medical Inc. develops, manufactures and markets medical devices for cardiovascular and vascular applications.

#90038p0380 02/07/1990 ~PR Newswire

DAYTONA BEACH, FL (FEB. 7) PR NEWSWIRE - Mazda's unmatched dominance at the SunBank 24 Hours has continued yet another year at world-famous Daytona International Speedway with two overpowering class victories and a qualifying record.

The Mazda RX-7, already the most successful single model ever to compete at Daytona or in International Motor Sports Association history, won its ninth straight Grand Touring Under Three-Liter (GTU) crown in the race and an unprecedentd 97th IMSA victory.

Peter Uria, Plantation, Fla., leased a car which had won this classic four times for owner Amos Johnson, Raleigh, N.C., and brought it home first again. He finished 15 laps of the 3.56 mile road course ahead of the second place Porsche 911. Mazda compiled a 1-3-4 class finish.

In Camel Lights prototype class, a privately entered Mazda powered Argo won by 33 laps as it finished ninth overall. The Erie Scientific car, entered by company president Frank Jellinek of No. Hampton, N.H., and co-driven by John Groom, Eliot, Maine, and Mike Greenfield, Freeport, N.Y. traveled further in the 24 hours than any other Lights class winner, 642 laps. The 24 hour Camel Lights victory score now is Mazda Argo 3 - all others 3 in this relatively new form of prototype racing.

Meanwhile, the Mazda factory's four-rotor RX-7 made a promising debut with defending GTO driving king Pete Halsmer winning the class pole position with a record 1:47.867, more than two seconds below the previous standard. Halsmer returned during the race to help the other GTO RX-7 fight its way back to second place along with manager-driver Jim Downing of Atlanta,

Johnson and business executive John O'Steen of Cincinnati, Ohio.

Uria, who sells heart pacemakers for a living, made the arrangement with Johnson and Team Highball only a fortnight before Daytona. Because he is a private entry, he earns a $21,000 bonus from Mazda Motorsports under programs to encourage independents to compete. He took home about $40,000, more than any other entry in the race except the overall winner, a Jaguar.

Uria's co-drivers included Jim Pace of Jackson, Miss., a former med-student who aspires to an Indy career and Rusty Scott of Denver, scion of a banknote printer who competes in Formula Atlantic. Both were Daytona GTU rookies. Bob Dotson, Waynesville, N.C., the other co-driver, is a driving instructor like Pace.

Another bonus recipient was Dick Greer, Columbus, Ohio, restaurateur, who bought last year's winning RX-7 and mothballed it until this race. He finished third in class earning $5,750. The $750 was for being second finishing GTU Mazda.

Of the 61 listed cars which began the grueling day and night endurance contest, only 22 finished and five of them were Mazda rotary powered.

TULSA, OK (FEB. 7) PR NEWSWIRE - Unit Corporation (NYSE: UNT) has announced record production of 4.6 billion cubic feet of natural gas in 1989, a 48 percent increase over the 3.1 billion cubic feet produced in 1988. Unit's 1989 oil production of 311,000 barrels was the highest in the company's history, 21 percent above the 257,000 barrels produced in 1988.

During 1989, Unit continued to increase remaining oil and gas reserves despite its high production rates. Proved oil reserves of 2,028,000 barrels at Jan. 1, 1990, were 26 percent above the 1,610,000 barrels at the previous year's beginning. Proved natural gas reserves of 29.2 billion cubic feet were 17 percent higher than the 24.9 billion cubic feet of the prior year. Since 1984, the company's after production reserves have grown at an average annual rate of 27 percent per year.

The increase in Unit's reserve base was a result of equal amounts of new wells drilled and reserve acquisitions.

Unit Corporation is a Tulsa-based, publicly-held energy company engaged in oil and gas exploration, production, and contract drilling.

#90038p0391 02/07/1990 ~PR Newswire

ATLANTIC CITY, N.J. (FEB. 7) PR NEWSWIRE - "Notice has been given today by the New Jersey Casino Control Commission (CCC) that the 90-day test demonstration of a computerized card shuffling and security system for Blackjack will begin on Monday, March 12, at Bally's Park Place Casino Hotel in Atlantic City," announced Adolph E. Nicoletti, president of We Are Systems "21" Inc., the company that is marketing the revolutionary Card Management Security System.

"The system, and the long-lasting vinyl Genie Watch cards, which were approved for use with an interim waiver last year, will be used at one table over the test period, permitting the CCC and the Division of Gaming Enforcement (DGE) to collect data. At the conclusion of the trial period they will determine if the Card Management Security System can be approved in its final format for permanent use in New Jersey casinos," Nicoletti added.

The equipment has been designed to increase game security while allowing casinos to better serve the playing public. It is housed in a standard Blackjack table and uses two computers which can shuffle and check two eight-decks sets of cards. This permits one to be shuffled while the other is in play. Fiber-optics, working in conjunction with one computer, assure that every card is present in each shuffle and free from any damage or markings. Any bogus cards introduced would temporarily stop the system, allowing the dealer and floor personnel to take appropriate action.

The second computer is programmed with mathematical algorithm formulas to insure a pseudo-random shuffle. Said Nicoletti, "The recent study published by Dr. Persi Diaconis, a statistician and mathematician from Harvard University, and Dr. Dave Bayer, a computer scientist and mathematician from Columbia University, indicates that it takes seven shuffles to thoroughly mix a deck of cards. Our surveys show that while most casinos shuffle significantly fewer times than is recommended by the recent study, they still spend about 12 minutes per hour with all of the required procedures. Our Card Management Security System could return to the casino up to 10 of the 12 minutes lost each hour. It also provides a more fair shuffle, because no individual can ever hope to approach the ability of a computer to disperse the cards in such a thorough and unbiased fashion."

Nicoletti noted that the equipment is suitable for use wherever legalized Blackjack gambling exists internationally. The company has received

inquiries from every segment of the market, including casinos in the United States and foreign countries, many Caribbean islands, cruise ships, Indian reservations and riverboats.

ATLANTA (FEB. 7) PR NEWSWIRE - BMR Financial Group Inc., Atlanta, (NASDAQ: BMRG), and First Chattanooga Financial Corp., Chattanooga, Tenn., (NASDAQ: FCHT), jointly announced today that they had signed a letter of intent providing for the merger of FCHT with BMRG.

Terms of the letter of intent call for holders of each share of FCHT common stock to receive $17 in cash plus 1.07195 shares (or an aggregate of 3 million shares) of BMR common stock at closing. In addition, the board of directors of FCHT announced its intention to declare and pay a special $2 cash dividend per share before the closing of the merger. Based upon the $7.75 closing price of BMRG common stock on Feb. 6, the merger, including the special dividend, has an indicated value of more than $76 million, or approximately $27.25 per share.

The transaction is subject to (a) approval of an amendment to the charter of First Federal Savings and Loan Association of Chattanooga ("First Federal"), (b) the signing of a definitive agreement, (c) receipt of required regulatory approvals, (d) approval by the shareholders of each company, (e) financing by BMRG of the cash portion of the purchase price, and (f) certain other conditions.

After the merger is completed, it is expected that two members of the FCHT board, Spencer H. Wright, chairman and chief executive officer of FCHT, and Z. Carter Patten III, will join the BMRG board with Wright becoming vice chairman of BMRG. James L. Greene will continue as chairman and chief executive officer of BMRG.

#90038p0398 02/07/1990 ~PR Newswire

SOUTHFIELD, MI (FEB. 7) PR NEWSWIRE - The board of directors of Federal-Mogul Corporation (NYSE: FMO) today declared the regular quarterly dividend of 23 cents a share on the common stock of the company.

The dividend is payable March 9, 1990, to shareowners of record at the

close of business on Feb. 23, 1990. It will be the 216th consecutive dividend paid by the company.

President and Chief Executive Officer Dennis J. Gormley said, "Federal-Mogul's dividend policy is being continued as an expression of our confidence in the future.

"When released next week, we expect 1989 fourth-quarter results to be profitable but substantially lower than the 15 cents to 20 cents per share current street estimates," he added.

"The fourth-quarter results have been impacted by the sluggish economy and increased automotive and truck production cutbacks. This is an industrywide condition, particularly in our original equipment markets." Gormley said that while 1989 proved to be a difficult year, he expects to see considerable improvement in the company's 1990 results.

Headquartered in Southfield, Federal-Mogul operates 37 plants, more than 70 distribution centers and four major research facilities throughout the world. Its products range from a variety of precision parts for the transportation, farm equipment, construction, and manufacturing industries to aerospace components.

#90038p0400 02/07/1990 ~PR Newswire

HOUSTON (FEB. 7) PR NEWSWIRE - National Convenience Stores Inc. (NYSE: NCS) said it expects to commence on Thursday, Feb. 8 an offer to exchange all of its nine percent Convertible Subordinated Debentures due Dec. 1, 2008, for new $14.375 Convertible Exchangeable Preferred Stock.

Under the terms of the exchange offer, the company will issue seven shares of the company's $14.375 Convertible Exchangeable Preferred Stock, Series E, having a par value of $1.00 per share and a liquidation preference of $100 per share ("Series E Preferred Stock"), in exchange for each $1,000 in principal amount of its outstanding 9 percent Convertible Subordinated Debentures due Dec. 1, 2008 ("9 percent debentures"). On Feb. 6, 1990, the closing price of the 9 percent debentures on the New York Stock Exchange Inc. composite tape was 67-1/2 percent. Each $1,000 in principal amount of nine percent debentures is convertible into 50 shares of the company's common stock, par value 41-2/3 cents per share ("common stock"), while each seven shares of Series E Preferred Stock received will be convertible into 63.7 shares of common stock, in each case subject to adjustment in certain circumstances.

Each $1,000 principal amount of nine percent debentures is entitled to

receive annual interest of $90, while each seven shares of Series E Preferred Stock is entitled to receive annual dividends of $100.63. After March 1, 1993, the company may redeem the Series E Preferred Stock at $100 per share or exchange the Series E Preferred Stock for the company's 14.375 percent Convertible Subordinated Debentures due 2008 ("new debentures") having a principal amount equal to the liquidation preference of the Series E Preferred Stock in exchange for which they are issued. The Series E Preferred Stock incorporates an additional conversion rate adjustment in the event of a change in control of the company, which is not provided for the 9 percent debentures.

The exchange offer will be made solely by the offering circular and will be conditioned on at least 70 percent of the 9 percent debentures being tendered.

V.H. Van Horn, president and chief executive officer of NCS, said, "The exchange offer will strengthen the company's capital structure by reducing long-term debt and increasing stockholders' equity, and increase the company's dividend paying capacity, which is currently limited under certain restrictive covenants in its debt and loan documents.

The exchange offer is part of the company's continuing program to reduce its leverage and to improve its financial strength and flexibility."

NCS is one of the largest operators of convenience stores in the United States, currently operating 1,099 specialty convenience stores in four Sunbelt states under the name Stop N Go.

HOUSTON (FEB. 7) PR NEWSWIRE - Seagull Energy Corp. (NYSE: SGO) announced today that it is calling for redemption the 980,950 outstanding shares of its $2.25 Convertible Exchangeable Preferred Stock, Series A (NASDAQ: SGOPP).

The redemption is scheduled to occur on March 9, 1990, at a per-share redemption price of $26.50, plus accrued dividends through the redemption date of $0.413 per share.

The preferred shares are currently convertible into shares of common stock at a rate of 1.5625 shares of common stock per share of preferred stock. As a result of the redemption, this conversion right will expire at the close of business (5 p.m. EST) on Feb. 22, 1990. Cash will be paid in lieu of fractional shares of common stock upon the conversion of shares of

preferred stock.

Houston-based Seagull is engaged in transportation, distribution and marketing of natural gas, liquids products and petrochemicals; oil and gas exploration and production, and natural gas processing.

#90038p0415 02/07/1990 ~PR Newswire

CHICAGO (FEB. 7) PR NEWSWIRE - Playboy Enterprises, Inc. (NYSE: PLA) today reported net income of $.5 million, or $.05 per share, on net sales and revenues of $45.5 million for the second quarter of fiscal 1990, which ended Dec. 31, 1989. For the same period last year, net income of $1.5 million, or $.16 per share, was reported on net sales and revenues of $48.5 million.

For the second consecutive quarter, the Playboy Entertainment Group was profitable. Second-quarter fiscal 1990 revenues for the group increased from the prior year, led by improvements in the home video and recently launched international television businesses. The Playboy Entertainment Group encompasses pay television operations "Playboy at Night," a pay-per-night service, subscription cable, hotel service and direct broadcast satellite transmission; domestic syndication operations; international television and home-video operations, and event programming, including the Playboy Jazz Festival.

The publishing group's revenues and earnings declined when compared with the second quarter last year, due primarily to $2.1 million in revenues generated in last year's second quarter from the sales of a portion of the company's collection of LeRoy Neiman paintings. Additionally, last year's second quarter included higher newsstand and advertising revenues from Playboy's special 35th anniversary issue.

The licensing and merchandising group's second-quarter performance reflected continued strong growth, as revenues and operating income increased.

Corporate administration and promotion expenses were $.2 million lower for the second quarter of fiscal 1990 than they were for the same period last year, due primarily to the completion of the company's management information system conversion.

The company realized an extraordinary tax benefit of $.2 million in the second quarter of fiscal 1990 resulting from the utilization of tax loss carryforwards compared with a benefit of $.6 million for the same period a year ago.

Playboy Enterprises, Inc., is a media and marketing company that publishes consumer magazines, direct mail catalogs and art reproductions; produces and markets programming for pay television, domestic and international syndication, and home video; and licenses the Playboy name and other trademarks.

#90038p0418 02/07/1990 ~PR Newswire

ATLANTA (FEB. 7) PR NEWSWIRE - BMR Financial Group Inc. (NASDAQ: BMRG) today reported net income of $2,029,000, or $.80 per share, for the 12 months ended Dec. 31, 1989, compared with $2,004,000 or $.93 per share, for the prior year, when fewer shares were outstanding.

Earnings for the three months ended Dec. 31, 1989, were $380,000, or $.15 per share, compared with $560,000, or $.22 per share, for the fourth quarter of 1988.

"Two significant factors hindered our ability to achieve our fourth quarter targets in 1989," stated James L. Greene, chairman. "Consulting revenues in the fourth quarter were $1.2 million, 12 percent lower than in the fourth quarter of 1988. Regulatory processing delayed the acquisition of our banks in Florida by 90 days, which reduced our ability to improve the earnings of these banks in 1989.

"With the addition of Meigs County Bankshares Inc., Decatur, Tenn., during the second quarter of 1990, we will have doubled our banking assets in recent months," continued Greene. "This will provide us with the base for growth in earnings in 1990 through improved earnings in these banks. In

addition, although Meigs County Bankshares and Meigs County Bank were to be acquired for $2.75 million in cash, the parties of the bank have agreed on Jan. 29, to a revised transaction involving the issuance of approximately 350,000 shares of BMR common stock in a transaction to be accounted for as a pooling of interests. This gives the company greater flexibility in pursuing additional acquisitions and should add incremental earnings per share in 1990." Meigs County Bankshares and Meigs County Bank had total consolidated assets of $42 million at Dec. 31, 1989. This acquisition is subject to approval by the shareholders of Meigs County Bankshares and Meigs County Bank, receipt of regulatory approvals and satisfaction of certain other conditions.

BMR Financial Group owns and manages banks in Georgia and Florida, as well as providing consulting services to financial institutions nationwide. Total assets for the company were $260 million at Dec. 31, 1989. The common stock is traded in the Over-the-Counter market and is listed on the NASDAQ national market list under the symbol "BMRG."

#90038p0419 02/07/1990 ~PR Newswire

MILFORD, MA (FEB. 7) PR NEWSWIRE - Home National Corporation (NASDAQ: HNCP) today announced a preliminary operating loss of $20.4 million or $3.21 per share for 1989. The company anticipates completion of its year-end audit within 30 days, and therefore, these preliminary results are subject to change. Additions to loan loss reserves and charge-offs of non-performing loans increased significantly for the quarter in response to what the company termed a sluggish performance in the housing industry. The company beleives that this trend may continue and that further deterioration is possible.

Once the company completes its review of the loan portfolio, which is also being examined by the Comptroller of the Currency, the company may decide to make further provisions for loan losses for 1989. If this occurs, it would add to the company's losses for 1989.

The company added $16.4 million to loan loss reserves in the fourth quarter of 1989, while charging off $13.8 million of loans. for the year ended Dec. 31, 1989, additions to loan reserves total $30.1 million, while charge-offs total $21.2 million. The year end reserve for loan losses stands at $20.4 million. Non-performing loans increased from $58.7 million at Sept. 30, 1989, to $72 million at year end. At year-end 1989 total assets equaled $485.6 million.

The loss of interest on non-performing loans, increased additions to reserves, and the rise in costs needed to manage the troubled sector of the loan portfolio caused the company to report the preliminary net loss. The loss for the fourth quarter of 1989, also preliminary, totaled $14.7 million, or $2.31 per share.

The need to preserve capital was a principal factor in the board of directors decision to eliminate quarterly cash dividends in the third quarter of 1989. Nonetheless, equity capital has been reduced to $11.4 million or $1.79 per share by the preliminary operating loss of 1989.

Management has developed a program that will conserve capital through internal cost containments while recognizing the need to raise significant additional capital from external sources.

The bank, through its parent holding company, will attempt to raise this new capital in 1990. The company noted that there can be no assurance that new capital can be raised. If such capital is raised this would likely result in significant dilution to shareholders. If the company is not successful in raising new capital it is likely that it will not meet regulatory capital requirements which become effective on Dec. 31, 1990. The company has retained the New York consulting firm of Lyons, Zomback & Ostrowski, Inc. to assist in the recapitalization efforts.

The plan also calls for an approximate 20 percent reduction in the asset size of the bank to be completed by year end 1990. To accomplish this, lending activity will be restricted and offset by a corresponding reduction in out of area time deposits. A key component of this phase of the plan is the need for significant reduction of non-performing loans in 1990.

In addition to a reduction in the asset size of the bank, extensive cost reduction and cost control measures have been instituted. Budgets not directly related to the management of troubled loans have been reduced to 1988 levels or lower. Salaries for bank officers are frozen at current levels until further notice. Retail bank functions are being consolidated and streamlined. Overall staffing levels will be reduced by the offering of early retirement packages, voluntary termination programs, and a general reduction in force.

CHICAGO (FEB. 7) PR NEWSWIRE - Dow Brands today released the following statement:

Dear Media Representative:

Since early this morning, DowBrands, makers of SARAN WRAP(a) brand plastic

film, has received phone calls from consumers who are confused by a recent Cable News Network segment. The segment urged consumers to be wary of using plastic wraps in their microwave ovens for fear of ''plasticizer contamination'' of their food. The segment told an incomplete story and has left many consumers perplexed and worried.

DowBrands hopes to quell any fears about plastic wrap use by offering you the following statement.

Dow statement on the safety of plasticizer additive used in saran wrap:

Some recent articles in the lay press have raised the issue of possible health concerns as a result of potential migration of certain additives from plastic films used to wrap food items. SARAN WRAP(a) brand of plastic film has been used over the past 40 years for a broad range of applications, including food contact. As is common for most films used for food contact, SARAN WRAP(a) wrap contains a material known as plasticizer that increases the pliability of the wrap. The plasticizer used in SARAN WRAP(a) is known as acetyl tributyl citrate (ATBC), a derivative of citric acid commonly present in citrus fruits.

SARAN WRAP(a) compiles with the requirements of the Federal Food Drug and Cosmetic Act as amended for use as a food packaging material at conditions which include cooking and reheating foods in a microwave oven. SARAN WRAP(a) is transparent to microwaves and plays no part in heating the food. The use of ATBC as a plasticizer in SARAN WRAP(a) is prior sanctioned by FDA under 21CFR 181.27. A recent report by the British Ministry of Agriculture, Fisheries and Food estimated the maximum human intake of the plasticizer ATBC from current uses of plastic film to be around 0.0008 milligrams per kilogram body weight per day. Even if one would assume a greater degree of potential exposure from repetitive exaggerated heating of certain wrapped foods in a microwave oven, there still would be a very larg margin of safety. The safety of ATBC as a plasiticizer in food wrapping has been demonstrated by many years of use experience as well as results of toxicity studies conducted over the past 40 years. As measured for either acute or chronic toxicity using tests in laboratory animals, ATBC has been found to be essentially nontoxic. Based on tests routinely used for comparative assessment of the acute toxicity of materials, ATBC is place d in the lowest toxicity category entitled ''Relatively Harmless.'' The repetitive ingestion of 2,500 mg per kilogram body weight per day caused no adverse effects in animals. Other studies, including lifetime duration of exposure, have reported no carcinogenic or mutagenic response.

To supplement the information already available from previous studies, DowBrands Inc. is participating in an ongoing research program to conduct additional tests. This testing program is being jointly sponsored by the industry and is being conducted in laboratiories in U.S. and Europe. The

test completed thus far have confirmed the safety of the ATBC used as a plasticizer in SARAN WRAP(a) and this concurs with the results of the studies that had been conducted previously.

PHOENIX, AZ (FEB. 7) PR NEWSWIRE - StatesWest Airlines Inc. (NASDAQ: SWAL) reported January 1990 passenger enplanements were up 31.1 percent to 8,797 compared to 6,707 for January 1989. The carrier's January 1990 traffic capacity was 4,843,062 available seat miles (ASM) producing a load factor of 37.8 percent. ASM's for January 1989 totaled 3,814,387 producing a load factor for that period of 34.9 percent. Traffic increased 37.6 percent to 1,830,723 revenue passenger miles compared to the January 1989 figure of 1,330,156.

StatesWest also announced today that it is extending the termination date of its Series A Common Stock Purchase Warrants (CUSIP No. 857657 11 8) which were issued in the April 1987 public offering to June 30, 1990. All other terms and conditions of such warrants will remain the same.

StatesWest is one of the largest regional air carriers in the country not owned or totally affiliated with a major carrier. The company owns 7.34 percent of Mesa Airlines Inc. (NASDAQ: MESA), a regional airline carrier headquartered in New Mexico.

StatesWest operates one of the newest fleets of regional prop-jet aircraft in the United States. Present destinations include the Southern California locations of Burbank, Los Angeles, Orange County and San Diego, along with the Arizona cities of Phoenix, Tucson, Lake Havasu City, Sierra Vista/Ft. Huachuca, and Laughlin, Nev./Bullhead City, Ariz. and Telluride, Colo. StatesWest operates 63 daily departures between these locations.

SAN FRANCISCO (FEB. 7) PR NEWSWIRE - Del Monte Foods announced today the promotion of Dee Ann Campbell to vice president, corporate communication. Campbell was previously director of marketing services for Del Monte Foods USA.

In her new assignment, Campbell is responsible for news media and community relations, consumer affairs, product publicity, and internal communications.

Campbell joined Del Monte in 1983 as manager of advertising and has worked in various advertising and marketing positions. She brings over 15 years of advertising and communications experience in the foods industry to this assignment.

"Corporate Communications will play a vital role in helping the community, the media and our employees better understand our business, our objectives and our values," said A. Ewan Macdonald, president and chief operating officer.

Campbell was born in Tulsa, Okla. and attended the University of Oklahoma. She is married, has one son and resides in San Anselmo, Calif.

Del Monte Foods is a privately held multinational processor of food and beverage products headquartered in San Francisco. Del Monte manufactures and markets its products under the Del Monte brand.

HOUSTON (FEB. 7) PR NEWSWIRE - The Wyoming-California (WyCal) Pipeline Co. said it was pleased by today's decision by the California Public Utilities Commission to let the market decide which interstate pipeline projects will be built to bring new gas supplies to California. The company said it is confident its WyCal project will meet the Commission's conditions for bringing economical and reliable natural gas supplies from the Rocky Mountains to California, and that it plans to begin construction later this year.

WyCal is a subsidiary of the Coastal Corporation, one of the country's

largest natural gas transportation companies.

The Coastal Corporation is a Houston-based diversified energy corporation. Together with its subsidiaries, Coastal has assets of $8 billion and operations in natural gas transmission and storage, oil and gas exploration and production, refining and marketing, coal and chemicals, and independent power production.

BALTIMORE (FEB. 7) UPI - Blacks in the United States are nearly twice as likely to be legally blind or suffer impaired vision than whites, but for many the solution is as simple as a new pair of glasses, researchers said.

Researchers at Johns Hopkins Wilmer Eye Institute surveyed 5,000 Baltimore residents to draw conclusions about the eyesight of the general population.

Among Americans older than 40, 1.5 percent of blacks are considered legally blind, compared to 0.9 percent of whites, researchers found. About 3.3 percent of blacks have impaired vision that cannot be corrrected with glasses, compared to about 2.7 percent of whites, said the study published Tuesday in Archives of Ophthalmology.

Dr. James Tielsch, co-author of the study, said the survey was the first of its kind to use extensive vision tests on a large, multiracial urban population.

Rates of blindness and visual impairment occurs two times as often among blacks when study participants are compared among similar ages, he said. Age adjustments were made among study participants since the black population is younger, in general, than the white population, Tielsch said.

''If you make both groups the same age ..., blacks are twice as likely to have the problems as whites,'' Tielsch said.

Legal blindness is defined as vision of 20-200 or worse. A person with 20-200 vision can read an eye chart at only 20 feet that someone with normal vision could read at 200 feet.

Tielsch and his co-author, Dr. Alfed Sommer, said 11.7 percent of the whites and blacks had functional vision impairment when they reported for their examinations.

Between 66 and 75 percent of those studied could improve their vision significantly with new glasses, the researcher said.

''When fitted with the best glasses, 54 percent improved their vision by one of more lines on the eye chart, and 7.5 percent improved three additional lines on the chart, which makes a huge difference in vision and their ability to function in society,'' Tielsch said.

Though legal blindness and vision impairment increase with age for everyone, blacks tend to have higher rates of both, researchers said. By age 80, however, blindness and vision impairment occur at the same frequency among whites and blacks, the study found.

Among blacks between ages 40 and 49, 0.63 percent were legally blind, a figure that rose to 8 percent by age 80. Among whites between 40 and 49, 0.55 percent were legally blind, a frequency that increased to about 7.3 percent by age 80.

The rate of visual impairments rose rapidly beyond age 60 for both whites and blacks. Among blacks, 3.4 percent were visually impaired at age 60, and 18 percent by age 80. Among whites, rates of vision impairment among whites rose from 1 percent at age 60 to about 14.5 percent by age 80.

Hopkins researchers looked at 5,341 people age 40 or older from January 1985 to November 1988, including 2,395 blacks, 2,913 whites, and 33 people of other races.

The American Academy of Ophthalmology suggests that blacks between the ages of 20 and 39 have eye exams every three to five years, and that whites of the same age should have an exam every five years.

#90038u0204 02/07/1990 ~United Press International

WASHINGTON (FEB. 7) UPI - U.S. high school seniors have such a ''weak understanding'' of geography that most are unable to find Southeast Asia on a map and many do not know which parts of the world are hot and which are cold, the government reported Wednesday.

The results of the first Education Department test of geography knowledge follow a series of troubling reports showing that American students have ''dreadfully inadequate'' reading and writing skills, and lag behind their counterparts in other industrial countries in math and science.

The National Assessment of Educational Progress, a congressionally mandated project, tested geography learning in four areas - locations; map and graph reading; economic, environmental and other factors in cultural geography; and concepts in physical geography such as climate and weather.

The report said most high school seniors failed to understand even ''basic concepts'' in cultural and physical geography. In addition, many could not identify the location of ''major countries, cities and landmarks'' or answer map questions requiring a knowledge of longitude and latitude.

''Students generally have a weak understanding of geography and .. the amount of geography instruction provided across the high school grades is quite low,'' said the report, which also asked about students' geography studies.

Minorities fared especially poorly on the 76-question multiple-choice exam

given to 3,030 seniors at about 300 public and private schools in the 1987-88 school year. Whites answered 60.5 percent of the questions correctly, compared with 48 pecent for Hispanics and 42.5 percent for blacks.

Among blacks, nearly a third could not locate Canada on a world map and most did not know the change in seasons is caused by the Earth tilting on its axis.

In general, most students could answer location questions. But the report found ''puzzling'' gaps - 13 percent could not find Canada, 15 percent could not locate the Soviet Union and 29 percent did not know were Latin America is.

Only 37 percent were able to locate Southeast Asia, which the report noted was ''surprising given the recent U.S. involvement'' in the region. Thirteen percent thought either Brazil or Saudi Arabia was part of Southeast Asia.

When asked what kind of change in climate a traveler headed from northern Europe to the Middle East would experience, 32 percent said the country he was leaving - marked in Scandinavia on a map - was tropical or desertlike.

On map tests, fewer than two-thirds correctly answered latitude and longitude questions. The seniors had ''mixed success'' interpreting graphs and charts, and had particular difficulty when they had to compare more than one map.

In cultural geography, the study said seniors had a ''partial understanding,'' mainly of topics addressed in the news. Seventy-nine percent knew how to control acid rain, but one-fifth thought removing vegetation would increase the wildlife population and only 35 percent knew America imports steel.

Students had a ''general'' knowledge of physical geography. Seventy-one percent understood that volcanic eruptions formed Hawaii, but 30 percent did not know what causes the change of seasons and only 31 percent were aware that rising atmospheric pressure indicates the weather will be dry and sunny.

Males scored better than females on the test and students in the Southeast trailed those in other regions.

Better scores were registered by students who had well-educated parents or two parents or guardians living at home as well as by students who did more homework and watched less television.

Taking ''a geography course per se'' did not seem to improve students'

scores, but students who reported studying more geography topics did do better.

The exam was designed by the Education Testing Service, based on goals experts believed ''students should achieve in the course of their education.''

The effort received support from the National Geographic Society, which in 1988 sponsored a geography test for people 16 and over.

NAEP, known as the nation's report card, has tested students since 1969 in reading, mathematics, writing, science, history-geography and other areas.

#90038u0209 02/07/1990 ~United Press International

WASHINGTON (FEB. 7) UPI - President Bush was challenged Wednesday to put his money where his mouth was back in 1973 - when he was an ardent supporter of family planning - and not let his anti-abortion zeal block access to birth control and family planning services.

''The 1980s were a decade of disaster for the millions of Americans most in need of family planning services,'' said Scott Swirling, executive director of the National Family Planning and Reproductive Health Association.

''Unfortunately, the first year of George Bush's administration has shown no signs of reversing the trend set by his predecessor,'' Swirling added. ''The family planning program of this nation has been more than a victim of benign neglect. It has been the focus of relentless attack over the past decade.''

Swirling made his comments as the association released a report sharply critical of the Reagan administration's treatment of family planning programs, including sharp decreases in funding for Title X, the basic family planning program that provides a variety of services to poor women.

And Swirling accused Bush of continuing the attack launched by Reagan at the behest of anti-abortion advocates and others on the right.

''This president - just like his predecessor - has turned a deaf ear and a blind eye to the family planning programs and services that are proven deterrents to the need for abortions,'' Swirling said. ''The simple reality - that birth control prevents abortions - is one that the president has chosen to ignore.''

When he was a member of Congress, Bush was one of the leading advocates of family planning. In 1969, in a speech on the floor of the House, Bush

declared that, ''We need to make population and family planning household words. We need to take the sensationalism out of this topic so that it can no longer be used by militants who have no real knowledge of the voluntary nature of the program, but, rather, are using it as a political stepping stone.''

And in 1973, Bush gave himself credit for taking ''the lead in Congress in providing money and urging - in fact requiring - that in the United States family planning services be available for every woman, not just the private patient with her own gynecologist.''

Word of the report has apparently angered the administration.

A Feb. 1 meeting between senior Health and Human Services staff and agencies that provide Title X services was abruptly canceled after a media advisory was distributed announcing the news conference.

''The meeting that was canceled had to do with administrative matters with broad implications for the day-to-day operation of the family planning program,'' Swirling said.

''Its cancellation is but one more indication that this administration would prefer not to deal with the reality of family planning issues and how they affect overall health care priorities and the reproductive health care needs of poor women,'' he said.

In the report, the group charged:

-Funding for Title X has been reduced from a high of $162 million in 1980 to $135.6 million in 1990. If funding kept pace with inflation, the program would currently be funded at $230 million.

-Contraceptive research has ground to a halt in the United States and is ''severely curtailed by administration restrictions'' at the National Institutes of Health.

-Appointments to key family planning policy positions were opponents of the program but it did not name any names.

-The administration imposed ''gag rules'' forbidding Title X providers from any information - ''including nondirective, factual information'' - regarding abortion.

-Blocking collection of data about family planning services and sexual behavior that would be useful in developing programs designed to prevent unintended pregnancies, AIDS and other sexually transmitted diseases.

-Vetoes of major legislation have hindered access of the neediest U.S.

women and those in developing countries to reproductive health care and family planning services.

#90038u0212 02/07/1990 ~United Press International

WASHINGTON (FEB. 7) UPI - Sales of existing single-family homes rose 2.1 percent during the fourth quarter but posted a 4.3 percent decline for the year, the National Association of Realtors reported Wednesday.

Rising interest rates during the first half of the year held down housing sales, which finished the year stronger only after rates began to fall. The heightened resale activity was not enough to bring the year's activity up to 1988's record level, the association said.

Norman Flynn, the association's president, said first-time buyers continued to have trouble breaking into the market, especially in the West and Northeast, which was the only region to post declining resale activity.

California, Texas, Pennsylvania, Ohio and New York led the nation in terms of units sold during the quarter. Based on percentages, the greatest gains were posted by Vermont, South Dakota, Nevada, Ohio and Utah.

California led the nation with a resale pace of 516,000 units during the quarter, up 3 percent from the third quarter. Several other western states also posted significant gains.

''This is by far the best-performing region of any in the country right now - the whole area seems to be strong for housing,'' said John Tuccillo, the association's chief economist.

Tuccillo also said surprising gains were made in Texas, Louisiana and Oklahoma, which traditionally have been housing trouble spots in the South.

''In the South, we are looking at a region that gradually is turning itself around and one that likely will thrive in 1990 given its fundamental strength,'' Tuccillo said.

Resale activity strengthened in the Midwest during the quarter, led by a 25.6 percent increase in South Dakota. Ohio posted a 23.3 percent increase for the nation's fourth-greatest gain.

Tuccillo attributed the vigor of the Midwestern market to a growing strength of secondary cities that offer a lower cost of living and higher quality of life.

The housing market in the Northeast continued its sluggish pace during the quarter, declining by 2.6 percent. Resale declines were posted in New

Jersey and Pennsylvania. Vermont, Connecticut and New Hampshire bucked the regional trend, showing stronger resale activity.

The association also reported that housing prices appreciated in many areas of the country, led by Honolulu, where the median price for a single family home reached $280,900 during the quarter.

Following Honolulu, which posted a 24.8 percent increase, was the San Francisco Bay area, which reported a median price of $260,000, up 12.1 percent.

Rounding out the nation's five price leaders were: Orange County, Calif., $247,900, up 9.5 percent; Los Angeles, $217,000, up 13.6 percent; and Boston, $183,000, up 2.4 percent.

In New York, which traditionally had been regarded as the country's most expensive city, the median housing price rose just 0.1 percent to $180,000.

The country's five fastest appreciating cities, ranked by percentage increase, were: Seattle-Tacoma, Honolulu, Sacramento, Akron and San Diego. The Seattle-Tacoma area posted median housing prices of $115,100, up 25.2 percent during the quarter.

Among the areas with moderately priced housing that appreciated signifcantly during the quarter were Akron, Ohio, where the median price rose 19.3 percent to $69,700; Buffalo-Niagara Falls, N.Y., up 13.7 percent to $75,700; Grand Rapids, Mich., up 13.5 percent to $67,200 and Greenville-Spartansburg, S.C., up 10.1 percent to $71,000.

''Affordable homes within a reasonable commute make these cities a prime target for companies looking to expand or relocate,'' Flynn said.

#90038u0224 02/07/1990 ~United Press International

WASHINGTON (FEB. 7) UPI - A five-year, $1.5 billion program to spur excellence in American education was on the verge of passage in the Senate Wednesday after surviving a Republican-led effort to derail it amid fears by conservatives that it will lead to national certification of teachers.

Senate Democratic leader George Mitchell won unanimous consent Tuesday limiting the number of amendments and assuring approval of the bill. One of the amendments will be offered by Sen. Jesse Helms, R-N.C., and targeted at the $25 million or the development of certification for elementary and secondary education.

Before starting work on the education bill, based on the proposals made by President Bush last year, the Senate unanimously approved legislation with a goal of eliminating illiteracy in America by the end of the century.

The Senate voted 99-0 for a comprehensive campaign to combat adult illiteracy with a coordinated and expanded federal program, including grants to states and literacy compacts with labor and business. There are an estimated 23 million functional illiterates in the country.

The Congressional Budget Office estimated the cost of the program as $50 million in the first year and $855 million over the following three years.

The Educational Assistance Act stalled when conservative Republicans battled a proposed $25 million grant to the National Board for Professional Teaching standards to develop a voluntary program of board certification for elementary and secondary teachers.

Conservatives made three efforts to kill or weaken the proposal Tuesday and were soundly beaten 64-35, 60-37 and 57-40.

Sen. Jesse Helms, R-N.C., charged that the grant to the national board was a power grab by the two giant teachers unions who want to be the ''sole source'' for deciding the standards.

''They don't want to test competenency,'' Helms said. ''They want power and the taxpayers' money.''

Other Republicans expressed fear the grant to the board, which would have to be matched by private money, was the first step in developing certification of teachers nationally, usurping the traditional rights of the states to set their own standards.

But Sen. Sam Nunn, D-Ga., said it was ''absolutely clear'' the standards would be voluntary, adding ''I can't see where the alarm is coming from.'' And Sen. Christopher Dodd, D-Conn., added the bill ''explicitly prohibits the board from interfering in state licensing.''

Before putting off a final vote until Wednesday, the Senate adopted by voice vote an amendment that would provide $5 million for drug testing of school athletes and another amendment providing $7.6 million in awards for outstanding teachers.

The five-year, $1.5 billion program is designed to reward schools, teachers and students who have ''maintained a standard of excellence or made substantial progress in working toward the goal of excellence.''

The bill also emphasizes excellence in math and science, as well as the prevention of drug abuse in schools; designates money for the

disadvantaged and makes numerous changes in the laws governing student loan defaults.

Among the major provisions are establishment of the Presidential Merit Schools Program, which provides cash awards to schools that show progress in raising educational achievement, creating a safe and drug-free environment and cutting the dropout rate.

The bill also creates new magnet ''schools of excellence;'' provides federal assistance to develop creative alternative teacher and principal certification; authorizes a new merit-based national scholars program to provide college scholarships for studies in the sciences, math and engineering; and adds money for the drug-free schools program.

#90038u0247 02/07/1990 ~United Press International

(FEB. 7) UPI - Secretary of State Baker unveiled the U-S plan to help Czechoslovakia in a speech Wednesday morning at Charles University in Prague. In prepared remarks, Baker says the United States will immediately grant the fledging democracy a waiver of the Jackson-Vanik agreement, which limits U-S trade with nations that restrict immigration. He says Washington also will support a proposal to locate in Prague the European Development Bank, which will promote economic growth in the newly emerging democracies of Eastern Europe.

From Prague, Baker will fly to Moscow to meet with his Soviet counterpart, Eduard Shevardnadze, beginning Wednesday evening. Foreign Ministry spokesman Gennady Gerasimov says Baker may also meet with Soviet leader Gorbachev during the three-day visit.

Senator Bob Packwood introduced a capital gains bill Tuesday he says will encourage people to put more money in savings and investments. The Oregon Republican says his proposal... besides lowering the capital gains tax rate... would establish a tax-free family savings account and provide new tax benefits for first-time home buyers. Last year, Congress nixed President Bush's version of the capital gains tax cut, which Packwood says covered a narrower range of assets.

The drinking done by the skipper of the Exxon Valdez was the focus of Joseph Hazelwood's criminal trial Tuesday. Two crewmen told a jury in Anchorage, Alaska, how they spent hours drinking with Hazelwood before their loaded tanker sailed out of port and onto the rocks. But they emphasized their skipper showed NO signs of intoxication. The prosecution contends alcohol led to the worst oil spill in U-S history.

-30- 1848

#90038u0248 02/07/1990 ~United Press International
(FEB. 7) UPI - Ecologists in Mexico say that, so far this winter, researchers have counted only a dozen or so of the more than four-thousand gray whales that normally mate off the coast of Baja California. They fear the mammals were harmed by the Exxon oil spill in Alaska... although they have NO evidence to back up their theory. NO comment from Mexico's Fisheries Ministry, which keeps track of the whales.

British rock singer Billy Idol was hospitalized in serious but stable condition in Los Angeles following a motorcycle accident in Hollywood Tuesday. A publicist for the white-haired singer says Idol had just finished recording a new album and was on his way home when the crash occurred. Police say Idol was NOT wearing a helmet when he allegedly ran a stop sign and hit a car. Idol suffered a broken right leg and left arm, and underwent seven hours of surgery. The driver of the car was NOT hurt.

-30- 1069

#90038u0291 02/07/1990 ~United Press International
(FEB. 7) UPI - It took more than 40 games and three months for the Portland Trail Blazers and Los Angeles Lakers to meet this season. For the Lakers, the wait was worth it.

Turning aside - at least for now - the latest challengers to their longtime Pacific Division rule, Los Angeles played overtime without Magic Johnson but still outlasted the Blazers 121-119 before another sellout crowd at Memorial Coliseum.

The Lakers, division champions the last eight years, boosted the NBA's best record to 34-11. Portland slipped to 33-13.

With a half-second left in regulation, the Blazers' Terry Porter - an 89-percent foul shooter entering the game - made only the second of two free throws to force overtime. The Blazers wound up only 25 of 40 from the line.

''They had an opportunity to win it but they didn't,'' Los Angeles Coach Pat Riley said. ''We got the 17-point lead but then we got sloppy, ran the clock down too far and then started to rush things. We let them back in it but we gathered ourselves.''

Johnson, who had 24 points, 10 rebounds and 15 assists for his sixth triple-double this season, sank a jumper over Buck Williams with 2.2 seconds left in regulation for a 113-112 lead. His foul on Porter moments later was his sixth.

Portland got the first four points of overtime, but couldn't score the next 3 1/2 minutes. James Worthy, who finished with 25 points, grabbed

Byron Scott's airball and scored with 45 seconds left for a 120-117 lead.

''I don't know whether it was them (winning) or ourselves (losing),'' said Portland Coach Rick Adelman. ''I'd like to have that situation at the end with Terry (Porter) at the line. It thought it was over.''

Former Blazer Mychal Thompson also had 24 points for the Lakers. Clyde Drexler led Portland with 32.

-- AROUND THE NBA --

Elsewhere, San Antonio pounded Atlanta 105-94, Detroit defeated Cleveland 105-96, New York topped Orlando 117-110, Indiana nipped Denver 138-130 in overtime, Milwaukee beat Boston 119-106, Houston trimmed Minnesota 108-101 Washington trounced Miami 118-100 and Dallas downed Sacramento 100-90.

SPURS 105, HAWKS 94

At San Antonio, Terry Cummings scored 23 points to lead San Antonio - just a half-game behind Portland in the West - to its club-record 20th consecutive home victory. David Robinson contributed 17 points and 10 rebounds for the Spurs. Atlanta has lost six straight.

PISTONS 105, CAVALIERS 96

At Auburn Hills, Mich., Joe Dumars scored 22 points and keyed another strong defensive performance as the NBA champions won their eighth in a row. Cleveland got 21 points from John Williams.

KNICKS 117, MAGIC 110

At Orlando, Fla., Patrick Ewing scored 24 of his 35 points in the second half and New York limited Orlando to one point in a four-minute span down the stretch. Ewing also had 13 rebounds and seven blocked shots. Terry Catledge led the Magic with 28 points.

BUCKS 119, CELTICS 106

At Hartford, Conn., Jack Sikma and Fred Roberts each scored 20 points for Milwaukee, which capitalized on a 19-5 fourth-quarter run. Kevin McHale paced Boston with 28 points and Larry Bird added 24.

ROCKETS 108, TIMBERWOLVES 101

At Houston, Otis Thorpe and Akeem Olajuwon had 23 points each for the Rockets. The Timberwolves, who received 19 points apiece from reserves Donald Royal and Sam Mitchell, trimmed 15 points off an 18-point deficit before Mitchell Wiggins scored four points in the final 15 seconds.

PACERS 138, NUGGETS 130, OT

At Denver, Rik Smits scored a career-high 34 points, including six in overtime, to lead Indiana. Reggie Miller added 28 points for the Pacers, who snapped a five-game losing streak. Danny Schayes had a season-high 28 points for the Nuggets.

BULLETS 118, HEAT 100

At Miami, Jeff Malone scored 34 points, including 14 in the decisive third quarter, to lift Washington. The Bullets closed the period with a 17-6 run. Rony Seikaly led Miami with 22 points.

MAVERICKS 100, KINGS 90

At Sacramento, Calif., Roy Tarpley, starting for the first time since returning from his Jan. 23 suspension, had 18 points and 11 rebounds for Dallas. Teammates Ron Harper and Rolando Blackman added 20 points apiece.

-30- 4440

#90038u0303 02/07/1990 ~United Press International

(FEB. 7) UPI - Three subjects constantly put to Mario Lemieux are his streak, the NHL scoring title and the playoffs. Since the All-Star break, the Pittsburgh sensation has closed in on the NHL's all-time consecutive-games scoring record, charged toward his third scoring title and been frustrated in the Penguins' struggle for a playoff spot.

Now, with at least a point in 43 games and eight games away from Wayne Gretzky's record 51-game run, new subjects have ominously emerged: pain; brace, surgery.

Lemieux's herniated disc and arthritis have required a brace, misssed practice and he now has predicted he will need postseason surgery. At a news conference Tuesday night, the team physician revealed the extent and history of Lemieux's chronic problems.

Then Lemieux went out and scored five points on two goals and three assists in an 8-7 overtime loss to the New York Islanders - ''a heart-breaker for us,'' Penguins Coach Craig Patrick said.

''You don't like to get into a shoot out with the Pittsburgh Penguins because of all the offensive power they have,'' said LaFontaine, ''but at the same time, if that is what happens, you have to try and find a way to win it.''

The Islanders did, with LaFontaine contributing six points, including a

hat trick, Derek King his first career hat trick, and Don Maloney the overtime winner.

Prior to the game, Penguins official Paul Martha said the team may consult Dr. Arthur White, who performed back surgery on San Francisco 49ers quarterback Joe Montana in 1986. White, of St. Mary's Hospital of San Francisco, removed a ruptured disc associated with a congenital spinal condition, and the surgery has been credited with saving Montana's career. Both the 49ers and Penguins are owned by the Edward J. DeBartolo family.

Lemieux said the pain has fluctuated throughout the season but he does not expect it to ease before the end of the season.

''It'll probably get worse,'' he said.

But as he proved Tuesday night, it doesn't mean his performance will follow suit.

-- AROUND THE NHL --

In other games, Boston blanked Detroit 2-0, Washington clobbered Quebec 12-2, St. Louis topped Toronto 6-4, Los Angeles defeated Calgary 5-3, Vancouver beat Winnipeg 5-3, and Edmonton and New Jersey tied 2-2.

BRUINS 2, RED WINGS 0

At Detroit, Andy Moog recorded his ninth career shutout and Allen Pederson scored his first goal since the 1986-87 season to lead Boston. Moog turned away only 14 shots to earn his third shutout this season.

CAPITALS 12, NORDIQUES 2

At Landover, Md., Dino Ciccarelli scored four goals, including a pure hat trick in the second period, after an eight-game scoreless slump to help Washington set a club record for goals in a game. Mike Ridley scored once and added four assists and defenseman Bob Rouse contributed four assists. The first goal was scored by defenseman Scott Stevens, who returned after missing 17 games with a broken left foot Dec. 29.

BLUES 6, MAPLE LEAFS 4

At St. Louis, Brett Hull scored his 50th goal and Paul MacLean added a goal and three assists against Toronto. After Hull got his milestone goal 5:55 into the third period on a breakaway, hats and shaving kit bags, the promotional item for the game, were thrown on the ice. Hull was given a lengthy standing ovation by The Arena crowd of 13,253, which included Hull's legendary father, Bobby. Toronto had won all six of the teams' previous meetings this season.

KINGS 5, FLAMES 3

At Calgary, Alberta, Luc Robitaille scored the tie-breaking goal at 15:19 of the final period to highlight a three-goal rally by Los Angeles.

CANUCKS 5, JETS 3

At Vancouver, British Columbia, Steve Bozek scored the winning and insurance goals during the Canucks' four-goal second period to rally Vancouver to its first victory over Smythe Division opponent Winnipeg in six meetings this season.

OILERS 2, DEVILS 2

At East Rutherford, N.J, Patrik Sundstrom scored a power-play goal with three seconds left in the third period and the Devils possessing a two-man advantage, courtesy of a power play and pulled goaltender. Two Edmonton players were hospitalized in the opening period: goalie Bill Ranford, who was knocked unconscious as the Devils scored the opening goal; and defenseman Kevin Lowe, who suffered a gash on his right eyelid and possible trauma to the eye when high-sticked by New Jersey's Jamie Huscroft.

KOROR, Palau (FEB. 7) UPI - For the seventh time in as many years, the people of the western Pacific state of Palau have voted on the islands' political future following decades of administration by the United Nations and the United States.

Polls closed Tuesday night but officials said initial results would not be available until Friday at the earliest because of delays in transporting ballots to the capital from remote outer islands.

Palau's estimated 11,000 voters are scattered around the world, primarily in Hawaii, California and Guam, and many voted by mail in the referendum. Other ballots had to be sent to Koror by boat from hundreds of miles away.

In six previous ballots, voters in Palau, about 800 miles east of the Philippines, rejected a compact of free association with the United States that would have brought a fiscal bonanza to the impoverished islands.

''We have to move ahead so we can develop our economy and provide jobs for our people and, most of all, pay our bills so we can have a first-class hospital and top-notch schools,'' Palau President Ngiratkel Etpison said in campaigning for adoption of the compact.

Opponents of the pact have urged its defeat for a seventh time in hopes of a better settlement from the United States, which has pledged there would be no more negotiations following the latest vote.

The main stumbling block in the proposed compact has been the question of use of the strategic islands by U.S. Navy vessels powered by nuclear energy or by ships or aircraft armed with nuclear weapons.

Since 1983, Palauans have voted six times on the compact but each time failed to achieve the required 75 percent approval needed to override constitutional provisions barring nuclear weapons or nuclear-powered ships from the archipelago.

The United States has insisted its military ships and aircraft have access to the strategically located area and that defense matters still be handled by Washington in return for subsidizing the economy of the islands which lack income-producing natural resources.

The issue has generated fierce debate among the 15,000 people of the islands and has led to politically motivated shootings, fires and fighting.

The association with the United States, however, would result in financial assistance to the heavily indebted island group totaling more than $1 billion over a 15-year period.

The United States took over administration of the former Japanese-held islands of the western Pacific after World War II under a U.N. trusteeship. Other island groups from the former Trust Territory of the Pacific Islands have reached various post-trustee relationships with Washington.

Palau has been operating as an independent republic since 1983 with nominal administration of some aspects of government by the U.S. Interior Department.

(FEB. 7) UPI - Eleventh-ranked Connecticut and 14th-rated Louisville employed scoring streaks Tuesday to run away from their opponents.

The Huskies went on a 22-4 spree to start the second half en route to their 10th consecutive victory, a 74-39 rout of Fairfield in Storrs, Conn.

The Cardinals used a 14-2 run that started in the first half to turn a tie score into a 37-25 second-half lead. Louisville never trailed after the spurt and used another big run to record a 69-50 Metro Conference victory

over Florida State in Louisville, Ky.

Freshman Nadav Henefeld scored 18 points as Connecticut, 20-3, recorded 20 regular-season victories for the first time since 1965. The Stags, who committed 24 turnovers, fell to 7-12.

The Huskies expanded a 28-23 halftime lead to a 50-27 advantage with 13:34 left. Henefeld scored 12 points during the run. The Huskies held Fairfield to five field goals and 16 points after intermission.

Tate George contributed 13 points and Chris Smith added 11 for Connecticut. Ed Duncan scored 15 points and Marvin Walters added 10 for Fairfield.

Cornelius Holden scored a career-high 20 points and pulled down 12 rebounds to lead Louisville, which improved to 17-4 and 7-1. The Seminoles fell to 13-11 and 4-5.

Florida State scored just one point in the last five minutes of the first half as Louisville took a 28-25 lead into the locker room. The Seminoles then went almost four minutes into the second half without scoring, allowingLouisville to build its advantage to 37-25.

The Seminoles managed one field goal - a dunk by Chuck Graham at the 14:09 mark - in an 11:34 span from the end of the first half into the first six minutes of the second half.

Florida State closed to within 39-32 on two free throws by Irving Thomas with 11:17 to go. But a 14-5 Louisville burst made it 53-37 with 6:01 left.

Jerome Harmon added 15 points for the Cardinals. Chuck Graham, Irving Thomas and Michael Polite had 11 points each for Florida State.

-- AROUND THE NCAA --

Elsewhere, it was: Harvard 119, Suffolk 86; Holy Cross 103, Siena 76; Manhattan 63, Iona 54; Monmouth 60, Marist 50; Penn 51, Princeton 50; Rhode Island 77, Duquesne 59; St. John's 89, Rutgers 77; Villanova 66, Boston College65; Georgia 70, Florida 65; NC-Charlotte 88, Georgia Southern 68; SW Louisiana 98, Tennessee Tech 95; Illinois State 65, St. Louis 61; and Xavier (Ohio) 70, Loyola (Ill.) 53.

At New York, Malik Sealy scored 25 points and Boo Harvey added 21 to help St. John's rally past Rutgers. The Redmen, 18-6, snapped a three-game losing streak while ending a three-game winning streak for the Scarlet Knights, 11-11. Rutgers lost its 13th straight game at Madison Square Garden.

At Boston, Chris Walker scored 14 points, including the go-ahead basket with 56 seconds left, to lift the Wildcats, 13-11 overall and 5-6 in the Big East. Walker's basket snapped a 63-63 tie and Lance Miller added a foul shot with 31 seconds left. The Eagles' Lior Arditti made a layup with seven seconds left. Boston College, 7-14 and 1-10, had a chance to win the game, but Walter Lundy's shot from beyond the 3-point line fell short as time expired.

BANGKOK, THAILAND (FEB. 7) UPI - Thai police rescued 16 Colombian women from a brothel and arrested two Colombians and two Thais for forcing the women into prostitution, an investigator said Wednesday.

The women were rescued Monday from a house in Bangkok where they were held for dispatch to clients, said police officer Maj. Tarin Chatrathib.

Police said cases of Thai women being forced or tricked into prostitution were not uncommon, but it was highly unusual for foreign women to be brought to Thailand for such purposes.

An investigation showed the 16 women were duped into coming to Thailand by a job placement company in Colombia that promised them jobs as tour guides and models, said Tarin who headed the investigation.

A Colombian couple identified as Macro Fidel Rivera, 31, and Elizabeth Galindo, 23, were arrested along with two Thai men and charged with arranging prostitution and holding people against their will.

All those arrested have denied the charges and refused to cooperate with police, Tarin said.

The women, ages 17 to 25, were taken to a welfare home where they will remain until they can testify, he said.

Tarin said he received a tip about the prostitution ring and made the arrests after he pretended to be a customer and one of the girls was brought to him at a Bangkok hotel for a fee of $160.

He said the girl then led police to the house where the other women were being held.

#90038u0401 02/07/1990 ~United Press International

JOHANNESBURG, South Africa (FEB. 7) UPI - The Rev. Jesse Jackson arrived in South Africa Wednesday declaring ''the winds of freedom'' blowing through the East Bloc nations must also affect South Africa.

Jackson, the two-time former U.S. presidential contender, arrived from Lusaka, Zambia, for a weeklong visit that the government said had come at an inopportune time because of the racial reform measures President Frederik de Klerk announced last week.

In an airport news conference after his arrival, Jackson warned apartheid must be abolished and said if the government backtracks on its reform program, the result would be ''chaos.''

''My entourage and I came to get a firsthand view of South Africa on the ground ... this moment in South Africa's political history must be seized '' Jackson said. ''The winds of freedom that are blowing in the Eastern Bloc must blow through South Africa.''

Jackson was welcomed at Johannesburg airport by Walter Sisulu, the former African National Congress secretary-general, the Rev. Allan Boesak, president of the World Alliance of Reformed Churches, and the Rev. Frank Chikane, secretary-general of the South African Council of Churches.

It was Jackson's second trip to South Africa. After his first visit in 1979, the government had denied him visas to come until now.

''If the government moves back, there will be chaos,'' Jackson said. ''If the government stands still, there will be increased tension. But if the government seizes the political moment and moves forward ... we will see the dawn of a new free and democratic South Africa.''

Tuesday in Cape Town, Foreign Minister Roelof ''Pik'' Botha accused Jackson of taking both sides on the issue of sanctions against South Africa and said the black civil rights leader can claim no credit for the government's racial reforms.

Botha also said Jackson's tour of South Africa beginning Wednesday was poorly timed and would have been better taking place in January, fueling speculation the government was unlikely to free jailed black leader Nelson Mandela as long as Jackson was around.

De Klerk last week lifted a 30-year ban on the African National Congress, said Mandela would be freed soon, suspended judicial executions and lifted restrictions on more than 370 political activists.

Botha said the government was ''in the midst of important decisions and work, and it's not always easy to handle all the fanfare for some of our American friends'' but added, ''Well, if it's got to be done, let it be done.''

Jackson, an advocate of sanctions against Pretoria, met with British Prime

Minister Margaret Thatcher in London Monday before heading to Lusaka. Jackson said he and Thatcher ''agreed to disagree.'' Jackson maintained sanctions must remain in place against Pretoria despite last week's reform package.

But Botha said, ''he made exactly the opposite remarks to my ambassador'' in Washington and added, ''in private talks he's one person, and the moment he sees Mr. (Archbishop Desmond) Tutu or Boesak, he's another person.

#90038u0516 02/07/1990 ~United Press International

(FEB. 7) UPI - Around the world... around the clock... the latest news from U-P-I.

President Bush says events in Eastern Europe and the Soviet Union have changed America's strategic defense posture. But Bush says it's NOT time ''to let down our guard.'' Bush is beginning day two of a three-day West Coast trip to lobby for his defense budget. He plans to tour the Lawrence Livermore nuclear weapons lab today and then speak at San Francisco's Commonwealth Club.

A ''Harvest of Peace'' resolution urges cuts in military spending to fight hunger and poverty. Oregon Republican Senator Mark Hatfield and New York Democratic Representative Matt McHugh introduced the resolution yesterday.

Secretary of State Baker may be in Moscow when an historic event occurs. Baker is due in the Soviet capital today to meet with Soviet Foreign Minister Eduard Shevardnadze... and possibly with President Mikhail Gorbachev. At the same time, the Communist Party Central Committee will be winding up debating on whether to O-K a multi-party system.

The Environmental Protection Agency has issued a new management blue-print for the Superfund clean-up program. The E-P-A pledged to make greater use of innovative technologies to clean up toxic sites. The agency also promised to act fast against toxic waste that poses immediate risks to people or the environment.

The Senate has opened hearings on elevating the E-P-A to Cabinet-level status. Sponsors of the bill say it would let the E-P-A administrator regularly attend Cabinet meetings... making sure the president hears his views first-hand. President Bush supports the measure.

-30- 1802

#90038u0520 02/07/1990 ~United Press International

(FEB. 7) UPI - The younger brother of boxer Thomas Hearns has been

sentenced to prison for murdering a woman. 23-year-old Henry Hearns got a 27 to 52 year sentence for shooting to death Nancy Barile in his brother's home in a Detroit suburb. Thomas Hearns was NOT home when the shooting occurred June 10th.

A public housing agency in Passaic, New Jersey, is under investigation. A congressional panel was told that the housing agency's director held four jobs and received four salaries totaling almost a quarter-Million dollars. HUD General Counsel Frank Keating said a criminal investigation is under way.

One year ago yesterday, Poland began the talks that led to legalizing the Solidarity movement. The architects of the agreement say it paved the way for dismantling communism across the East Bloc. And on the anniversary, Polish President Wojiech Jaruzelski said the country is committed to reform.

A jury in Houston is deliberating a 355-Million-dollar lawsuit against the Monsanto Company. 222 homeowners claim that Monsanto dumped dangerous chemicals at a waste site near their homes in southeast Houston... with NO concern for their health or safety.

Farm Aid Four is coming up. It will be held in Indianapolis April 7th. Singers Willie Nelson, John Cougar Mellencamp and Neil Young say family farms are in a more precarious situation than ever because of financial problems. 31 artists are lined up to appear at the concert.

-30- 1612
#90038u0633 02/07/1990 ~United Press International
(FEB. 7) UPI - Communist Party officials continue to debate reforms... Secretary of State Baker is due in Moscow today... President Bush heads for San Francisco for more military lobbying... and rocker Billy Idol is seriously injured. Those stories and more, next from U-P-I.

It's still NOT known which side will win the ongoing debate in Moscow over President Gorbachev's proposal to allow a multi-party political system.

One of Gorbachev's allies argued at the Communist Party Central Committee meeting- ''If you can't beat them, join them.''

The debate will continue for a third day today after the meeting was extended by a day because of the heated debate over the proposal.

There have been widespread reports that Gorbachev will purge the Politburo of hard-liners arguing against pluralism. But a Soviet journalist with close ties to the party leadership says he thinks a purge will be delayed. He gives two reasons... the unstable situation in the Communist Party and

the nationalist movements and other turmoil around the U-S-S-R.

Secretary of State Baker will be in a position to hear quick reactions from Soviet leaders on the outcome of the party meeting. Baker is due in Moscow this afternoon for talks with his Soviet counterpart, Eduard Shevardnadze... and possibly with Gorbachev himself.

Baker will go to Moscow after he leaves Czechoslovakia. In a speech at Charles University in Prague this morning, Baker unveiled a U-S plan to promote self-help in the fledgling democracy.

The secretary of state said the United States will immediately allow UNrestricted trade with Czechoslovakia and will make the country eligible for comodity credit programs. Baker says U-S officials also will support a proposal to locate the European Development Bank in Prague.

-30- 1965

#90038u0648 02/07/1990 ~United Press International

(FEB. 7) UPI - President Bush enters Day Two of a three-day road trip on the West Coast... pressing his case for continued substantial U-S defense spending.

While observing war games yesterday... Bush defended the 307-BILLION-dollar defense budget he wants for fiscal 1991.

Bush is supporting budget appropriations for the ''Star Wars'' missile defense system... the Bdeployment of M-X missiles. He says that despite warming relations and a decreased military threat from the Soviet Union... the United States canNOT let down its guard.

Bush said- ''Military challenges to democracy persist in every hemisphere... and America must always be prepared to fight for freedom and security.''

Today the president travels to the San Francisco Bay Area, where he plans first to tour the Lawrence Livermore nuclear weapons laboratory and highlight progress of the Strategic Defense Initiative missile-defense program.

Tomorrow, Bush goes to Strategic Air Command headquarters near Omaha to address nuclear forces on alert.

Two members of Congress, one from each party, and a minister are banding together to try to convert military spending to the fight against hunger and poverty.

Oregon Republican Senator Mark Hatfield and New York Democratic

Representative Matt McHugh introduced a ''Harvest of Peace Resolution.''

The measure calls for cutting in half world military spending by the year 2000.

McHugh says reduced tensions between East and West and efforts for peace in many parts of the Third World offer Congress an opportunity it should NOT miss. He says the time is ripe to substantially reduce world-wide military spending and redirect the money to meeting basic human needs.

The sense of Congress resolution would NOT have the force of law.

The resolution was drafted by Bread for the World, a church-based grassroots anti-hunger organization.

The Reverend Art Simon, president of Bread for the World, will lead a three-year, multimillion dollar effort to win passage of the resolution and implementation of its main provisions.

He says the world spent one-TRILLION dollars last year on weapons, while one-BILLION people went hungry.

As Simon put it... ''There is no excuse for hunger, only a lack of public outrage and political will.''

-30- 2475
#90038u0653 02/07/1990 ~United Press International
(FEB. 7) UPI - The Senate convenes this morning to pass a five-year one-BILLION, 500-Million-dollar program to spur excellence in U-S education.

Senate Democratic leader George Mitchell won unanimous consent yesterday to limit the number of amendments and assure approval of the bill.

Republicans led an effort to derail the Educational Assistance Act because of fears by conservatives that it will lead to national certification of teachers.

The Senate earlier voted 99-0 for a comprehensive campaign to combat adult illiteracy with a co-ordinated and expanded federal program, including grants to states and literacy compacts with labor and business. There are an estimated 23-Million functional illiterates in the country.

The Congressional Budget Office estimates the program's cost as 50-Million dollars in the first year and 855-Million during the next three years.

Before putting off a final vote until today... the Senate adopted by voice

vote an amendment that would provide five-Million dollars for drug testing of school athletes. It also approved another amendment providing seen-point-six Million dollars in awards for outstanding teachers.

Hospital officials in Los Angeles say rock singer Billy Idol is in stable condition this morning after his motorcycle collided with a car yesterday at a Hollywood intersection.

A spokesman at Cedars-Senai Medical Center says three orthepedic surgeons performed seven hours of ''complicated'' surgery to repair a broken right leg and left arm that Idol suffered in the crash.

Police say Idol was NOT wearing a helmet when his Harley-Davidson motorcyle allegedly ran a stop sign on Gordon Street at Fountain Avenue and hit the car.

Police plan to file a complaint against Idol, alleging he failed to obey a stop sign.

The 31-year-old woman driving the car was NOT hurt.

The white-haired Idol is the former leader of the British punk group Generation X. Since going solo, he has had five top-40 hits, including ''White Wedding'' in 1983 and ''Eyes Without a Face'' in 1984.

#90038u0658 02/07/1990 ~United Press International
(FEB. 7) UPI - The next in a series of concerts to help America's family farmers will be held April 7th in Indianapolis.

The organizers of Farm Aid Four... Willie Nelson, John Cougar Mellencamp and Neil Young... announced the concert yesterday at a news conference. They say they are more concerned with raising awareness than money through the concert.

Previous Farm Aid concerts have raised 12-Million dollars, sending the money to farm-related organizations for distribution.

The artists say they are disturbed by the lack of effect on national policy from previous Farm Aid concerts. And they say the family farmers' woes have become worse since the first concert in 1985.

The performers say 1990 is a key year for American farmers. Congress is considering a new farm bill and the international GATT agreement that regulates agricultural policy will be written by December.

31 entertainers have signed up for Farm Aid Four. They include rockers Don Henley and Lou Reed, rapper L-L Cool J, country singer Dwight Yoakam and bluesman Delbert McClinton.

(FEB. 7) EDITORIAL SAMPLER:

THE SALISBURY (N.C.) POST

A New York judge has ruled panhandling is a form of expression and the city of New York cannot ban it from subway stations.

Well-meaning rulings like this clunk the teeter-totter of justice down too far and too hard on the individual rights end, leaving the rights of the rest of society kicking helplessly in midair.

Judge Leonard Sand had to twist the First Amendment out of shape to reach his conclusion that a street person is merely engaging in ''informative and persuasive speech'' when he accosts you on a dark subway platform and hits you up for a dollar.

By thus getting your attention, the judge said, the beggar forcefully makes you aware of his desperate condition. To forbid him from bothering you would therefore deprive him of the right to convey to you a message you need to hear about homelessness and poverty.

What nonsense.

If a person were to set up a soapbox in Central Park - or even in the

subway station - and launch into an attempt to persuade passersby of the need for more generous welfare legislation, that would be expression.

But the kind of begging New York tried to regulate can be considered expression only by the most bizarre stretch of the imagination. It is behavior specifically designed to frighten and intimidate passersby and thereby extort money from them.

This ruling is misguided and wrong. It ought to be reversed on appeal.

THE CHATTANOOGA (TENN.) NEWS-FREE PRESS

You might think that most taxpayer obligations end when former speakers of the House of Representatives - like Tip O'Neill and Jim Wright - go riding off into the sunset. But they're still in business with you picking up the tab.

Since 1970, the ex-speakers have been entitled to maintain an office in their home distict - even though they are retired from government business and may seldom stop by. They also receive an allotment of $67,000 to run the office, continued free use of the mail and up to three staffers.

Carl Albert, who has long been out of office, still has a district office at McAlester, Okla. Three staffers at the O'Neill office in Boston sort through his papers and his mail. Of course, Jim Wright has his staff of three in Fort Worth, who pare paid to process about a third of a box a day of Wright memorabilia that is designated for Texas Christian University.

It's another costly benefit that we could very well do without, but which Congress has voted for itself.

BOSTON GLOBE

At least one study belies the assertion made by many abortion foes that abortions have a damaging affect on the lives of women who choose them. The study, conducted by Johns Hopkins School of Hygiene and Public Health, found that teen-age women who had abortions fared better than those who carried their pregnancies to term.

The 334 women in the study, all 17 years old and under, and all black, had come to one of two family-planning clinics in Baltimore for pregnancy tests. Before getting the results of their tests, they were interviewed about their educational achievements and aspirations, economic levels and psychological traits. After the results of their pregnancy tests were known, the women were divided into three groups: those who chose to terminate their pregnancies, those who carried their pregnancies to term, and those whose pregnancy tests turned out to be negative.

Those who chose to have abortions were more likely to stay in school and find jobs than those in the other groups. They were also the most likely to use contraception and the least likely to become pregnant again within 18 months. Most alarming was the finding that 58 percent of the young women whose pregnancy tests were negative became pregnant within a year and a half.

Admittedly the women who chose to terminate their pregnancies came from more educated families, suggesting that they would have been successful no matter what their choices. Researchers claim that even when allowing for these variables, those who had abortions were still more likely to succeed.

The authors of the study do not want to suggest that abortions foster success. The limitations placed on the futures of teen-agers who carry unwanted pregnancies to term, however, may be more damaging than the experience of abortion. It is imperative that women receive sex education and birth control information so that they can avoid having to make such a choice at all.

(FEB. 7) EDITORIAL SAMPLER:

THE MILWAUKEE SENTINEL

Lifting of the ban on African National Congress in South Africa may turn out to be even more significant than the legalization of Solidarity in Poland.

South Africa's President F.W. de Klerk, it should be noted, has made no commitment to a one-man, one-vote system that would give South African blacks rule in his country. Nonetheless, granting government recognition to the exiled guerrilla organization, as well as 30 other opposition groups, took tremendous political courage.

South Africa, unlike the former governments of the Eastern bloc countries, has not been a one party state. And less liberal elements of the white political structure would still have to accept reform.

What de Klerk has wrought may be more clear after ANC leader Nelson Mandeal is release from prison, as de Klerk has promised. It is hoped that Mandela, jailed since 1962, will serve as a mediator between the government and the ANC. Whether he will accept, even as an interim measure de Klerk's vision of a system of government where no single race dominates is not certain.

Even if he does, Mandela may have a problem convincing the more strident

ANC members who have helped keep alive the battle for black rights in South Africa to agree.

THE CHICAGO TRIBUNE

The reunification of Germany, as even Mikhail Gorbachev has conceded, daily grows more inevitable. With the reluctant but impotent East German communists finally yielding to that reality, the question becomes not ''whether'' but ''when.'' More and more Germans are convinced the answer is ''soon.''

Soon is not what the Soviet Union or its communists allies in East German want. Nor does it reflect the desires of the United States and its Western friends. But change is clearly in the saddle. And as recent events have shown, sometimes there's no way to slow the pace. ...

Both Washington and Moscow have put forth proposals that would have NATO and the Warsaw Pact evolve more toward some political and economic roles. That goal, perhaps, could defuse the issue. And while the West shouldn't rub their noses in it, neither the East German communists nor the Kremlin are likely to be in any realistic position to control the final outcome. With economic and political chaos threatening in the East, Bonn - in addition to acting out of national pride - would be performing a rescue mission that will dilute the mighty West German economy for years to come. It will need all the benefits it can get from its partnership in the West.

DETROIT FREE PRESS

In deciding to seek the appointment of a special prosecutor to investigate the scandal at the Department of Housing and Urban Development during the Reagan years, Attorney General Richard Thornburgh has helped to assure that the country will get to the bottom of this sordid business.

The Bush administration has been commendably straightforward about the scandal under its predecessor. Jack Kemp, who is George Bush's HUD secretary, has been forthright and even aggressive about trying to unravel the full dimensions of the favoritism, misappropriation of funds and other abuses that occurred during the Reagan years. Thornburgh had earlier, however, indicated a reluctance to see the appointment of a special prosecutor.

THE MUNCIE (IND.) STAR

The FBI arrest of Washington, D.C. Mayor Marion Barry on charges of buying and smoking crack, a highly potent cocaine, rivets the attention of Latin American governments.

For years presidents of Bolivia, Colombia, Mexico and Peru have asserted

that Americans make up one-sixth of the world population yet consume 60 percent of the world's illegally sold drugs. Those percentages are not disputed by U.S. drug officials.

The Latins say the United States takes a dangerously tolerant view of drug abuse. They say too many sports and entertainment celebrities known to be on drugs have not been jailed but, instead, ordered to do such ''community service'' as visiting schools to preach against drug use.

This tells young people they can use drugs until caught, and then they can become lecturers against drugs, say Latin critics.

Hundreds of narcotics agents are murdered each year in Mexico, Colombia and Peru in their highly perilous battle against powerful drug cartels. Latin America's decent elements, comprising its large majority, recognize and accept one's innocence until guilt is proven.

They wonder, however, if U.S. justice will even bring Barry to trial. Already reports say that he could strike a deal to avoid a jail sentence by admitting guilt on possession charges and resigning as mayor. ...

Should Barry not be tried, but allowed to get off an agreement that eases him out of office - or if he is tried and convicted but given a suspended or light sentence - the message beamed to Latin America will be that even the mayor of the U.S. capital ... can walk away from drug charges and that America is not serious about curbing drug use.

That kind of message would be read not only by the Latin American governments fighting drug traffickers but by the drug cartels as well. It's a dangerous message to send.

(FEB. 7) EDITORIAL SAMPLER:

THE HONOLULU ADVERTISER

The world must fervently hope South Africa's long ''season of violence is over,'' as proclaimed by President F.W. de Klerk. But this remains to be shown.

The changes announced in his historic speech to parliament are most welcome. They include legalization of anti-apartheid groups and promises to free Nelson Mandela and end the state of emergency. But they don't change the hated apartheid laws or address hard questions of white power sharing and black majority rule.

De Klerk has met most of the conditions of the African National Congress for the beginning of negotiations toward a new future for South Africa. This seems a show of good faith.

But the cynics' view is that he is only buying time to forestall conflict while nudging black moderates toward a compromise that would preserve a special position for the white minority.

Now comes the most critical time for both sides. De Klerk has created expectations he will be pressured to fulfill. The congress has a radical element that could sabotage negotiations. Even when Mandela is released and negotiations begin, dramatic change may be a long way off.

De Klerk himself now admits that sanctions have been effective and the threat of tougher sanctions by the European Economic Community may have had much to do with recent changes.

Given all that remains to be accomplished, the world community needs to be careful not to mistake promises for real change.

THE HOUSTON POST

Congress last week ended a sorry 38-year-long episode of ideological xenophobia. It did so by repealing a major provision of the McCarran-Walter Immigration Act. Now lifted from the lawbooks is the measure that allowed the barring of foreigners from entering the United States based on their political beliefs or associations.

It was a provision passed during the Red Scare year of 1952, based on the arrogant notion that it was needed to protect Americans from subversive ideas, chiefly communism.

Protect Americans from ideas! America is about ideas. Indeed, the argument can be made that the country is an idea - that of allowing individuals as much freedom as possible consonant with not harming other people. Moreover Americans as a whole are a canny lot; they usually know a bad idea when they hear it without any help from the government.

In short order, this provision was being stretched to cover a spectrum of people so wide as to be just plain silly. ...

Left in place, quite rightly, is a McCarran-Walter provision that allows the barring of individuals for such causes as apparent espionage or drug trafficking, or being likely to engage in terrorist activities.

As for the rest of the law, including the onerous portion that allows denying permanent residency based on a person's beliefs, it should be scrapped.

Happily, bills are pending in the House and Senate to do just that. They should be passed with all due speed. Americans are quite capable, thank you, of thinking for themselves and choosing their own company.

SAN FRANCISCO CHRONICLE

The installation of high-intensity floodlights along a particularly porous stretch of the California-Mexico border is the latest effort by immigration experts to stem the steady northward march of illegal aliens, but it too has failed ...

While America must remain committed to supporting the oppressed of other nations, it is also true that California will never have the wherewithal to make up for the massive economic failings of the country of Mexico.

California is not a limitless utopia. The growing pressures on the state from the rapid flow of illegal immigration will continue to dwarf California's ability to deal with it and to provide for it.

Redoubled effort must be addressed to this problem, whether it be a question of subsidizing a larger Border Patrol program - with agents stationed in strategic locations - or stiffer penalties for U.S. employers who hire illegal aliens, or greater U.S. investment in the Mexican economy.

#90038u0673 02/07/1990 ~United Press International

WASHINGTON (FEB. 7) UPI - President Bush will agree at next week's drug summit to a plan that would replace the Andean cocaine industry with legal commerce, USA Today reported Wednesday.

The United States will join Bolivia, Colombia and Peru for the drug summit on Feb. 15 in Cartagena, Colombia. The newspaper reported a joint communique to be issued at the end of the summit will call for:

-Bush to ask Congress for funds to assist Bolivia, Colombia and Peru in a broad range of anti-drug initiatives during 1991-1994. The funding would be contingent on anti-drug efforts by those nations.

-The United States to foster private investment in the three countries and help open markets for their goods, crops and services.

-Barring U.S. weapons exports to drug traffickers and limiting exports of chemicals used to manufacture cocaine.

-Strengthening controls, licensing or registration of planes, ships, explosives and communications equipment.

-Greater sharing of intelligence information for police, prosecutors and military.

-U.S. aid in the form of equipment and training for Andean law enforcement and military, and cooperative policing pacts.

-Stepped-up interdiction of drug money laundering.

-Increased anti-drug education and treatment of addicts.

#90038u0705 02/07/1990 ~United Press International

ST. PETERSBURG, FL (FEB. 7) UPI - The Times Publishing Co., owner of the St. Petersburg Times, is being sued by Texas billionaire Robert Bass and other investors seeking to boost their share of company dividends.

The Bass group, formally called the Poynter-Jamison Ventures Limited Partnership, already owns 5.7 percent of all Times stock, including 40 percent of the voting shares.

The suit filed Tuesday in Tampa federal court claims that company chairman Andrew Barnes and other members of the board of directors have squandered company assets, largely by doling out millions of dollars in dividends to non-voting stockholders.

That stock could be redeemed for $318,000, according to corporate bylaws. The suit said the Bass group has repeatedly asked the board to do just that.

At the heart of the suit is the ownership structure established by Nelson Poynter, late owner of the St. Petersburg Times. He essentially placed the newspaper in the hands of a journalism institute named after him so the paper could be independent and locally owned.

Barnes, who last week received a letter from the Bass group offering $270 million for what would amount to controlling interest in the paper, has denied any wrongdoing.

"The suit is without merit and an attempt to uproot the very basis of Nelson Poynter's generous creation. ... That a corporate raider, Bob Bass, would seek to undo this for purely financial gain is unconscionable," he said in a prepared statement. "It comes down to a question of whether money is everything, or can American business also serve higher interests."

The suit claims the publishing company in fiscal 1988 earned more than $97 million and incurred no long-term debt. But despite the success, the

limited partnership did not get it's fair share, the suit claims. Because the stock has not been redeemed, non-voting shareholders have earned $3.3 million each year for the past three years for stock valued at $318,000.

The suit claims Bass' group has lost about $6.6 million in dividends in the past five years because the board has refused to redeem the non-voting shares. It also charges that Nelson Poynter set up the institute to perpetuate "absolute control of (Times) Publishing by its management, free of any oversight."

Times Publishing owns the paper and four magazines, including Congressional Quarterly, Florida Trend, Georgia Trend and Governing. The publishing company is in turn owned by the Times Holding Co. and the Poynter Institute. All three companies are named in the suit.

The Bass group is seeking a $5.5 million judgement, which is what the nieces of Nelson Poynter would have earned if the non-voting shares had been recalled plus interest. The two women, who inherited voting stock in 1986, joined in the limited partnership with Bass and other investors in 1988.

Alternatively, the suit asks that all of the dividends paid by the board to non-voting stockholders since August 1988, when the Bass group bought into the paper, be repaid to the publishing company. Bass, of Fort Worth, has purchased Bell & Howell Co., part of Taft Broadcasting Corp., and American Savings Bank in California in recent years.

In the letter to Barnes, the Bass group insisted that the editorial integrity of the paper would not be compromised. "It is impossible to separate journalism from the money that supports it," said George Rahdert, attorney for the paper. "Good journalism takes paper and people and steady commitment. The Bass group has shown no such committment to journalistic quality."

#90038u0741 02/07/1990 ~United Press International

TOKYO (FEB. 7) UPI - Japan's economy will sustain steady growth at least for the next three years, setting a postwar record span of continuous expansion and causing an acute labor shortage, a Japanese economist has predicted.

"The question now is how long the current upturn of the economy will last, and a serious labor shortage will be a major problem to be tackled," said Toshiaki Kakimoto, chief economist of Sumitomo Bank. He said the current expansion is anticipated to exceed a postwar record span of 57 months from 1965 to 1970.

He based his prediction mainly on robust capital investment and personal consumption and little likelihood of a recession in the United States. "We anticipate that the U.S. economy will make a moderate upturn in the latter half of this year after a temporary slowdown in the first half and take the soft landing scenario," Kakimoto said.

He estimated net growth of the U.S. economy at 1.7 percent in 1990, 2.4 percent in 1991 and 2.9 percent in 1992. Kakimoto forecast Japan's economy will grow at an annual rate of 4.3 percent for the 1990-92 period. Its growth for fiscal 1989, ending next March 31, is estimated at 4.5 percent.

He said sustained growth of the Japanese economy will cause an acute labor shortage in 1992. "In order to avoid this situation, efforts must be made to raise the productivity and labor-force participation ratio of each sex and age," he said.

He estimated the labor force in 1992 at 65.06 million against demand of 66.75 million, causing a 1.69 million shortage. "Efforts must be made both by the government and enterprises to raise participation of female workers, particularly in the 20-49 age bracket," he said.

Female workers in that age group accounted for 64 percent of the total work force in Japan in 1989, compared with 72 percent for the United States and 73 percent for Canada, he said.

Kakimoto said Japanese manufacturers will continue capital investment overseas to shift their production but the decrease in jobs at home can be absorbed in the process of economic expansion. He said capital investment at home is expected to continue at a high level in the next three years because domestic demand will remain brisk.

Japan's capital investment in fiscal 1989 was estimated at $608 billion, up from $525 billion in 1988. This compared with the U.S. figure of $513 billion in calendar 1989 and $487 billion in 1988.

Kakimoto said strong personal consumption in Japan will be supported by rising wages and price stability attributable to a high yen. He predicted the yen will further appreciate against the dollar over the next two years.

He discounted the possibility of another discount rate hike by the Bank of Japan this year on grounds that domestic prices remain stable, supported by a strong yen.

The central bank raised the key interest rate three times in 1989 to its present level of 4.25 percent. "If our forecast is right, there is a strong possibility that the current economic expansion will be sustained for a postwar record span," he said.

The current economic expansion, which started in November 1986, has already entered its 39th month, the third-longest, following 57 months from October 1965 to July 1970 and 42 months from June 1958 to December 1961.

#90038u0769 02/07/1990 ~United Press International

(FEB. 7) UPI - Prices on the Tokyo Stock Exchange plummeted in thin trading Wednesday, reflecting pressure of arbitrage selling and rumors of another bribery scandal in Japan.

The Nikkei Average of 225 selected issues, which gained 35.42 points Tuesday, tumbled 364.96 to close at 37,301.87. The broader-based Tokyo Stock Exchange index of all listed major stocks fell 15.77 points to 2,750.36.

An estimated 450 million shares changed hands, compared with 535 million shares Tuesday. Losers broadly outpaced winners 621 to 296, with 218 issues unchanged.

Brokers said rumors about a scandal involving a senior member of the ruling Liberal Democratic Party and a company trading in the over-the-counter market kept investors away.

"The market tends to overreact to such rumors because trading is so dull," an analyst said. Investors also stayed on the sidelines in the absence of fresh incentives.

Steels and shipbuildings such as NKK, Sumitomo Metal, Ishikawajima-Harima Heavy Industries and Kawasaki Heavy Industries were sold along with constructions and distribution-related issues. Foods, chemicals, machinery issues and finances also weakened. Some nonferrous metals and medium-sized steels were selected for buying.

Elsewhere in Asia, stocks closed sharply higher in active trading on the Hong Kong Stock Exchange as signs of a thaw in China's relations with Hong Kong gave investors a reason to hunt for bargains.

The Hang Seng Index gained 52 points to 2,844.89. Volume was 1.1 billion

shares, compared with 754 million Tuesday.

Utilities rose 70.64 points, financials gained 12.94, and industrials climbed 51.22. Properties closed up to 101.77 points.

The day's gains and Tuesday's 36-point advance were prompted in part by assurances by Chinese Premier Li Peng that China will maintain its economic reforms, analysts and brokers said.

Eric Sandlund, director at the securities firm Tyndall, said "this market has wanted to go a lot higher for some time. Even with Tokyo and New York down, Hong Kong was resilient."

Stocks closed lower in active trading on the Singapore Stock Exchange, reflecting the decline on Wall Street.

The Straits Times Industrial Index lost 5.39 points to close at 1,577.31. The narrower All Singapore Index dropped 2.59 to close at 440.75. Volume was about 203 million shares.

Analysts said profit taking at the opening caused the market to slide, but late afternoon buying curtailed some of the losses. "The market is technically bullish and will rally after a few days of consolidation," he said.

On the trading floor, gainers included Overseas Chinese Banking Corp. (foreign), Metro Holdings, Cold Storage, Wearne Brothers, and Overseas Chinese Banking Corp. (warrants).

Losers were Cycle and Carriage, Sembawang Shipyard, Singapore Press (foreign), Singapore Airline (foreign), Keppel Corporation, Shangri-la Hotel, and Ming Court Hotel.

In Australia, stocks closed lower on the Sydney Sharemarket, affected across the board by the collapse of the investment group Westmex.

The All Ordinaries index lost 22.9 points to close at 1645.6. Volume was 117 million shares.

Russell Goward, a previously prominent market player, was forced to call for the liquidation of his cash-strapped investment group. Goward said he would ask the Supreme Court in the state of New South Wales to appoint Tony Sherlock, a bankruptcy expert with the firm of Coopers and Lybrand, as provisional liquidator.

Goward owns 25 percent of Westmex and is the largest shareholder. His own fortune, which once was estimated at around $8 million, was wiped out as a result of the liquidation.

Trading in Westmex was suspended before the market opened. Westmex stock Tuesday traded at 13 cents.

The All Industrials index lost 31.3 points, down to 2557.6. The All Resources lost 16.2 points to close at 948.9.

Adelaide Steam was among the main losers, down 24 cents to $5.22, so was News Corp, down 35 cents to $11.25.

Banks were weaker as investors questioned the credit-worthiness of their clients. Westpac and ANZ both fell 14 cents to end at $5.80 and $6.06 respectively, while NAB was down eight cents to $6.72.

Profit taking, in response weaker bullion prices, affected the gold stocks and the gold index was down 25.5 points to 1,948.6.

PITTSBURGH (FEB. 7) UPI - About 3,400 United Steelworkers union members are scheduled to vote Monday on a tentative contract agreement with Allegheny Ludlum Corp, a union spokesman said. No details of the pact were released pending the vote. The current contract expires March 31, the union spokesman said Tuesday.

Allegheny Ludlum is a specialty steel maker with plants in Brackenridge, Natrona and West Leechburg in western Pennsylvania. It also has plants in Wallingford, Conn.; New Castle, Ind.; and Lockport, N.Y.

#90038u0792 02/07/1990 ~United Press International
BY HELEN THOMAS

WASHINGTON (FEB. 7) UPI - President Bush is going to have a hard time defending a $295 billion military budget for the 1991 fiscal year with the communist world falling apart.

The White House pitch runs like this: Granted there is a lessening of tension and a weakening - if not destruction - of the Warsaw Pact, made up of Soviet and former satellite nations, but the United States cannot let its guard down.

The key reason, according to the president, is that the Soviets are continuing to modernize their military technology. No one can challenge the administration's word on that, since the Pentagon, the CIA and other government intelligence agencies are supposed to be the ones privy to the facts.

No one wants the United States to fall behind in its ability to protect the nation.

Amid talk of troop cuts and peace dividends, the president defended his military budget on his recent Western swing, pointing to the invasion of Panama as evidence U.S. forces must keep up a post-Cold War guard against ''uncertainties and dangers'' even in a safer world.

''We see our armed forces smaller but more agile and flexible, well-suited and ready for the demands of likely contingencies,'' Bush told the troops he visited at Fort Irwin, Calif. ''When I decide we must use military forces to protect American lives and interests, I need to know - as I did in Panama - that you are ready and you are ready now,'' he said.

Still, the president seems to be trying to hold back the dawn in terms of facing the new reality of a unified Germany and eventually a united cohesive continent where East-West divisions and hostility will be considerably toned down.

All the political moves are in the direction of Western values. Democracy and capitalism are the new battle cries in Eastern Europe and even the Soviet Union. It is true there is a lack of stability that could justify the U.S. troops remaining on the scene for the time being.

The president, reading the handwriting on the wall, and definitely still behind the crowd in the breathtaking collapse of the Marxist world, has proposed another cut in American forces in Europe, down to 195,000 on each side.

Soviet leader Mikhail Gorbachev has welcomed the suggestion. At the same time, all the betting is that Bush's move is only the beginning. As time goes on there will be more and more proposals for an even larger draw down and it will be a lot tougher for the president explain why it shouldn't be done.

Nevertheless, Bush says ''this is no time for complacency.''

The hardliners on both sides are still in a ''say it isn't so'' mode. But they too can only sound their warnings of an outside threat.

But their voices are becoming dimmer as the din for democracy grows louder.

Bush insists on pursuing the ''Star Wars'' space defense although many scientists doubt its feasibility. Nobody doubts its cost, in the multibillions. And whether the research on ''Brilliant Pebbles'' will prove productive and worth the gamble.

The proposed base closings and the shut down of defense plants is going to cause hardship and disruption as the United States moves into the post-Cold War world.

Many members of Congress will fight base closings in their areas as part of pork barrel politics. But no one can deny that more money for domestic needs, from the social programs to road and bridge building, would be more worthwhile in the short run and the long run.

The president recently added $500 million more to funding for the Head Start program, bringing the total appropriation to $2 billion. Under that funding 80 percent of the disadvantaged 4-year-olds in the country can go to preschool. Why not make it 100 percent? No change is easy, but the United States has to be as ready for it as the communist world. Retrenching the war machine after 40 years won't be easy. But neither is

it easy for Gorbachev to stand aside as the Soviet empire disintegrates, and to even spur on the process for the good of the people.

#90038u0825 02/07/1990 ~United Press International
SELMA, AL (FEB. 7) UPI - The school board has closed the public schools and reinstated the black superintendent it fired, triggering protests and student boycotts in a city that loomed large in the civil rights battles of the 1960s.

The white-controlled school board asked Norward Roussell late Tuesday to return to work until his contract expires in June. Roussell was relieved of his duties last week because of mounting protests over the board's refusal to extend his contract.

The six white members of the board also asked the five black members, who resigned in protest when Roussell's contract was not extended, to return to the panel.

The board's move came after acting Superintendent F.D. Reese resigned Tuesday and called for Roussell to be rehired. Before he resigned, Reese closed Selma High School and Eastside Middle School for the day because of racial disturbances and walkouts by black students.

The board followed by closing all 11 schools indefinitely, beginning Wednesday.

''Due to recent disturbances and turmoil which have prevented normal operation of our school system, it has been determined that all schools will be closed on Wednesday,'' the six white board members said in a statement. ''Dr. Norward Roussell, who has returned from personal leave, will continue to exercise his duties as superintendent over the school system.''

None of the black board members was present for the meeting. Roussell was also absent but said later the schools will reopen when parents and students are confident about their safety.

School board member Dick Bean said classes will resume ''when we can move away from mob rule and back to normal.''

The board took no action on Roussell's contract. Mayor Joe Smitherman said itwould be discussed this week with board members and protesters.

''I'll continue to meet as long as it takes to find an honorable solution '' Smitherman said.

Smitherman was also mayor in 1965 when when state troopers used clubs and tear gas to turn back black marchers in Selma. The clash became known as ''Bloody Sunday'' and spurred Congress to enact the Voting Rights Act.

The current controversy began in December when the nine-member school board, in a vote along racial lines, chose not to renew Rousell's contract at the end of the school year. The five black board members rsesigned and left the room.

Black leaders organized class boycotts and picketing at City Hall and the at businesses of several members and associates of the school board.

The situation worsened after the board moved to fire Roussell outright last week. Four black leaders were arrested Monday following a confrontation in Smitherman's office.

Dallas County Commissioner Perry Varner, attorneys Rose Sanders and Carlos Williams and activist Margaret Brock were forcibly removed from Smitherman's office and charged with midemeanors ranging from obstructing government operations to assault.

Attorney J.L. Chestnut said white city officials were warned of more racial problems if they terminated Roussell.

''For a year, a number of us have been saying there was no reason to cancel Dr. Roussell's contract and to do so would set in motion forces no one could control,'' Chestnut said. ''It is sad no one listened.''

#90038u0828 02/07/1990 ~United Press International

MOSCOW (FEB. 7) UPI - Secretary of State James Baker arrived in Moscow Wednesday for a three-day visit for talks with Soviet leader Mikhail Gorbachev and Foreign Minster Eduard Shevardnadze.

''U.S. Secretary of State James Baker arrived in Moscow today on an official visit,'' the official Tass news agency said. ''First Deputy Foreign Minister Aleksandr Bessmertnikh and other officials met him at the Sheremetievo-1 airport.''

Baker flew to Moscow from Prague, where he met with new Czechoslovak President Vaclav Havel, whose country underwent a so-called Velvet Revolution last November that broke the communists' 41-year-old monopoly on power.

His arrival in Moscow concided with the third day of the Soviet Communist Party plenum, where the Central Committee leadership was embroiled over

the issue of multi-party democratic reforms.

The Moscow meetings between Baker and his Soviet counterpart, Foreign Minister Eduard Shevardnadze, were meant to lay the foundation for the June U.S.-Soviet summit in Washington.

One official in Baker's entourage said Baker believes this week's Moscow meetings can produce a significant breakthrough in strategic arms cuts as well as progress on conventional forces reductions in Central Europe.

One sign that the United States is taking the occasion seriously is the size of the Baker delegation, which is comprised of 48 officials, not including translators, staff and security aides.

Baker was to meet Friday with Soviet President Mikhail Gorbachev and speak Saturday before a committee of the Supreme Soviet, the first time a U.S. official will have directly addressed the Soviet parliament.

While in Czechoslovakia, Baker said Washington would immediately grant that country a waiver of legislation limiting U.S. trade with nations that restrict emigration.

Baker also promised President Bush will ask Congress to simplify rules for investments in Czechoslovakia and the United States will support its request for admission to the International Monetary Fund.

Baker laid a wreath at the St. Wenceslas statue in famed Wenceslas Square and afterward greeted some of the hundreds of onlookers before leaving for the airport.

U.S. officials who traveled to Prague with Baker said Czechoslovakia was not interested in direct aid or loans, but wanted to create a free-market economy and begin trading with other free markets, including the United States and the European Community.

In a speech Wednesday at Prague's Charles University, Baker said the United States would immediately waive application of the Jackson-Vanik amendment, which curtails U.S. trade with nations that limit emigration.

Baker said that as soon as Czechoslovakia lifts emigration restrictions, the waiver would become permanent, meaning Czechoslovakia would gain the coveted Most Favored Nation trade status, allowing its products greater access to the U.S. market.

Baker also said he would support a proposal to locate in Prague the European Development Bank, which will promote economic growth in the newly emerging democracies of Eastern Europe, Baker said.

Baker said Czechoslovakia will immediately be made eligible for commodity credit programs and added that a U.S. consulate will open in Bratislava, the capital of the Slovak Socialist Republic and second-largest city in Czechoslovakia.

Baker met Tuesday with Havel, the playwright opposition leader turned president, in a gilded room of a Prague palace built by Empress Marie Therese.

A senior U.S. official, describing the meeting between the two, said, ''This is obviously a time of great ferment,'' as the former opposition leaders learn the business of government.

Havel "showed a strong sense of wanting to catch up and to make Czechoslovakia an important part of new Europe," according to an American who attended the meeting.

(FEB. 7) UPI - Secretary of State Baker gave some good news to people in Czechoslovakia this morning. Baker said the United States will allow UNrestricted trade with Czechoslovakia and will make it eligible for commodity credit programs. Baker is due to arrive in Moscow from Prague today. He may be on the sidelines when the Soviet Communist Party Central Committee votes on whether to allow a multi-party system. But the Soviet news agency Tass says debate will end before Baker's arrival in Moscow.

However, debate at the Communist Party plenum has been so hot the meeting was extended an extra day. Tass called the debate on pluralism... ''keen.''

President Bush is ranging up the coast of California, giving pep talks on behalf of his military budget. At Fort Irwin yesterday, Bush said the Soviet Union still has formidable forces. He added that military challenges to democracy persist in every hemisphere. Bush will head north to San Francisco today, stopping first at the Lawrence Livermore nuclear weapons laboratory.

The Senate appears likely to pass an education excellence bill today. The five-year, one-BILLION 500-Millon dollar program survived Republican-led opposition yesterday. Before starting work on the education excellence bill... the Senate voted unanimously for legislation that has a goal of eliminating illiteracy in America by the turn of the century.

The former male prostitute who caused misconduct allegations against Congressman Barney Frank says he revealed his relationship with Frank because it would have been found out anyway. Steve Gobie spoke yesterday at his first news conference since the scandal broke last year. The House

Ethics Committee has NOT yet reported on its probe of Frank, a Massachusetts Democrat.

(FEB. 7) UPI - South African Foreign Minister Roelof Botha has fueled speculation that black leader Nelson Mandela WON'T be freed for another week. Jesse Jackson arrived in South Africa yesterday for a week-long tour. Botha said Jackson's visit was poorly timed. He also said Jackson could NOT claim any credit for South Africa's racial reforms.

Playwright Harold Pinter delivered a speech for author Salman Rushdie yesterday in London. Rushdie... author of ''The Satanic Verses''... is still hiding a year after the late Ayatollah Khomeini ordered his execution. In the speech delivered by Pinter, Rushdie said he used to think all free men and women could take literature for granted. His speech was titled... ''Is NOthing Sacred?''

Pacifists are holding a years-long peace vigil in Lafayette Square, the park across the street from the White House. But they say the atmosphere has changed. President and Mrs. Bush occasionally wave at the demonstrators as they ride by. The peace advocates are pleased with the thawing of the cold war. And one of them says ''things are more civilized in the Bush administration.''

#90038u0842 02/07/1990 ~United Press International

NEW HAVEN, CT (FEB. 7) UPI - The war against drugs declared by Mayor John Daniels when he took office five weeks ago hit home with the arrest of his younger brother on drug-dealing charges.

Robert Daniels, 48, surrendered Tuesday to another brother, Police Detective Melvin Daniels, on a warrant charging him with selling cocaine and operating a drug factory in the city.

A spokesman for the mayor said the family had tried several times to get Robert Daniels to seek help for a drug habit but they did not know the extent of his involvement.

The mayor, who was told that a warrant had been issued for his brother, said Tuesday he was ''very saddened'' by his brother's arrest.

''I love him very much,'' said the mayor, who launched a war on drugs when he was inaugurated Jan. 1 as the city's first black mayor.

John Daniels, 53, also vowed to attack violence in drug-ridden

neighborhoods of the city, which recorded a record 32 homicides in 1989, most of them drug-related.

Police said Robert Daniels became a suspect after they raided a house where he lived last Thursday and arrested three other people and confiscated a small amount of cocaine.

The suspect, who had no prior police record in New Haven, was ordered held on $50,000 bond for a further hearing in Superior Court.

Police spokesman Lt. James Sorrentino said Robert Daniels was charged with possession of cocaine, possession with intent to sell, operating a drug factory, conspiracy to sell narcotics and two counts of selling narcotics.

Sorrentino said the arrest was conducted just like any other drug case. ''It was done as a matter of routine police work,'' he said.

Following the arrest, the mayor told the New Haven Register he was not surprised when he learned his own Police Department was looking for his brother.

''He needs help and hopefully this will drive him to get the help he so badly needs,'' Daniels told the newspaper.

The mayor said his brother has had a drug problem for about a decade when he was laid off from his job at the Olin Corp. After a brief respite, he returned to his old lifestyle and his marriage fell apart, the mayor said.

''I have stated over and over again how this drug menace touches all families,'' the mayor said.

''Maybe my own experience explains why I'm so adamant about fighting this battle to win,'' he said.

#90038u0871 02/07/1990 ~United Press International

NEW YORK (FEB. 7) UPI - A jury for a second day deliberated the fate of reputed Mafia boss John Gotti on assault charges Wednesday, after reviewing secret recordings of Gotti allegedly ordering the shooting of a union official.

Jury deliberations resumed at state Supreme Court Wednesday morning after more than seven hours of discussion on Tuesday.

Acting Justice Edward McLaughlin gave the jury more than two hours of instruction Tuesday. He stressed Gotti's alleged position at the helm of the Gambino crime family, the nation's most powerful organized crime

structure, does not give them license to convict Gotti if the government has not proven its assault case ''beyond a reasonable doubt.''

''With regard to La Cosa Nostra, or the Mafia ... being associated with such an entity is not a crime in itself and membership is not a substitute of proof of the elements of the charges contained in this indictment,'' McLaughlin told the jury of seven men and five women.

Gotti, 49, reputed godfather of the Gambino crime family, is accused of ordering John O'Connor's shooting in retaliation for the trashing of a mob-linked restaurant built with non-union labor.

The judge also announced that four alternate jurors, who have been sequestered with the rest of the panel for the entire 12-day trial because of fears of jury tampering, will not be released immediately.

A court source said the alternates were being held as a security precaution because they have become friendly with their fellow jurors and have information that could be valuable to someone interested in tampering with the sitting panel.

The jurors retired for the day at 7:20 p.m. after listening to 11 tapes of secretly recorded conversations of Gotti, his alleged underlings and members an Irish gang. The panel was expected to resume deliberations at 9:45 a.m. Wednesday.

In summations Monday, Assistant District Attorney Michael Cherkasky told jurors the lawyer for Gotti was nothing more than a mob henchman who lashed out at the government when it threatened his client's ''dark power.''

Gotti's lawyer, Bruce Cutler, claimed prosecutors had whipped up a ''corrupt'' case built on Mafia hysteria. He urged the jury to restore the court's ''integrity'' by acquitting Gotti of assault and conspiracy.

The May 7, 1986, shooting of O'Connor, a business agent for Carpenters Union Local 608, was allegedly carried out at Gotti's behest by a murderous Irish gang known as the Westies.

With one more conviction, Gotti, a convicted killer and hijacker, could be branded a ''persistent felon'' and sent to prison for life. But Gotti has consistently slipped from the government's grip in recent years.

In 1985, he went to trial for assaulting a refrigerator repairman and robbing him of $325 during an argument over a parking space in Queens. The repairman learned who Gotti was, checked himself into a hospital, developed amnesia and said he could no longer remember who hit him. The judge had no choice but to dismiss the charges.

Gotti also was acquitted in 1986 of running an 18-year racketeering enterprise that included gambling, loansharking, truck hijackings, armored car robberies and three murders from 1968 to 1985.

#90038u0872 02/07/1990 ~United Press International

PRAGUE, CZECHOSLOVAKIA (FEB. 7) UPI - The Soviet army, readying for a demanded pullout from Czechoslovakia, detonated some ammunition stores Tuesday and caused several hours of confusion among residents in the southeastern part of the country.

Czechoslovak radio reported the blast inside a Soviet-occupied military zone at the town of Libawa in Moravia, but gave no immediate indication as to its source.

Later, Defense Ministry spokesman Stanislaw Pohoral confirmed the Soviets had detonated some stores of ammunition as part of their planned pullout.

The items destroyed included 500 antitank grenades, 44 pounds of gunpowder and 4.4 pounds of TNT. There were no injuries.

The explosion caused a huge mushroom-shaped, orange cloud that caused some concern among the local population, the radio said. However, no radioactivity was measured, Pohoral said. Firefighters were prevented from entering the area.

The incident occurred as bilateral talks got under way in Moscow on a timetable for withdrawal of the approximately 70,000 Soviet troops stationed in Czechoslovakia since the 1968 Warsaw Pact invasion that halted the reform-minded Prague Spring.

The Czechoslovak side is seeking withdrawal of all troops by the end of 1990, with most of them to be out by elections scheduled in May.

Some 30,000 demonstrators rallied Monday night in Wenceslas Square demanding a total pullout by May 31. It was the latest of several rallies around the country calling for withdrawal of Soviet troops.

In Moscow, the news agency Tass described the demonstrations as anti-Soviet, but Foreign Ministry spokesman Lubos Dobrovsky rejected the categorization Wednesday and said the rallies were a reaction to Soviet foot-dragging in the negotiations.

''I think that it is especially the Soviet side which bears a deal of responsibility for the demonstrations,'' Dobrovsky said.

''Certain reluctance in solving the extremely important question concerning mutual relations between the two countries has rightly aroused nervousness of the Czechoslovak public,'' he said.

Dobrovsky said the Czechoslovak delegation ''will resolutely push through'' the demands it made in the first round of the talks: total withdrawal of Soviet troops by the end of 1990, with the majority to leave by the free elections.

''May 15, 1990 remains the fundamental date,'' Dobrovsky said.

#90038u0889 02/07/1990 ~United Press International

NEW YORK (FEB. 7) UPI - Latest metal market prices as quoted Wednesday by the American Metal Market, authoritative metals publication:

Aluminum, New York Merchants, 99.7 percent pure ingots 65.00-66.00 c-lb.

Antimony, domestic, refined in alloy, $2.00 lb.

Copper, electrolytic wirebars, delivered U.S. (Warrenton Refining Co.) 112.00 c-lb.

Lead, common, U.S. primary producers 40.00 c-lb.; U.S. non-primary (secondary) producers 42.00-47.00 c-lb.

Magnesium, 99.8 percent, ingot 163.00 c-lb.

Manganese, 99.9 percent, boxed regular 91.00-95.00 c-lb.

Mercury, $285.00-$300.00 76-lb. flask.

Nickel, bettes delivered to customers, merchant, N.Y., $2.95-$3.30 per pound.

Palladium, N.Y. Am. Met. Mkt. dealer $135.00-138.00 per troy ounce.

Platinum, soft, 99.5 fine, producer - $511.00-$513.00; dealer-approx., $505.00-$515.00 per troy ounce.

Steel, No. 1 heavy melt scrap - Pittsburgh $100.00 per gross ton (consumer buying price); Am. Met. Mkt. composite scrap price $103.33 per ton.

Tin, N.Y. Am. Met. Mkt. ex-dock - 297.00 c lb.

Titanium, aircraft quality, 8 1/8 inch round rotating billet, f.o.b. shipping point $8.87-12.96 lbs., domestic sponge 99.3 percent, domestic

and imported duty-paid $5.35-5.50 lb.

Tungsten powder (H-Red), 99.9 percent minimum pure $10.00 per lb.

Zinc, prime western, U.S. 65.00-65.75 c-lb.

#90038u0929 02/07/1990 ~United Press International

TOKYO (FEB. 7) UPI - Nippon Steel Corp. announced Wednesday the signing of a contract with the Iranian Offshore Oil Company to increase production fivefold in one of Iran's major oil fields. Nippon Steel will launch the 21-month project in March on the Salman offshore oil field, company executives said.

The project is designed to increase oil production to 220,000 barrels from the current 40,000 barrels at the Salman offshore oil field, which was damaged during the Iran-Iraq war, the company said.

Nippon Steel declined to disclose the exact cost. A Japanese trading company, Toyo Menka Kaisha Ltd., will also participate in the project, the Nippon spokesman said.

Last week the official Islamic Republic News Agency quoted Iranian oil minister Gholamreza Aqazadeh as saying Iran had signed contracts with two unnamed companies - one Japanese and the other Italian - to build a $1.3 billion refinery at Bandar Abbas in the Strait of Hormuz.

The agency also quoted Aqazadeh as saying in October that Iran had signed contracts with a Dutch company and was negotiating with South Korea to help it complete a giant petrochemical project from which the Japanese had withdrawn.

The Japanese trading company Mutsui, which had a 50 percent share in the plant with the state-owned National Iranian Petrochemical company, had earlier pulled out of the project after agreeing to pay Iran $920 million in compensation.

#90038u0930 02/07/1990 ~United Press International

CAPE TOWN, SOUTH AFRICA (FEB. 7) UPI - The right-wing Conservative Party, outraged by President Frederik de Klerk's racial reform initiatives, vowed Wednesday to mobilize Afrikaners to fight for an exclusively white homeland in South Africa and warned that extremist violence may escalate.

Accusing the government of putting the fate of the Dutch-descended whites who comprise a majority of South Africa's 5 million whites at ''perilous

risk,'' the opposition party declared ''there is no way that Mr. de Klerk can drag the Afrikaner people into his 'new South Africa.'''

Meanwhile, police reported Wednesday five deaths in black unrest across the country, including four men burned to death when unidentifed persons hurled a Molotov cocktail into a passenger bus. The incident occurred Tuesday in the tense township of Botshabelo, near the central city of Bloemfontein, where unrest escalated during protests last week over a boycott-breaking English cricket tour of South Africa.

A house and another vehicle in the same area were damaged by firebombs and police fired birdshot to disperse groups stoning buses in the township, police said. Four women and a man were wounded, police said, without elaborating.

A fifth death occurred in faction-fighting in the strife torn province of Natal, police said.

Conservative Party spokesman Koos van der Merwe told reporters the party intends to mobilize 1 million people to demand a new election. He acknowledged, however, that no constitutional formula exists for having one in the next five years unless called by the president.

Van der Merwe said 1 million votes would put the party in power to pursue its plan to divide South Africa into at least two parts - one for whites, the other for blacks. The Conservative Party, largest of the right-wing groups, captured 670,000 votes in the last election.

''You can only solve the political power struggle by dividing the land,'' he said. ''If you go thorugh this country you will find the graves of thousands of Afrikaners who have lived here, who have died for this country, for a part of it.

''We only want that part of South Africa which is legally ours, which we have fought for, which we have spilled our blood for.''

He also announced plans for a rally May 26 in Pretoria on the 42nd anniversary of the National Party's rise to power and warned of a two- or three-day work stoppage by Afrikaners to paralyze the state-run railways, hospitals, police and fire departments and schools in a demonstration of the Afrikaners' power.

''That which is facing us, ladies and gentlemen, is nothing but black, ANC communist domination in this country,'' Van der Merwe said. ''They are trying to put us in chains and we say 'no go.' We are not prepared to do that.

''We are going to organize white resistance in a legal manner against Mr.

de Klerk's initiatives.''

He said the party has rejected violence but warned that white anger might be impossible to contain.

''The government is creating a mood in which violence can become a possibilitiy,'' he said.

The right-wing was especially angered following comments Tuesday by the government's chief racial reform negotiator, Constitutional Affairs Minister Gerrit Viljoen, that a coalition government is likely to be in place by the turn of the century.

"In 10 years you would have not a single party in government but a coalition," Viljoen said. ''The National Party is not very likely to be in control.''

The white supremacist spokesman was forced to leave Parliament Tuesday because he declared during debate that de Klerk was a ''traitor to the Afrikaner nation'' and refused to retract his remarks.

Van der Merwe charged that de Klerk, by unilaterally lifting a 30-year-old ban on the African National Congress without securing the movement's renunciation of violence as a political weapon, deliberately misled white voters in the Sept. 6 election that returned the National Party to power.

In an opening address to Parliament on Friday, de Klerk also said Nelson Mandela, the jailed-for-life symbolic leader of the ANC, would be unconditionally released soon. There was still no word Wednesday on when the black nationalist would be freed.

Mandela, 71, was quoted Tuesday as describing de Klerk's speech as ''bold and courageous'' but said it fell short of creating the climate conducive to power-sharing talks by failing to lift a 43-month-old state of emergency in its entirety and releasing all political prisoners.

#90038u0945 02/07/1990 ~United Press International

(FEB. 7) UPI - A storm front clobbered the Pacific Northwest Wednesday, dumping heavy snow and causing numerous accidents on slick mountain roads, while fog enshrouded the Midwest and rain soaked parts of the middle Atlantic Coast.

The fierce thunderstorms started Tuesday and brought lightning, hail and more than a foot of snow to Washington's Cascade and Olympic ranges. The National Weather Service issued a winter storm warning for the north Coast Range and authorities banned vehicles without chains or snow tires from

most mountain passes.

State Police in Portland, Ore., said roads were extremely icy and the glistening surface on Interstate 5 was responsible for a series of fender benders overnight. Two people died on the frozen roads Tuesday.

The storm system also cut a path through Idaho and Colorado, leaving behind scattered snow showers.

The storm prompted the National Weather Service to post a winter storm warnings and watches in Utah. Up to a foot of snow was expected in the northern mountains, 6 inches in the Cache Valley and 2-3 inches in the northern valleys, forecaster Ed Carle said.

Good news for residents of the Lake Erie snow belt. The weather service said the Lake Erie water temperature has risen to 34 degrees. The temperature - taken about 30 feet below the surface - never drops below 33 but normally doesn't start rising until the end of winter. Last year, the temperature didn't reach 34 until March 27.

Early morning fog covered the Midwest Wednesday as temperatures dropped below freezing in Wisconsin. The decreased visibility combined with icy spots on roads to make driving hazardous, the NWS said.

In central Wisconsin, Wausau reported visibility was down to 1/16th mile with a temperature of 26. Fog was also reported in Madison in southcentral Wisconsin, while Milwaukee saw the only clear skies statewide and also reported the warmest temperature at 32.

The fog extended through Illinois, in Peoria and Rockford, south to Columbia, Mo. Other areas of Illinois reported cloudy skies but temperatures held in the upper 30s. Detroit reported light rain and 36 degrees, while in Michigan's Upper Peninsula skies were clear to partly cloudy.

A weak ridge of high pressure moved across New England, where skies were partly cloudy. Dense fog covered southern New Hampshire and Vermont and temperatures fell into the teens.

A low-pressure system brought rain and some fog to most of the South, but high pressure followed in its wake with the promise of clearer skies for Mississippi and Alabama. Temperatures remained on the mild side, climbing to 51 in Knoxville, Tenn., 53 in Atlanta, 56 in Jacksonville, Fla., 57 in Charleston, S.C. and 69 in Miami.

Despite a weak cold front stretching from upper Louisiana to the Texas-Mexico border, unseasonably warm temperatures continued throughout the southwest, after the mercury soared into the 80s Tuesday in Texas.

A thick blanket of fog reduced visibility in east and southeast Texas and along the Louisiana Gulf Coast Wednesday morning, prompting the weather service to issue dense fog advisories.

Light rain moved into Pennsylvania, Maryland, Delaware and West Virginia, where temperatures ranged in the 30s and 40s.

#90038u0956 02/07/1990 ~United Press International

KATMANDU, NEPAL (FEB. 6) UPI - The government arrested about 100 leaders of the banned Nepali Congress party Wednesday in an effort to stall a movement toward democracy in the Himalayan kingdom, a party spokesman said.

The government apparently is attempting to head off a national movement by the opposition to lift a 29-year-old ban on political parties and to temper the near absolute powers possessed by King Birendra.

Assistant general secretaries of the banned Congress party Yog Prasad Upadhaya and Basu Risal, and office secretary Dbruba Bhandary, were among 100 people arrested in a 24-hour period, Congress party spokesman Daman Dhungana said.

''Our modest estimate is that 100 persons have been arrested in the last 24 hours and nationwide arrests in the last four days have reached 277,'' Daman Dhungana said at a press briefing Wednesday.

Police searched the home of Sarbottam Dangol, a leftist leader, and surrounded the house of Siddhi Lal, another prominent communist leader, opposition sources said.

Siddhi Lal is leader of seven factions of communist parties that have supported the Congress move toward democratic reform.

Banned party sources also said 44 leftist students were arrested in the tourist resort town of Pokhara in west Nepal and 20 of them had been dispatched to jails.

Five people who staged a five day hunger strike to protest that they were arrested without warrents in Palpa, west Nepal, have been released, the sources said.

The government, which has also started banning newspapers, seized the offices of Dristi, a weekly newspaper with leftist leanings, the second newspaper to be forced from publishing this week.

#90038u0963 02/07/1990 ~United Press International
WASHINGTON (FEB. 7) UPI - Vaclav Havel, the new non-communist president of Czechoslovakia, will address Congress Feb. 21 during a visit to Washington that also will include meetings with President Bush, officials announced Wednesday.

Havel will be the second East Eurpoean reform leader to address a joint meeting of the House and Senate in recent months. Lech Walesa, leader of Poland's Solidarity movement, gave a warmly received speech to Congress Nov. 15.

Havel, a playwright who spent five years in jail during the communist regime in Czechoslovakia, was unanimously elected president by the country's new legislature at the end of December.

Since then Havel has visited Poland, Hungary, East and West Germany for discussions with leaders of those nations and plans to meet with Soviet President Mikhail Gorbachev in Moscow this month.

Havel is scheduled for a working visit with Bush and other officials at the White House Feb. 20 and will address Congress the next day. He then plans to travel to New York City before returning to Czechoslovakia.

#90038u0988 02/07/1990 ~United Press International
BONN, WEST GERMANY (FEB. 7) UPI - The West German government agreed Wednesday to begin immediate negotiations with East Germany on the establishment of a monetary union between the two states, Finance Minister Theo Waigel said.

Waigel said at a news conference that Cabinet ministers had shown particular interest in a proposed system that would introduce the West German currency into East Germany, which would then have to give up its monetary sovereignty.

Economics Minister Helmut Haussmann, also speaking at the news conference in Bonn, said it was possible to create ''a German-German economic miracle in both German states or in a unified state.''

The proposal for a monetary union is largely seen as a step toward the reunification of the two German states divided since the end of World War II.

West German Chancellor Helmut Kohl had suggested the monetary union in what appeared to be an offer to bolster East Germany's troubled economy, crippled by the migration west of an estimated 2,000 East Germans each day.

The Bundesbank, West Germany's central bank, had warned against setting up

a monetary union before East Germany had thoroughly reformed its economy.

But government and bank officials said Wednesday that Bundesbank President Karl-Otto Poehl, in talks with government ministers, agreed with the call for early negotiations on the issue with East German authorities.

The move toward the monetary union was immediately praised and criticized by some European economists Wednesday, who said it would inevitably cause complications in the European Community's monetary system.

''Of course this will have consequences for the European Monetary System '' a European diplomat said Wednesday. ''Consultations between EC member states will be very important in this respect.''

West Germany and eight other EC countries have linked since 1979 their currencies and the West German deusche mark, the strongest currency, is considered the linchpin in the system.

In Bonn, Haussmann said the union could be agreed to before the beginning of 1993, but Kohl said he wanted to act as fast as possible in a bid to help restore confidence in the East German economy.

Waigel said there were several possible alternatives for a monetary union but he indicated that the West German government favored bringing the West German currency to East Germany.

''We have intensively dealt with and discussed the introduction of the deutsche mark as legal tender in the GDR (East Germany), which would speed up the mobilization of Western capital,'' he said.

He said such a solution meant East Germany would have to ''partially give up its sovereignty'', hand over monetary control to the Bundesbank and ''adopt our economic order and our economic laws.''

Waigel also admitted that the proposal would initially cause some problems such as increase the rate of unemployment in East Germany.

He said another, more gradual scenario would require ''patience, political authority and much strength'' adding that ''it is questionable whether these still exist in the GDR.''

Poehl also told the Cabinet that ''he realizes one does not have time and that he can understand the government is concerned and wants to act quickly,'' a Bundesbank spokesman said.

Kohl said earlier that although the proposed union could not be established before the March 18 elections in East Germany, negotiations should start soon because of the rapid deterioration of the East German

economy.

He said he would discuss the issue with East German Prime Minister Hans Modrow in Bonn next week.

One European economist said the West German deustche mark was strong enough to withstand a monetary union with East Germany.

''The German stock exchange is on the upswing,'' said the financial expert from Kredietbank, one of the major Belgian banks. ''Not only the expected economic growth in West Germany, but also the expectations of growth possibilities following German unification, are factors we should not underestimate.''

#90038u1032 02/07/1990 ~United Press International

WASHINGTON (FEB. 7) UPI - Sen. Robert Byrd, D-W.Va., suggested Wednesday countries which get the biggest share of U.S. foreign aid, which includes Israel, could be cut by as much as 10 percent or 20 percent.

Byrd, chairman of the Senate Appropriations Committee, did not mention

Israel nor other major recipients such as Egypt, Greece, Turkey, the Philippines and Pakistan in a Senate speech.

But the former Senate Democratic leader said cuts in aid for some countries could be ''substantially larger'' than the 5 percent accross-the-board reduction for all recipients proposed recently by Senate Republican leader Robert Dole.

''Some countries, certainly the largest of our historic aid recipients, can probably take cuts substantially larger than 5 percent - somewhere between 10 percent and 20 percent would be more realistic, I would think.''

A cut of 20 percent for Israel, the largest single recipient at $3 billion would reduce aid by $600 million.

''Some recipients might not take any cut at all,'' Byrd said. ''There is one thing for certain; no foreign aid country has earned the right to our money or resources. And no foreign country can assume it has an American entitlement program.''

Byrd's brief speech continued the debate, sparked by Dole, over the future of U.S. aid which now faces the needs of the new democracies in Eastern Europe plus the unredeemed requests of Latin American nations.

Byrd dismissed complaints, mainly from the administration, over the practice by Congress of earmarking money for specific countries, saying that it was a ''routine priority setting practice'' common throughout the federal budget.

''No one can seriously presume that we are going to hand over some $15 billion or so to the administration and say, have at it, let us know who you gave it to and for what purpose,'' Byrd said. ''The Congress has a legitimate and responsible job of setting our priorities, and that means earmarking or whatever other term one wishes to give to such priority setting.

''The size and nature of the earmarks are what the debate will be over,'' he said.

Byrd warned that the amount of foreign aid will remain limited and will not grow because of any ''peace divident'' from cuts in the defense budget.

''Foreign aid is not going to be pie in the sky, it is going to be limited and the priority setting will consist of re-allocating the funds within that pie,'' Byrd said. ''If the administration wants to increase the size of that pie, it will have to tell us where the money is coming from.''

#90038u1069 02/07/1990 ~United Press International
BRUSSELS, BELGIUM (FEB. 7) UPI - The proposed monetary union between West and East Germany will inevitably cause complications in the European Community's monetary system, the outcome of which depends on international confidence in West Germany's economic potential, financial experts said Wednesday.

The West German government agreed Wednesday to start immediate negotiations with East Germany on a monetary union, a step seen as leading to the reunification of the two German states, divided since the end of World War II.

''Of course this will have consequences for the European Monetary System '' a European diplomat said Wednesday. ''Consultations between EC member states will be very important in this respect.''

West Germany and eight other EC countries have linked since 1979 their currencies within narrow fluctuation margins in the European Monetary System. At the same time they float jointly against other currencies such as the U.S. dollar.

The deutsche mark, the strongest currency in the EMS, is the linchpin in the system. Financial experts are trying to determine how a monetary union between the strong West German economy and the deeply troubled East German economy will affect the crucial deutsche mark.

''All ideas about this are still very speculative,'' said an expert from Kredietbank, one of the major Belgian banks.

''We see some positive factors which indicate the West German Mark may even get stronger in the future,'' he said. ''Not only the expected economic growth in West Germany, but also the expectations of growth possibilities following German unification, are factors we should not underestimate.

Under the terms of the proposed monetary union, West Germany would introduce its deustche mark into East Germany, which would give up its monetary sovereignty.

Financial experts said the move would attract foreign investors to East Germany.

But they warned it would also force East Germany to transform its state-run economic system into a market-driven system - a difficult task made harder because the government had been subsidizing certain consumer products.

The East German economy is also saddled with outdated, inferior trade goods and low productivity.

''They will have to make an enormous effort to catch up,'' the Kredietbank expert said, adding that West Germany will have to heavily subsidize East German efforts toward economic reform.

''This increase in West German expenditure will inevitably reduce the West German external balance surplus,'' he said. ''The increased demand might even boost inflation in West Germany.

''Whether these negative factors eventually will result in a weaker position of the West German mark, and reduce its influence in the EMS, will depend on whether world trade is confident West Germany can generate ... an economic miracle,'' he said.

#90038u1071 02/07/1990 ~United Press International

WASHINGTON (FEB. 7) UPI - Backstairs at the White House:

Secretary of State James Baker delivered a testimony of religious faith at the National Prayer Breakfast that captured Washington's attention.

Baker, whose wife is deeply religious, was the one speaker at the breakfast who held the audience, including President and Mrs. Bush in thrall, as he spoke of his transition from a person who makes some of the most powerful decisions to a man ''trying to put my faith into practice in my life.''

Baker's public statement was unique since although he was a regular churchgoer in the Reagan administration years when he held the high ranking positions of White House chief of staff and treasury secretary, he never was aligned with the evangelical right that had a strong influence on the Reagan White House.

He said the most important thing he learned in Washington was that ''temporal power is brief.''

He recalled:

''As my driver turned the car into the Northwest Gate (the main gate at the White House) I looked down Pennsylvania Avenue and walking alone was a man who had been a chief of staff in a previous administration. He had no security. That mental picture continued to remind me of the impermanence of power. That man had it all but he had it only for a time.

''One thing I know for sure: The people who wouldn't return my phone calls

before I came to Washington are not going to return them after I leave.''

It's deju vu all over again for Peter Roussel, former deputy press secretary to President Reagan and former press secretary to George Bush when Bush was U.S. ambassador to the United Nations.

Roussel, who resides in Houston, has been appointed communications director for the Economic Summit Host Committee when the organization of the seven Western industrialized countries meets in Houston in mid-July.

President Bush, who is the host of the summit, wanted the conclave held in his adopted home town.

Planning for the Texas summit is already under way with the booking of hundreds of hotel rooms. Security problems also will tax the state as well as the Secret Service with seven heads of government to guard. Each will bring along his own security contingent as well.

The closed meetings will be held on the campus of Rice University in Houston.

The scaffolding around the White House has another year to go. Workmen have been meticulously and tenaciously scraping 30 years of paint from the 200-year-old building, getting down to the original stone.

And they are finding many faults, places in dire need of repair and not a minute too soon, they say.

The Executive Mansion appears to have always been in a state of neglect when finally something is done about it. The most recent thorough renovation of the White House structure itself was undertaken in 1952 when a leg of the piano Margaret Truman was playing went through the East Room floor.

Nancy Reagan had the upstairs quarters redone, even down to the plumbing and other fixtures, as well as the floors. So much so that Barbara Bush raves about it and says that she did not have to do a thing, except turn the living quarters into a home with her personal furnishings and belongings after she moved in.

Never has there been as much trepidation in the White House and in the country over President Bush's determination to attend the Andean summit in

Colombia, where violence inflicted by the drug lords has reigned supreme since the government declared war on the cartels.

But with lots of bravado the presidential party is setting forth, convinced that 5,000 Colombian troops supplemented by heavy Secret Service reinforcements can protect Bush.

The setting of the meeting on the Colombian resort peninsula of Cartagena will be familiar to moviegoers - at least those who saw ''Romancing the Stone,'' which was filmed there.

JOHANNESBURG, South Africa (FEB. 7) UPI - Winnie Mandela's telephone has been disconnected because she has run up an unpaid bill of more than $1,700, the Johannesburg afternoon newspaper, The Star, reported Wednesday.

Callers who dial the unlisted telephone number of Mandela, wife of the jailed black nationalist Nelson Mandela, reach a recorded message saying the service had been ''interrupted''.

A spokesman for the Department of Posts and Telecommunications, responsible for the country's telephone network, told The Star the last time Mandela's phone bill was paid was in November.

Mandela regularly changes the number of her home phone in the upscale Diepkloof suburb of Soweto, the black township outside of Johannesburg.

#90038u1100 02/07/1990 ~United Press International

SAVANNAH, GA (FEB. 7) UPI - Carolyn McKenzie was at her wits' end trying to figure out what had happened to her Siamese cat, Sammy, until she remembered that her next-door neighbors moved the day he disappeared.

Sure enough, Sammy had stowed away in the moving van and was safe and sound - 800 miles from his Savannah home in Shreveport, La.

McKenzie said Tuesday she knew Sammy loved to roam in the woods behind her house. But, she had no idea his wanderlust would take him so far from home.

''Sometimes he does roam around for a day or so. But I went in the woods and I called him and I called him and he didn't come home, and I knew something was very wrong,'' she said.

When Sammy disappeared on Jan. 29, McKenzie asked Sav-A-Life and the Pet Assistance League, two Savannah pet agencies, for help in finding her

wayward cat. Neither agency could find a trace of Sammy, and McKenzie feared he would never come home. Then, she remembered her neighbors had moved to Shreveport so she tracked them down and discovered Sammy had also made the trip.

''I thought, Oh God, how in the world am I going to get my cat back?'' she said.

It cost McKenzie $1,100 to have her prodigal cat flown home. But she said Sammy's reunion with her family five days after he was found was worth the expense.

''My daughter cried for two or three days. You don't realize how much you love them (pets) until they're really gone,'' McKenzie said.

McKenzie said she decided not to take any more chances with Sammy's penchant for roaming, so she took the cat to the Pet Assistant League and had him tattooed with a number that will go into a national pet register.

#90038u1101 02/07/1990 ~United Press International

DETROIT (FEB. 7) UPI - General Motors Corp. said Wednesday its Chevrolet division is recalling about 1,600 1990-model Geo Prizm subcompact sedans to check them for a gradual loss of air pressure in the tires.

In a bulletin to Chevrolet dealers, GM said the tire bead, or the part of the tire that connects to the rim, may have been damaged during the mounting process at the factory.

Tires on affected cars will be dismounted and checked, with any damaged tires replaced, GM spokesman David Hudgens said.

GM said the recall is not safety related, but that owners are being notified by mail to bring their cars in for service.

The Geo Prizm is assembled under a joint venture between GM and Toyota Motor Co. at the New United Motor Manufacturing Inc. (NUMMI) assembly plant in Fremont, Calif. It is based on Toyota's Corolla sedan.

#90038u1107 02/07/1990 ~United Press International

WASHINGTON (FEB. 7) UPI - The Internal Revenue Service said Wednesday interest rates will remain at 10 percent for tax overpayments and at 11 percent for tax underpayments for the quarter starting April 1. Personal income tax returns are due April 15.

"Under the Tax Reform Act of 1986, the rate of interest is determined on a quarterly basis, and the rate on underpayments is 1 percent higher than the rate on overpayments," the IRS said. The rates on tax overpayments and underpayments are based on federal short-term interest rates, the service said.

NEW YORK (FEB. 7) UPI - An index reflecting expectations by plant managers to get new orders in the first quarter of 1990 was at a two-year low, Dun & Bradstreet Corp. reported Wednesday.

The company, which markets business information worldwide, said its New Orders Optimism Index was ''at its lowest level in two years,'' and fell sharply from the two previous quarters.

''While plant managers are somewhat glum about the near-term outlook, they remain fairly optimistic regarding the 12 months ahead,'' said Joseph Duncan, corporate economist and chief statistician for the company.

Dun & Bradstreet surveys 1,500 plant managers who are asked what their expectations are for the first quarter and all of 1990.

The first-quarter Production Index fell 11 points to 18 from 29 in the fourth quarter of 1989 and the New Orders Optimism Index slid 10 points to 19 from 29 in the previous quarter.

First-quarter expectations for overall demand fell 8 points top 22 from 16 in the last quarter.

The company said the decline in first-quarter indexes did not have a negative impact over managers' confidence for the entire year.

COLOMBO, SRI LANKA (FEB. 7) UPI - More than 100 fighters were killed in battles between rival Tamil militant groups in eastern Sri Lanka, a senior police official said Wednesday.

The official said the Eelam People's Revolutionary Liberation Front (EPRLF) Tuesday night stormed two training camps of their rival Liberation Tigers of Tamil Eelam (LTTE) in the jungles of Amparai district, 175 miles east of Colombo.

''We heard that two training camps of the Liberation Tigers were completely destroyed,'' said the police official. He said police did not have other details of the fighting.

The attack on the camps sparked clashes in other areas of eastern Sri

Lanka between the two radical groups.

''For nearly an hour we heard gun fire and loud explosions. They were firing mortars,'' the official said.

He said the LTTE lost more than 100 members and several others were injured in the clashes.

It was not clear how many EPRLF members were killed or injured in the fightings.

Tuesday's clashes were a major setback for the powerful LTTE which aims to obtain complete control of North-Eastern Province after India withdraws its troops by March 31.

Indian troops were sent following a July 29, 1987, peace accord between New Delhi and Colombo that aimed to end the more than 4-year-old Tamil separatist war by granting greater autonomy to the Tamil-dominated areas.

The troops were sent to maintain peace and oversee the surrender of arms by Tamil militants.

The LTTE - largest and most popular of the Tamil rebel organizations - refused to endorse the accord and in clashes with the Indian army lost more than 600 members. India lost more than 1,100 soldiers in the fighting.

The group has also dealt severe setbacks to the Indian-backed militia of the EPRLF, which endorsed the accord and won the 1988 North-Eastern provincial council elections, boycotted by the LTTE.

#90038u1147 02/07/1990 ~United Press International

WEST BERLIN (FEB. 7) UPI - Three major East German opposition groups Wednesday formed a political alliance in an apparent bid to counterbalance a similar electoral coalition of conservative parties preparing for March 18 elections.

The East German news agency ADN said the new group, dubbed Alliance 90, included New Forum, Democracy Now, and Initiative Peace and Human Rights, opposition groups that are sometimes described as leaning to the left.

Gerd Poppe, from the Initiative Peace and Human Rights, said the alliance was a ''corrective to the parties whose programs ignored certain problems.''

Observers believe the new electoral alliance is aimed at balancing a similar alliance formed Monday by three conservative groups that have the backing of West German Chancellor Helmut Kohl's Christian Democratic Union.

A spokesman said Alliance 90 would run its electoral campaign without support from West German parties.

An opinion poll conducted in East Germany and published Tuesday by ADN showed that if elections were held immediately, the Social Democratic Party, supported by the the West German party of the same name, would be the clear winner, gaining 54 percent of the vote.

The poll showed that the Communist Party would garner only 12 percent of the vote in the election, the first free poll in East Germany's 40 year history.

Liberal parties, including the Free Democratic Party, backed by the West German party of the same name and the base of Foreign Minister Hans-Dietrich Genscher, have also been considering the formation of an electoral alliance.

(FEB. 7) UPI - The West German government has agreed to start immediate negotiations with East Germany on the establishment of a monetary union between the two states. A senior aide to Chancellor Helmut Kohl made the announcement today at a meeting of parliament. He says the government wants to start negotiations without delay.

Black South African leader Nelson Mandela's daughter says the United States should NOT rule out the use of military force if it's necessary to help end apartheid. Make Mandela, daughter of the jailed African National Congress leader, made the statement last night in a speech at the University of South Florida.

The Reverend Jesse Jackson arrived in South Africa today. He said ''the winds of freedom'' blowing through the East Bloc nations must also affect South Africa. Jackson arrived for a week-long visit that the government says has come at an inopportune time and indicated may delay the release of Nelson Mandela.

Streamlined voter registration has received a nod from the House. The legislation now goes to the Senate... where passage is UNcertain. The intent of the bill is to make it easier for more Americans to cast ballots. But President Bush questions whether it will allow vote fraud to increase.

Congressman Dana Rohrabacher says the National Endowment for the Arts helped pay for one-dozen sexually explicit performances by a woman who did pornographic videos. The California Republican says the federal government contributed to the performances by giving money to the New York State Council for the Arts.

A report says Baxter Healthcare is in trouble with the Food and Drug Administration. The report says the F-D-A found quality control violations in a Baxter facility that screens blood and plasma from across the nation for contamination by AIDS, hepatitis and other diseases.

JERUSALEM (FEB. 7) UPI - Israeli soldiers shot and killed an Arab teenager and wounded at least seven other young people Wednesday in a second day of clashes in the Rafah refugee camp in the occupied Gaza Strip, Palestinian sources said.

Palestinian sources in Gaza speculated the rising violence in the refugee camp was linked to the arrest of a former Rafah resident by Egyptian authorities. The Palestinian suspect was questioned about Sunday's attack on a tour bus near Cairo that left nine Israeli tourists dead.

The suspect, who has not been identified, reportedly received Egyptian citizenship 10 years ago. He is suspected of driving the car used in the attack.

The violence increased significantly Tuesday and Wednesday in the Gaza Strip, with soldiers killing one and wounding at least 68 Arabs. Military officials declined to comment on the cause of unrest.

Rafah, with its 46,800 residents, was tense Wednesday and clashes erupted for a second day. Ayman Zaqout, 17, was fatally shot in the back. His brother, Tal'at, 19, was killed during a stone-throwing incident June 22, 1988, Palestinian sources said. The victim's mother was arrested two months ago on suspicion of throwing stones and incitement.

At least seven other Rafah youths between 15 and 20 were wounded by army gunfire, hospital officials said. Most were hit in the leg, they said.

Elsewhere in Gaza, three Arabs were wounded, including an 8-year-old boy from Beach camp who was hit in the left arm by a plastic-coated metal ball.

At lest 636 Palestinians have been killed by Israeli soldiers or civilians in the 2-year-old Palestinian uprising.

The army spokesman confirmed Zaqout was killed and said the shooting was under investigation.

On Tuesday, 38 Rafah camp residents were wounded in one of the most violent days in the occupied Gaza Strip in several months, officials at Nasser Hospital reported. As many as 20 Arabs from elsewhere in the Gaza Strip also were wounded during confrontations with the army, Palestinian sources said.

The army spokesman said 14 residents were wounded seriously enough to be hospitalized. He acknowledged others may have been lightly wounded and treated at hospitals or clinics and later released.

In Nablus, the largest city in the West Bank, residents observed a general strike to protest the death of Mustafa Kulab, 45. He died Tuesday when the Israeli driver and guard on a gas tanker opened fire at stone-throwing youths.

Also Wednesday, reserve Cpl. Meir Levi was sentenced to four months in jail for slapping an Arab prisoner who swore at him, Army Radio reported. The incident occurred last year in the West Bank city of Jenin. The Arab prisoner was being transported in a vehicle and his hands were bound when Levi hit him.

Defense Minister Yitzhak Rabin said Wednesday the security forces will consider reopening universities in the West Bank, which have been closed since the start of the Palestinian uprising nearly 26 months ago.

''As soon as the university administrators will come and take upon themselves the responsibility that studies and only studies will take place at the universities, we will reconsider this,'' Rabin said.

In another development, the 100th soldier refusing to serve in the occupied territories was sentenced to jail. Reserve Maj. Zvi Nir'el was the highest ranking soldier so far to refuse to serve, Israel Radio reported.

CUPERTINO, Calif. (FEB. 7) UPI - The General Accounting Office has recommended the Air Force reopen bidding on a $164 million defense computer contract, threatening Apple Computer Inc.'s biggest sale yet to the federal government.

In a ruling last week, the GAO, the investigative arm of Congress, questioned the ability of Apple's Macintosh computers to meet the Air Force's requirements for multitasking, which allows users to perform several functions at once.

Under the present contract, awarded in August, Apple would supply at least 10,000 Macintoshes and possibly 80,00 desktop computers over several years for the Air Force's worldwide command and control system.

Honeywell Inc. of Minneapolis is the prime contractor and would help Apple hook the machines together with software. Martin Marietta Corp., which sought to supply the Air Force with computers made by Sun Microsystems Inc., of Mountain View, Calif., protested the award.

The GAO's ruling dealt a blow to Apple's attempts to crack the lucrative government market for personal computers.

The Air Force, however, has not yet decided whether to reopen bidding on the deal. Apple said it will continue to honor the contract until it hears otherwise.

#90038u1226 02/07/1990 ~United Press International
KHARTOUM, SUDAN (FEB. 7) UPI - Sudanese military ruler Gen. Omar al Bashir said Wednesday he planned to introduce a one-party political system in his country, the official Sudan news agency reported.

Bashir, defying the trend toward democratic reform sweeping Eastern Europe said his one-party system would succeed where other countries' imposed totalitarian parties had failed.

But his announcement came as government attempts to control southern parts of Sudan took a further blow.

Rebel forces fighting Bashir's fundamentalist Islamic regime claimed they had penetrated the southern provincial capital of Juba for the first time in seven years of civil war.

Bashir has ruled Sudan with a 10-man military junta since he seized power from a democratically elected government in June last year.

The junta has suffered embarrassing military reverses in the south, alienated some neighboring countries and has only shaky control over large areas of the country.

Nonetheless, Bashir announced final preparations were in progress to set up a national political organization under the umbrella of his National Salvation Revolution government.

In an apparent reference to the collapse of East bloc regimes in Europe over recent months, Bashir said his system would work where others have failed.

''The organization, which will be built up from the base to the top, will not be like the imposed totalitarian parties which did not manage to continue,'' Bashir said.

Bashir has already set up local Salvation Committees, which organize neighborhoods under his Islamic fundamentalist regime.

''The revolution will go down to the bases,'' Bashir said, adding he would allow the committees time to convince the masses of the need to form the new political organization.

The rebel Sudanese People's Liberation Army, meanwhile, said a military unit had penetrated Juba, 700 miles south of Khartoum, the capital.

Clandestine SPLA Radio, mouthpiece of the anti-Islamic, mostly black African rebels, said the incursion was the first in its months-long siege of the regional capital.

The town was still under artillery fire, the SPLA said, as was the nearby town of Yei.

LONDON (FEB. 7) UPI - Prices fell sharply on the London International stock exchange Wednesday, with traders concerned about the political situation in the Soviet Union and the U.S. Treasury refunding program.

The Financial Times Stock Exchange 100-share index dropped 13.7 points, down to 2,307.4 points. At the close of a roller coaster trading day, the FT-100 had recovered from a day low of 2,299.1 points, but was way below a morning high of 2,320.6.

The narrower Financial Times-30 index closed at 1,826.2 points, off 9.4 points.

Volume was a low 368.1 milion shares, compared with 407.8 million Tuesday.

Dealers were cautiously following political developments in Moscow, where the official Tass news agency said the Central Committee voted to adopt the platform presented by Mikhail Gorbachev without disclosing further details.

On the trading floor, dealers said the market was also cautious about the outcome of the three-day U.S. Treasury quarterly auction.

Poor weather conditions over Britain negatively affected the insurance sector. General Accident shares fell 30 cents to $19.45.

Properties were also down, with Rosehaugh shares tumbling 34 cents to $5.32, following a recent rights issue. Stanhope shares dipped 19 cents to $2.53 in sympathy.

Eurotunnel shares lost 26 cents to $10.80, following a disappointing progress report.

British Telecom shares dropped to $5.07, down 8 cents, in anticipation of interim figures Thursday, while Savage shares fell 25 cents to 94 cents over trading worries.

Elsewhere, Euro Disney shares dropped 31 cents to $18.45 on profit-taking.

Hambros shares rose 29 cents to end at $5.44 on reports that Baltica was holding talks about it.

#90038u1269 02/07/1990 ~United Press International

TALLAHASSEE, FL (FEB. 7) UPI - Gov. Bob Martinez called Wednesday for the execution of drug dealers caught bringing large amounts of cocaine or opiates into Florida, regardless of whether the activity is linked to any death.

The proposal is part of package to boost spending on Florida's drug war to $120 million, double current spending.

''These are the merchants of death - death by drugs. They don't deserve to simply sit in our prison system. They deserve to have their lives extinguished, like they've extinguished the lives of innocent people,'' Martinez told a news conference.

The governor's plan would apply the death penalty to anyone caught with more than 150 kilograms or cocaine or 30 kilos of heroin or other opiates, regardless of whether drugs are linked to a death.

No other state has gone that far in targeting drug traffickers, although President Bush has proposed the death penalty in cases where drug trafficking can be linked to a murder.

Martinez said his plan is justified by the misery attending the drug problem.

''I think it's time that the carnage not only be on the side of the innocent. There also is now a taking it back to them (the dealers), that the penalties will be stiffer. In some cases ... it will be terminal,'' he said.

Martinez said the plan would deter drug traffickers from using Florida as a point of entry.

''No matter how vicious these individuals are, the idea of waiting in a cell ... six or seven years to face the electric chair is not something any of them will look forward to,'' he said.

The chairman of the House Criminal Justice Committee, North Miami Beach Democrat Ron Silver, said he was not sure the Legislature would pass the bill, but might approve the death penalty when the trafficking results in a known death.

''To the extent that they can provide a nexus between the event that has occurred and a death that has occurred, I would be supportive of it,'' he said.

Martinez' plan contains $23.4 million to boost law enforcement, $32.3 million for drug education and abuse prevention programs and $64.4 million for treatment.

#90038u1273 02/07/1990 ~United Press International

BUENOS AIRES, Argentina (FEB. 7) UPI - The U.S. dollar leaped over 3,000 australes on the free foreign currency exchange market Wednesday, threatening to worsen an already grave Argentine economic crisis.

President Carlos Menem vowed he would not reimpose restrictions on the currency exchange market to try and rein in the skyrocketting dollar.

One dollar exchanged for as much as 3,000 australes Wednesday, before dropping back to 2,850 australes later in the day.

On Monday, the dollar traded for 2,140 australes.

Financial reaction was mixed to the rise of the dollar.

Thirty-day interest rates for bank depositors rose to more than 30 percent up from 24.7 percent Tuesday.

Menem appeared on television Tuesday night to ask Argentines to ''have trust and patience'' with his government's economic austerity plan intended to cut inflation, reduce government spending and encourage foreign investment.

''Hyperinflation is over,'' said Menem, referring to an economic period commonly defined by inflation rates of more than 50 percent.

Inflation in December was more than 40 percent and although the January figure has not yet been released, government officials predict it will easily top 60 percent.

Menem said currency traders bought more dollars Tuesday, thereby forcing up the exchange rate. He said this was a reaction to incorrect press reports that the latest negotiations with the International Monetary Fund had fallen through.

''The stories over the break with the Monetary Fund could alarm or affect a market that is sensitive, like what happened yesterday with the dollar '' Menem said.

The head of the IMF mission in Argentina, Armando Linde, told reporters Tuesday there had been ''stumbling blocks'' to the negotiations but that the talks would definitely continue.

''The inflation in December and January was much higher than expected,'' said Linde but added that Argentine officials have pledged to bring inflation down.

The economic plan of the Argentine government ''has been, and continues to be, as far as I understand it, to reduce inflation to the lowest level possible, create more stability, stimulate confidence, stimulate more interest in investment, both local and foreign, and create more jobs,'' Linde said.

''The fund supported and continues supporting these measures,'' he said.

At the same time, businessmen seemed to show impatience with the economic situation that has left eight million of the country's 31 million inhabitants scrabbling for $11 government food checks each month.

Industrial sources told United Press International Tuesday that industrial activity had fallen some 50 percent in January.

''We don't have the exact percentage for the fall in activity. We have ordered a study, but our associates signal this magnitude of a drop,'' said Marcelo Heredia, Vice President of the Argentine Chamber of Commerce.

''Starting in March you are going to see a very sharp fall in activity and a rise in unemployment,'' Heredia said.

#90038u1288 02/07/1990 ~United Press International

(FEB. 7) UPI - History was made today in the Soviet Union as the Communist Party abandoned more than 70 years of its constitutional monopoly on power. The move... which was supported by Soviet President Gorbachev ... paves the way for a multi-party system of government for the first time in recent Soviet history. No word of the vote was carried by the Soviet news agency Tass.

The source... a Soviet journalist who requested anonymity... says the 249-member Central Committee voted to remove Article 6, which guarantees the Communist Party's constitutional right to power. Committee hardliners put up a stiff fight against the repeal... saying Gorbachev's proposals need more discussion and the time is NOT right for their implementation.

Secretary of State Baker is on his way to Moscow from Czechoslovakia... where he promised that Washington will ease trade restrictions with the former communist country. Baker laid a wreath at the St. Wenceslas Statue in famed Wenceslas Square and afterwards greeted some of the hundreds of onlookers. Then, he and his entourage left for the airport and his three-day visit in Moscow.

The National Association of Realtors reports that sales of existing single-family homes rose slightly more than two percent during the fourth quarter of 1989. Despite the strong finish... rising interest rates during the first half of '89 held housing sales to a four-point-three-percent decline for the year.

#90038u1289 02/07/1990 ~United Press International

WARSAW, POLAND (FEB. 7) UPI - Poland plans to restore the traditional gold crown to the white eagle that graces Poland's red shield, a parliamentary commission said Wednesday.

A special commission recommended that the crown be restored but decided against the shield's pre-war golden border, which in Polish heraldry signifies illegitimate birth.

''It's not entirely appropriate for the national symbol,'' said commission chairman Piotr Nowina-Konopka.

Parliament is expected to adopt the commission's version of the eagle Friday.

The white eagle, with a crown on a red background, has been Poland's symbol for more than 1,000 years. It was the personal crest of Poland's first dynasty and and was adopted by all subsequent rulers.

The present version of the eagle was designed in 1927 to symbolize Polish indepdence following World War I, but after the communist takeover in 1945 new authorities removed the crown, calling it a reactionary symbol.

The crowned eagle quickly became a symbol of opposition to the communist system.

On Dec. 29, 1989, Parliament voted to return to the pre-World War II symbols of Poland, which included changing the country's name from Peoples' Republic of Poland to Republic of Poland.

Hundreds of thousands of sympolic eagles, emblazoned on everything from national flags to the buttons on mailmen's uniforms, will have to be changed under the new order.

Parliament has allowed five years for the changes to be completed, but some people are concerned Poland will not be able to afford the cost.

''A state should be able to find the money for its symbols,'' said Konopka. ''Besides, many people have been willing to pay for the new symbols themselves. I really don't think there will be a problem with the costs.''

The adoption of the pre-war symbolic eagle is one more step on Poland's quest to eradicate all traces of its communist past.

#90038u1297 02/07/1990 ~United Press International

MOSCOW (FEB. 7) UPI - West German Chancellor Helmut Kohl and his foreign minister will come to Moscow Saturday in a suprise visit amid escalating talk of German reunification, Soviet Foreign Minister Eduard Shevardnadze said Wednesday.

Shevardnadze announced the upcoming visit by Kohl and his foreign minister Hans-Dietrich Genscher while speaking to reporters at the start of the Soviet minister's meeting with Secretary of State James Baker. He said the Germans would arrive Feb. 10.

''This is a very important process,'' Shevardnadze said.

There were no further details, but the future of a united Germany is on the agenda of the talks between Baker and Shevardnadze. East German Prime Minister Hans Modrow was recently in Moscow for talks that also covered reunification.

The accelerated movement on German reunfiction comes after a series of hints in the first week of February by Soviet leader Mikhail Gorbachev.

At one point when meeting Modrow, Gorbachev said the question of German reunification was ''not in doubt,'' but he has cautioned against rapid steps and insisted that the process take place within a European framework.

Last Friday, East German Communist leader Gregor Gysi said in Moscow Gorbachev had blessed plans for a step-by-step approach to a German confederation and apparently to possible reunification in some form.

German reunification is a sensitive issue for the Soviet Union because of the 20 million people it lost in defeating Germany in World War II after Adolf Hitler attacked in 1941.

The Red Army took Berlin in August 1945 and remained in the eastern half of Germany as an occupation force after the war. Moscow installed a Communist government on Oct. 7, 1949, and proclaimed the founding of the German Democratic Republic.

The permanent division of Germany to prevent another devastating attack on the Soviet Union became a tenet of Soviet foreign policy.

Moscow currently has 385,000 troops in East Germnany, which is the lynchpin of the Warsaw Pact alliance formed in May 1955 as a counterbalance to NATO.

#90038u1299 02/07/1990 ~United Press International

WASHINGTON (FEB. 7) UPI - Legislation designed to overturn a series of Supreme Court decisions that limited the scope of civil rights laws in employment discrimination cases was introduced in the House and Senate Wednesday.

Sen. Edward Kennedy, D-Mass., and Rep. Augustus Hawkins, D-Calif., introduced the Civil Rights Act of 1990 in both the Senate and House and promised quick action and prompt passage.

Kennedy, joined by civil rights leaders and some Republican members, said at a news conference called to announce the legislation that in the past year the ''Supreme Court has issued a series of rulings that mark an abrupt and unfortunate departure from its historic vigilance in protecting civil rights.

''The fabric of justice has been torn,'' he said. ''Significant gaps have been opened in the existing laws that prohibit racism and other types of bias in our society.''

Kennedy said he was ''hopeful of gaining the president's support.''

''The Bush administration has expressed a wait-and-see attitude about the need for this legislation,'' Kennedy said. ''But our case is strong and our cause is just. As our bill moves through Congress, I urge the president to join us in enacting it this year. This is no time for Congress, the White House or America to retreat on civil rights.''

Hawkins added that it would be ''very difficult for (the president) to

veto'' the measure.

Coretta Scott King, wife of slain civil rights leader Martin Luther King, said that ''we will not allow ourselves to be denied.''

''We will secure Martin Luther King's dream of a discrimination free workplace,'' she added.

The legislation is designed to overturn a series of decisions issued by the Supreme Court last year. The court, firmly in the control of conservatives appointed by former President Reagan, has scaled back on a number of important rulings.

While some of the decisions dealt with what may be viewed as technicalities, taken as a whole they make it much harder for victims of discrimination to bring and win lawsuits. Another ruling allowed whites to challenge discrimination settlements even though they took no action while the suit was ongoing.

''As a result of these Supreme Court decisions, victims of even the most humiliating racial harassment in the work place cannot obtain a meaningful legal remedy,'' said Sen. Bob Packwood, R-Ore.

He added this bill is ''necessary to protect the gains made in the last 25 years toward eliminating employment discrimination.''

#90038u1301 02/07/1990 ~United Press International

WASHINGTON (FEB. 7) UPI - The American bald eagle, the nation's symbol, may no longer be in danger of extinction as federal wildlife programs and public support have helped the population recover, officials said Wednesday.

The Interior Department announced it would review the bald eagle's status, examining its population with the idea that it be reclassified from endangered to threatened.

Endangered means a species is in immediate danger of becoming extinct, while threatened means a species could possibly become extinct.

''The dramatic growth of eagle populations in recent years leads us to think the species may no longer be in danger of becoming extinct,'' said John Turner, director of the U.S. Fish and Wildlife Service.

The banning of the pesticide DDT coupled with federal, state and private eagle recovery programs have boosted eagle populations, which have grown steadily since the early 1970s.

The announcement of a possible status change drew mild criticism from private wildlife quarters, with some arguing that species recovery nationwide is not complete and the Interior Department could be looking for a ''success story.''

An Interior Department official stressed a status change would not remove the eagle from government protection. Under a threatened status, the eagle would still be protected under the federal Endangered Species Act, meaning it would remain illegal to kill the birds.

''This is the first step,'' said Interior Department spokeswoman Elizabeth Lipscomb. ''It is definitely on the road to recovery and if that trend continues it is possible we will be taking it off the (endangered) list.''

Lipscomb explained the department will solicit bald eagle information from states and will decide whether to propose status changes after the 1990 breeding season, which occurs in summer.

''If we decide that is what we are going to do, the Interior Department will propose some sort of reclassification,'' said Lipscomb, who said breeding trends indicate some reclassifications are likely. It make take up to a year for the first status changes to take effect, Lipscomb said.

Wildlife experts accepted the proposal with some skepticism.

''We are very encouraged by the recovery process of the bald eagle throughout the country,'' said Jim Pissot, a wildlife expert with the National Audubon Society. ''But we are leery of this announcement because recovery has been spotty and inconsistent throughout the country.''

The Interior Department said the bald eagle has met goals for reclassification in every region of the country except the Southeast. But Pissot said without taking away from government and private efforts, recovery is less dramatic if examined on a state-by-state basis.

Pissot said the DDT threat is gone, but new threats, like habitat destruction from commercial real estate development, are ''incremental, subtle and difficult to measure.''

Maurice Lefranc, a wildlife expert for the National Wildlife Federation, agreed with Pissot that it's possible the government wants a ''success story'' with bald eagle recovery. But he noted eagle recovery is adequate for reclassification in most areas, adding maybe its time to focus on other endangered wildlife.

The bald eagle is currently listed by the Interior Department as an endangered species in 43 states and as a threatened species in Washington,

Oregon, Minnesota, Wisconsin and Michigan. It has never been endangered in Alaska, where the population numbers 30,000. There are between 7,500 and 10,000 bald eagles in the lower 48 states.

The bald eagle was declared the national bird of the United States in 1872 and is often found inland, along rivers and lakes. An adult bird grows to 3 feet, weighs about 12 pounds and has a wing span of 7 feet. A full grown bald eagle is dark brown with a white head and tail and its beak, feet and eyes are yellow.

Widespread application of the pesticide DDT in the 1940s, '50s and '60s caused reproductive impairment of the bald eagle, causing its numbers in the lower 48 states to drop to under 1,000 in the early 1960s. It was placed on the first endangered species list in 1967.

Federal and state governments alone spent an estimated $3 million in 1989 on the bald eagle and private donations pushed that figure up significantly. Lipscomb said public awareness of the eagle plight has translated into support and money for eagle research and recovery.

#90038u1320 02/07/1990 ~United Press International

ENGLEWOOD CLIFFS, NJ (FEB. 7) UPI - CPC International Inc., the food products giant, Wednesday said its fourth-quarter net income rose 8.5 percent to $89.5 million, or $1.17 a share, from $82.4 million, or $1.06 a share, in the comparable period of 1988.

For all of 1989, the company indicated its net income climbed 13.3 percent to $327.5 million, or $4.22 a share, from $289.1 million, or 3.68 a share, in 1988.

CPC said its fourth-quarter sales increased 10.4 percent to $1.30 billion from $1.18 billion a year ago. For all of 1989, the company's sales rose 8.6 percent to $5.1 billion from $4.7 billion in 1988.

James R. Eiszner, CPC's chairman of the board and chief executive officer, said the company anticipates continued growth. "In 1990, CPC expects to achieve good gains in both sales and earnings," he said. "Acquisitions of 18 businesses in the past three years are expected to contribute approximately $700 million to our sales in 1990, with additional gains coming from growth of our core product lines, additions to these lines and new products."

CPC indicated its worldwide consumer foods businesses posted sales gains of 6.2 percent in 1989, with Asian operations climbing 20 percent and the Latin American division showing a 9.2 percent increase. The company said net income from its corn refining business soared 30 percent in 1989. CPC

said it has 24 corn refining facilities in 12 countries.

CPC International, based in Englewood Cliffs, has 31,400 employees. The company said it operates 110 plants in 47 countries.

#90038u1321 02/07/1990 ~United Press International

AIKEN, SC (FEB. 7) UPI - Two maintenance workers were exposed to radioactive materials Wednesday when 20 gallons of heavy water escaped from a reactor pipe at the problem-plagued Savannah River nuclear weapons plant.

The water escaped at about 2:30 a.m. as the workers unbolted a flange on a 12-inch heavy water line while replacing an expansion joint at the plant's K reactor, said Mickey Andrus, spokeswoman for Westinghouse, the prime contractor at Savannah River.

Department of Energy officials declared an alert emergency status at the plant at 2:25 a.m. but downgraded the spill to an unusual incident three hours later.

''I know we have people in there evaluating the situation,'' Andrus said several hours later. ''They're trying to find out what happened and why and how we can prevent it from happening again.''

Andrus said the two workers were wearing protective suits and received less radiation than a person is exposed to in a chest x-ray.

Because the maintenance work was being performed in a tent-like containment hut, there was no contamination outside the immediate area, she said.

''Impacts to other employees in the facility and on site are negligible,'' the DOE said in a statement.

Plant operations were back to normal by early morning and workers were ordered to report on schedule as cleanup operations continued.

The K reactor was not operating and did not have nuclear materials in the reactor vessel, the DOE said.

Heavy water normally contains tritium, a radioactive hydrogen isotope prepared artificially for use in hydrogen bombs, but the three aging reactors at Savannah River have been shut down since April 1988 because of safety concerns and operational failures.

Government plans call for the K reactor to be restarted this fall, with

the other two units to follow.

#90038u1327 02/07/1990 ~United Press International

WASHINGTON (FEB. 7) UPI - Treatment experts fear that the recovery of Mayor Marion Barry, suspected of alcohol and cocaine addictions, is threatened by his celebrity.

Barry's continuing contact with his staff, they say, also interferes with his rehabilitation.

They warn that if Barry is addicted to either alcohol or cocaine - or cross-addicted to both - his chances for a quick recovery are poor.

City Administrator Carol Thompson has acknowledged that she and other officials are in ''almost daily contact'' with Barry, who is at a rehabilitation center in West Palm Beach, Fla.

Patients in such facilities often try to keep up with job responsibilities but most reputable treatment programs strictly forbid intrusions that might interfere with recovery.

In seeking treatment, the mayor - branded a crack smoker in an FBI sting three weeks ago - may have taken a first tentative step toward recovery from addictions he has not publicly admitted or identified.

But C.J. Kirk, a clinical social worker at Washington's Alcohol Training Institute, warned that Barry's celebrity stands in the way of his recovery.

''There is a very small chance that the mayor can get adequate treatment '' said Kirk, who counsels members of the Peace Corps who have problems with alcohol and drugs.

''His face was on the cover of Newsweek,'' Kirk noted. ''His story is not only national but international. It's been all over the newspapers in London.''

Although Barry is at a good treatment facility, Kirk said, ''It will be incredibly difficult for him to have a solid recovery process. That's because recovery is doubly difficult for celebrities.''

Kirk said that at his group therapy sessions attended by Washington Redskins other participants insisted on ''talking to them about football'' rather than recovery. It's nobody's fault. That's just ther way it is.''

Without saying the mayor should resign, Kirk said, ''It would seem to me to be a difficult thing to run this city while continuing to recover from

an addiction. Recovery is a full-time job. The mayor's first priority must be his recovery - not the welfare of the people, not getting snow removed from city streets.''

In disclosing his plan to seek help ''to heal my body, mind and soul,'' Barry told a news conference that in helping others he had neglected his own needs.

Some observers said the mayor's words constituted a classic case of denial a major symptom of diseases of addiction.

But Kirk said, ''No one gets through denial in ther first 48 hours. That's the purpose of in-house treatment - to break through denial.''

Agreeing that Barry ''has begun to take the first step'' toward recovery, Kirk said, ''He's got to admit his problem but still keep his dignity.''

Kirk said Barry evidently has been surrounded by ''enablers,'' people who unintentionally make it easier for friends and loved ones to abuse alcohol and drugs.

''Anyone who may have witnessed the mayor's addiction and didn't say anything to him about it is an enabler,'' Kirk said.

Rehabilitation for alcohol and cocaine addicts is difficult. Relapse is common. Treatment emphasizes total abstinence for life and usually includes participatiion in self-help groups such as Alcoholics Anonymous and Narcotics Anonymous.

''The mayor's got a tough row to hoe,'' Kirk said. ''I wish him well.''

SAN FRANCISCO (FEB. 7) UPI - The Bush administration denied Wednesday published reports that President Bush had informed France a pardon for convicted pro-Iranian terrorist Anis Naccache could help win the release of U.S. hostages in Lebanon.

The French daily newspaper Le Figaro reported Tuesday that Bush told President Francois Mitterrand in a recent telephone conversation that the Naccache affair was raised during U.S.-Iranian negotiations over the release of nine American hostages from Lebanon.

White House press secretary Marlin Fitzwater, traveling with Bush on the West Coast, told reporters that Bush and Mitterrand had no such conversation and had not discussed U.S. hostages or the French prisoner.

Naccache, who is Lebanese, was convicted and sentenced to life in prison on March 10, 1982, for a 1980 assassination attempt on former Iranian Prime Minister Chapour Bakhtiar in France.

The Iranian negotiators described the release of Naccache as one of the conditions for a favorable outcome to the talks, the newspaper said.

Citing unnamed sources close to the Foreign Ministry, the article said Bush asked Mitterrand if he was planning to settle the Naccache affair - a major source of tension between Paris and Tehran.

Iranian officials claim France promised to release Naccache during talks that led to the release of French hostages from Lebanon in 1988.

Mitterrand reportedly told Bush there were no major obstacles that would prevent him from issuing such a pardon and that the possible liberation of American hostages could provide a reason to accelerate the process.

U.S. negotiators immediately informed Tehran of Mitterrand's reply, sparking rumors last week in Beirut the captors had been informed and that the U.S. hostages might be released soon, the newspaper reported.

MOSCOW (FEB. 7) UPI - Against a backdrop of important changes taking places within the Soviet system, Secretary of State James Baker began talks with his Soviet counterpart Wednesday that could lead to sweeping cuts in nuclear and conventional arms.

Baker, who will be in Moscow for four days, spoke to reporters on the plane bringing him from Prague, Czechoslovakia, where he offered U.S. assistance in the change ''from revolution to democracy.''

He said he did not believe that the tumultuous Soviet Communist Party meeting that preceded his arrival would affect his Moscow talks. As he flew in, the Central Commitee of the party agreed to Soviet President Mikhail Gorbachev's proposal that it abandon the monopoly on power that it has held for seven decades.

Baker said, ''There are are very, very important fundamental changes going on in the Soviet Union.'' But he added he did not think that that would have an impact on his talks, which began with an agenda-setting session with Soviet Foreign Minister Eduard Shevardnadze Wednesday night.

Baker and his team are to hold talks Thursday and Friday, including a session Friday with Gorbachev. As one indication of the seriousness with which the United States is approaching these discussions, Baker assembled

a team of 41 experts from the State Department, Pentagon and White House.

U.S. officials have said they expect basic decisions to be made on several strategic arms issues during the talks as well as putting together the basic working document that would lead to verified reductions in NATO and Warsaw Pact conventional forces in Central Europe.

Baker told reporters aboard his plane, ''I'll be bringing a package of proposals to show that we are serious, that the United States is leaning forward as the president wants us to do in the arms control area.''

The specific issues to be discussed include limits and counting rules for air-launched cruise missiles and methods for counting and verifying missiles which have been built but not deployed.

Baker also said he and Shevardnadze will disscuss a possible solution to the continuing miitary stuggle in Afghanistan. Baker refused to discuss the specifics publicly, but suggested the United States is now willingly to accept a continued role of President Najibullah as long as it is understood that he will not be part of the Afghan government ''at the conclusion'' as Baker put it.

Baker said, ''Our policy is that he (Najibullah) should go,'' but Baker also made it clear the United States is prepared to tolerate an interim role for him as long as it leads to a negotiated solution.

Also on the agenda for the talks is the future of a united Germany, something that Baker thinks is going to happen sooner than anyone had anticipated even four months ago.

In Prague, Baker delivered a major speech at Charles University Wednesday, stressing that the United States is prepared to help in the process of moving ''people power'' revolutions into the process of government, a process that he thinks may be more difficult than taking over power in the first place.

On Saturday, Baker is to testify before the Supreme Soviet International Relations Committee, the equivalent of the U.S. Senate Foreign Relations Commitee, the first time an American official has been invited to appear before the committee.

The chances for a three-way meeting in Europe on the Palestinian issue between Baker and the foreign ministers of Egypt and Israel appered to have dimmed sharply in the past two weeks, and an official said, ''No such meeting is now scheduled.''

#90038u1372 02/07/1990 ~United Press International

WASHINGTON (FEB. 7) UPI - Treasury Under Secretary David Mulford defended Wednesday the historic debt-reduction agreement between the United States and Mexico, rebuffing critics who say the deal did little to trim actual Mexican debt. The deal, the first of the so-called "Brady Plan," of which Mulford was a principal architect, was signed Sunday in Mexico City.

Treasury officials said the deal will cut Mexico's total external debt by $15 billion to $80 billion at the end of this year, from $95 billion in 1989, and will help spur Mexico's beleaguered economy.

The landmark agreement restructures more than 85 percent of the debt owed by Mexico's banks. Bank debt will be cut by about $7 billion through debt reduction bonds, and a debt-equity swap will retire as much as $3.5 billion worth of debt by 1992.

In announcing the deal, Treasury Secretary Nicholas Brady told Mexican President Carlos Salinas de Gortari the agreement forever removes "from the backs of the Mexican people," the burden of $42 billion in debt payments. "The reason this deal is important is because it is regarded as a turning point for Mexico," Mulford told a subcommittee of the House Banking Committee.

Critics contend the deal will leave Mexico's debt virtually unchanged during the next two years and will cut its foreign interest payments by less than $1 billion annually.

Shafiqul Islam, a senior fellow on the Council on Foreign Relations, told the panel that the Brady Plan package gives Mexico only 40 percent of the interest relief and 20 percent of the new money that the World Bank thought Mexico needed nine months ago to spur economic recovery.

"One thus cannot help feel somewhat bewildered that President Salinas and the international financial community are celebrating a debt accord that will do no more than help move Mexico from being 'a severely indebted country' to a less 'severely indebted country'," Islam said.

"It's always easy to say a good program isn't good enough," said Rep. Jim Leach, R-Iowa, who likened the Brady Plan to the Marshall Plan that was used to rebuild Europe after World War II.

Without the Brady Plan deal, Mulford said, Mexcio's total debt by 1992 would increase by about $24 billion. The deal also frees about four percent of Mexico's gross domestic product for investment and lends stability to Mexico's economic and investment climate.

Mulford also defended the price of the 30-year zero-coupon Treasury bonds used by Mexico as collateral for the debt reduction and debt service bonds.

Critics termed the Treasury bonds a $300 million subsidized gift to Mexico. "The simple and honest response is that the pricing of the zero-coupon bonds represented no subsidy to Mexico," Mulford said.

The bonds carried a 7.925 percent interest rate, below the 8.05 percent average borrowing rate for 30-year notes as of Jan. 5. "Pricing zero-coupon bonds is complicated by a number of factors," Mulford said, adding that the Treasury had only issued non-marketable zero-coupon bonds twice before and had little price-setting guidance.

He also deflected reports that Treasury officials exerted undue pressure upon major U.S. commercial banks to paticipate in the Mexican debt reduction plan.

"There has been one basic message to banks - this is a voluntary program for them but we do expect them to paticipate," Mulford said. "We don't take the view that there's an option to do nothing."

He said no pressure was applied on banks to participate in upcoming Brady Plan deals with Costa Rica and the Philippines, whose debt will be structured differently than the Mexican transaction.

VATICAN CITY (FEB. 7) UPI - A high-level Vatican delegation flew to Budapest Wednesday to sign an accord that will clear the way for the re-establishment of full diplomatic relations with Hungary for the first time since World War II.

''On our part there has never been lacking the will for dialogue and the possibility of closer contacts with Hungary,'' Vatican Secretary of State Cardinal Agostino Casaroli told reporters before boarding the plane at a Rome airport.

''It is clear that now all this will take place at a more authoritative level,'' he said. ''A new period is opening, but born out of the old one.''

Casaroli, 70, the main architect of the Vatican's East European policy for the past 25 years, will sign the new accord with Hungarian Prime Minister Miklos Nemeth on Friday, in the presence of Hungarian Primate Cardinal Laszlo Paskai, Vatican sources said.

Later the same day, after a meeting with Hungary's Acting President Matyas Szuros, Casaroli and Nemeth will hold a joint news conference.

Hungary will be the second former communist-ruled country of Eastern Europe to re-establish full diplomatic relations with the Vatican. Pope

John Paul II's native Poland re-established full relations July 17, 1989.

The accord followed a steady improvement in relations between the Vatican and Hungary in recent years, culminating in a new law guaranteeing religious freedom adopted by the Hungarian Parliament last month.

At Rome airport Casaroli described the new law as being ''on the whole very positive.''

SALT LAKE CITY (FEB. 7) UPI - The first recipient of an experimental lung-support device died Wednesday, five days after receiving the tiny implant designed to supplement ailing lungs, officials said.

Although the 16-year-old girl who received the device died of causes apparently unrelated to the implant, it was too early to determine whether the device was a success, said Tim Madden, spokesman for the LDS Hospital.

But the device appears to have ''functioned as intended until the patient's death,'' the hosptial said.

''There were no clinical complications from the use of the device. It worked as intended, by removing some carbon dioxide from the patient's blood and replacing it with oxygen,'' officials said.

The device, known as the intravascular oxygenator or IVOX, is a narrow tube filled with bundles of hollow fibers. It is inserted into a major vein to deliver oxygen into the blood stream and remove carbon monoxide.

By assuming at least half of the lungs' gas exchange function, doctors hope IVOX will help a patient's lungs heal and stabilize other vital body functions.

The Food and Drug Administration has approved experimental human testing of the intravascular oxygenator, or IVOX, at four U.S. hospitals. The Salt Lake City hospital had the first qualified patient, officials said.

It was too early to say whether IVOX is a success ''until we have completed the 10 patient course of investigation for this device, Madden said.

''Until that part of the investigative process is over with, we really can't say whether it did any harm or did any good,'' Madden said.

The 16-year-old girl was in critical condition since the two-hour implant operation Feb. 2. Patients suffering from adult respiratory distress

syndrome have a 90 percent to 95 percent mortality rate.

''The patient was suffering from severe adult respiratory distress syndrome, a condition resulting from a variety of causes which results in an inability of the lung to transfer oxygen to the blood,'' LDS Hospital officials said.

The other hospitals approved to use the device for up to seven days at a time are Penn State's Hershey Medical Center, the University of Michigan Medical Center in Ann Arbor, the Los Angeles County-USC Medical Center.

''The investigative protocols for the IVOX device will continue to be pursued with other appropriate patients here and at the other investigative centers,'' LDS hospital officials said.

#90038u1392 02/07/1990 ~United Press International

LONDON (FEB. 7) UPI - Prime Minister Margaret Thatcher welcomed the end of the power monopoly of the Communist Party in the Soviet Union Wednesday as part of Britain's broad endorsement of Mikhail Gorbachev's reform program.

The 249-member Soviet Central Committee voted to remove Article 6 of the Soviet constitution, which guarantees single-party rule for the communists and the decision is seen as a victory for Gorbachev over conservative members who have resisted his reforms.

Thatcher, speaking to a visiting Soviet delegation, saluted the move as a ''great decision.''

''We are greatly in support of everything Mr. Gorbachev is trying to do,'' the British leader said. ''We are very pleased with the results of this morning's meeting ... and that communism will be one party among other parties.''

The development was also greeted by Neil Kinnock, the leader of the main opposition Labor Party, who said he was ''delighted at Mr. Gorbachev's mandate for democracy.''

#90038u1430 02/07/1990 ~United Press International

WASHINGTON (FEB. 7) UPI - Chairman Dan Rostenkowski, D-Ill., said Wednesday the House Ways and Means Committee would study some tax changes but he warned against undercutting the 1986 Tax Reform Act by reducing capital gains taxes, as President Bush wants.

''Let me set forth my opinion clearly and emphatically: tax reform is

working and it is working very well,'' Rostenkowski said in opening three days of hearings on the effects of the 1986 law, the most substantial revision of the tax code in a half-century.

Lawmakers ''should leave the substantive policy of the law in place so that taxpayers can make business, investment and personal decisions with confidence that the rules of the game will not be changed,'' the chairman of the tax-writing committee said.

House Speaker Thomas Foley, D-Wash., later agreed with Rostenkowski, saying, ''The basic form of the 1986 Tax Reform Act should not be unraveled.''

Rostenkowski invited interested parties to submit written proposals for tax code simplifications, but warned the panel's study is not an invitation to revive special tax breaks.

A major thrust of the 1986 law was to eliminate loopholes and special deals in exchange for lower basic tax rates.

''My invitation for simplification proposals is not an invitation for the restoration of special benefits that were repealed after two grueling years of tax reform,'' said Rostenkowski, who played a major role in getting the 1986 law passed. ''Such an effort would be counterproductive and would ruin the goals of fair and predictable tax laws.''

While not specifically mentioning capital gains in his prepared statement, Rostenkowski disputed Bush's argument that a lower tax rate on profits from selling stocks, bonds and real estate would stimulate the economy and create jobs.

''We all know that the real cause of economic problems in this nation is the (budget) deficit,'' said Rostenkowski, who was the leadoff witness at the hearing.

''Until the deficit can be significantly reduced, no tax system crafted by Congress will cure the economic ills of this country while the passage of special tax breaks will only create more economic distortions.''

In response to a question, Rostenkowski said, ''I really don't see any big groundswell for (cutting) capital gains.''

The House approved a cut in capital gains taxes late last year, but Senate Democrats killed the move.

Rostenkowski said while the6 law made the tax code fairer, it can be further simplified without undoing the principles of tax reform.

Opponents of Bush's capital gains cut argue that one of those principles is the link between the capital gains rate and regular income tax rates.

Before 1986, capital gains were taxed at a lower rate than ordinary income. Tax reform made capital gains rates the same as regular income and lower the basic rate to just three brackets - 15 percent, 28 percent or 33 percent.

Opponents insist that lowering capital gains rates without also raising regular income rates for the wealthy, who would benefit most from cutting capital gains, would violate basic fairness.

Also appearing at Wednesday's hearing were Kenneth Gideon, assistant secretary for tax policy at the Treasury Department, and IRS Commissioner Fred Goldberg, who both said tax reform is working fairly well.

But Gideon said ''problems remain'' and argued that ''incentives for savings and investment must be improved'' - a push for both Bush's capital gains cut and the administration's so-called family savings plan under which long-term savings accounts would earn tax-free interest.

Goldberg, whose agency is beginning to check millions of 1989 tax returns, praised tax reform for its ''triumph over mass-marketed, abusive tax shelters.''

#90038u1438 02/07/1990 ~United Press International

WASHINGTON (FEB. 7) UPI - Senate Democrats accused Agriculture Secretary Clayton Yeutter Wednesday of submitting a vague "fill in the blank" farm bill, but he refused to be more specific until Congress unveils its own ideas.

The criticism came one day after the adminstration proposed revisions in farm policy laws to give farmers more freedom to decide which crops to grow. The administration did not say how much its plan would cost nor did it make recommendations for crop subsidy rates.

During an appearance before the Senate Agriculture Committee, Yeutter also faced resistance to a recommendation to eliminate the federally subsidized crop insurance program in favor of a permanent disaster relief program. Sen. Slade Gorton, R-Wash., called that "a counsel of despair."

Agriculture Committee Chairman Patrick Leahy, D-Vt., and Yeutter engaged in a cat-and-mouse game over who would be first to propose some dollar figures for farm programs in coming years. The current farm policy law expires this year, so Congress must write a new long-term plan.

The administration submitted a package of ideas for modifying and continuing the current law, written in 1985. Its goal was to expand farm exports while protecting farm income.

"We still need a detailed farm bill from the administration," Leahy said, adding, "We can't write a farm bill if we don't know what the administration wants. I want some specifics."

Yeutter refused to suggest figures, particularly for subsidy rates, and repeatedly offered to "sit down and negotiate with this committee" to come up with a satisfactory bill.

"I want to make sure there are 20 necks (on the line), not one," Yeutter said. "All our necks will be on the line, but yours first," Leahy responded. Sen. Tom Daschle, D-S.D., told Yeutter, "To a certain extent, you've given us a fill-in-the-blank proposal."

Daschle, Leahy and Sen. Kent Conrad, D-N.D., questioned Yeutter on what level target prices - a key component in calculating crop subsidies - should be. Conrad said that freezing or reducing target prices would mean lower income for farmers. The administration has asked for a $1.5 billion cut in subsidies next year. "The proposal before us fails to meet the income needs of rural America," Conrad said.

Republicans challenged Conrad on that point, saying the government was trying to make it easier for farmers to earn more money from the marketplace. "I think we should get away from the notion the only way we measure farm income is through subsidies," said Sen. Thad Cochran, R-Miss. who said the two biggest farm industries in his state - poultry and forestry - receive no subsidies.

Sen. Richard Lugar, R-Ind., said it legitimate to have a government "safety net" for farmers but called it "bogus" to view farm program spending as the only determinant of farm income. He sided with Yeutter's approach, saying it would be "very foolish" to make a commitment now on subsidy rates.

Senate Democratic George Mitchell of Maine joined in the criticism of the administration proposal. He said the adminsitration repeatedly is failing to offer its own ideas on controversial topics.

#90038u1446 02/07/1990 ~United Press International

WASHINGTON (FEB. 7) UPI - State officials called on the president and Congress Wednesday to clean up all polluted federal facilities within 30 years and give the EPA and states greater enforcement powers over federal agencies.

In a unprecedented joint report, the National Association of Governors and the National Association of Attorneys General said the cleanup of thousands of federal military bases, weapons plants and other facilities would require a national commitment equal to NASA's manned mission to the moon.

''In the early 1960s, the United States set a goal of putting a man on the moon by the end of the decade,'' the report said. ''This goal required development of new technologies and a substantial financial commitment by the government.

''To reach what should be our national goal of drinkable water, uncontaminated land and clean air at federal facilities, there must be a similar national commitment in time, technology and money.

''The president should request and Congress should adopt a goal of not more than 30 years for completion of all environmental compliance and restoration at federal facilities,'' said the report, titled ''From Crisis to Commitment: Environmental Cleanup and Compliance at Federal Facilities.

The report also urged the president and Congress to give the Environmental Protection Agency and state environmental officials greater oversight powers over federal agencies to ensure they follow through on cleanup promises.

It said while government policy generally required federal agencies to meet all federal, state and local environmental requirements, the Justice Department had blocked efforts by the EPA and the states to enforce those rules.

Idaho Gov. Cecil Andrus, lead governor on the report, said the Justice Department has taken the position that the EPA is not authorized to police other federal agencies and that federal sovereign immunity protects the government against state legal action.

Andrus called on President Bush to unchain the EPA, saying: ''The president can solve that problem between EPA and the Justice Department with one phone call. I hope he will do that.''

Andrus said Congress should enact legislation formally waiving the sovereign immunity defense in regard to federal facility cleanup.

The report was personally received at a news conference by House Speaker Thomas Foley, D-Wash., and Senate Democratic leader George Mitchell of Maine, both of whom promised full consideration of the states' recommendations.

Mitchell noted he already has introduced legislation to expand EPA and

state environmental enforcement powers over federal agencies and he said, ''I will push for enactment.''

The report said the scope of the federal pollution problem still was not clear, but it noted the Defense Department alone listed 8,139 sites at 897 military installations as needing cleanup, at an estimated cost of between $10 billion and $15 billion.

It said cleanup problems were even more daunting at the Energy Department's nuclear weapons plants, where thousands of acres are contaminated by mixtures of nuclear and toxic wastes which cannot be addressed with conventional cleanup technology.

It said at least 3,700 polluted sites had been detected at the weapons plants and the estimated price tag for cleanup was between $95 billion to $130 billion.
